Academic Catalog
2016-2017
Fall Term 2016-2017

July
01  Web registration opens for fall—9:00 am
06  Financial aid—FAFSA priority deadline for fall
21-28 Undergraduate enrollment nights for fall—5:00-7:00 pm
27  Bursar statements mailed; fall term
27  Group advising for continuing students—School of Education—4:30-6:00 pm

August
06  Web registration opens for fall—9:00 am
06  Financial aid—FAFSA priority deadline for fall
21-28 Undergraduate enrollment nights for fall—5:00-7:00 pm
27  Bursar statements mailed; fall term
27  Group advising for continuing students—School of Education—4:30-6:00 pm

September
01  Fall term begins
01  New student orientation—School of Undergraduate Studies and School of Psychology & Counseling 5:00-9:00 pm
02  Last day to submit application for degree/certificate for fall term
05  Labor Day—no classes, offices closed
08  Fall term classes begin
08  Last day for acceptance into degree/certificate this term
10  New student orientation—School of Management—9:30 am-4:30 pm
13  Last day to waive health insurance for the fall term only
15  LAST DAY to ADD/DROP

October
05  Financial aid—final deadline for all fall term documents
05  Registration hold applied for non-payment
10  Columbus Day observed—classes held, offices closed
21  Intent to graduate forms for January graduates due to Registrar
22  Open House—all schools

November
01  Web registration opens for spring
03  Financial aid—FAFSA priority deadline for spring term
11  Veterans Day—classes held, offices closed
17  Group advising—School of Education 4:30-6:00 pm
23  Undergraduate—last day for portfolio submission
24-25 Thanksgiving Holiday—no classes, offices closed

December
05  ILP/ARP and Capstone due to faculty
08  Bursar statements mailed; spring term
15  Last day of graduate classes
22  Last day of undergraduate classes
Dec. 24-Jan. 14 Winter recess
Dec. 25-Jan. 1 Holiday season—no classes, offices closed

Spring Term 2017

January
10  Last day to submit application for degree/certificate for spring term
12  New student orientation—School of Undergraduate Studies and School of Psychology & Counseling 5:00-9:00 pm
14  New student orientation—School of Education—10:00 am-noon
14  Group advising—School of Education—1:00-3:00 pm
17  Spring term begins
17  Spring term classes begin
17  Last day for acceptance into degree/certificate this term

Accreditation and Authorization

Regional Accreditation
Cambridge College is accredited by the New England Association of Schools and Colleges, Inc. Accreditation of an institution of higher education by the Commission indicates that it meets or exceeds criteria for the assessment of institutional quality periodically applied through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation. Accreditation by the New England Association is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding the accreditation status by the Commission should be directed to the administrative staff of the institution. Individuals may also contact:

Commission on Institutions of Higher Education
New England Association of Schools and Colleges
3 Burlington Woods Drive, Suite 100, Bedford, MA 01803
email: cihe@neasc.org • 781.425.7785 • https://cihe.neasc.org

Program Accreditation
The Teacher Education Program and School Guidance Program at Cambridge College are awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

State Authorization
Massachusetts
All Cambridge College’s degree programs are authorized by the Massachusetts Department of Higher Education (www.mass.edu). Cambridge College programs preparing students for educator licensure are approved by the Massachusetts Department of Elementary and Secondary Education and are subject to its regulations and standards.

In addition to the Cambridge campus, authorized instructional sites are located in Lawrence, Springfield, and collaborating hospitals.

Other State Authorization
Cambridge College is also currently authorized or licensed to operate in California and Puerto Rico.

California
Cambridge College is a private institution, approved to operate by the California Bureau for Private Post-Secondary Education.

As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling 1-888-370-7589 or by completing a complaint form, which can be obtained on the bureau’s Internet web site www.bppve.ca.gov.

Puerto Rico
The Puerto Rico Council of Education (www.ce.pr.gov) has authorized Cambridge College to offer selected programs.
The President’s Welcome

Dear Student,

It is my pleasure to welcome you to the start of another great academic year at Cambridge College. On behalf of the Board of Trustees and the entire College Community, we look forward to helping you succeed in both your academic and professional lives.

At Cambridge College, we have been supporting the incredible potential of adult learners since we first opened our doors in 1971. With programs in Undergraduate Studies, Education, Management, and Psychology and Counseling, we have the classes and availability required to fit into your busy schedule.

Our top priority is the success and academic persistence of each and every individual student. Our faculty and diverse student population bring a wealth of experience and knowledge into the classroom, ensuring a rich and unique learning environment. In addition to support in the classroom, faculty, staff, and student support services are here to assist with all aspects of Cambridge College, including financial aid, career resources, and class registration. These channels are ready and available to help you succeed.

Thank you for choosing Cambridge College. I look forward to greeting you as you begin the academic year and to congratulating each and every one of you as you cross the stage at Commencement to receive your diploma—a symbol and acknowledgment of your hard work and dedication. In the meantime, may your journey be a rich and rewarding one.

Sincerely,

Deborah C. Jackson
President
Cambridge College
## About This Catalog

This catalog presents current information about Cambridge College's academic programs, courses, resources, policies and procedures for the 2016-2017 academic year (September 1, 2016-August 31, 2017).

This catalog has been compiled from the most accurate information available as of the date of publication, and is subject to change at any time. The development, review and updating of College policies and procedures is an ongoing process. Official College policies may be viewed at www.cambridgecollege.edu/college-policies. Programs and policies are subject to change within the sole discretion of the College and in accordance with applicable law.

This catalog does not constitute a contract, and shall not be construed as a binding agreement.

© September 2016, Cambridge College, Cambridge, MA
Cambridge College was established in 1971 by a group of educators as the Institute of Open Education, an innovative graduate program offering advanced degrees to teachers and other working adults. The College’s educational model at the time was pioneering—inclusive, student-centered, career-oriented—and opened new doors for adult learners seeking to lift themselves with the little time and resources they had available.

Very few higher educational institutions have remained as true to their mission. Today, Cambridge College is a fully accredited four-year, private non-profit college, with four schools—the School of Education, School of Management, School of Psychology & Counseling, and School of Undergraduate Studies—and offers classes at five locations as well as online. The College has maintained its commitment to open enrollment and continues to prioritize the needs of the diverse, working adult students it has always served, who now number over 35,000 alumni.

Mission
To provide academically excellent, time-efficient, and cost-effective higher education for a diverse population of working adults for whom those opportunities may have been limited or denied.

Values
Cambridge College is a responsive learning community, where adult learners can find ways to make the personal and professional changes they need to achieve their goals. Learning at Cambridge College takes place in an atmosphere of true diversity, where students support each other in a collaborative learning process that respects their needs and values, their prior learning and life experiences. The College’s innovative adult-centered learning model links theory and practice, helping students to acquire the academic credentials they seek, enrich their lives and careers, and become leaders in their communities.

History
In 1971, a small group of educators created an educational institution, now known as Cambridge College, whose primary mission was to provide educational opportunities and degree attainment for working adults who did not have ready access to higher education. The art and science of helping adults learn became the foundation of education philosophy at the institution. By blending theory and practice in a developmental and participatory approach, this group of educators developed “the teaching/learning model” specifically for adult learning and to benefit those who may not have had opportunities for a college education.

The College was first known as The Institute of Open Education within Newton College of the Sacred Heart, and later became part of the Antioch University Network. In 1981, it became an independent, private non-profit institution with the new name of Cambridge College. A Master of Education was the initial degree program launched at the graduate level; it successfully supplied the growing need for teachers, especially in urban settings. The mission and philosophy of the College drew the attention of students from businesses, non-profit and social service agencies, and other professions. As this learning community grew, the College expanded to offer a broad range of academic programs, including the Master of Business Administration, Master of Management, Bachelor of Arts, Bachelor of Science, Certificate of Advanced Graduate Studies, and the Doctor of Education.

Today, Cambridge College also serves the educational needs of students outside of its original home location in Cambridge, Massachusetts. The College has regional locations in Springfield and Lawrence, Massachusetts, and in California and Puerto Rico. The College aspires to be a visionary organization and learning community for its constituents. Through the dynamic learning processes which are the foundations of our educational model, and our dedication to our mission, we believe we are serving and transforming the lives of adult learners across the national landscape.
Distinctive Teaching/Learning Model
The College’s innovative adult-centered learning model links theory and practice, helping students to acquire the academic credentials they seek, enrich their lives and careers, and become leaders in their communities. This model of adult learning has proven resilient and adaptable to new content areas and a variety of learning formats throughout Cambridge College’s history. Cambridge College is a learning community in which adult learners experience educational practices that honor and empower them. The College believes that each person can learn regardless of one’s age, life history, current circumstances, or past academic experience. Each student’s uniqueness, capabilities and experiences are valued in the classroom communities. Our programs develop and enhance skills, competencies, attitudes, values and habits of mind, all enabling our students to competently meet personal needs and professional challenges.

Our coursework is designed to promote collaborative learning, support the use of technology, and to increase content expertise. The real-world diversity of our classrooms provides rich opportunities for examining socially constructed learning in individual research projects and team-based assignments. The majority of our faculty are experienced professionals who bring both academic and professional perspectives to the classroom, thus allowing our students to study current trends in the field. Faculty members and program chairs work with students to build the competencies needed for academic and career success.

High Quality and Engaging Student-Faculty Relationship
According to the Council for Adult and Experiential Learning, reducing barriers for adult students means recreating the roles of faculty to be more facilitators of student learning and less lecturers, and to instill in them the freedom to learn from students without professional embarrassment. By recognizing adult learners as potential co-creators of knowledge and connecting their real life experience to academic theory, students will be able to continually enrich and contribute to their learning process and feel motivated to persist in their educational pursuits.

At Cambridge College, many of our students report that the dynamic learning process has transformed their professional and personal lives. The distinctiveness and efficiency of this model has been long substantiated by our student population; our students regularly praise the quality of the relationships they enjoy with the faculty and highlight it as one of the defining and unique characteristics of a Cambridge College education. Our alumni re-engage with Cambridge College because they see the College not only as an inspiring institution where they acquired their priceless education but also as a community of genuinely caring individuals who continue to believe in, nurture, and admire their resiliency, abilities, and well-deserved accomplishments.
Our Students
Adults — Cambridge College draws a highly diverse population of adults who are serious about learning and earning the degree credentials they need to advance their careers and change their lives. Cambridge College attracts adults based on our goal-directed programming, our experienced faculty, and flexible scheduling.

Diverse — Our students are quite diverse in terms of their age, educational background, professional attainment, race, ethnicity, and language, and bring to class a wealth of personal experiences.

Committed — Our adult students have made a commitment to their education while working, parenting, and participating as members of their community.

Student Diversity
Cambridge College was once again named one of the top 100 colleges and universities in the United States that conferred the most degrees to minority students.

Faculty Profile
More than 400 active full- and part-time professors (Academic Year 2015-2016); many are active professionals working in their field.

Full-time faculty
- 22 full-time faculty members college-wide
- 68% with a doctorate or other terminal degree
- 50% female, 50% male
- 33% minority
- average tenure 24 years

Part-time faculty
- more than 380 active part-time faculty college-wide
- 34% with a doctorate or other terminal degree
- 99% with at least a master's degree
- 55% female, 45% male
- 30% minority
- average tenure 7 years

Campus Life
Cambridge College, main campus and regional locations, are in urban settings. Each center has a student lounge and vending machines but no cafeteria, as public eateries are nearby.

Cambridge, MA Locations
Cambridge College’s four schools are located in two buildings in the heart of Cambridge, MA. Our students enjoy many convenient eateries, bookstores, museums, shops, and cultural events within a few blocks of the main campus.

- School of Undergraduate Studies
- School of Education
- School of Psychology & Counseling
- School of Management

Regional Locations
Our students and alumni have urged Cambridge College to bring its academic programs and culture of adult learning to the people of their own cities and states. Each Cambridge College location offers academic programs established at the main campus, selected to serve local needs, and authorized by state education authorities.

Academic Schedule
Convenient evening and weekend classes accommodate students’ work schedules.

Three terms/year — Fall and spring terms are 15 weeks for undergraduate programs, and 14 weeks for graduate programs. The summer term is nine weeks for undergraduate programs and seven weeks for most graduate programs (see Academic Calendar.)

Getting Started
at Cambridge College

WELCOME to Cambridge College

We are a college whose educational environment and programs are designed specifically for adult learners. Our dedicated faculty, flexible scheduling, and educational centers are focused on students who are working to advance their education and working in their lives to balance employment, finances, and family commitments with their decision to go to college. The Cambridge College community is comprised of people who understand the complications of adult life, from the faculty and deans, to the staff and administrators. As important as the context of flexible education opportunities and support for working adults is, we see that adults also need the challenge to change and grow. We are here because we have a strong belief: that you want to continue developing and gaining new perspectives, even amidst the demands of life. We welcome you to become part of a special cohort of students who come from different backgrounds, but arrive with a common need to learn, to share knowledge with others, to stretch out from the comfort zones, and to be accepted as adults working and learning.

Admissions

Equal Opportunity
We welcome a diverse student body and academic community regardless of race, color, religion, sex, sexual orientation, gender identity, age, disability, marital status, citizenship, national origin, genetics, or any other characteristic protected by law. See Non-Discrimination and Harassment policy at www.cambridgecollege.edu/non-discrimination-and-harassment.

Application for Admission
Apply online at www.cambridgecollege.edu/applynow or request a printed booklet from your admissions counselor. Please mail all admissions materials to your admissions counselor at the Cambridge College location that you plan to attend. See directory at the end of this catalog for addresses.

Your admission file must be COMPLETE and you must be ACCEPTED before:

- Financial aid may be awarded.
- Transfer credit may be evaluated.
- You may register for courses.

Rolling Admissions
Cambridge College practices a rolling admissions policy. Applicant materials are processed and reviewed as they are received. Students are then notified of their admission on a continual basis, as their file becomes complete and reviewed. Please allow 1-2 weeks for processing.

(Please note: Cambridge College reserves the right to deny a student admission. Submission of all required materials does not guarantee admission.)

Admissions Materials
Cambridge College requires all admission materials to be submitted and reviewed in order for a student to be accepted and register. See full policy at www.cambridgecollege.edu/admission-material-policy.

Admissions documents must be submitted in English. However, applicants to the Puerto Rico Regional Center may submit the current résumé, personal statement and professional references in Spanish.
All materials become the property of Cambridge College and cannot be returned to the student. Access to these materials is limited under the Family Educational Rights and Privacy Act of 1974 (FERPA). Submitted reference letters that have been designated confidential will not be available to the student.

Keep copies of your completed application and other items you submit. Application materials may not be returned, duplicated for personal use, or forwarded.

All completed application materials are kept on file for one year after submission and can be reactivated during this period if a student chose not to enroll at the time of submission. The application process must be completed in order to be reviewed for acceptance. Applicants can choose to defer their application file for up to three terms (no longer than one year). After one year, documents are purged. Interested applicants will need to reapply.

Students accepted into a degree or certificate program will find academic advising resources listed on their academic record that they can access through the MyCC web portal.

Make an Informed Decision

Applicants are responsible for reading the Cambridge College catalog to get the information needed to make an informed program choice. Please visit www.cambridgecollege.edu/academic-catalog for information, including program requirements and policies, tuition, fees and refund policies. Applicants should contact the program chair with academic questions regarding their specific program of interest.

International Transcripts

If your transcript comes from a school outside the U.S., you must submit an original or certified copy of your transcript, and an official transcript evaluation, completed by an evaluation service listed on www.mass.gov/edu/government/departments-and-boards/ese/programs/educator-effectiveness/licensure/academic-prek-12/teacher/foreign-degree-and-credit-equivalency.html.

Students Returning After Five Years

Students who withdraw any time after their initial registration, and wish to return after more than five years need to reapply to a program that is currently offered, submitting all materials to the Admissions Office. Program requirements current at the time of their return must be met.

Please be aware that some programs may no longer be available. Your academic advisor or the dean can assist you to find a program that may accept much of your earlier course work, and help you map out your remaining course work.

See policy at www.cambridgecollege.edu/returning-student-policy
Cambridge College Admissions Requirements

School of Undergraduate Studies

https://www.cambridgecollege.edu/admissions-requirements/school-undergraduate-studies-admissions-requirements

Bachelor's Degrees and Certificates

(For-Credit Certificates)

☐ Application completed and signed.

☐ $50 Application Fee nonrefundable ($100 for international students).

☐ Official Transcript

• High school transcript (original) showing graduation or GED transcript (original).
• or associate’s degree transcript from a regionally accredited college or university, showing conferral date.

You must request official transcripts from all schools and colleges you have attended, to be sent directly to Cambridge College; we must receive them sealed and unopened. Please follow instructions at www.cambridgecollege.edu/requesting-official-transcripts. International transcripts must be translated and evaluated.

☐ Personal Statement

Write a 1-2 page typed, double-spaced essay (250-500 words) describing why you are interested in obtaining a degree from Cambridge College, your professional goals, and/or life experiences that led you to this decision.

☐ One Professional Recommendation

Program Requirements

For Specific Programs

Alcohol & Drug Counseling Certificate

This certificate is offered by the School of Psychology & Counseling (SOPC) for both graduate and undergraduate students. Applicants must therefore meet the admissions requirements of both schools. In addition to the regular undergraduate requirements (see at left), the following are required:

☐ Interview with and approval of the SOPC Admissions Committee and acceptance by the dean.

☐ Interview with program chair.

☐ Current résumé.

☐ A second professional recommendation.

State Health Requirements — Massachusetts locations only

☐ Immunizations — Get required form at www.cambridgecollege.edu/resources/student-forms.

☐ Health Insurance — Go to MyCC web portal homepage and follow instructions under “Student Health Insurance.” Students who have health insurance need to waive out. If you do not waive out, you will be automatically enrolled and billed.

☐ Transfer Credit Evaluation

www.cambridgecollege.edu/admissions/transferring-credits

• Official Transcripts of all college courses. All official college transcripts are evaluated for transfer credit.

☐ International Students — may be admitted only to Massachusetts locations. The California and Puerto Rico locations are not authorized to admit international students.

• International Students Application Supplement (www.cambridgecollege.edu/prospective-international-students). This must be completed and accompanied by all supporting documents listed.

• Official demonstration of English language proficiency (see International Students).
Master of Education Degrees

A. GENERAL REQUIREMENTS
   For All Master’s Programs

☐ Application Form Complete carefully and sign.

☐ $50 Application Fee nonrefundable ($100 for international students and EdD).

☐ Official Transcripts
   Transcripts must evidence a bachelor’s degree or higher from a regionally accredited college or university. Certain programs require a degree in a specific field; see also Program Requirements.

   You must request official transcripts to be sent directly to Cambridge College; we must receive them sealed and unopened. Please follow instructions at www.cambridgecollege.edu/requesting-official-transcripts. International transcripts must be translated and evaluated.

☐ Current Résumé
   Three years of work experience are recommended.

☐ Personal Statement
   Write a two-page, typed, double-spaced essay (500 words) describing your professional experience, your goals and objectives for graduate study and for educator licensure. How do you expect your graduate studies to apply to your school and enhance your future career?. Keep a copy for your electronic portfolio of learning.

☐ Two Professional Recommendations Please ask your evaluators to speak specifically to the program for which you’re applying.

B. LICENSURE PROGRAM REQUIREMENTS

   In addition to the general requirements (item A), all of the following conditions must be satisfied for admission into one of the School of Education’s educator preparation programs for licensure in Massachusetts:

☐ Massachusetts Educator Personnel ID (MEPID number)
   If you do not have a MEPID number, please submit an application to receive one with the Massachusetts Department of Elementary and Secondary Education (ME-DESE) and submit a copy of the official notification of the number along with the MTEL results for admission into the licensure program selected.

☐ MTEL Communication & Literacy Test
   Candidates for licensure are required to pass the Massachusetts Communication & Literacy Test (MTEL) prior to admission into licensure programs. Submit a copy of the official document noting your “pass score” or verification page from the Educator Licensing and Recruitment (ELAR) system maintained by the Massachusetts Department of Elementary and Secondary Education (ESE).

☐ GPA of 3.0
   Submit the official transcript of your prior bachelor’s or graduate degree as evidence of a GPA of 3.0 or better.

☐ Program Requirements
   Any requirements for your desired program must also be met. See Program Requirements, item C below.

Students entering the College having met the MTEL and GPA requirements for admission into approved licensure programs

If all conditions for entry into the approved educator licensure program are satisfied upon application to the College, all evidence for entry into the program must accompany the application submitted for admission. Application materials will be reviewed and approved by the School of Education before the admissions process is completed.

As of Summer 2017, the Personal Statement will need to address the following criteria, which will be assessed by the School of Education for admissions purposes into all educator licensure programs:
   • Relevancy of prior experience for the program selected;
   • Clarity of educational goals and objectives for the graduate study in the licensure program selected;
   • Depth of knowledge specific to the content of the program selected;
   • Rationale for entry into the field of educator licensure (teaching or leadership);
   • Rationale for selecting (or continuing in) the field of education;
   • Clarity of thought and effective written expression

Students entering the College without having met the MTEL and GPA requirements

Students entering the College without having met the basic requirements for admission into the approved program for licensure must enroll in the non-licensure program aligned with their desired licensure area until all conditions are satisfied. Once the MTEL test is successfully completed and a GPA of 3.0 earned in at least two Cambridge College courses, students may then seek approval from the program chair to become licensure candidates in the program selected. If a teacher’s license is sought, further approval of the Department Head, Teacher Education Department is required prior to program entry.
Consultation and Approval Process
Students should consult the program chair regarding requirements for admission into SOE approved programs for licensure.
- In Educational Leadership, approval from the program chair is required to enter into the approved program for licensure.
- In Teacher Education, approval from the program chair and department head is required.

C. PROGRAM REQUIREMENTS
For Specific Master’s Programs

- **Health/Family & Consumer Sciences**
  Transcript(s) must document at least 24 credit hours of coursework (including anatomy and physiology) in relevant content area(s) (e.g., personal health and wellness, child and adolescent growth and development, psychology, drug abuse prevention, nutrition, human sexuality). If content area coursework (other than anatomy and physiology) is not completed at the time of admission, students may complete them concurrently. This requirement applies to both licensure candidates and applicants who do not desire licensure.

- **Math Licensure**
  Candidates for licensure in Math (5-8, 8-12) must take a Cambridge College math placement test. Based on test results and the program chair’s recommendation, lower-level math courses may be selected/ required before admission into initial licensure courses.

- **Educational Leadership**
  - A minimum undergraduate GPA of 3.0 is required for admission. Lower grades might be accepted; however, applicants must provide compelling evidence of potential to complete graduate level coursework.
  - Letter documenting experience: See CAGS in Educational Leadership.

- **School Nurse Education**
  Registered Nursing License (RN) required. Complete and submit a Registered Nurse License Requirement Form and be prepared to show your RN license to the program chair when class begins. Do not send photocopy.

- **Transfer Credit Request**
  www.cambridgecollege.edu/admissions/transferring-credits
  - Official Transcripts and syllabi or course descriptions of graduate courses to be evaluated.
  - Transfer Credit Request Form needed if you wish to have prior course work evaluated for transfer credit.

- **International Students** — may be admitted only to Massachusetts locations. The California and Puerto Rico locations are not authorized to admit international students.
  - International Students Application Supplement (www.cambridgecollege.edu/prospective-international-students). This must be completed and accompanied by all supporting documents listed.
  - Official demonstration of English language proficiency (see International Students).

CAGS in Educational Leadership

**A. REQUIREMENTS FOR ENTRY**
For Licensure and Non-Licensure Candidates
All students begin study in the non-licensure pathway. Later on qualified students may transfer into the licensure pathway.

- **All Requirements for Master’s Programs**
  See above.

- **Official Transcripts with GPA of 3.0**
  Transcripts must evidence a master’s degree from a regionally accredited college or university, in education or a closely related field, with a minimum GPA of 3.0 for all graduate work attempted. (Bachelor’s degree also required.)

- **Letter Documenting Experience**
  The résumé must evidence three full years of work experience specific to the program selected. Submit a letter which states that you have met the applicable work experience requirement. The letter, on your employer’s letterhead, must be signed by a school/district level official (principal or human resource director).

  - School Administration (licensure and non-licensure) and Curriculum & Instruction: Three years of full-time experience in one of the roles below:
    - Executive management/leadership role;
    - Supervisory, teaching, or administrative role in a public or private school or in higher education;
    - Leadership district-wide, school-based, or other educational setting accepted by the Educational Leadership Program.
  
  For supervisor/director license: Three full years of employment, with either an initial or preliminary license, in an educational role other than the area for which the application is made.

  - State Health Requirements — Massachusetts locations only
    - **Immunizations** — Get required form at www.cambridgecollege.edu/resources/student-forms.
    - **Health Insurance** — Go to MyCC web portal homepage and follow instructions under “Student Health Insurance.” Students who have health insurance need to waive out. If you do not waive out, you will be automatically enrolled and billed.
Special Education Administration:
- Initial license in special education, speech, or language & hearing disorders, or work experience as a school psychologist, school social worker/school adjustment counselor, and/or school principal/assistant principal.
- Three full years of employment in a district-wide, school-based or other educational setting OR in law, public policy, higher education, or other related field accepted by the Educational Leadership Program.

B. REQUIREMENTS FOR LICENSURE PATHWAY
Program Change Typically Requested After 1-2 Terms of Study

☐ All Licensure Program Requirements
   See master's programs above.

☐ Two Professional Recommendations
   Submit two recommendation forms from course faculty instructors. (MEd students: one recommendation from your EAD691 Leader).

Certificates
The following are required for admission into certificate programs:

☐ Application Form  Complete carefully and sign.

☐ $50 Application Fee  nonrefundable

☐ Official Transcripts

Transcripts must evidence a bachelor's degree or higher from a regionally accredited college or university.

If applying for:
- Certificates identified as graduate level: a bachelor's degree or higher is required.
- Certificates identified as post-graduate or post-master's: a master's degree or higher is required.

You must request official transcripts to be sent directly to Cambridge College; we must receive them sealed and unopened. Please follow instructions at www.cambridgecollege.edu/requesting-official-transcripts. International transcripts must be translated and evaluated.

Doctor of Education
Applicants are not currently being accepted.
Cambridge College Admissions Requirements

School of Management

All Applicants

- Application completed and signed.
- $50 Application Fee nonrefundable ($100 for international students).
- Official Transcripts You must request official transcripts to be sent directly to Cambridge College; we must receive them sealed and unopened. Please follow instructions at www.cambridgecollege.edu/requesting-official-transcripts. International transcripts must be translated and evaluated.

Master of Business Administration

- Bachelor’s Degree conferred by a regionally accredited college or university.
- Current Résumé and Work Experience
  On résumé indicate education and work experience. Two years work experience required. Health Care Management and Informatics: Three-five years health care experience required (Informatics: or information technology experience).
- Interview
  Interview with and approval of the School of Management Admissions Committee and/or program chair, dean, or regional center director.
- Personal Statement
  Write a 2-page description of your work experience, professional goals, and why you’re interested in pursuing an MBA.
- Two Professional Recommendations
  Preferably including one from an employer.

Master of Management

- Bachelor’s Degree conferred by a regionally accredited college or university.
- Current Résumé and Work Experience
  On résumé indicate education, work experience and professional/ career goals. Three-five years work experience recommended. Health Care Management and Informatics: Three-five years health care experience required (Informatics: or information technology experience).
- Interview
  Interview with and approval of the School of Management Admissions Committee and/or program chair, dean, or regional center director.
- Personal Statement
  Write a 2-page description of your work experience, professional goals, and why you’re interested in pursuing an MM.
- Two Professional Recommendations
  Preferably including one from an employer.

Certificates

- Bachelor’s Degree conferred by a regionally accredited college or university.
- Current Résumé and Work Experience
  On résumé indicate education, work experience and professional/ career goals. Three-five years work experience recommended. Health Care Management and Informatics: Three-five years health care experience required (Informatics: or information technology experience).
- Approval of the program chair, dean, or regional center director.

Your admissions file must be complete and the admissions review completed before you may register for classes.

Continued

Transfer Credit Request

www.cambridgecollege.edu/admissions/transferring-credits
- Official Transcripts and syllabi or course descriptions of graduate courses to be evaluated.
- Transfer Credit Request Form needed if you wish to have prior course work evaluated for transfer credit.

Please note: No transfer credits are accepted into the MM55.

International Students — may be admitted only to Massachusetts locations. The California and Puerto Rico locations are not authorized to admit international students.
- International Students Application Supplement (www.cambridgecollege.edu/prospective-international-students). This must be completed and accompanied by all supporting documents listed.
- Official demonstration of English language proficiency (see International Students).

State Health Requirements — Massachusetts locations only

- Immunizations — Get required form at www.cambridgecollege.edu/resources/student-forms.
- Health Insurance — Go to MyCC web portal homepage and follow instructions under “Student Health Insurance.” Students who have health insurance need to waive out. If you do not waive out, you will be automatically enrolled and billed.
Completion of a professional degree or license (e.g., RN), or high school diploma or GED and at least 60 undergraduate credits that meet general criteria for transfer.

Current Résumé and Work Experience
On résumé indicate education, work experience and professional/career goals. Five to ten years of proven leadership and management experience. Health Care Management and Informatics: Three to five years of health care experience required (Informatics: or information technology experience).

Personal Statement
Write a 2-3 page typed, double-spaced essay describing your experience and learning, including learning outside the classroom, such as employment, family, military, volunteer work and participation in community organizations. Explain your reasons for further study, and personal and professional goals.

Two Professional Recommendations
Preferably including one from an employer.

Evaluation of eligibility by admissions committee and/or the School of Management dean and/or regional center director.

Interview
Interview with and approval of the School of Management Admissions Committee and/or program chair, dean, or regional center director.
Cambridge College Admissions Requirements

School of Psychology & Counseling

https://www.cambridgecollege.edu/admissions-requirements/school-psychology-counseling-admissions-requirements

All Degrees and Certificates

☐ Application completed and signed.

☐ $50 Application Fee nonrefundable ($100 for international students).

☐ Official Transcript of completed degree conferred by a regionally accredited college or university:
  • MEd and most graduate certificate programs require a bachelor’s degree. See also program requirements.
  • Post-master’s certificates require a master’s degree; see program requirements.
  • Alcohol and Drug Counseling certificate requires a high school diploma/GED, bachelor’s, or higher degree.
  • CAGS program requires a master’s degree in counseling or a closely related field.

You must request official transcripts, to be sent directly to Cambridge College; we must receive them sealed and unopened. Follow instructions at www.cambridgecollege.edu/requesting-official-transcripts. International transcripts must be translated and evaluated.

☐ Interview with and approval of the SOPC Admissions Committee and acceptance by the dean.

☐ Current Résumé

☐ Personal Statement
Write a 1-2 page essay (250-500 words) describing your reasons for obtaining a degree from Cambridge College, your professional experience and goals, and your academic background.

☐ Two Professional Recommendations

School Guidance, School Adjustment ESE Licensure Candidates

Applicants to degrees and certificates preparing students for licensure in School Guidance or School Adjustment must also meet the admission requirements below.

☐ MTEL Communication & Literacy Test
Candidates for licensure are required to pass the Massachusetts Communication & Literacy Test (MTEL) prior to admission into licensure programs. Submit a copy of the official document noting your “pass score” or verification page from the Educator Licensing and Recruitment (ELAR) system maintained by the Massachusetts Department of Elementary and Secondary Education (ESE).

☐ GPA of 3.0
The official transcript of your prior bachelor’s or graduate degree is required to show a GPA of 3.0 or better.

Students entering the College without having met the MTEL and GPA requirements are:

  • Required to begin as follows:
    • School Guidance Counseling (48 credits): Register for School Guidance/non-licensure
    • School Guidance/Mental Health Counseling (60 credits): Register for Mental Health Counseling.
    • School Adjustment/Mental Health Counseling: Register for Mental Health Counseling.

  • Advised to take the Communication & Literacy MTEL within their first term at the College.

Once the MTEL test is passed and a GPA of 3.0 earned in at least two Cambridge College courses, students may seek approval to become licensure candidates in School Adjustment or School Guidance Counseling.

☐ Massachusetts Educator Personnel ID (MEPID number)
If you do not have a MEPID number, please submit an application to receive one with the Massachusetts Department of Elementary and Secondary Education (ME-ESE) and submit a copy of the official notification of the number along with the MTEL results for admission into the licensure program selected.

☐ Program Chair Consultation and Approval
Students should consult with the program chair regarding licensure requirements and seek approval to enter an ESE licensure program.

Continued
Program Requirements
For Specific Programs

Alcohol & Drug Counseling Certificate
- High school diploma/GED, bachelor’s or higher degree required.
- Interview with program chair required.

Rehabilitation Counseling Certificate
- 60-credit master’s or higher degree in mental health counseling, marriage & family therapy, social work, or psychology.

School Adjustment Counseling Certificate for Mental Health Counselors
- Completion of current Cambridge College 60-credit M.Ed. in mental health counseling or equivalent program. (Bachelor’s degree also required.)
- Pass Massachusetts Communication & Literacy Test (MTEL).

Transfer Credit Request
www.cambridgecollege.edu/admissions/transferring-credits
- Official Transcripts and syllabi or course descriptions of graduate courses to be evaluated.
- Transfer Credit Request Form needed if you wish to have prior course work evaluated for transfer credit.

International Students — may be admitted only to Massachusetts locations. The California and Puerto Rico locations are not authorized to admit international students.
- International Students Application Supplement (www.cambridgecollege.edu/prospective-international-students). This must be completed and accompanied by all supporting documents listed.
- Official demonstration of English language proficiency (see International Students).

State Health Requirements — Massachusetts locations only
- Immunizations — Get required form at www.cambridgecollege.edu/student-forms.
- Health Insurance — Go to MyCC web portal homepage and follow instructions under “Student Health Insurance.” Students who have health insurance need to waive out. If you do not waive out, you will be automatically enrolled and billed.
Non-Matriculated Students

Taking Individual Courses

Students not matriculated into a degree or certificate program at Cambridge College are allowed to take up to nine credits for credit without applying for and enrolling in a degree or certificate program. Students should seek advisement from the academic dean of the school in which they are taking courses. Certain exceptions based on program, alumni status or location may apply.

Acceptance of credits into a degree or certificate — Courses completed at Cambridge College by students not enrolled in an academic program may be evaluated for acceptance into Cambridge College programs by the dean or program chair of the receiving program. There is no guarantee that courses taken as a non-matriculated student will be accepted into an academic program at Cambridge College.

To get the full benefit of the course work, any course prerequisites must be met. The prior education and experience required for the corresponding degree are recommended.

Financial Aid

To be eligible for financial aid, enrollment in a degree program or eligible certificate is required. Please contact the Financial Aid Office for more information.

See policy at www.cambridgecollege.edu/college-policies.

The College reserves the right to restrict access by non-matriculated students to particular courses.
Tuition and Payment

Bursar’s Office  •  617.868.1000 x1326  •  bursars@cambridgecollege.edu  •  Rates as of July 2016, subject to change without notice.

Admissions

Application fee (non-refundable) .................................................$50
Application fee - international applicants (non-refundable) .......$100
Application fee - EdD (non-refundable) .................................$100

Course Tuition Rates are set by the Board of Trustees and are subject to change. Current rates apply to all students. See full policy at www.cambridgecollege.edu/tuition-rates-and-fees

Rates effective Fall 2016 — All rates are per credit hour.
Tuition for each course is the same for students enrolled in a degree or certificate, or as a non-matriculated student taking single courses.

### Please Note, Regarding Cost Estimates Provided Above

- Enrollment/First term charges include application fee (non-refundable) and tuition (refundable) for one term of typical full-time study: BA/BS: 12 credits; MEd, MM: 8 credits.
- Tuition figures provided reflect 2016-2017 tuition rates. All rates are subject to change and all students pay current rates. Therefore tuition rate may change over the period of an academic program. Tuition may be refunded (see Refunds and Repayment).
- The Student Tuition Recovery Fund (STRF), at time of publication, is not figured into the Enrollment/First Term or Entire Program cost estimates.
- The optional payment plan service charge of $60/term (non-refundable) is not included in calculations above. It is non-refundable. See also below.
- The optional payment plan service charge of $60/term (non-refundable) is not included in calculations above.
- The Student Tuition Recovery Fund (STRF) to receive or mitigate economic losses suffered by students in educational programs who are California residents or are enrolled in a residency program attending certain schools regulated by the Bureau for Private Postsecondary Education.

### Student Tuition Recovery Fund

**You must pay** the state-imposed assessment for the Student Tuition Recovery Fund (STRF) if **all** of the following applies to you:

1. You are a student in an educational program, who is a California resident or are enrolled in a residency program, and prepay all or part of your tuition either by cash guaranteed student loans, or personal loans, and
2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party.

**You are not eligible for protection from the STRF and you are not required to pay** the STRF assessment if **either** of the following applies:

1. You are not a California resident, or are not enrolled in a residency program, or
2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party.

The State of California created the Student Tuition Recovery Fund (STRF) to receive or mitigate economic losses suffered by students in educational programs who are California residents or are enrolled in a residency program attending certain schools regulated by the Bureau for Private Postsecondary Education.

**You may be eligible for STRF if** you are a California resident or are enrolled in a residency program, attending prepaid tuition, paid STRF assessment, and suffered an economic loss as a result of one of the following:

1. The school closed before the course of instruction was completed.
2. The school’s failure to pay refund or charges on behalf of a student to a third party for license fees or any other purpose, or to provide equipment or materials for which a change was collected within 180 days before the closure of the school.
3. The school’s failure to pay or reimburse loan proceeds under a federally guaranteed student loan program as required by law or to pay or reimburse proceeds received by the school prior to closure in excess of tuition and other costs.
4. There was a material failure to comply with the Act or the Division within 30 days before the school closed or if the material failure began earlier than 30 days prior to closure, the period determined by the Bureau.
5. An inability after diligent efforts to prosecute, prove, and collect on a judgment against the institution for a violation of the Act.

---

Cambridge, MA • 617.868.1000 • www.cambridgecollege.edu

Academic Catalog 2016-2017 • May 12, 2017
The following is an overview of information you need to be aware of as you begin your time at Cambridge College. The following items are subject to change at any time. Please refer to www.cambridgecollege.edu/bursars-office for the most up to date information.

Course registration is contingent upon the payment of all amounts due to the College. Students owing a balance of more than $50 cannot register for courses. Once registered for a term, payment or acceptable arrangements must be made prior to the start of the term. If a student registers after the term starts, payment is due immediately upon registration.

Communicating With You
The Bursar’s Office will often communicate with you by email to your Cambridge College email account. You are responsible for checking your email on a regular basis so you don’t miss important information.

Billing of Tuition
Bills are mailed at least 30 days prior to the start of the term. Payments are to be remitted on or before the due date indicated on the statement (this date is typically one week prior to the term start date).

It is easy to figure your tuition bill each term. On our website, go to your Cambridge College location, click on your academic program, and see current tuition rates posted on the Tuition tab. Multiply the number of credits you are taking by the per-term rate. (In some cases there may be other expenses in addition to course tuition.)

Always refer to your account online for the most up-to-date balance information.

Late Payment Fee
Students will be assessed a late payment fee if acceptable payment arrangements are not made by the due date indicated on the statement. Acceptable payment arrangements include payment in full, pending financial aid, approved third-party billing (i.e., Veterans) and an active and current payment plan with the Bursar’s Office.

Paying for Your Education
There are several ways to pay for your college education:

- Financial aid (federal student loans, scholarships, etc.) — to apply for aid, go to www.cambridgecollege.edu/financial-aid.
- Employer tuition assistance programs or third party sponsor — acceptable if payment is made directly to Cambridge College and is not contingent upon grades. Please contact the Bursar’s Office prior to the beginning of the term so that an invoice can be generated.
- Veteran’s Benefits — if you are eligible for veteran’s educational benefits, please contact the Bursar’s Office to discuss your own particular situation.
- Using your own funds — see “How to pay your bill” below.

How to Pay Your Bill
Online — The quickest and easiest way to make a payment is by paying online via the MyCC web portal. This is available 24 hours per day and can be done in four easy steps:

1. Log into MyCC
2. Click “Finances” tab
3. Click “My Account Balance”
4. Click “Make a Payment”

Mail — Checks or certified funds must be made payable to Cambridge College and include your college ID number.
Mail payment to Cambridge College, ATTN: BURSAR, 1000 Massachusetts Ave, Cambridge, MA 02138.

In Person — During business hours you can make a payment in person at our main campus, 1000 Massachusetts Avenue, Cambridge, MA. Payments are not accepted at any other college location.

Wire Transfer — Please contact the Bursar’s Office if you are interested in making a payment via wire transfer.

Payment Plan — The Bursar’s Office can work with you to establish a payment plan that allows you to pay your tuition and fees in up to four payments in the fall and spring terms, and two payments in the summer term. Please contact the Bursar’s Office.

Non-Payment and Collections
You will not be able to register until you have paid your bill. Once acceptable payment arrangements have been made, we can clear you to register online. Students with a balance will have a Bursar restriction (“Hold”) placed on their account. This restriction prevents access to grades, transcripts (both official and unofficial); diplomas, and certificates. Students are notified of impending restriction via email to their Cambridge College email address.

The College will make every effort to work out repayment plans. In the event a balance remains outstanding, student debts will be submitted to a collection agency if payment is not received. In such cases, the student is liable for any court costs and collection agency fees. Collection agency fees may total up to 40% of the outstanding bill, as allowed by Massachusetts law. Cambridge College reserves the right to report account information to a credit bureau.

Withdrawal or Leave of Absence
Students considering withdrawal are urged to see the Bursar’s Office before leaving the College in order to arrange payment of any outstanding balance. Students who have received financial aid must contact the Financial Aid Office.

Students who do not complete the term after having paid the current term charges or received financial aid must submit a completed Withdrawal form to the Registrar’s Office. Tuition will be pro-rated based on the withdrawal date as determined by the Registrar’s Office upon receiving the form. The following refund and repayment policies apply.
Refunds and Repayment

Financial aid repayment/return — Title IV financial aid or state scholarship monies are subject to federal regulations. See Financial Aid.

Refund — Students who paid current tuition charges themselves (not from federal or state aid) are eligible for refunds as follows:

<table>
<thead>
<tr>
<th>Date of Withdrawal</th>
<th>Refund</th>
</tr>
</thead>
<tbody>
<tr>
<td>Before add/drop deadline (within first two weeks of term)</td>
<td>100%</td>
</tr>
<tr>
<td>During third week of term</td>
<td>75%</td>
</tr>
<tr>
<td>During fourth week of term</td>
<td>50%</td>
</tr>
<tr>
<td>During fifth week of term</td>
<td>25%</td>
</tr>
<tr>
<td>Thereafter</td>
<td>0%</td>
</tr>
</tbody>
</table>

<table>

<td>25%</td>
</tr>
<tr>
<td>Thereafter</td>
<td>0%</td>
</tr>
</tbody>
</table>

Overpayment — Non-Federal Funds
Payments received on a student account, exceeding the account balance or anticipated charges, will remain on the account and be applied toward future term charges within the academic year. Remaining overpayments are refunded at the end of the academic year. No refunds will be issued at any other time unless the student is withdrawing or has completed their degree.

Excess Funds — Title IV
In accordance with federal regulations, excess funds from federal financial aid, over and above current charges, cannot be held without written authorization from the student.

Graduation Clearance
All tuition and other charges must be paid in full by the published graduation clearance deadline in order to receive graduation clearance from the Bursar’s Office.

California: Student’s Right to Cancel
You have the right to cancel or withdraw and receive a refund of 100% of the amount paid for institutional charges, less the STRF of $0.00, and a reasonable deposit or application fee not to exceed $250, through attendance at the first class session, or the seventh day after enrollment, whichever is later, if notice of cancellation is received on or before the right to cancel date. See Table below.

To cancel, download the Withdrawal form from www.cambridgecollege.edu/resources/student-forms, and submit the completed Withdrawal form to the Registrar’s Office by the right to cancel date (Add/Drop Deadline).

Students are not required to purchase books, supplies or equipment through Cambridge College, and the College does not offer student housing or transportation. Therefore these expenses cannot be refunded by the College.

Student Health Insurance

Massachusetts law states that students who meet all the following criteria are required to be enrolled in the College’s student health insurance plan or participate in a plan in comparable coverage.

- Attend classes within Massachusetts.
- Are enrolled in a certificate or degree program.
- Are enrolled full-time or three-quarter time (undergraduate: 9 credits or more; graduate: 6 credits or more).

A student’s status as full or three-quarter time is determined as of the last date of the add/drop period.

Annual Insurance waiver — Students who have insurance with coverage comparable to Massachusetts state criteria may waive out of the College’s student health insurance plan by submitting an annual waiver request by the term deadline. It is the student’s responsibility to determine and certify that their insurance is comparable. To submit the annual waiver request, students must go to the MyCC website portal homepage and follow the instructions under Student Health Insurance; click on the external link provided, and follow the online instructions. In so doing they grant permission for the insurance provider to audit their insurance information, and if it is found to be falsified, inactive, or non-comparable to Massachusetts criteria, they will be enrolled in the insurance plan and will be charged the full insurance premium.

Students who do not submit an annual waiver request by the deadline are automatically enrolled in and billed for the College’s student health insurance plan. The deadline changes each term, but is within a week of the last date of the add/drop period for the term. The deadline for the current term is posted on the MyCC website portal homepage.

Students are required to submit an annual waiver request in the first term they are enrolled and every fall term thereafter. Students returning after a leave of absence must submit the waiver request in the term when they return.

CC locations in other states — Students at Cambridge College locations outside Massachusetts are not required to purchase student health insurance.

CC Summer Institutes — Summer Institute students enrolled in more than three weeks of classes will need to show proof of health insurance. Massachusetts law does not require students enrolled in short-term courses (defined as no more than 15 days of classes for each term and 30 days total for the entire school year) to purchase student health insurance.

Adding Courses

Students who add courses after the term has begun are responsible for payment immediately. Students must check their account online for changes to their balances as a result of adding courses.
Dropping Courses

**Tuition Charged**
You must pay the full tuition for all courses for which you have registered, by the payment due date.

- However, if you correctly drop the course, you may get tuition credit as outlined below under “Tuition Credit”.
- If you do not attend class and do not correctly drop the course, you remain responsible for the full tuition.
- If you begin attending class and later cease attending classes without formally withdrawing, you remain responsible for the full tuition.

**Tuition Credit**

**Date Add/Drop Request is Received**  
**Tuition Credit**

Courses that meet every week and start in the first week:
- Before the add/drop deadline ........................................ 100%
- Before third class or when no more than six hours of class time have elapsed, whichever comes first ........ 75%
- After third class ......................................................... 0%

All other courses:
- Before the first class .................................................. 100%
- Before second class or when no more than six hours of class time have elapsed, whichever comes first .... 75%
- After the second class .................................................. 0%

Online courses have the same tuition credit policy as standard seated courses.
Financial Aid

Financial Aid Office  ●  617.873.0440  ●  financialaidweb@cambridgecollege.edu  ●  www.cambridgecollege.edu/offices/financial-aid

Financial aid is available for our students who qualify, to assist in financing educational expenses at Cambridge College. Visit www.cambridgecollege.edu/offices/financialaid/ to begin the financial aid process. The financial aid staff is available to assist students by phone, by appointment and by e-mail.

Eligibility for Financial Aid

It is essential that students comply with requirements in order to receive financial aid.

Eligibility Requirements

Eligibility for federal financial aid is determined by the following criteria:

- Students must be enrolled in a Title IV approved program leading to a degree or certificate and the student may only receive federal financial aid for classes that are required for degree completion. Classes outside of a student’s approved program cannot be used in cost of attendance calculations and determination of half time enrollment. Students enrolled in non-degree programs or certificate programs not Title IV approved are not eligible for federal financial aid.

- Students must be enrolled at least half time to receive a federal direct loan. (undergraduate: at least 6 credits; graduate: at least 4 credits).

- Students must be enrolled full time to receive the maximum Pell Grant. If a student is enrolled less than full time the Pell grant will be prorated based on enrollment status.

- Federal financial aid will be adjusted if a student withdraws from all classes before 60% of the semester is completed. Students may have a balance owed to the College after these adjustments to financial aid are posted to the student’s account. (See policy on Withdrawals and Leave of Absence.)

- Students must have financial need except for the unsubsidized loan program and some merit based aid or private grant aid. Need is defined as the cost of attendance minus the expected family contribution derived from filing the Free Application for Federal Student Aid (FAFSA).

- Students must have a high school diploma or equivalent (General Education Diploma (GED) certificate, a certificate from a state-authorized examination that the state recognizes as the equivalent of a high school diploma, a two year degree acceptable for full credit towards a bachelor degree), or have completed a high school education in a home setting that is treated as a home school or private school under applicable state law.

- Students must be a U.S. Citizen or eligible non-citizen.

- Students must have a valid Social Security Number.

- Students cannot be in default or owe money on a federal student loan.

- Male students ages 18-25 must register with the Selective Service.

Applying for Financial Aid

www.cambridgecollege.edu/applying-financial-aid

Academic Award Year

For awarding purposes the Fall term is considered to be the beginning (header) of the academic award year for Cambridge College. The Summer term will be considered the end (trailer) for the academic award year. For determining eligibility and disbursing funds the Free Application for Federal Student Aid (FAFSA) year must match the academic award year.

Example: Student applies to start in the Summer 2012 term, the last term of the academic award year 2011-2012. Student must file the 2011-2012 FAFSA and will be awarded for the Summer 2012 term only. For the next academic award year of 2012-2013 the student must file the 2012-2013 FAFSA, and will be awarded starting with the Fall 2012 term and ending with the Summer 2013 term.

Students may submit an appeal to the director of financial aid if they wish to be awarded on a different schedule due to extenuating circumstances. All appeals must be in writing and contain appropriate supporting documentation. Each appeal will be reviewed on a case by case basis by the director of financial aid.

Verification

Students sometimes make errors on their financial aid application. The Federal Department of Education requires that 30% of Free Application for Student (FAFSA) filers be verified, as selected by the Department of Education central processing system (CPS). However Cambridge College also has the authority, and may be required, to verify additional students. This policy applies to all Cambridge College students and their parents (only dependent students).
Selecting students — Cambridge College will request verification information from all students who are selected by the central processing system (CPS). Required verification items are: Household size as defined by the federal Department of Education; number in college; adjusted gross income as supplied by the IRS; U.S. taxes paid; certain types of untaxed income and benefits such as child care, IRA/Keogh deductions, interest on tax-free bonds (examples not all inclusive); All other untaxed income included on the U.S. income tax return (excluding schedules).

Cambridge College is also required to verify any application information that appears to be incorrect or contains discrepancies. Students with these applications are considered to be selected for verification. Students whose award has changed due to verification will be notified through an updated award letter indicating the changes to each and any award.

Notifications — Students who are selected for verification will be notified in writing a letter which lists all documents that have been requested. This information is also posted on the student’s Cambridge College MyCC account. Students whose award has changed due to verification will be notified through an updated award letter indicating the changes to each and any award.

Deadlines — Students are responsible for submitting all required verification items by the established deadline included in the letter sent to the student. Failure to submit required documents by the deadline may forfeit Federal Financial Aid eligibility. Deadlines are established each academic year and are located on the Cambridge College Financial Aid Application and on the Cambridge College web site.

Ongoing Eligibility

- Students must re-apply every year at www.cambridgecollege.edu/applying-financial-aid
- Students must work consistently towards completing their degree in a timely manner, while making satisfactory academic progress.

Satisfactory Academic Progress

Satisfactory Academic Progress (SAP) is a measure of progress toward the completion of a student’s course of study according to Cambridge College standards and required by federal regulations. Students must meet these standards to maintain eligibility for federal financial aid. These standards apply to all federal financial assistance programs and to all students: full-time and part-time, undergraduate, and graduate, degree and certificate candidates. For Financial aid satisfactory academic progress policy, see www.cambridgecollege.edu/federal-financial-aid-student-satisfactory-academic-progress-sap. If you have any questions or concerns feel free to contact the director of financial aid.

Grants for Undergraduate Students

Pell Grant

Federal Pell Grants may be awarded to undergraduate students based on criteria established by the U.S. Department of Education. Students may receive Pell Grants up to 600% of Life Time Eligibility (LEU). This is calculated by the Department of Education. No repayment required.

SEOG

Supplemental Educational Opportunity Grants (SEOG) for undergraduate students range from $500 to $2,000. Preference is given to Pell Grant recipients with high financial need. No repayment required.

Loans for All Students

Federal Direct Loans

William D. Ford Federal Direct Loans are available to students who are enrolled at least half time. Federally subsidized loans, available to undergraduate students only, are based on financial need. Unsubsidized loans are available to all graduate students and to undergraduate students who do not qualify for subsidized loans.

First time borrowers on or after July 2013 cannot receive Subsidized Loans for more than 150% of the published length of the borrower’s educational program.

The interest on subsidized Federal Direct Loans is paid by the federal government while students are enrolled. Students may pay the interest on Federal Unsubsidized Direct Loans while enrolled or allow the interest to accrue. Accrued interest will increase the principal amount of the loan and result in higher monthly payments. Repayment begins six months after a student is no longer enrolled at least half time.

Grad Plus

Grad Plus Loans, with a fixed rate of 7.9%, are available to credit-worthy students. If a student is denied on the basis of an adverse credit history, the student may obtain a credit-worthy endorser who will be responsible for the loan. The Grad Plus is available to students only after they have borrowed the maximum on the unsubsidized Direct loan.

Parent Plus

Parent PLUS loans, with a fixed interest rate of 7.5%, are available to credit-worthy parents of DEPENDENT students. If a parent is denied on the basis of an adverse credit history, the parent may obtain a credit-worthy endorser who will be responsible for the loan. If a parent is denied and cannot obtain an endorser, the student is eligible for additional Direct Unsubsidized funds. The Parent PLUS loan is available to students/parents only after they have borrowed the maximum on the Direct loans for dependent students.

If a student obtains a loan to pay for an educational program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any funds refunded to the loan provider, and that, if the student has received federal student financial aid funds, the student is entitled to a refund of the moneys not paid from federal student financial aid program funds.
How Loans are Calculated

Students may receive federal financial aid for direct costs of a degree or eligible certificate, including tuition and fees. Courses outside of the degree requirements are not eligible for financial aid.

Credits/Term

Federal financial aid awards are based in part on enrollment status: the number of credits taken each term. Federal guidelines are as follows:

<table>
<thead>
<tr>
<th>Enrollment Status</th>
<th>Undergraduate</th>
<th>Graduate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full time</td>
<td>12 or more</td>
<td>8 or more</td>
</tr>
<tr>
<td>At least half time</td>
<td>6 or more</td>
<td>4 or more</td>
</tr>
</tbody>
</table>

Credits earned through portfolios and exams are not counted toward the minimum number of credits/term.

Student Enrollment Data

The number of credits registered for, enrollment status, leave of absence, withdrawal, etc. is electronically downloaded to the National Student Loan Clearinghouse each term by the Registrar’s Office. Student loan vendors receive this information directly to verify in-school status.

Other Educational Expenses Eligible for Financial Aid

Computer for new and continuing students — The cost of one computer for your academic program may be included in your federal financial aid. If you buy a computer too soon, and find that you are not eligible for it, Cambridge College will not be able to assist you.

If you buy a computer too soon, and find that you are not eligible for it, Cambridge College will not be able to assist you with funding.

If continuing students do not yet have a computer that meets the requirements and now you need one, please contact the Financial Aid Office to discuss your needs.

Standardized tests — Undergraduate students may take CLEP or other standardized exams for credit, or earn credits by portfolios.

Books and supplies — These are a personal expense until first-term charges have been paid and a credit balance appears on your account.

Room and board (Summer Institutes only) — Students may receive federal financial aid for room and board if residency is required to attend their academic program.

Prior student loans — If students elect to stay elsewhere, or if the College has not arranged for accommodations, students must pay all their expenses up front. They may submit receipts to be considered for reimbursement.

A printed receipt or lease agreement is required from the hotel or other rental agency, showing the amount paid, date, and student’s name, before additional funding can be offered.

Transfer Credits

Prior transfer credits accepted are included in the credits earned in your first academic year. The number of terms allowed to complete your program is correspondingly reduced.

Grade Level

In accordance with federal guidelines for determining awards, undergraduate students are classified by grade level. For example, students are classified as first year until they have completed 30 or more credit hours.

Prior Student Loans

Students enrolling in eligible degree programs may be eligible for in-school deferment of prior student loans. Please contact the Registrar’s Office if you have questions.

Scholarships

Cambridge College Scholarships

Cambridge College scholarship funds, provided by donors and College general funds, are awarded only through the Office of Financial Aid. The College reviews all undergraduate and graduate students enrolled in degree and certificate programs for scholarship eligibility, based on the following criteria:

- Completion of the annual Free Application for Federal Student Aid (FAFSA) for all need based scholarships. (see www.cambridgecollege.edu/financial-aid-applying-financial-aid).
- Continuing students must meet “Satisfactory Academic Progress” requirements.
- Students must be in compliance with the College’s Code of Student Conduct.
- Students must demonstrate financial need where necessary — based upon the Expected Family Contribution on the FAFSA.
- Students must meet any other requirements as set forth by the donor.

Scholarship information is available at:

- www.cambridgecollege.edu/financial-aid-resources/scholarships
- Financial Aid tab on the MyCC web portal which is accessible to students once they have been accepted, have their student ID number, and set up their personal account.

A student who withdraws, cancels, becomes inactive, enrolls less than full-time (when full-time enrollment is required for scholarship retention), or is suspended or dismissed from the College, will lose his/her scholarship eligibility. A student who is classified under one of the above categories due to medical reason may appeal in writing to the Committee to have his/her scholarship reinstated. The appeal
must be submitted in writing with supporting documentation. For full policy, see www.cambridgecollege.edu/financial-aid-resources/scholarships

**Finding Outside Scholarships**
A trip to your local library and to the Internet requires some work on your part (applications, essays, etc.), but a few hours of your time could yield valuable information and lead to additional funding for your education. Learn more and get started at www.cambridgecollege.edu/financial-aid-resources/scholarships

**Other Financial Aid Resources**

**Alternative Loans**
For more information and to apply for alternative loans please go to www.elmselect.com

**Military Personnel**
Veterans may be eligible for G.I. Bill assistance. Information is available from the Cambridge College Student Affairs Office or from your regional Veteran’s Administration Office. Go to www.cambridgecollege.edu/resources/veterans-benefits

**Federal College Work Study**
These funds provide part time employment to students to help meet educational expenses; eligibility is based on financial need. Internship sites may be considered for off-campus work study opportunities. For more information and current opportunities, go to www.cambridgecollege.edu/financial-aid/work-study

**State Aid**
Cambridge College students are encouraged to research financial aid opportunities in their own states.

**Massachusetts State Scholarships**
Massachusetts residents pursuing undergraduate degrees may be eligible for the Mass State Grant or other state funding. The maximum award amount varies, depending on state funding. The application (FAFSA) must be filed before May 1 for consideration for the following academic year. Students must be full-time to receive state grants. Go to www.cambridgecollege.edu/grants.

**Tax Benefits**
Various tax benefits are intended to help students and their parents, as well as all working Americans, to fulfill a variety of educational objectives. For information, go to www.cambridgecollege.edu/financial-aid-resources/other-financial-aid-resources

**How Funds are Disbursed**

**Financial Aid Award Letter**
Your award letter will be mailed to your home address, and you can view your award information on the MyCC portal.

**Awards and Disbursement**
Loans are prioritized and disbursed according to the number of terms enrolled. In accord with federal policy, financial aid awards are posted to students’ accounts at Cambridge College, not directly to students themselves. Once the College receives the loan disbursement from the government, the College credits the student’s account. Any federal funds in excess of current charges may be refunded to the student after term charges have been paid, pending any change of enrollment status.

**Schedule of Disbursement**
The initial posting of financial aid is one week after the add/drop deadline each term, and weekly thereafter.

**Refunds and Excess Funds — Title IV**
Students must wait for awards to be credited to their student accounts. Any federal funds in excess of current charges may be refunded to students after term charges have been paid, pending any change of enrollment. Any excess funds are refunded within 14 business days after the disbursement is credited to a student’s account (14 days after the add/drop deadline, if credited earlier). The Bursar’s Office will automatically mail refunds to students. Before calling the Financial Aid or Bursar’s Office, students may access their accounts on the website by logging on to the myCC portal. Student ID and PIN will be needed.

According to federal tax laws, these refunds are regarded as taxable income. Careful records should be kept and all the income must be reported on your income tax return.

**Repayment Process and Loan Rehabilitation**

**Exit Counseling**
All borrowers of federal student loans must complete federally mandated exit counseling when graduating or dropping to less than half-time enrollment status. Exit counseling prepares students for re-payment. Students must do the exit counseling in its entirety, with complete and correct information; otherwise the degree, diploma, and official transcripts will be withheld.

To complete the exit interview online, go to www.studentloans.gov, and click on Exit Counseling.

Loan payments may be necessary long after graduation. Federal authorities pay careful attention to student loans; defaulting on federally subsidized loans is a serious offense. With careful planning, students should be able to enjoy the rewards of their study at Cambridge College without being overburdened by payments.

**Loan Default and Rehabilitation**
Current and former students with an outstanding balance on a defaulted loan, who have not made satisfactory arrangements for payment, will not receive official or unofficial transcripts.

Defaulted Direct and Perkins (and Stafford) loan borrowers are eligible for rehabilitation and restoration of Title IV eligibility. Borrowers may regain eligibility after six on-time consecutive monthly payments;
however, the loan is still in default. Once twelve such payments have been made, a federal loan is removed from default, or “rehabilitated”. Defaulted borrowers must request rehabilitation. In the case of borrowers who have a judgement rendered on their loan, borrower payments must be “voluntary” — equal to the amount required under the judgement.

Federal Financial Aid Withdrawal

Leave of Absence or Withdrawal

Students who need to withdraw or take a leave of absence from Cambridge College may do so for academic, disciplinary, personal, or medical reasons. If the student is receiving federal financial aid and withdraws from the College, Life Time Eligibility (LEU) they may be subject to federal financial aid return policies. Students must notify the Financial Aid Office about any change in planned period of enrollment, whether due to drop/withdrawal from a class, leave of absence, a change in academic division, or withdrawal from the College.

Non-Attendance (No-Show)

Non-attendance does not constitute official withdrawal. If a student who began attendance and did not officially withdraw fails to earn a passing grade in at least one course over an entire term, the College must assume that the student has unofficially withdrawn. For this purpose, non-passing grades are defined as No Credit/Incomplete (NCI), No Credit (NC), Withdrawal (WD), Administrative Withdrawal (AW), No Show (NS). Unofficial withdrawals will be determined within 90 days of the end of the term. Federal financial aid recipients will have their awards reviewed and recalculated, resulting in a reduction in federal financial aid awarded.

Return of Title IV Aid

The Financial Aid Office, is required by federal statute to recalculate Title IV financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60% of a term.

- Recalculation is based on the percentage of earned aid using the following Federal Return of Title IV funds formula: Percentage of earned aid = number of days of the term completed up to the withdrawal date divided by the total days in the term. For unofficial withdrawals, the withdrawal date used for aid recalculation is the midpoint of the term. Any break of five days or more is not counted as part of the days in the term.

- Funds are returned to the appropriate federal program based on the percentage of unearned aid using the following formula: Aid to be returned = (100% of the aid that could be disbursed minus the percentage of earned aid) multiplied by the total amount of aid that could have been disbursed during the term.

- If a student earned less aid than was disbursed, the College is required to return a portion of the funds that have been received by the student. Keep in mind that when federal Title IV funds are returned, the student may owe a balance to the College. If a student earned more aid than was disbursed, the College would owe the student a post-withdrawal disbursement which must be paid within 120 days of the student’s withdrawal.

Repayment

Repayment of Federal Funds

Students receiving federal financial aid, who withdraw from the College or stop attending all classes during a term before more than 60% of the term has elapsed, are subject to specific federal regulations.

The amount of Title IV aid that you must repay is determined by the federal formula for return of Title IV funds as specified in Section 484B of the Higher Education Act.

The amount of Title IV aid that you earned during the term before you withdrew is calculated by multiplying the total aid for which you qualified by the percentage of time in the term that you were enrolled (college work-study not included).

Your disbursement or repayment owed:
- If less aid was disbursed to you than you earned, you may receive a late disbursement for the difference.
- If more aid was disbursed to you than you earned, you will be billed for the amount you owe to the Title IV programs and any amount due to the College resulting from the return of Title IV funds used to cover College charges.

Cambridge College will return the unearned aid to the Title IV programs as specified by law:
1. Unsubsidized federal loans
2. Subsidized federal loans
3. Federal Perkins loans
4. Federal PLUS loans
5. Federal Pell Grant
6. Federal Supplemental Educational Opportunity Grants (SEOG)
Repayment of Massachusetts Funds
Students who have received financial aid from the Commonwealth of Massachusetts are subject to the following repayment/refund policy.

The amount of aid you earned during the term before you withdrew is calculated by applying the federal formula for return of Title IV funds:

- If you also received federal Title IV aid this term, then the percentage of Massachusetts aid earned is the same as the percentage of Title IV aid earned.
- If you did not receive Title IV funds, the College shall use the federal formula for return of Title IV funds to determine the percentage of Massachusetts aid earned.

The following are then applied to your tuition fees:

- The amount of state and federal aid earned (see above).
- All other sources of financial aid.
- All scheduled cash payments.
- The unearned portion of state financial aid.

**The result is your remaining unpaid balance of tuition charges and mandatory fees.**

Note: the College cannot make any unauthorized post-withdrawal award and/or disbursement of state financial aid to cover this balance.

Your disbursement or repayment owed:

- If the remaining balance is greater than or equal to the unearned state aid, then additional state aid can be "earned" by a student that equals 100% of unearned state aid.
- If unearned state aid is greater than the unpaid balance, then additional earned state aid has to be equal to the value of the remaining balance.

You will be billed for any amount you owe to Massachusetts financial aid programs and any amount due to the College resulting from the return of Massachusetts funds used to cover College charges.

Cambridge College will distribute the remainder of unearned state aid back to Massachusetts financial aid programs as specified by law.

1. Tuition waiver (need based and categorical)
2. Massachusetts No Interest Loan
3. Tomorrow’s Teachers Scholarship
4. Commonwealth Futures Grant
5. General Scholarship (Mass Grant)
6. Performance Bonus
7. Christian Herter Memorial Scholarship
8. Gilbert Grant
9. Public Service Scholarship
10. Cash Grant (Access Grant Scholarship)
11. Part Time Grant

Excess Funds
In accordance with federal regulations, excess funds from federal financial aid, over and above current charges, cannot be held without written authorization from the student.

---

Quiet Study Space
This area is reserved for students to study. Thank you.
Transfer credit requests, initiated by the student, are evaluated only on the basis of official transcripts. Students must submit a completed admissions application packet, including official transcripts and course descriptions/syllabi, if applicable.

How to Initiate Your Transfer Credit Request

- Please request official transcripts from previously attended institutions as soon as possible.
- If you have any grades not on the ABC scale, ask the course instructor to clearly state the letter grade equivalent in a letter on official college letterhead, addressed directly to the Cambridge College Transfer Credit Office.
- If requesting transfer of required courses into an MEd, CAGS, or EdD, fill out transfer request form (available at www.cambridgecollege.edu/admissions/transferring-credits) and attach course descriptions or syllabi. Photocopies of course descriptions or syllabi must clearly show the course number, title and description; name of the college, your name and date of birth.

Priority Dates
We must receive all documents for transfer credit evaluation (outlined above) by the following priority dates, in order to evaluate your transfer credit by the beginning of the term. Later submission will result in delayed transfer credit awards.

- By April 1 for Summer term.
- By July 15 for Fall term.
- By December 1 for Spring term.

Veterans and Military Students — The Transfer Credit Office adheres to the regulations and requirements outlined in the DoD Military Tuition Assistance Program. It recognizes, accepts and awards credit where appropriate; specifically credits earned through standardized examinations and from American Council on Education evaluated transcripts.

Evaluation Process

- The Transfer Credit Office reviews official transcripts and identifies all courses that meet the general criteria and may be eligible for transfer.
- Undergraduate academic advisors will create an academic plan which includes all eligible transfer credits that meet Cambridge College undergraduate degree/program distribution requirements. Based on the policy below, credits constituting an earned associate’s degree will be accepted in total up to 69 credits. Credits outside of, or above and beyond an earned associate’s degree, will be evaluated for transferability by the academic advisor.
- For licensure programs, specialized concentrations, CAGS and doctoral programs, the program chair reviews the content and approves courses that meet program-specific criteria.
- Final determination of the transferability and programmatic distribution of credit lies with the academic dean of the appropriate school.

In Your First Term
Graduate students — Do not take any course that you hope will be covered by a corresponding course that you have submitted for assessment. Wait until your transfer credit evaluation is completed.

Re-Evaluation of Transfer Credit
If you change concentration or program, you must request a new transfer credit evaluation.

When you return after an absence of one term or more, prior transfer credits are revised according to policies in effect at the time of your return.

Notice Concerning Transferability of Credits and Credentials Earned at Our Institution
The transferability of credits you earn at Cambridge College is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the degree, diploma, or certificate you earn in Cambridge College’s educational program is also at the complete discretion of the institution to which you may seek to transfer. If the credits or degree, diploma, or certificate that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason, you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Cambridge College to determine if your credits or degree, diploma, or certificate will transfer.
Student must be accepted into a specific degree and concentration for transfer credit to be evaluated. The following general criteria will guide the evaluation process.

Courses: General Criteria
- Course credits must be earned at a regionally or nationally accredited degree granting institution of higher learning.
- For courses not included as part of an earned associate's degree, only grades of C (2.0) or better are considered, and such courses must meet program distribution requirements.
- Professional development courses (PD) and continuing education units (CEU) are not eligible for transfer.
- Associate's degrees from regionally or nationally accredited institutions are accepted in their entirety at 60-69 semester hours, including only the courses actually required for the degree.
- A maximum of 90 semester hours from a regionally or nationally accredited degree granting institution of higher learning may be accepted, provided the coursework meets Cambridge College degree/program distribution requirements.
- Students must complete at least one-fourth of their undergraduate credits (30 semester hours), including substantial advanced work in the major or concentration, at Cambridge College.

Standardized Examinations
- Credits earned through standardized examinations (DANTES, DSST, CLEP and AP) may be accepted and will be recorded as transfer credits.
- Credits earned through school-specific testing are not eligible for transfer.
- Credits earned through standardized exams may replace major requirements only at the discretion of the program chair or academic dean.
- Students already matriculated into a Cambridge College program are advised to consult their academic advisor for written approval prior to taking any standardized exams. Without prior approval, acceptance of credits is not guaranteed.

ACE Evaluated Transcripts
Credits recognized through the American Council on Education (ACE) evaluated transcripts will be accepted at their full credit value as follows.
- Up to 60 lower level credits may be accepted, provided the coursework meets Cambridge College general education or elective distribution requirements.
- An additional 30 upper level credits may be accepted provided the coursework meets Cambridge College degree/program distribution requirements.
- No ‘V’ or vocational credits will be accepted for college transfer credits.

Please Note
- Prior written approval by the undergraduate academic dean is required before taking courses at other institutions.
- ACE evaluated and standardized exam credits may not duplicate a course taken at Cambridge College or at another institution.
- Electronic transcripts will be accepted from military branches that only provide electronic transcripts; i.e. Army (AARTS) transcripts which will transition to Joint Services Transcripts on January 1, 2013.

Articulation Agreements
Articulation agreements are partnerships between educational institutions which formalize their relationship to each other, and allow for the direct transfer of academic credit. Cambridge College has developed articulation agreements with community colleges and other associate’s degree-granting institutions in order to expand the higher education opportunities for their graduates. These articulations are designed to maximize the students’ educational experience by providing guaranteed admission into Cambridge College bachelor’s degree programs, and accepting all credits constituting the associate’s degree of an articulating partner.

Any additional credits earned above and beyond the associate’s degree are subject to program distribution requirements (see above).

Cambridge College currently has articulation agreements with the following colleges:

Connecticut
- Asnuntuck Community College
- Capital Community College

Massachusetts
- Bunker Hill Community College
- Greenfield Community College
- Jewish Vocational School
- Mount Wachusett Community College
- Northern Essex Community College
- Quincy College
- Roxbury Community College
- Springfield Technical Community College
- Urban College of Boston
Master’s, CAGS and Doctoral Transfer Credit
https://www.cambridgecollege.edu/transferring-credits/transferring-credits-graduate-programs

The student must be accepted into a specific degree and concentration for transfer credit to be accepted.

**All Courses** must meet the following criteria.
- Only graduate courses designed for graduate degree credit may be accepted.
- Courses completed at regionally accredited institutions authorized to grant graduate/post-graduate degrees may be accepted.
- Only grades of B (3.0) or better are considered.
- Other grades must be confirmed as equivalent to B or better.
- Courses must be degree credit-bearing graduate courses that are not professional development or continuing education unit courses.
- Courses must meet current program requirements.

**School Collaborative Courses**
- School collaborative courses (Cambridge College) courses are not transferable into any licensure program.
- Only one (1) school collaborative course taken at or through Cambridge College prior to matriculating into a non-licensure program may be transferred, if it meets all other transfer credit guidelines and current program requirements.
- Exceptions regarding school collaborative courses will be made under certain circumstances with the approval of the dean of the School of Education.

**Professional Development and Continuing Education Units**
- Professional development and continuing education units (CEU) are not eligible for transfer into graduate programs.
- Professional development course(s) up to three credits total from another institution may be accepted into non-licensure degree programs, providing the granting college or university accepts the course(s) into its own graduate degree program.
- Professional development courses are not transferable into any licensure program.

**School of Education: CAGS and EdD**
CAGS and EdD transfer courses must be advanced graduate level; courses open to undergraduate students are not accepted.

**Courses NOT Acceptable** for master’s, CAGS or doctoral transfer credit.
- Course work taken at other institutions after enrollment in a degree program or during an absence from the College.
- Field experiences, practica and internships.
- Independent learning, research and applied action projects (final projects cannot be replaced by transfer credit).
- Courses/credits included in another degree (anticipated or completed).

**Licensure Course Transfer**
To safeguard your licensure application, a course is accepted for transfer into a licensure program only if:
- The content matches a corresponding Cambridge College required course, meeting the high standards of our programs, and
- It is judged to match the requirements and expectations of the licensing authorities.

**Counseling Licensure Courses** — Final approval of other institutions’ course work for your licensure application is solely within the discretion of the licensing authorities; please seek their advice.

**Educator Licensure Programs** — All transfer of credit into educator licensure programs is defined by the Mass., Department of Elementary and Secondary Education (ESE) as a “waiver.” Records of all waivers are kept in student files, and are subject to audit at any time by the ESE. These records will be required when you apply for licensure.

**Doctor of Education (EdD)**
Nine credits may be accepted from an approved master of education program and 12 credits from an approved CAGS program; total: 21 credits.

**Transfer Credit Limits**

Academic Advising, Policies, Procedures

Academic Standards and Expectations

Academic Affairs prides itself in providing students with excellent instruction and outstanding opportunities for career development and enhancement. We are committed to maintaining an environment that is supportive of your academic needs, and conducive to your creative development as a student.

The provost and the Office of Academic Affairs maintain academic standards and policies that promote the achievement of professional goals. Working through four distinct schools that comprise the essence of Cambridge College, we endeavor to meet your academic needs through a variety of academic programs and services. Our doors of opportunity are open and waiting for you to join us on a horizon broadening adventure.

Cambridge College reserves the right to change academic policies including course structure, availability, content, or requirements solely at its own discretion as it deems necessary and appropriate.

Academic Advising

Students arrive at Cambridge College with an idea of what they want to accomplish. Some will know how to assimilate into the college experience without much need for help. Others will need to consult, ask questions, make sure they are on the right path, and learn to read the signs of success. No matter which type of student you are, we think that when students discuss plans and get advising along the way, there is a greater likelihood for success.

Cambridge College builds an academic advisor into each of its schools and programs:

- In the School of Undergraduate Studies, the Undergraduate Academic Advising Office provides academic advisors and an academic success program for students.
- The School of Education provides academic advisors for its graduate students. Program chairs serve as the primary advisor with seminar leaders and site coordinators providing additional support.
- The School of Psychology and Counseling provides an academic advisor for its graduate students. In school guidance and school adjustment, the program chair provides further advising.
- The School of Management provides an academic advisor for its graduate students; the seminar leader provides further academic advising.

These skillful advisors can provide information, help arrange appropriate course schedules and build professional networks. There are systems to get used to, course loads to manage, forms to know about and deadlines to keep. Advisors can help, so can program chairs, academic deans and office administrators: the College supports students with the right people providing useful questions and answers.
Students Seeking Degree/Certificate  
(Matriculated)

**NEW Students**
1. Complete your admissions file and be accepted.
2. Get academic advising to be sure to register for the right courses.
3. Register online — On the MyCC web portal homepage, log in with your user name (student ID) and password, and follow online instructions to register.

If you forget your password, go to the MyCC homepage and click on “I forgot my password” and follow instructions online.

For assistance with registering, please call the Registrar’s Office.

**CONTINUING Students**
1. Contact your academic advisor to plan next term’s courses.
2. Register online when web registration opens. (Clear any holds on your account).

**IMPORTANT NOTES**

Registration is first-come, first-served. There is no waitlisting. Courses or sections may be canceled due to underenrollment or closed because of class size limits. Students who find an anticipated course is closed or cancelled should contact the Financial Aid Office immediately to find out whether their eligibility for financial aid is affected.

Students must not register for courses outside their academic program, as financial aid eligibility may be lost. See full policy at www.cambridgecollege.edu/courses-outside-academic-program.

Holds and Registration — A restriction or hold may be placed on a student’s record for admissions, academics, graduation, business, financial-aid, disciplinary or immunization reasons. A hold may prevent a student from registering for courses. If a hold is placed on a student record, when the student enters her/his user ID and password into MyCC, the student will see a description of the hold and contact information, so that the student can remedy the situation. Registration will not be possible until all holds are reconciled and removed. See full policy at www.cambridgecollege.edu/student-holds-policies-and-procedures.

<tr>
<td>Graduate</td>
<td>4 credits/term</td>
<td>12 credits/term</td>
</tr>
</tbody>
</table>

* The online registration system limits course registration to the maximum shown above. Exceptions require prior written approval from an academic advisor and academic dean, and are rare.

Online and Hybrid Courses — Students must limit the number of credits taken in online courses to less than 50% of their program credits. Hybrid courses that combine online and in-seat residency in a single course are considered in-seat and not online.

Repeat Courses — Students may repeat a course once. See policy at www.cambridgecollege.edu/repeat-courses.

Students Returning After Absence — Before registering:

Students enrolled in a degree or certificate but not registered and taking courses are considered “absent” that term or year.

Students absent for two or more consecutive terms will be placed on academic hold, and must check in with their dean to certify that they are in good academic standing.

Students absent fewer than five years must visit the Registrar’s Office to complete a Reinstatement form.

Students absent for five years or more need to re-apply to a program that is currently offered, submitting all materials to the Admissions Office. They must meet all current admission and academic program requirements.

Please be aware that some programs may no longer be available. Your academic advisor or the dean can assist you to find a program that may accept much of your earlier course work, and help you map out your remaining course work.

See policy at www.cambridgecollege.edu/returning-student-policy

Auditing Courses — Courses which are audited do not count towards degree requirements and cannot be converted to credit at a later date.

Individuals wishing to audit a course must contact the Registrar’s Office to verify that the course is available for auditing. Practicum and internship courses may not be audited. Once registered, the individual should consult with the course instructor at the first class to discuss expectations for class participation.

No financial aid is available for auditing courses. Please note that financial obligations will be incurred for an audited course unless the course is dropped before the add/drop deadline.
Non-Matriculated Students
See policy at www.cambridgecollege.edu/college-policies.

Non-matriculated students may register for most in-seat, hybrid and online courses; they may audit courses as well. However, the College reserves the right to restrict access by non-matriculated students to particular courses.

To get the full benefit of the course work, any course prerequisites must be met. The prior education and experience required for the corresponding degree are recommended.

Please fill out a paper Non-Matriculated Students Registration form, which is available at the Registrar’s Office or www.cambridgecollege.edu/academic-policies-procedures/course-registration.

Students not matriculated into a degree or certificate program at Cambridge College are allowed to take up to nine credits for credit without applying for and enrolling in a degree or certificate program. Students should seek advisement from the academic dean of the school in which they are taking courses. Certain exceptions based on program, alumni status or location may apply.

Acceptance of credits into a degree or certificate — Courses completed at Cambridge College by students not enrolled in an academic program may be evaluated for acceptance into Cambridge College programs by the dean or program chair of the receiving program. There is no guarantee that courses taken as a non-matriculated student will be accepted into an academic program at Cambridge College.

Adding and Dropping Courses
See policy at www.cambridgecollege.edu/add-drop-policy

ONLINE Process BEFORE Add/Drop Deadline
Students may ADD or DROP a class by the add/drop deadline listed in the Academic Calendar for the term. Log in to the MyCC web portal and click on the Student Registration tab; click on add/drop courses.

PAPER Process AFTER Add/Drop Deadline
Submit a paper form to the registrar, with all required signatures.

You may register for additional courses before the first class if space is available and school policies are satisfied. Faculty signature is also required to add a course if the course is full.

However, courses added after the add/drop deadline may be subject to a late registration fee.

Dropped courses will appear on your student record as follows:
• Courses correctly dropped before add/drop deadline or before course starts will not appear on your record.
• Grade of Withdrawn (WD) — Completed form received after course started, after the add/drop deadline.
• Grade of No Show (NS) — Registrar’s Office has not received form.

Important: With grades of Withdrawn and No Show you remain responsible for tuition.

Please Note
• Adding or dropping courses may impact your financial aid.
• If courses are not correctly dropped in a timely manner, students may remain liable for tuition cost. (See Tuition and Payment).
• No verbal or telephone “drops” or “adds” permitted.
• Students must register for a class or add it as described above. Student names hand-written in to a class roster are not thereby registered. Unregistered students cannot attend class or receive academic credit. See Class Rosters policy at www.cambridgecollege.edu/class-rosters.
Academic Integrity
Cambridge College students are expected to meet high academic and ethical standards as they engage in experiences of genuine learning. They are expected to submit their own original work in course assignments and exams.

Violations of Academic Integrity
- PLAGIARISM
  Plagiarism is the use of another's work, thoughts, or language without giving credit; summarizing, copying, or using the work of another person or source without proper acknowledgement. Plagiarism is dishonest and a serious academic offense.

- CHEATING
  Cheating appears in multiple forms such as:
  1. Unauthorized use of notes, texts, or other aids during an exam or in completing course assignments.
  2. Copying the work of another student.
  3. Submitting the same assignment for more than one course, subject to faculty discretion.
  4. Sharing student work with a group when such sharing has not been authorized by the professor.

Any breach of academic integrity is grounds for a grade of F/No Credit in academic courses and/or academic probation, suspension, or dismissal.

See full policy at www.cambridgecollege.edu/academic-integrity.

Federal Credit-Hour Definition
In accord with federal regulations, a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that reasonably approximates:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately 15 weeks for one semester-hour of credit, or the equivalent amount of work over a different amount of time, or
2. At least an equivalent amount of work as required in paragraph 1 for other academic activities such as lab work, internships, practica, studio work and other academic work that leads to the award of credit hours.

Student Class Attendance
Class attendance is mandatory for all courses taken at Cambridge College. Students must provide a valid excuse for any and all absences and, if requested by the instructor, provide supporting documentation. Students who miss more than 10% of the scheduled class meetings may, at the discretion of the instructor, be subject to a failing grade.

Online course attendance is calculated as synchronous and/or asynchronous online participation, as determined by the instructor and the delivery model and structure of the course. Scheduled participation and completion of all modules is required.
Change of Academic Program, Major, or School

When thinking about changing your program, your course load, or enrollment status, seek advising. We recommend students check with their academic advisor or seminar leader, the Financial Aid Office and Registrar’s Office to learn about the academic and administrative procedures needed.

Within One School — Students who wish to change their program or major within their current Cambridge College school (for example, the School of Education) must complete the Change of Academic Program form and obtain all required signatures.

Between Two Schools — Students who wish to change to a program in another Cambridge College school (for example, from the School of Education to the School of Management), will need to meet the admission requirements of the receiving school, and be approved for admission by that school.

Students must consider carefully and explore the financial and academic implications:

- Meet with your current academic advisor, the chair of your new program, and the academic dean to discuss the change and get approval.
- A different program may have additional program-specific admission requirements, and may require additional courses, time, effort, and expense.
- You will be required to meet the requirements of your new program that are current at the time of your program change.
- Courses you have already completed may not be accepted into a different program.
- Transfer credits accepted may differ.
- Financial aid rules and awards may differ.

Note: all students receiving financial aid must see a financial aid officer before making any program change, or any changes in the total number of credits taken in a term.

Students who do not receive financial aid are encouraged to meet with the bursar to address financial implications of their change.

Course Evaluation Survey

Cambridge College is committed to fostering teaching excellence, and we believe that students can make a significant contribution to this goal by completing online, a confidential course evaluation survey. The purpose of this survey is to help the College improve the quality of curriculum and instruction. At the end of each course, students will receive an e-mail invitation to participate sent to their Cambridge College e-mail address. For further information, please contact the Office of Research, Planning and Evaluation.

Course Waivers

Additional courses must be taken to make up the credits for courses accepted for waiver. See your academic advisor.

School of Undergraduate Studies — Some required courses may be waived if mastery of the learning outcomes is demonstrated by the successful completion of comparable coursework from a previous, regionally accredited college or university. Eligibility for waiving a required course or courses will be determined by the student’s advisor in conjunction with the academic program chair and/or academic dean. Essential skills courses in writing and mathematics may only be waived if a student has successfully completed previous college-level work in those areas, and a standardized assessment, administered by the College, indicates appropriate competencies.

School of Education — Required licensure courses may be waived if mastery of the learning outcomes is demonstrated by successful completion of comparable coursework from a previous, regionally accredited college or university. Other required courses may be waived if students demonstrate comparable graduate learning. Eligibility for waiving a required course will be determined by the program chair with subsequent approval by the dean.

School of Psychology and Counseling — Course waivers are typically requested along with evaluation of transfer credit. (See Transfer Credit.) Other courses must be taken in place of any credits waived.

School of Management — Required courses may be waived if students demonstrate comparable graduate learning. Some essential skills courses may be waived if mastery of the learning outcomes is demonstrated through assessments administered by the College. Additional management courses must be taken in place of any credits waived. Contact the dean of the School of Management.

Courses Taken at Other Institutions After Matriculation

Undergraduate — Only the following may be accepted into the School of Undergraduate Studies while a student is enrolled in the program.

- Courses needed for graduation that are not offered within two terms of the anticipated graduation date.
- Electives not available at Cambridge College that are pre-approved by the undergraduate dean or program chair.

Written approval from the academic advisor and undergraduate dean is required.

Graduate — Courses taken at other institutions while a student is enrolled in a Cambridge College master’s degree program may not be transferred towards that degree. Special exceptions may be considered with the academic dean’s approval.

Leave of Absence

A leave of absence is a process designed to allow students interrupting the academic program for a limited period of time. During the limited leave, the student is considered to be on active status. A leave of absence may be granted by the academic dean or the provost. The LOA will become part of the student’s permanent record.

Students should consult with an advisor and the Financial Aid Office about whether to request a leave of absence and determine the financial aid or re-enrollment implications of not registering.

The length of the leave must not exceed 180 days in any 12 month period.

Leaves of absence must be submitted in writing, signed and dated, to the academic dean or designee explaining the details and circumstances surrounding the request. Acceptable reasons include:
Physical or mental health concerns; family obligations; financial concerns; military service; academicians — sequenced courses are not offered for the upcoming term, reconsidering major, academic struggles, etc.; career opportunities. Students with other circumstances should consult with their advisor(s) for appropriate alternatives. The student must apply in advance for a leave of absence unless unforeseen circumstances prevent the student from doing so. The request must always be accompanied with appropriate documentation and evidence. In any case, there must be a reasonable expectation that the student will return from the LOA and the request should include the anticipated date of return and any specific issues the student must resolve before returning. All financial aid rules will apply and it is the responsibility of the student to seek and understand the financial implications of applying and obtaining a leave of absence (see Financial Aid).

The academy dean or designee will review the request and may ask for additional information in evaluating it.

The academic dean or designee will inform the student of the decision in writing within five business days of the receipt of the application. If the request is approved and the student is a Title IV loan recipient, the letter will explain the effects that the student’s failure to return from an LOA may have on the student’s loan repayment terms, including the expiration of the student’s grace period. The academic dean or designee will inform the Registrar’s Office, Financial Aid Office and dean of Student Affairs Office of the decision. If the request is denied, the academic dean or designee will discuss other options with the student.

The institution will not assess the student any additional institutional charges, the student’s need may not increase, and therefore, the student is not eligible for any additional federal student aid.

Students may return before the expiration of their leave. Upon wishing to return, the student must contact their advisor or academic dean.

A student may appeal the decision to the provost in writing. The provost’s decision is final.

Withdrawal
Current students who do not plan to take courses in the next term must:
1. Discuss it with the seminar leader/academic advisor, and
2. Submit a completed Withdrawal form (available at www.cambridgecollege.edu/offices/registrar) to the Registrar’s Office.

This form must be submitted to the registrar in order to receive any reduction in tuition liability and to inform lending institutions of the change in enrollment status. A student who drops out without submitting the form will receive grades of No Show, and no reduction of tuition liability.

If the Withdrawal form is received by the Registrar’s Office after the term Add/Drop deadline, the student remains responsible for tuition payment.

Medical Withdrawal — Upon presenting appropriate medical documentation to the dean of student affairs, a student may be allowed to withdraw for medical reasons. All withdrawal policy requirements apply (see above). See full policy at www.cambridgecollege.edu/medical-withdrawal-policy.

Grades and Grading
See policy at www.cambridgecollege.edu/academic-policies-procedures/grades-and-grading-policy

Faculty have discretion over grades. Grades are based on performance in relation to learning outcomes listed on each course syllabus.

Grade Entry — No one other than instructors may enter final grades using the MyCC web portal. If an instructor is unable to enter grades through the portal, he or she is to forward a grade list to the Registrar’s Office for entry. In the event that an instructor fails to submit grades to the College, the provost may assign the dean of the school in which the instructor teaches to issue (or change) the missing grades.

Credit (CR) is a grade denoting content competence.
- Undergraduate programs — equivalent to D or better.
- Graduate and post-graduate programs — equivalent to B or better.

No Credit (NC) means that the student has not met expectations and that the academic work will not be counted toward degree requirements. Students who receive a grade of “No Credit” in a required course or seminar are required to repeat the course or seminar. In general, reasons for a grade of “No Credit” include:
- Lack of class attendance — absent for more than four hours of class time.
- Required work not completed to the instructor’s standards.
- Failing grades on required work.

Students incur financial liability for courses attempted whether or not credit is awarded.

No Show (NS) indicates that a student did not attend a class and/or did not formally withdraw from the course. The student remains financially liable for the tuition.

Changes in Grade — Grades (including CR) are considered to be final unless a clerical or procedural error has been made. If there are discrepancies, please contact the instructor and/or the Registrar’s Office.

Undergraduate Grades
Grades of “Credit” or “No Credit” are awarded only for portfolios, challenge exams, standardized exams, seminars, and skill development courses.
Graduate and Post-Graduate Grades
Graduate and post-graduate programs award passing grades of B or better. Coursework below B receives a grade of “No Credit”. Grades of “Credit” or “No Credit” may be an option for students in specific courses.

Incompletes (INC)
An incomplete grade (INC) may be granted by an instructor if the student has satisfactorily completed ≥67% of the required work for the course, and the instructor has agreed to consider pending work for submission before the end of the following term. Students have one term after receiving an INC to submit outstanding work. INC’s that are not converted to a grade after one term will be converted to a grade of NCI (No Credit Incomplete) or a letter grade, assigned by the instructor, consistent with the work previously submitted for the course. NCI grades are factored into a student’s GPA as 0.0.

Note: Granting an incomplete is a privilege afforded to the student, not a right. If an instructor agrees to grant an incomplete, an “Incomplete Course Work Agreement” form, which clearly states the work needed and the timeframe in which it must be delivered must be signed by both the student and the instructor.

Academic Support for Students With Incomplete Grades
At the end of each term, students who have two or more Incomplete grades on their grade report will receive an “academic hold” on their account. Before they can register for the next term, these students must:
- Meet with their faculty advisor. International students must also meet with the international student advisor.
- Meet with course instructors, complete their coursework satisfactorily, and clear the Incomplete grades.

Incomplete Final Project
Graduate: If students do not complete the final project by the deadline within the term in which they registered for it, a grade of Permanent Incomplete (PIN) is assigned and cannot be changed to a grade thereafter. Students must register for the project completion course for their program (e.g. 801 for ILP/IRP, and 699 for Graduate Management Capstone) in order to complete their project and degree.

Undergraduate: If the Capstone is incomplete, students have one term to finish the work and have theIncomplete grade changed to a letter grade. If the Capstone is still incomplete, the student must register in the next term for the Capstone completion course in order to receive a grade. For example, students who get an Incomplete grade in BHS490 and do not finish it in the following term must register for BHS491 in the next term.

Students should be aware that there are fees associated with incomplete final projects. See Tuition and Payment.

Satisfactory Academic Progress
Students must make satisfactory academic progress to continue at Cambridge College as well as receive financial aid. Student records are reviewed at the end of each term. (See policy at www.cambridgecollege.edu/federal-financial-aid-student-satisfactory-academic-progress-sap.)

Student Records

FERPA — Student Records Access and Confidentiality
In compliance with the Family Education Rights and Privacy Act (FERPA) of 1974, as amended, the College does not permit the release of personally identifiable information in student records without the written consent of the student, except as specifically allowed by FERPA statute or regulation. The registrar controls access to and disclosure of student education records and maintains safeguards against unlawful disclosure. Record of the access and disclosure of student records must be maintained by the office providing such records (usually the registrar), and will be made available to the student upon request.

Students have the right to inspect and review all College records, files and data directly related to themselves with certain exceptions such as financial records of the student’s parents, confidential recommendations which were received before January 1975, or records to which students have waived their right of access. Official records and data related to a student are incorporated into his/her file, kept in the Registrar’s Office. Other student records may be maintained in the office which created the records such as academic deans, faculty, dean of students, etc. The College reserves the right to charge for copies of student records and will prohibit release of official transcripts for students who have financial holds.

FERPA allows, without prior written authorization from individual students, release of personally-identifiable directory information. Non-directory information may be accessed by individuals determined to have legitimate education interest, authorized representatives of federal, state and local educational authorities, accrediting organizations, and officials of another institution of postsecondary education where a student seeks or intends to enroll. Directory information at Cambridge College includes name, class year, home address and telephone number, e-mail address, dates of attendance, program status/major, degrees awarded, high school and any college previously attended.

Students who wish to keep their entire directory information private (a “FERPA block”) may contact the registrar. Students will be annually notified of this FERPA policy by web notice, catalog, email or other appropriate delivery method.

Cambridge, MA • 617.868.1000 • www.cambridgecollege.edu
FERPA does not apply to the records of applicants for admission who are denied acceptance, nor does it apply to applicants who are accepted but choose not to attend Cambridge College. Admitted students are covered by FERPA once they have enrolled. A student is considered enrolled on the first day of classes.

FERPA defines student as any individual who is or has been in attendance at an educational agency or institution and regarding whom the agency or institution maintains education records. 34 CFR 99.3. In interpreting this definition with respect to application materials, Cambridge College has generally taken the position that records sent by the student to the college are not protected as education records unless/until the student matriculates.

If students take exception to anything in their folders on the grounds that it is inaccurate, misleading or otherwise inappropriate, they have the right to challenge its inclusion and seek to have it corrected or deleted. A written request must be submitted to the registrar for a joint meeting with the provost and vice president for academic affairs, the registrar, and any other appropriate person to discuss the matter.

If the College fails to comply with FERPA requirements, written complaints may be submitted to the Family Policy and Regulations Office, U.S. Department of Education, Washington, D.C. 20202.

See full policy at www.cambridgecollege.edu/ferpa—student-records-access-and-confidentiality.

Change of Name, Address and Contact Information

Address and Contact Information — When registering online each term, students are asked to confirm or update some personal information including their mailing address and contact information.

Name — Students wishing to change their names must provide legal documentation showing the reason for the change, as well as a written version of the new name. Acceptable documents include marriage certificates, divorce papers, passports, social security cards, and other court-issued documents. Students should send the request in writing and include their student ID number and/or social security number if ID number is not known. Once a student graduates the record is closed; name changes are not possible unless the student is reapplying for a new degree. See full policy at www.cambridgecollege.edu/change-name-address-and-contact.

Transcripts

Students may request their official transcripts from the Registrar’s Office at any time. If students are receiving financial aid, transcripts are held until all funds have been received.

Transcripts for graduating students are not released until after the degree conferral date, when their academic record has been cleared for graduation and their accounts are paid in full and cleared by the Bursar’s Office. Student transcripts are kept permanently.

Go to www.cambridgecollege.edu/offices/registrar to get the Transcript Request form. The completed form must be accompanied by full payment (see Tuition and Fees for cost).

Verification of Degree or Enrollment

Cambridge College has authorized the National Student Clearinghouse to provide verifications. The Registrar’s Office does not provide verifications over the phone. If you are an employer or background screener, you may contact the National Student Clearinghouse’s DegreeVerify service by web or by mail.

Web: www.degreeverify.org
Mail: National Student Clearinghouse
2300 Dulles Station Boulevard, Suite 300
Herndon, VA 20171

Educator Licensure/Certification Verification

State program verification forms are processed by the Office of the Dean of the School of Education. Forms cannot be completed until the graduating student’s conferral date.

Graduation

Preparing to Graduate

- Grades Required
  - Undergraduate students must successfully complete all components of their academic program with grades of D or better, or Credit. A cumulative grade point average of 2.0 (letter grade of C) is required for all undergraduate courses completed at Cambridge College.
  - Graduate students must earn grades of B or better for successful completion of all graduate courses counted towards degree completion, with a cumulative grade point average of 3.0.

- Intent to Graduate form — Students planning to graduate must complete and submit to the Registrar’s Office an Intent to Graduate form. It must be submitted during the term the student intends to graduate, by the deadline published in the academic calendar, in order for the student’s academic record to be reviewed for graduation clearance. Students must meet with their academic advisor and review their academic plan to ensure that all program requirements will be completed by the end of the term.

Registrar Clearance for Graduation

The registrar will review records of students who have submitted the Intent to Graduate form by the deadline.

Candidates who have completed all academic requirements are notified by the Registrar’s Office via Cambridge College email. Their academic records are closed and the degree conferral date is placed on their final transcripts. Candidates who have not satisfied the academic requirements are informed via Cambridge College email of their status and next steps.
Degree Conferral

The College has three conferral dates for graduation, in January, June, and August. A student who completes all academic program requirements and successfully completes the graduation clearance process may request an official transcript from the Registrar's Office at any time after the degree conferral date (see Transcripts.)

Diplomas

Diplomas are mailed to all students who have been financially and academically cleared within three months of the degree conferral date. Diplomas are mailed via U.S. mail to the address that is in the student database as of the commencement date. If a hold is removed from the student's record after the original diploma mailing, the student must contact the Registrar's Office to arrange shipment of the diploma.

Student's Official Name — All name changes must be received, verified and processed by the Registrar's Office prior to the degree conferral date.

Replacement Diplomas — Students who need a replacement diploma must request it in writing, including their name, signature, student ID number, telephone number, and an up-to-date address. Replacement diplomas cost $27. Students may include credit card information, or a check or money order made out to Cambridge College. The replacement diploma will be mailed via U.S. mail.

Commencement Ceremony

One commencement ceremony is held each year in Boston, in June. Graduates from all Cambridge College locations are invited to participate. Diplomas are not presented at the Commencement Ceremony, but are mailed.

“March Only” Conditions

Students may be allowed to “march only” in the Commencement Ceremony with the status of “participants” only, under the following conditions:

- All core requirements, including the final project (e.g. Capstone, Independent Learning/Research Project, Action Research Project) and required practicum and/or internship, must be completed and a passing grade documented in the student's academic record by the grade posting deadline.
- Six or fewer credits remain to complete the course of study; the credits are offered and completion is anticipated in the summer term.
- The student has registered for the summer term, for all remaining credits, and the registration has been processed.
- Exception by Provost.
- A student must submit a Petition to March Only to the Registrar after registering and no later than April 10. The form is available at www.cambridgecollege.edu/registrar. Be sure to complete the second page (August Intent-to-Graduate form).
- No College written materials shall refer to the student as a Cambridge College graduate or otherwise imply that the student has satisfied Cambridge College graduation requirements.
- Students who have not completed graduation requirements cannot obtain a diploma and will not be given any written documentation that implies that they have graduated.
The Office of Student Affairs (OSA) serves as a vital resource for all Cambridge College students. With a focus on enhancing their quality of life, the OSA supports the many facets of a student’s life through **FOUR PILLARS of STUDENT CARE**:

**Student COMMUNICATION** — Orientation and training events provide students with the necessary information and resources as they progress at the College.

**Student CONDUCT** — The Code of Conduct establishes standards of personal conduct for each student with the goal of sensitive and responsible behavior towards one another.

**Student CARE** — Care for students is provided through disability and career advising, and undergraduate academic advising. The OSA also makes available mediation for personal concerns and unresolved issues.

**Student COMMUNITY** — Opportunities for personal and academic growth are accessible through the co-curricular life where students are encouraged to participate in skill building workshops, networking events, and College student engagement events.

For policies about starting and operating student organizations, see policy at www.cambridgecollege.edu/office-student-affairs-osa-policies-student-community. If you have any questions or concerns feel free to contact the dean of student affairs.

Whether you are new to college or returning after years away from school, the student affairs and student support staff understand that the transition can feel a little overwhelming at times. They are ready to offer you guidance and assistance from orientation through graduation and are committed to providing you with the resources, support, assistance and advice that will help you be successful. We are committed to helping you become involved with the Cambridge College community both inside and outside of the classroom and allowing to achieve your potential. We hope to see you in our offices often throughout your Cambridge College career and are here to assist you in any way that you need us.

**Career Resources**

The Cambridge College Career Resource Center helps all undergraduate and graduate students to grow DEEP in their career development process. DEEP (Discover, Explore, Experience, Pursue) is the career development process created to fit each student’s individualized needs. Discover yourself through self-assessment. Explore your chosen career path through research. Experience your career field with hands-on learning. Pursue your career dreams. Career Resources helps students with informed career decisions, job search strategies, and exploration of volunteer, professional, and educational opportunities consistent with their interests, abilities and values. The Cambridge College Career Resource Center serves all students enrolled in degree programs at all sites. Services available include individual career counseling, graduate school application assistance, resume and cover letter reviews and mock interviews.

Job listings are accessible via MyCareerPATH, the career management system as well as resources. Visit MyCareerPATH (www.cambridgecollege-csm.symplicity.com) for online career resources including resume, interviewing, and networking guides. Helpful sample documents can also be found.

Career Services also sponsors career development workshops, career panels, and career fairs, in which all students are invited to participate to begin making connections with employers and alumni. We provide career development resources, but are not a job placement service.

**Cambridge**: To make an appointment for a resume or cover letter review, or to discuss other career development questions, contact the office via e-mail: careerservices@cambridgecollege.edu.

**Regional Cambridge College locations**: Virtual career resources are available to all students and staff. For assistance with resume or cover letter review, or to discuss other career development questions, contact the office via e-mail: careerservices@cambridgecollege.edu.

Enrollment in Cambridge College or completion of an academic program does not guarantee employment.
Disability Support
Cambridge College is committed to providing equal access to all educational opportunities to students with physical, psychological, or learning disabilities.

It is important to provide documentation of your disability as soon as possible as many of the services provided are outside of the College and must be arranged far in advance. Please contact the Office of Academic and Disability Support Services to arrange for an intake meeting and to discuss your needs. The Office can be contacted at disabilitysupport@cambridgecollege.edu or by phone at 617.873.0191.

Disability Declaration and Documentation — Students with disabilities at Cambridge College are encouraged to contact the Office of Disability Support (ODS) to request appropriate services but are not required to disclose any disability. All students seeking accommodations under the Americans with Disabilities Act must self-identify with ODS and provide appropriate information. Students must disclose disability directly to ODS in order to receive status as a student with a disability. Disclosure to faculty, admissions counselors, or other staff members is not considered official disclosure.

Initial self-disclosure may be initiated through phone, email, or in-person, but receipt of accommodations will require an in-person meeting unless the student takes classes at one of the College’s regional locations or unless an in-person meeting is impossible for another legitimate reason. In cases where an in-person meeting is not possible, only phone or video-call conversations will be acceptable.

Appropriate documentation — ODS asks students who request disability accommodations to describe their disability, their past use of accommodations, and the disability’s likely impact on their educational experiences. Documentation provides a valuable tool for helping Cambridge College understand how courses, systems, and facilities may present barriers, and for planning strategies, including reasonable accommodations, that provide access. ODS uses external documentation to augment conversations with students and to support requests for accommodations.

Types of documentation supportive of requests include medical records, psycho-educational testing, school records, and letters or affidavits from mental health professionals. If students do not have copies of this type of information, they are welcome to meet with ODS to discuss other ways to demonstrate a connection between the condition and academic barriers anticipated or currently being faced.

See Disability Declaration and Documentation Policy at www.cambridgecollege.edu/college-policies.

Confidentiality — The Office of Disability Support Services (ODS) is committed to ensuring that all information and communication pertaining to a student’s disability is maintained as confidential as required or permitted by law. See Policy on Confidentiality of Disability Documentation at www.cambridgecollege.edu/college-policies.

Accommodations — Students with appropriately documented disabilities may be eligible for accommodations in accordance with the Americans with Disabilities Act. Under this law, students are eligible for accommodations which are deemed reasonable by the College. At the initial intake meeting, appropriate accommodations will be discussed. Students must meet with or contact the coordinator of academic and disability support services every term to set up letters sent to faculty. Accommodations do not automatically transfer from term to term and may be course specific. It is the responsibility of the student to initiate the accommodation process from term to term.

All students are expected to fulfill essential course requirements in order to receive a passing grade, with or without reasonable accommodations. Accommodations cannot be granted retroactively. For more information, please visit www.cambridgecollege.edu/student-affairs/disability-support-services.

Disability grievances — See policy and procedure at www.cambridgecollege.edu/college-policies.

Emergency Phone Calls for Students
If a caller asks that a student be located because of an emergency, College staff take the caller’s name and phone number, make their best effort to find the student, and give this information to the student if located. To protect student privacy, the College does not inform the caller whether the student is on the premises or whether the call is returned. The College does not convey non-emergency messages.

Health and Medical Care
In the event of a medical emergency, security staff will call an ambulance. Students are responsible for their personal health and medical care. The College does not provide medical services.

Health Insurance
In compliance with state public health departments, Cambridge College requires its students to comply with state laws regarding health insurance for college students. See Tuition & Payment.
Immunizations
Cambridge College requires all students enrolling in a degree or certificate program (full-time or part-time) to comply with the immunization requirements for full-time college students of the state where their Cambridge College classes are located. This is because our students often alternate between full-time and part-time study from term to term.

Massachusetts: immunizations required (subject to change by MA):
- Hepatitis B: 3 doses or laboratory proof of immunity
- TDap (tetanus/diphtheria): 1 dose
- MMR (measles, mumps, rubella): 2 doses or laboratory proof of immunity
- Varicella (chicken pox): 2 doses or reliable history of chicken pox (e.g. diagnosis by physician), or laboratory proof of immunity, or birth before 1980 in the U.S. (except for health science students)

Only for programs with dormitory residency (e.g. Summer Institutes):
- Meningococcal: 1 dose MCV4 or MPSV4 in the last five years. (Students may decline the vaccine after they have read and signed the MDPH Meningococcal Information and Waiver form provided by the College.)

See Massachusetts immunization guidelines at: http://www.mass.gov/eohhs/docs/dph/cdc/immunization/guidelines-ma-school-requirements.pdf

International students — Any student obtaining, maintaining, or regaining F1 nonimmigrant student status through matriculation in a Cambridge College degree or certificate program must abide by all policies and rules set forth for full-time students, as full-time enrollment is, generally, a requirement for maintaining F1 status. These policies and rules are not nullified by an approved reduction of course load."

Orientation
Orientation introduces new students to the Cambridge College community, helping them to make a smooth academic and personal transition into the College. Informative publications are distributed. Academic and program chairs meet new students and provide course advising and explain program paths. They also deliver information on degree completion, licensure/certification requirements, and course registration. Students also meet their new classmates.

Orientation is required for all new students.

The dean of student affairs and directors collaborate to provide students at regional Cambridge College locations with information and resources to help them get started at the College.

Student Government
Cambridge campus — Students participate in College governance through the Student Advisory Board for their school or program. Open meetings facilitate communication and discuss ways to improve college-wide services, programs and policies. The College's Senate subcommittee on Marketing, Student Services & Retention helps departments develop policies and procedures that facilitate quality student service and retention. Meeting dates are posted on the campus website, sent monthly College-wide.

Student representatives are elected to participate in the College Senate.

Regional Cambridge College locations — Students are invited to contact the site director with creative suggestions for student participation efforts.

Supportive Resources
At the main campus, a list of local external resources is available from the Office of Student Affairs. At regional Cambridge College locations, similar information is available from the center director.
- Drug and alcohol rehabilitation programs.
- Local agencies and/or private practitioners who provide assistance with alcohol and substance abuse.
The Student Code of Conduct ("Code") applies to all students enrolled in any course or program at Cambridge College, including regional locations and the NITE program. In addition to all on campus academic and social activities, the Code also applies to College-sponsored or supervised events off campus and to off campus conduct by students that, in the judgment of the College, may affect the interests of the College.

Prohibited conduct is not intended to be all-inclusive or to limit the types of inappropriate conduct that may subject a student to sanctions or disciplinary action. Rules and regulations of the College and departments that are not listed below or excluded below are incorporated herein by reference. Such rules and regulations may be communicated to students in publications and posted notices including, but not limited to, the Student Handbook, Academic Catalog, enrollment contracts, MyCC web portal, and school-specific publications.

Notwithstanding the above, the Code does not cover violations of academic policies such as academic dishonesty or plagiarism.

Violations of academic policies will be addressed by the undergraduate dean or appropriate graduate school dean. In the event that conduct may violate both the Student Code of Conduct and academic policies, the dean of student affairs, in conjunction with the student’s school and/or the provost will determine how the student’s conduct should be addressed.

When a student is considered to be a threat to either another person or to himself or herself, property, or the orderly functioning of the College, the student may be removed or suspended immediately from the College by the dean of student affairs, in his or her sole discretion; unauthorized use of alcoholic beverages; or underage drinking.

Examples of prohibited conduct include, without limitation:

- Behavior or activity that may endanger the safety of one’s self or others, including, but not limited to, the possession and/or use of firearms, fireworks, dangerous weapons, or hazardous chemicals.
- Vandalism or damage, destruction or defacement of property.
- Theft of College property or the property of any person while on College premises.
- Any violation of the Cambridge College Drug and Alcohol Awareness Policy and Program, including, without limitation, possession, sale, or use of any controlled substance without medical authorization; unauthorized use of alcoholic beverages; or underage drinking.
- Any violation of the Cambridge College smoke-free policy.
- False reporting of an emergency or tampering with fire safety equipment, including, but not limited to, false reporting of a fire or a bomb threat or tampering with other fire related equipment.
- Unauthorized presence in or forcible entry into a College facility or College-related premises, including, but not limited to, College building roofs or fire escapes.
- Unauthorized use of College property, equipment or keys, including networks, computers, software or other information technology resources.
- Illegal peer to peer downloading or the unauthorized use of intellectual property.
- Violation of policies regarding children visiting the College.
- Failing to follow the reasonable directives of a university official, including violating the terms of a disciplinary sanction imposed by this policy.
- Hazing: The term “hazing” shall mean any conduct or method of initiation into any student organization, whether on public or private property, which willfully or recklessly endangers the physical or mental health of any student or other person.

Such conduct shall include whipping, beating, branding, forced calisthenics, exposure to weather, forced consumption of any food, liquor, beverage, drug or other substance, or any other brutal treatment or forced physical activity that is likely to adversely affect the physical health or safety of any such student or other person, or that subjects such student or other person to extreme mental stress, including extended deprivation of sleep or rest or extended isolation.

Sanctions and Disciplinary Actions

Considerations in Imposing Sanctions

Discipline sanctions, up to and including expulsion, may be administered in response to a Code violation by a student. In determining appropriate discipline or sanctions, factors evaluated include the nature and severity of the violation, the degree to which the student has participated or been involved in the violation, motive and intent in connection with the violation, and any record of past violations.

Sanctions or Disciplinary Actions

The following sanctions or disciplinary actions may be imposed separately or in combination. This list of sanctions or disciplinary actions is not exhaustive. The College reserves the right to impose other sanctions or disciplinary actions not listed.
The following process will be followed to consider complaints regarding alleged violations of the Code. The goal of this process is to review the facts and circumstances of a complaint, to allow students the opportunity to respond to an allegation and, to determine if a violation of the code of conduct occurred and if appropriate, to impose sanctions warranted by those facts and circumstances.

Process for Considering Complaints of Code Violations

The dean of student affairs will resolve any questions regarding the interpretation or application of the Code. The determination of the code of conduct occurred and if appropriate, to impose sanctions warranted by those facts and circumstances.

Student Code of Conduct Administrators

A student conduct administrator is a Cambridge College official authorized on a case-by-case basis by the dean of student affairs to impose sanctions upon any student found to have violated the Student Code of Conduct.

The dean of student affairs will resolve any questions regarding the interpretation or application of the Code. The determination of the dean of student affairs concerning the interpretation or application of the Code will be final.

Complaint

Any member of the College community may file a complaint against any Cambridge College student by submitting in writing to the dean of student affairs or regional center director with the following information:

- The name(s) of the student(s) who is (are) the subject of the complaint.
- A clear explanation of the nature of the complaint.
- The name(s), address(es), and telephone number(s) of those filing the complaint.
- The name(s), address(es), and telephone number(s) of witness(es) (if known).

Dean of Student Affairs Preliminary Review

When a complaint is filed, the dean of student affairs will review facts and circumstances surrounding the complaint in a Preliminary Review. The dean of student affairs may use the Preliminary Review process as a means of trying to mediate the complaint or may involve others to attempt to mediate the complaint. If a student agrees to a mediated resolution, there is no further review of the complaint and the student has no right to go before the Administrative Review Board. In resolving a matter through mediation, a student will waive his or her right for a hearing before the Board. If the matter is not dismissed and the parties do not agree to a mediated resolution, the dean of student affairs may either issue an appropriate sanction or discipline or refer the matter to the Board for a hearing. Any mediated matter involving restitution of more than $1000, suspension for longer than one semester, mandatory withdrawal for more than one semester or expulsion will be referred to the Administrative Review Board.

Notification of Results of Review

After the preliminary review, the student(s) involved in filing the complaint or who are the subject(s) of the complaint may be notified of the outcome by the dean of student affairs. If a student is to go before the Administrative Review Board, notice will be given at least seventy-two hours in advance.

Administrative Review Board

Membership

The Board may be comprised of faculty members and College administrators recommended by the dean of student affairs, undergraduate dean and graduate school deans, and are subject to the approval of the dean of student affairs. Generally, the Board consists of at least three members. The dean of student affairs will serve as the advisor to the Board but will not participate in the Board's deliberations or vote when the Board determines whether a violation has occurred or recommends sanctions or discipline.

Challenging a Board Member

If the complaining student or the student who is the subject of the complaint believes that one or more members of the Board hearing the complaint has a conflict of interest, he or she shall notify the dean of student affairs immediately and, in any event, at least forty-eight hours prior to the hearing of the complaint by the Board. The determination of the dean of student affairs regarding whether any conflict of interest exists will be final.

OR submit an online Student Concern/Complaint Report to the Office of Student Affairs at https://goo.gl/SgWgjD.

Please fill out the report form completely, providing specific details. The dean of student affairs will then review the concern and facilitate further discussion towards a resolution. Cambridge College will make its best effort to resolve issues in a way that is positive for both the student and the institution.
Advisors
All students may bring with them a member of the Cambridge College faculty or staff to serve as an advisor. If a student requests to have an attorney present, the College shall have its general counsel present.

Students may select a person who is a member of the Cambridge College community to advise him or her through the complaint and hearing process. The advisor (includes attorneys) may advise the student in preparation for the hearing and may accompany the student to the hearing. The advisor may not address the Board directly nor may the advisor question any witness. The student must inform the dean of student affairs of the name of his or her advisor a week prior to the Board hearing for approval. If the dean of student affairs does not give prior approval of the advisor, the advisor may be dismissed at the time of the hearing if it is believed a conflict of interest could exist.

Pre-Hearing Conference
The student who is the subject of the complaint will be invited to attend a conference prior to the hearing before the Board. The student will receive notification of this meeting by a letter explaining the nature of the complaint (“Complaint Letter”).

The purpose of this meeting is for the dean of student affairs or designee to familiarize the student who is the subject of the complaint with the complaint and hearing process and to allow the student to prepare his or her version of the event question for the Board hearing.

The student who is the subject of the complaint will be responsible for attending the meeting after receiving the Complaint Letter.

Administrative Board Hearing
The following procedures will govern the Board hearing:

- Witness lists and all documents to be presented in the hearing will be exchanged between the dean of student affairs and the student prior to the hearing. This process will be coordinated by the dean of student affairs and copies of the information will be provided to the Board at the beginning of the hearing.
- All individuals present will be introduced.
- The dean of student affairs will elect a designee to present the complaint citing, where applicable, the specific policy(ies), rule(s), or regulation(s) allegedly violated.
- The student who is the subject of the complaint will be given an opportunity to respond briefly.
- The dean of student affairs or designee and/or the complaining student will briefly present relevant information. Witnesses and documents may be presented. The Board may pose questions to the witness(es).
- The student who is the subject of the complaint will be given an opportunity to respond briefly. Witnesses and documents may be presented. The Board may pose questions to the witness(es).
- The complaining student may be allowed to pose relevant questions through the Board or, if the Chair permits, directly to the witness(es).
- The complaining student and the student who is the subject of the complaint will be allowed to present summation statements.
- All participants are expected to act in a courteous fashion and to respect the protocols established by the Chair. Interruptions, name-calling, threats, or other rude or inappropriate behavior will result in sanctions or disciplinary actions being imposed on the offending party.

- The Board may proceed with its hearing and make its determinations and recommendations without the presence of the student if the Board determines that the student was properly notified of the hearing and fails to attend without good cause within the sole discretion of the Board.

Board Recommendations
At the conclusion of the hearing, the Board will decide by consensus whether it believes that is more likely than not that a violation of the Code has occurred.

If the Board decides that a violation has occurred, the Board will, by consensus, determine it recommendation for specific sanctions or disciplinary actions.

Notification of the Board Recommendation
The dean of student affairs will meet with the student who is the subject of the complaint to discuss the Board recommendation as soon as and if practicable after the Board makes its recommendation. The meeting will be followed by a letter that confirms the Board recommendation and outlines the procedures available to the student to request reconsideration of the recommendation.

Requests for Appeal
If the student who is the subject of the complaint or the complaining student wishes to request reconsideration of the Panel recommendation, any such request shall be made in writing to the dean of student affairs within five calendar days of receiving notice of the Board recommendation. A request for reconsideration should include the following information:

- The name, address and telephone number of the student who is the subject of the complaint; and
- A clear statement explaining the nature and circumstance of the request, citing the reasons why the Board recommendation should be reconsidered.

The dean of student affairs will refer the request for reconsideration to the executive vice president who shall respond either by accepting the recommendation of the Board, by remanding the matter to the Board for further consideration, or by reversing or rejecting the recommendation. The executive vice president may proceed with or without meeting with the party requesting reconsideration. The determination of the executive vice president will be final.

Record Keeping
All sanctions or disciplinary actions are recorded and maintained by the dean of student affairs. Suspensions will be noted until such time as the time expires. The dean of student affairs will determine the appropriate method for recording the information presented at a Panel hearing.

Complaints, Grievances, Appeals
studentaffairs@cambridgecollege.edu • https://goo.gl/SgWgJD

Student Complaints and Grievance Process
A student complaint is any unresolved issue that a student feels should be addressed to the dean of student affairs. This process resolves differences within the College; it is not a legal forum.

Here are the steps for handling concerns and complaints:

**STEP 1** — Promptly discuss issue with the office involved and act upon their suggestions towards resolution. Connect with the director of that office or your Cambridge College regional site director if necessary. Resolution of complaints or grievances usually begins with this informal discussion with the person or office immediately concerned. Your academic advisor, program director, center director, or the dean of student affairs can suggest the appropriate channel for resolving particular complaints, and may assist you with the resolution.

Please make every effort to resolve an issue at step 1. Do not proceed to step 2 unless no adequate resolution has been achieved.

**STEP 2** — Students who want assistance with problem solving are invited to contact the Office of Student Affairs:

- Submit a Student Concern/Complaint Report to the Office of Student Affairs at https://goo.gl/SgWgJD. Please fill out the report form completely, providing specific details. The dean of student affairs will then review the concern and facilitate further discussion towards a resolution. Cambridge College will make its best effort to resolve issues in a way that is positive for both students and the institution. OR
- Contact the dean of student affairs, who will serve as the mediator with College offices and administrators. Call 617-873-0470 or e-mail regina.robinson@cambridgecollege.edu. Please provide complete information about the complaint or concern, including:
  1. Student name, ID# and contact information.
  2. Date and nature of the concern.
  3. Names of staff or faculty involved.
  4. Narrative of correspondence with involved parties.
  5. What resolution are you seeking?

If at any time you feel uncomfortable, frustrated, or need additional help in the resolution process, you have the right to contact the dean of student affairs directly as the neutral third party to facilitate the process. However, step 1 above is recommended first.

Grievances may be taken to the appropriate state education commission. Please note that state authorities typically expect a student to make every attempt to resolve a problem within their college first. Each state has its own procedure for handling complaints, often including a student complaint form and other documentation. They typically do not accept anonymous complaints.

State Resources
Complaints are handled by the state education commissions listed below for the main campus and regional locations. Students who reside in other states see also Complaint Process for All States, below.

- **California** — A student or any member of the public may file a complaint/grievance with the Bureau for Private Postsecondary Education at any time by calling 1-888-370-7589 or by completing a complaint form, which can be obtained on the bureau’s Internet web site, http://www.bppe.ca.gov/enforcement/complaint.shtml
- **Massachusetts** — Massachusetts Board of Higher Education, One Ashburton Place, Room 1401, Boston, MA 02108 • 617-994-6950 • www.mass.edu/forstudents/complaints/complaintprocess.asp
- **Puerto Rico** — Puerto Rico Council on Higher Education, PO Box 19900, San Juan, Puerto Rico 00910-1900 • 787-641-7100 • Fax: 787-641-2573 • www.ce.pr.gov

Other External Resources
**Standards for Accreditation** — The NEASC complaint procedures are solely for the purpose of addressing significant non-compliance with the Standards for Accreditation, not for individual dispute resolution. Contact: New England Association of Schools and Colleges (NEASC) Commission on Institutions of Higher Education (CIHE), 3 Burlington Woods Drive, Suite 100, Bedford, MA 01803 • https://cihe.neasc.org • 781.425.7714 • email: cihe@neasc.org

**Equal Opportunity, Harrassment, Sexual Harrassment** — Please contact:

- **The United States Equal Employment Opportunity Commission (EEOC)**
  John F. Kennedy Federal Building, 475 Government Center Boston, MA 02203 • 617-565-3200
  EEOC offices nationwide are listed online at www.eeoc.gov

- **Massachusetts Commission Against Discrimination (MCAD)**
  • www.mass.gov/mcad
  One Ashburton Place, Sixth Floor, Room 601, Boston, MA 02108 • 617-994-6000
  436 Dwight Street, Second Floor, Room 220, Springfield, MA 01103 • 413-739-2145
FERPA — If the College fails to comply with FERPA requirements, written complaints may be submitted to:
Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-8520

Complaint Process for All States
Resources for Student Complaint Processes — www.sheeo.org/node/434 provides a directory of agencies responsible for directory of agencies and individuals responsible for implementing state postsecondary quality assurance laws for all 50 states, the District of Columbia, and Puerto Rico. The current directory (at time of printing) is www.sheeo.org/sites/default/files/Complaint Process Links 12-2012.pdf

The directory information should not be construed as informative of what agencies regulate the institution or in what states the institution is licensed or required to be licensed. States, through the relevant agencies or attorney generals offices will accept complaints regardless of whether an institution is required to be licensed in that state.
Title IX Sexual Misconduct Policy

Regina Robinson, Deputy Title IX Coordinator for Students and Dean of Student Affairs
regina.robinson@cambridgecollege.edu ● https://goo.gl/SgWgjD

Cambridge College Values, Purpose of Policy, & Statement on Nondiscrimination

Institutional Values — Cambridge College (“CC” or “the College”) is committed to establishing and maintaining an educational and employment environment that is free from sexual misconduct. Sexual misconduct, as defined below, is a violation of a person’s rights, dignity, and integrity, and is contrary to the mission and values of the College. Acts of sexual misconduct are strictly prohibited and will not be tolerated.

CC takes all allegations of sexual misconduct seriously and is committed to providing information, education, resources, support, interim measures, and direction to the College community to prevent and address sexual misconduct. In response to any report that a member of the CC community has engaged in sexual misconduct, the College will take all appropriate steps to eliminate the misconduct, prevent its recurrence, and address its effects. To achieve equitable results, CC will carefully review and/or investigate all reports and complaints of sexual misconduct with an earnest intent to understand the perspectives and experiences of each individual involved, and to provide for fair and impartial evaluation and resolution.

Coordination with CC’s Nondiscrimination Policy — Cambridge College recognizes that discrimination or harassment related to an individual’s sex, gender identity or gender expression (collectively, “gender related status”), which is prohibited by this policy, can occur in conjunction with discrimination or harassment related to an individual’s race, color, ethnicity, national origin, religion, age, disability, sexual orientation, or any other legally protected characteristics (“protected characteristics”). Targeting individuals on the basis of any protected characteristics also violates CC’s community standards. When misconduct relates solely to a person’s gender related status, Cambridge College will address such conduct pursuant to this policy. When the College receives a report that a community member has engaged in misconduct related to both a person’s gender related status and other protected characteristics, the College has discretion to decide under which policy or policies to address the report and will coordinate the investigation and resolution efforts to address any and all harassment and discrimination.

Notice of Nondiscrimination

Cambridge College is committed to establishing and maintaining an environment free of all forms of harassment and discrimination for all College community members. CC does not discriminate on the basis of race, color, ethnicity, national origin, sex, sexual orientation, gender identity or expression, disability, or age in its programs or activities.

Prohibited Conduct & Definitions

Cambridge College prohibits all forms of sexual misconduct and gender-based harassment. Sexual misconduct is a broad term that includes, but is not limited to, sexual assault, sexual harassment, sexual violence, sexual exploitation, stalking, cyber-stalking, relationship violence, bullying or cyber-bullying relating to one’s sex or gender identity, and aiding or facilitating the commission of any such prohibited conduct. Gender-based harassment is also a broad term, and includes acts of verbal, nonverbal, or physical aggression, intimidation, or hostility based on sex, gender identity, gender expression or sex-stereotyping, even if those acts do not involve conduct of a sexual nature, and regardless of whether the gender-based harassment rises to the level of violating the law.

Reporting

Campus Reporting Options — To enable the College to respond to all reports in a prompt and equitable manner, the College encourages all individuals to directly report any incident of sexual misconduct to the Title IX coordinator or the deputy Title IX coordinator for students.

CC recognizes that a student or employee may choose to report sexual misconduct to any trusted employee of the College. For example, a student may choose to confide in a faculty member or an admissions counselor, each of which must report the incident to the College. Likewise, an employee may choose to confide in a supervisor. Under this policy, any full-time or part-time faculty member, staff member, or other employee who receives a report of sexual misconduct must share the report with the Title IX coordinator or the deputy Title IX Coordinator for Students. The Title IX coordinator and the deputy Title IX coordinator for students are specifically charged with investigating and responding to allegations of sexual misconduct.

Bystander Intervention — Cambridge College strongly encourages all community members to take reasonable and prudent actions to prevent or stop sexual misconduct, including relationship violence, stalking and sexual assault. Taking action may include directly or indirectly confronting the situation (if it is safe to do so), taking steps to interrupt the situation, or seeking assistance from a person in authority. Community members who choose to exercise this positive moral obligation will be supported by the College and protected from retaliation.

For more information, see www.cambridgecollege.edu/sites/default/files/file_uploads/cctitleixpolicy-2016.pdf
Violence Against Women

domestic violence • dating violence • sexual assault • stalking

In accord with the Violence Against Women Reauthorization Act of 2013 (VAWA), Cambridge College will respond to reported incidents of violence against women in the Cambridge College community with support for victims and fair, impartial disciplinary procedures.

Prompt Crime Reporting

Campus policy encourages every member of the campus community to report a crime promptly to the local police and to submit reported crime incidents to campus security personnel, the regional center director, the director of business operations or the dean of students.

Institutional Response to Reports of VAWA Crimes

The institution has programs to prevent domestic violence, dating violence, sexual assault, and stalking. When an incident of domestic violence, dating violence, sexual assault, or stalking is reported, the College will provide victims with written notice of available options, remedies, and services. If the accused individual is a student, the standard of evidence used in an institutional disciplinary hearing will be preponderance of the evidence.

Education Programs About VAWA Crimes

The College has education programs to promote the awareness of rape, acquaintance rape, dating violence, domestic violence, sexual assault, and stalking. These education programs include primary prevention and awareness programs for all incoming students and new employees. These education programs will include: a statement that these crimes are prohibited at the College; definitions of consent, domestic violence, dating violence, sexual assault, and stalking in the College’s jurisdiction; safe and positive bystander intervention when there’s a risk of one of those incidents; information on risk reduction to recognize warning signs of abusive behavior and avoiding potential attacks; and information about the institutional disciplinary procedures.

Sanctions for VAWA Crimes

Following a final determination of an institutional disciplinary procedure for cases of rape, acquaintance rape, dating violence, domestic violence, sexual assault, or stalking, the following sanctions or protective measures may be imposed: suspension, expulsion, education, prevention programs, community service, probation, no-contact order, disciplinary contract agreements, class changes, or other appropriate relief measures.

Procedures for Survivors of Domestic Violence, Dating Violence, Sexual Assault, or Stalking

Survivors/victims of these crimes will be provided written information about evidence preservation, how and to whom to report these crimes, options about involvement of law enforcement and campus authorities, and assistance in notifying law enforcement if the victim chooses, as well as the option to decline to notify authorities. Victims will also be provided information about rights and institutional responsibilities regarding no contact orders, orders of protection, trespass notices or other available applicable options.

Evidence preservation: In order to best preserve evidence, victims should avoid showering, washing, changing clothes, combing hair, drinking, eating, or doing anything to alter physical appearance until after a physical exam has been completed.

Reporting: Victims should report to the dean of students, (room 326 at 1000 Massachusetts Ave. in Cambridge, MA, 617.873.0470) or the local regional center director.

Notifying Law Enforcement: Victims have the right to notify law enforcement, and the campus can assist in notifying law enforcement if victims choose. Victims may also choose to decline to notify authorities.

Procedures for Institutional Disciplinary Procedures in Cases of Domestic Violence, Dating Violence, Sexual Assault, or Stalking

The institutional disciplinary procedures will provide a fair, prompt, and impartial process from investigation to final result. The investigation and any hearing will be conducted by those who receive annual training on issues related to VAWA crimes, how to conduct an investigation, and a hearing process that protects victim safety and promotes accountability.

Parties are entitled to the same opportunities to have an advisor of their choice present at any hearing and related meetings. There is no limit to the choice of an advisor; however, the parties are responsible for presenting evidence on their own behalf. Advisors may speak privately to their advisee during the proceeding, and cannot present evidence or cross-question witnesses. Parties will be informed simultaneously in writing of the outcome of the process, the availability of any appeal procedures, and when the results become final after any appeals.

The disciplinary processes available for victims of domestic violence, dating violence, sexual assault, and stalking are the appropriate campus student conduct disciplinary procedures or employee conduct disciplinary procedures as applicable. These processes include an investigation, charges issued, initial meeting, hearing and appeal as applicable. Investigations will generally be conducted within 60 days of the report being taken, timely investigation, charges issued, initial meeting, hearing and appeal as applicable. Investigations will generally be conducted within 60 days of the report being taken, unless extenuating circumstances described to the victim occur. Hearing appeals must be filed within 10 days of the hearing determination. The standard of evidence in these cases is preponderance of the evidence. Following an allegation or report of one of these crimes, the institution may offer available protective measures such as a no-contact order; alteration of residence assignments, academic, and work situations.

Confidentiality

The institution will maintain as confidential any accommodations or protective measures provided to the victims so long as it does not impair the ability to provide such measures.

Personally identifiable information about victims will not be included in any publicly available record-keeping, including the reporting and disclosure of crime statistics.
Written Notifications to Students, Employees, and Victims of VAWA Crimes

For Students and Employees:
The College will provide written notification to students and employees about existing and available counseling, health, mental health, victim advocacy, legal assistance, visa and immigration assistance, and other services available in community and on campus to victims of dating violence, domestic violence, sexual assault, and stalking. The College will also provide information about these services in writing to victims of domestic violence, dating violence, domestic violence.

For Survivors/Victims:
The College will provide written notification to victims regarding rights and options, including: available and existing on- and off-campus services such as victim advocacy, counseling, health, mental health, legal assistance, visa and immigration assistance; available and applicable institutional disciplinary procedures, and an explanation of those procedures; confidentiality in protective measures and Clery reporting and disclosure; and reasonable and available options and assistance with changing academic, living, transportation, and working situations, regardless of whether the victim chooses to report the crime to law enforcement.

In accord with the Violence Against Women Reauthorization Act of 2013 (VAWA), Cambridge College will include in its annual crime statistics all reported incidents of VAWA crimes.
Military Students—Veterans and Active Duty

veterans.support@cambridgecollege.edu  ●  www.cambridgecollege.edu/resources/veterans-benefits

Cambridge College is recognized as a military friendly institution offering a variety of degree and certificate programs which serve the academic and career development needs of many military members and their families. At Cambridge College our focus is on adult students, their experiences and their needs.

Our admissions staff and administration are trained to work with military students and help them get the best from all the benefits for which they qualify. At Cambridge College, we offer a personalized approach to assist our military students. Many of our faculty and staff have served in the armed forces and understand the challenges our military members and their families face each day. Our staff are here to help veterans through the admissions, registration and eligibility processes.

- The Veteran's Administration has approved Cambridge College programs for VA benefit coverage.
- Cambridge College is a Servicemember's Opportunity College (SOC) providing veteran support.
- Cambridge College is a Yellow Ribbon participant school.

Veterans Certifying and SOC Representatives

Please visit www.cambridgecollege.edu/resources/veterans-benefits for current contacts at Cambridge College.

Students taking courses at the Cambridge, MA campus should see the Bursar's Office for enrollment certification information after they have applied for benefits through the VA Office; students at regional Cambridge College locations should see their VA certifying official.

Transfer Credit Evaluation

Transfer credit—All students receiving veterans benefits will have all prior education and training evaluated upon enrollment. Credit will be awarded where applicable with the program being shortened accordingly. The student and the Department of Veteran Affairs will be notified. For transfer credit information please contact your veterans certifying representative.

Prior learning assessment can earn college credit and shorten your program—Veterans enrolled in undergraduate programs are especially encouraged to consider documenting their learning derived from experience in the form of standardized college-level exams and portfolios that demonstrate learning equivalent to specific college courses. For more information, ask to speak with your faculty advisor or Cambridge College regional center director, or visit www.cambridgecollege.edu/admissions/prior-learning-work-experience-credits.

Active Duty Tuition Discount

Tuition discount for active duty military personnel, their spouses and dependents—Undergraduate tuition is reduced to the amount covered by the federal Tuition Assistance Program; the rate is subject to change. We do not charge out-of-state tuition to our military members or their families.

Academic Progress

Progress will be monitored each term for all students receiving veterans benefits. If an undergraduate student’s cumulative GPA falls below 2.0 (graduate programs 3.0), or completion rate falls below 67% (graduate programs 50%) in all courses attempted at Cambridge College, in any term, he or she will be placed on academic probation for a maximum of two additional terms. If the student’s GPA or completion rate is not raised to meet graduation standards by the end of the second term of probation, the Veterans Administration will be notified and benefits will be interrupted.

Conditions for Reentrance: If the dean or regional site director determines that the conditions which caused the interruption have been rectified, the student will be eligible to receive benefits.

A wide range of educational benefits are available to veterans, their dependents and family members through the United States Department of Veterans Affairs. Students must apply directly to the US Department of Veterans Affairs.

Below are several links that will get you started and will provide you with the information you need to take advantage of your benefits.

International Students
International Student Office • 617.873.0142 • www.cambridgecollege.edu/offices/international-students

Cambridge College accepts international students only at its campus locations in Massachusetts, where all course instruction is in English. For the English language proficiency required, see below.

The California and Puerto Rico campuses are not authorized by SEVIS to recruit international students.

For assistance with the application process, please speak with your admissions counselor.
For assistance with immigration-related questions, please speak with the International Student Office.

See also international student policies:
• www.cambridgecollege.edu/international-student-policies-f1-non-immigrant-student-status
• www.cambridgecollege.edu/international-students-and-immunizations-policy—registrars-office

Checklist of Documents Required for Admission/Issuance of I-20

International students seeking to receive an I-20 to obtain or maintain F1 non-immigrant student status through Cambridge College must be fully admitted into a full-time degree program at Cambridge College.

Documents required for admission to Cambridge College include, but are not limited to:

All International Students
☐ Completed, signed Application, with all required documents (see application booklet).
☐ Application fee (see application booklet).
☐ Completed, signed International Student Application Supplement.
☐ Official demonstration of English Language Proficiency, documented in one of the following ways:
  1. Official demonstration of English language proficiency. Cambridge College will accept the following scores equal to or greater than the following:
     ● Paper-based TOEFL (PBT): 550
     ● Computer-based TOEFL (CBT): 213
     ● Internet-based TOEFL (IBT): 79-80
     ● IELTS: 6.0
     ● Michigan Test of English Language Proficiency (in-house): Level 2, 68 (undergraduate candidates); Level 3, 84 (graduate candidates)
  2. A diploma from a U.S.-based college, university, or high school.
  3. A Certificate of completion from a Cambridge College partner English language school. For a list of participating schools, please contact Admissions, or visit our website at www.cambridgecollege.edu/international-students/approved-english-language-schools

Not required of students whose first language is English.

☐ Copy of your passport or other government-issued document, showing:
  ● Your name
  ● Date of birth
  ● Country of birth
  ● Country of citizenship (if different from country of birth)

☐ Demonstration of adequate ability to fund your studies for at least the first year of study. Documents must be:
  1. In English, or accompanied by a notarized translation into English.
  2. Equal to or greater than $24,000 for bachelor’s and master’s students; equal to or greater than $30,000 for doctoral candidates.
  3. No older than four months from the date of acceptance; no older than one month is preferred.
  4. Accompanied by a completed Declaration of Funds, signed by the student or sponsor and signed by the bank from which funds are demonstrated.

Additional Documents

Additional documents required for students already in the U.S. include:
☐ i94, Arrival/Departure record, which you can access online at https://i94.cbp.dhs.gov/I94/
☐ Copy of your most recent visa.

Students currently in the U.S. in F1 status must also provide:
☐ Copy of current I-20, pages 1 and 2.
☐ Completed Transfer-In Request form.

Students with dependents in F2 status or wishing to obtain F2 status must also provide:
☐ Copy of each dependent’s passport.
☐ Copy of each dependent’s F2 I-20 (if applicable).
☐ Demonstration of financial capability for supporting the dependent while in the U.S.:
  ● For a spouse, demonstrate an additional $6,000 in financial capability.
  ● For each child, demonstrate an additional $4,000 in financial capability.
Changing to or Regaining F1 Status

Students who wish to obtain or regain F1 non-immigrant student status through Reinstatement or Change of Status must be fully accepted to a Cambridge College academic program before receiving assistance with the Change of Status/Reinstatement procedure. Cambridge College will provide assistance with but cannot guarantee the success of any Change of Status/Reinstatement application submitted to the federal government for review.

Getting Started

Transfer Credit
Please consult an admissions counselor, the Transfer Credit Office or your academic advisor regarding transferring credits to or from Cambridge College.

State Health Requirements for College Students
Students are required to comply with state laws regarding health insurance and immunizations for college students.

CAMBRIDGE ● LAWRENCE ● SPRINGFIELD
☐ Immunizations — Paper form required before students can register for first term of full-time study.
Get form at www.cambridgecollege.edu/resources/student-forms
☐ Health Insurance — Required early in first term and yearly: Go to the MyCC web portal homepage and follow instructions under “Student Health Insurance.” Students who have health insurance need to waive out. If you do not waive out, you will be automatically enrolled and billed.

Financial Planning
Tuition and Fees — See Tuition and Fees.
Payment and Refunds — See Payment and Refunds.
Scholarships are not currently available to international students.

Room, Board and Personal Expenses — All Cambridge College students are responsible for their own housing, transportation, and any personal expenses. The College does not provide dormitories, except for the Summer Institutes.

Maintaining F1 Status

Orientation
All F1 non-immigrant students are required to attend New International Student Orientation during their first term of study. Students who fail to attend will not be able to register for the following term until they have made arrangements to hear the information given during Orientation.

At the conclusion of New International Student Orientation, students are required to submit a completed International Student Information Sheet and Certificate of Understanding, both of which are provided during Orientation.

Full Time Registration Requirement
In order to maintain F1 status at Cambridge College, F1 international students must:
1. Register for a full-time course of study in the first term and all subsequent terms except in the final term, “Full-time” is defined as:
   ● 12 semester credits for bachelor’s (undergraduate) students.
   ● 8 semester credits for master’s (graduate) students.
   ● CAGS and doctoral (post-graduate) students: Course load per term is defined by the program. Please see the International Student Office for full-time registration requirements.
2. Attend all courses which contribute to full-time registration. Failing a class for truancy or absence is considered an unauthorized drop below full course of study.
3. Register for no more than three credits of online course work, except where the online course registration exceeds the required minimum full-time registration.
4. Register for and attend courses only taught at the Cambridge College center where the student has been authorized to attend. For a list of Cambridge College locations approved by the SEVP to host F1 students, please contact the International Student Office or visit www.cambridgecollege.edu/international-student.

Students are not required by federal regulations to register for Summer term; however, some academic programs may require Summer registration. Students must ask their academic advisor and/or academic dean if they are required to register for the Summer term.

Dropping Below Full Time Registration
In order to drop below full-time registration during Spring of Fall terms, students must first contact the International Student Office. No special permission from the International Student Office is required for Summer registration.

Students in their final term of study may register for fewer than the required number of credits, but are advised to contact the International Student Office to advise the P/DSO of their intent to graduate that term.

Students who wish to drop below full-time registration for academic reasons may do so only in the first term of study. They must contact the International Student Office no later than the fourth week of the term to request the reduction in course load. A student’s course load
may be reduced to no fewer than six credits when the reduction is academic in nature. Reducing the course load to fewer than six credits during Spring or Fall terms is considered a violation of F1 status.

Students who wish to drop below full-time registration for medical reasons may do so at any time during the term, but must provide documentation from a licensed medical provider in the U.S. demonstrating the need for the Reduced Course Load due to a medical condition. Students must notify the International Student Office in writing (email or letter) of the intent to drop below full-time registration prior to dropping/withdrawing from courses. Students must provide a completed Medical Reduced Course Load form to the International Student Office no later than 10 days after visiting the medical professional who certifies the need for a reduction in course load. Failure to do so is considered a violation of F1 status.

NOTE: Receiving authorization for a Reduced Course Load allows students to maintain F1 status while taking fewer than the minimum required credits during a required term. Students who reduce their course load after the add/drop period are still responsible for any late fees or charges applied to their accounts, as per the policies of the Bursar’s Office. Applying for a Reduced Course Load is not a withdrawal/drop from a class. Students must also visit the Registrar’s Office and Bursar when withdrawing from or dropping a class.

Updated Records
Students maintaining F1 status through enrollment at Cambridge College must keep all information updated with the International Student Office at all times. Students may email all information to the International Student Office and must do so within 10 days of the change in information. The information includes:
1. Current major field of study (if changed during studies).
2. Current residential address in the U.S.
3. Current legal name (if different from name provided when applying).
4. Current sources of funding (if different from funding demonstrated when applying).
5. Updated passport (may be scanned and emailed).
6. Updated visa (may be scanned and emailed).
7. Updated I-94, Arrival/Departure record, which you can access online at https://i94.cbp.dhs.gov/I94/

International students must separately inform the Registrar’s Office and International Student Office of any changes to their residential address in the U.S. Failure to report to either office within 10 days of moving may result in complications with communication from the College and the federal government.

Program Dates
Student program dates are listed in section 5 on page 1 of the Form 1-20. Each student is expected to monitor his/her own program dates and notify the International Student Office if an extension is needed; if s/he will complete the program before the listed end-date, or if s/he will depart the U.S. prior to completion of the program without intention to return within 5 months.

Degree/Enrollment Verifications
Students requesting enrollment verification must contact the International Student Office, providing their name and student ID number. The letter will confirm that the student is enrolled at Cambridge College, specify the student’s standing (active, applying for reinstatement, applying for change of status, etc.), and note the student’s SEVIS ID number and program dates as they appear in SEVIS. Letters issued by the International Student Office are issued within 48 hours of receipt of the request during the normal business week.

Students requesting transcripts must submit a Transcript Request to the Registrar’s Office. No transcript, official or unofficial, can be provided by the International Student Office.

Work Eligibility
Students in F1 non-immigrant status are permitted to engage in work only if they first receive authorization from the federal government through the International Student Office. There are three kinds of work in which international students may engage:

On-Campus Employment — International students may engage in part-time (no more than 20 hours per week) on-campus employment during required terms (Spring and Fall) and full-time (no limit on hours) during breaks and vacation (Summer). On-campus employment is not guaranteed to any student, nor is its availability guaranteed.

Curricular Practical Training (CPT) — International students may have the option to engage in Curricular Practical Training as part of their academic program. This is permitted only at the discretion of an academic instructor. Students interested in pursuing CPT should contact the International Student Office at least one academic term before the term in which they plan to engage in CPT.

Optional Practical Training (OPT) — International students completing a degree with Cambridge College may be eligible for the 12-month full-time Optional Practical Training benefit. Students should contact the International Student Office no later than the beginning of their final term of study for information on OPT and the OPT application process. Students may apply for OPT up to 90 days prior to the final date of classes listed for their level of study in the Academic Calendar, through 60 days following the same date. Students who have not been enrolled for two consecutive terms, including their final term of study, prior to completing their degree may not be eligible for the OPT benefit. As each student’s situation is unique, one-on-one advising on OPT is strongly recommended.

Additional Information
For detailed information or questions regarding federal regulations governing F1 student status, please contact the International Student Office.
Academic Support

Writing — Cambridge College produces graduates who think critically and communicate clearly. Writing is a complex process that takes a lot of time and practice. All students are encouraged to improve their communication and literacy skills to get the most from their coursework and write their final projects.

Writing faculty guide students through the thinking/writing process, beginning with articulating a main idea for a paper. They help students research the topic, critically read and evaluate their findings, document their sources, develop, organize, and clearly express their thoughts about the topic, and revise the final draft.

Writing and math tutors help students build the skills necessary to succeed in the classroom.

Academic Support Services — Academic support is available at the main campus and regional locations. For more information, see the regional locations in this catalog and each location’s web page. For Cambridge academic support services, contact the Office of Academic Support at 617.873.0191.

Workshops are offered by the School of Education for our students preparing for teacher tests.

For information on academic support at your Cambridge College location, please contact the director.

Disability Support — Cambridge College is committed to providing equal access to all educational opportunities to students with physical, psychological, or learning disabilities. See Student Affairs.
Who can use One-on-One Success Coaching?
The Integrated Student Success Program (ISSP) coaching services are available to all Cambridge College students who are ready to commit energy and time to goal setting.

Academic coaching is especially focused on providing support to new students, but all interested Cambridge College students are encouraged to participate in these comprehensive services.

Faculty may request that students meet with a success coach if they are experiencing academic difficulties at Cambridge College.

How do students request one-on-one success coaching?
- Send an email to Kathleen.Hartnett@cambridgecollege.edu and request an appointment, or
- Visit the Office of Student Affairs and sign fill out an appointment request form located in the front entryway outside room 318.

Library Services
www.cambridgecollege.edu/resources/library-services

Cambridge College Online Library (CCOL)
- More than 15,000 full-text scholarly journals and periodicals and 175,000+ full-text books appropriate for academic research in the fields of education, counseling, psychology, management, health, and other academic areas. Our collections are fully searchable through our Ebsco Discovery Service (EDS), and include EBSCO-host’s Academic Search Complete, Omnifile Full Text Select, PsycArticles, Education Research Complete, SocIndex, Humanities International Complete, MEDLINE with Full-text, Business Source Complete and much more. Citation-only results link conveniently to the WorldCat database for location of local libraries which hold print versions. Cambridge College is not responsible for the content of these sites or of any sites to which they may link.
- Chat with a Live Librarian provides 24/7/365 live reference librarian service for individual research assistance using online chat.
- Writing and Reading Help, Research Skills Help, and EFL Help on the CCOL home page provide additional resources.

Other Libraries
Cambridge College regional locations and international — For recommended academic and other research libraries open for public use, click Traditional Libraries on the Cambridge College Online Library home page.

Summer Institutes
During summer residency programs, our host library provides library accommodations. Students are responsible for all materials borrowed from host libraries. Outstanding fines must be paid and overdue books returned before graduation clearance is given.

Computer Use and Policies
IT Support Center • 617.873.0159 • www.cambridgecollege.edu/information-technology/available-it-resources

Information Technology Resources, Services, & Policy Highlights — Computer and network technology has become a critical component in education, in the workplace and in everyday life. Technology in these areas contributes significantly to the success of our students, our faculty and our staff. The College depends on our technical resources to provide a rich environment to those individuals who learn, teach and work at the College. Technology can also enable dynamic conversations and personal interactions in our adult classroom experience.

The Information Technology department strives to make its resources as reliable and as robust as possible. We ask that you recognize and respect that these resources are limited. Please treat them in a way that will guarantee that others can share in their use. The following few pages describe various procedures that are in place to make technology enabled education possible. We ask that you read through the material and by all means, ask questions of our staff if you need further information.

Computer Requirements
While a student at Cambridge College you will use a computer to access the College’s web portal (MyCC), the online library, email and other software applications related to the classroom experience. All students are required to be able to access and use a computer while a student at the College. Computers should meet the following minimum requirements.

- Recommended hardware:
  - 4GB RAM or higher.
  - Intel or AMD processor: dual-core or better.
- Recommended Operating System:
  - Windows users: Windows 7 SP 1 or higher
  - Apple users: Mac OS 10.8 or higher.
Access to a Computer
If you don’t have access to a personal computer or don’t have a high-speed Internet connection you can use the computer lab at your Cambridge College location. Other computer resources may include your local public library and public Internet hot spots.

Purchasing Technology
We recommend that students wait until they receive their financial aid award notice before purchasing a computer.

Once enrolled, students are encouraged to visit the password protected At Home or Student Use discount software site linked at www.cambridgecollege.edu/available-it-resources/it-services to see if any of the offerings available can aid and assist them in their coursework.

IT Support Center
Cambridge College maintains a 24/7 phone support line to assist you with minor IT problems such as:

- MyCC, the Cambridge College web portal.
- Cambridge College email (CC-Gmail).
- Cambridge College website.
- Connection to the Cambridge College network.
- Other College web-enabled programs.
- Password reset portal.

Please note: The College cannot assist students with questions regarding personal hardware and software issues. Please contact the manufacturer for questions regarding the use and maintenance of your computer or software.

To contact the IT Support Center
- Place a request at https://helpdesk.cambridgecollege.edu
- Call 617.873.0159 or toll free at 1-800-877-4723 ext. 0159.
- Email helpdesk@cambridgecollege.edu
- Drop-in locations (see your site information for details).

Recommended Software:
- Latest version of Firefox or Chrome browsers.
- Microsoft Office 2010 and up.
- DSL, broadband cable modem or other high speed internet access.
- Windows users: up-to-date anti-virus software protection.

Connection Requirements:
- Wireless capability for use while in class or at breaks.

Self Help
A number of self help topics are available on the IT Support website at www.cambridgecollege.edu/it-support as well as in the IT eHelpdesk portal under Solutions.

MyCC Web Portal
Students’ personal accounts are created upon self-enrollment through the admissions process. Instructions about logging in for the first time are located at www.cambridgecollege.edu/it-support. Users may log in to MyCC from the top right of the main Cambridge College website or https://mycc.cambridgecollege.edu/ics

The MyCC portal is a focal point for students and faculty. MyCC is the gateway to online course registration, online course work, the learning management system, and the online library. Students access their personal accounts and grades through the MyCC portal.

See also Web Portal Accounts Policies and Procedures at www.cambridgecollege.edu/information-technology/it-security-and-policies

Electronic Communication
Cambridge College provides access to email for all students. Email is an official method of communication at Cambridge College. Students are held strictly responsible for the consequences of not reading and responding to emails sent by the College to their College-provided email account.

Email Address — New students and returning students are provided a College-branded gmail account upon registration, referred to as GO Email or CC Gmail.

- Students, senior and adjunct faculty email addresses appear as: username@go.cambridgecollege.edu.
- Core faculty and staff email addresses appear as: username@cambridgecollege.edu.
- All staff use Exchange email in their conversations with students.

Use and Responsibility — Faculty will require students to access MyCC and read notices sent to their official Cambridge College email address. Please read the Electronic Communication (email) Policy at www.cambridgecollege.edu/information-technology/it-security-and-policies. Please read the policy to better understand the responsible use of email and the types of email and behaviors that are prohibited.

Network Password
Your network password is used to log in to our wireless network, lab computers, eHelpdesk, and to make printouts.

Password Reset Portal
This service allows users to reset their network password at any time from anywhere that they have web access. This service will allow users who have forgotten their passwords to conveniently reset it without having to contact an IT technician. Password reset kiosks are also available at selected locations around the College. Please contact a helpdesk technician for more information or access the portal at https://pwd.cambridgecollege.edu.

IT Technicians
Almost every Cambridge College location has local IT technicians to assist you and to help maintain equipment, classrooms, and drop-in computer centers.
Information Technology Responsible Use Policy
Cambridge College provides access to information technology resources to students, faculty and staff to support the College’s mission and to conduct the business of the College. Every authorized user of information technology resources at Cambridge College is responsible for utilizing these resources in an efficient, ethical and legal manner and in ways consistent for overall College policy. Please see the Responsible Use Policy at www.cambridgecollege.edu/information-technology/it-security-and-policies. This policy also covers the following points:

- Privacy.
- Passwords and user IDs.
- Personal use.
- Security.
- Copyright, trademark and domain names.
- Compliance and enforcement.
- Violations and disciplinary actions.

Computer Labs
Computer labs are available at the Cambridge campus and at our regional locations. Students may use these resources to conduct research and complete assignments and projects. Users can access the Internet, online classes, conduct word processing, create spreadsheets, and design presentations, as well as use course specific software that may be available through our labs. Some of our labs have trained staff on duty to assist in the use of our hardware. Limited software assistance can be provided. Lab users must comply with all information technology requirements and policy.

Computer Lab Guidelines
- Lab computers and printers are for registered Cambridge College students only. Do not share your Cambridge College network username and password with anyone. You will be held responsible if you share your personal information and someone else uses your account.
- Do not share your Cambridge College Network username and password with anyone. You will be held responsible if you share your personal information and someone else uses your account.
- Downloading, installing and running software is strictly prohibited on any lab computer.
- Illegally downloading music, videos or any other copyrighted content is a crime and may result in disciplinary action.
- Playing computer games on lab computers is prohibited.
- Food and beverages, with the exception of covered water bottles, are not allowed in any computer lab.
- Cell phone conversations are not permitted in the lab.
- The College is not responsible for valuables left unattended.
- Navigating to offensive, harassing or sexually explicit sites is not permitted and may result in disciplinary action.
- No chat or other form of instant messaging is permitted other than through the facilities provided by the College’s MyCC portal.
- Lab assistants can only provide technical support for Cambridge College software applications.
- Cambridge College technicians are not responsible for tutoring.
- Children are not allowed in the labs.

Print-outs
Go green. Please think before you print.

Print charges are currently disabled, but may be reinstated at any time.

For more information on our IT policies, please see www.cambridgecollege.edu/information-technology/it-security-and-policies.

Digital Millenium Copyright Act Policy
Cambridge College does not allow Peer-to-Peer (P2P) software usage on its wired or wireless network. Anyone using P2P applications on the Cambridge College network will be blocked from the network without prior notification. Please review Cambridge College’s Digital Millenium Copyright Act Policy at www.cambridgecollege.edu/information-technology/it-security-and-policies. When attached to the Cambridge College network, downloading or distribution of whole copies of copyrighted material for personal use or entertainment without explicit permission from the copyright owner is against the law, and therefore against College policy. Violators may be subject to criminal or civil prosecution.

Classroom Technology Services
Classroom technology services typically include wireless labs and audiovisual equipment. Requests for these services can only be made by Cambridge College faculty and staff through the AV Request Site at https://av.cambridgecollege.edu

For assistance with classroom equipment, contact the IT Support Center at https://helpdesk.cambridgecollege.edu or 617.873.0159.
School of Undergraduate Studies

- Introduction and Policies
- Multidisciplinary Studies
- Early Childhood Education & Care
- Health & Wellness Promotion
- Health Care Management
- Human Services
- Management Studies
- Managerial Accounting
- Natural & Applied Sciences
- Psychology
- Concentrations
- Certificates
- Course Descriptions

Cambridge College undergraduate students learn to communicate effectively; exercise analytical and problem-solving abilities; refine their values to facilitate decision-making; recognize, respect, and appreciate diversity; function effectively in a variety of organizations; and understand local and global issues in the contemporary world.

General Education Learning Outcomes
The general education component of the bachelor's degrees at Cambridge College is designed to develop and foster specific skills and attitudes which form the intellectual framework of a well-rounded scholar. The coursework is intentionally distributed across seven topical pillars in order to promote a diversity of perspective within the student. Specific skills and competencies within the general education portion of the bachelor's degree include:
- Critical thinking, logic and analysis.
- Mathematics and quantitative reasoning.
- Written and oral communication.
- Information literacy and computer applications.
- Understanding of the scope and relevance of the arts and humanities throughout history, and within contemporary society.
- Integration of scientific thought and analysis.
- Understanding of intercultural and intracultural concepts within the social sciences.

Program Components
General education — Cambridge College students gain academic skills in college-level writing, critical thinking, quantitative thinking, computer applications, research, and presentations. They gain knowledge within the natural, physical, and social sciences, arts and humanities, begin to use their knowledge, and learn to think systematically across disciplines.

Open electives — Each student selects unrestricted electives from the full spectrum of the College’s course offerings. Electives may be an eclectic mixture that reflects the student’s unique interests and goals, or may be focused in a particular concentration or area of study. See program charts.

Major — In-depth understanding of the field of study, including major themes and issues, historical development, major figures and ideas; analysis, synthesis, and evaluation of ideas across disciplines, from multiple perspectives, and over time.

Final project — Near the end of their program, degree candidates complete a Capstone project. Students apply the fruits of their academic experience to a culminating learning project that interests and challenges them, on a topic related to the major and their professional goals. They do original research and develop it into an extended essay demonstrating mastery of key concepts, methods, and terminology in the field.

Academic Advising
Admissions counselors give applicants an overview of the College’s academic programs and assist with the application process and schedule students for the academic assessment. Academic advisors are available for academic counseling.

Orientation — Just before each term begins, group advising and registration sessions provide group course advising for new students and assistance with course registration.

Initial advising — Entering students take an academic-skills course, Principles and Processes of Adult Learning (LRN175). Students become independent learners who can effectively manage the structures, processes, and expectations of undergraduate education.
Ongoing advising — Following LRN 175, students receive advising from the Student Academic Support Services office. An advisor develops a student’s academic plan that reflects his or her prior learning experiences and assessed academic skills.

Student academic support services staff:
- Assign you an advisor.
- Update your academic plan each term.
- Guide you in selecting the right courses for graduation.
- Monitor your academic progress.
- Recommend academic support (tutors) as needed.
- Provide disability support.
- Serve as a resource for creating portfolios and taking standardized tests (ACCUPLACER and CLEP).
- Provide current and accurate information regarding administrative, policy and curriculum changes.
- Provide career counseling services to students.
- Facilitate interaction between College administrators and staff (student advisory committees, Senate) as it relates to the academics and student life.

Writing Assessment, Courses and Tutoring
All new students take a standardized writing assessment prior to registration. Skill development courses are provided for students whose assessment indicates need to develop the level of proficiency needed for college level work. WRT090 Effective Writing Skills is free of charge; it may be taken more than once, as needed. Need-specific tutoring is also provided. WRT101-102 may by waived if students have taken equivalent courses and assessment indicates proficiency.

Taking Graduate Courses
In consultation with your advisor, and with written permission from the course instructor, undergraduate students who have completed at least 90 credits at an overall GPA of 3.0 or better may take graduate courses at Cambridge College. These graduate courses may be applied towards a bachelor’s degree if they meet current program requirements; they may not be used towards a graduate degree unless specifically identified within an advanced standing program. Licensure courses may not be taken by undergraduate students.

Focused Study
Approval — Some undergraduate courses may be completed in a focused study format if the course has not been offered for several terms and you need the course to graduate on time. A completed application for focused study must be approved by the undergraduate dean.

Cost — The standard undergraduate tuition per credit is charged.

Learning Format — Focused studies meet a minimum of four times. You and your and instructor arrange meeting times; you are expected to work independently. A three-credit focused study will require about 90 hours of documented learning activities, meetings, and individual work.

Independent Study
Self-motivated students may earn undergraduate credit through individually designed courses, which may be appropriate in the following situations:

- The field or topic is not offered by Cambridge College.
- A unique learning environment provides opportunity for college-level learning (for example, international travel, participation in a cultural exchange program, involvement in a social or political action project).
- Level of student’s prior knowledge in subject area is sufficient preparation for advanced study.

After identifying a Cambridge College faculty sponsor, the student and sponsor jointly complete an independent study registration form, specifying the department, course title, number of credits, course objectives, planned activities and method of evaluation.

Cost — The standard undergraduate tuition per credit is charged.

Prior Learning Assessment/Portfolios for Credit
Undergraduate students may earn academic credit for prior learning outside the classroom (not simply for experience). They may attempt to demonstrate the learning equivalent to college courses that meet their program requirements. Content must not duplicate courses already taken or accepted in transfer. By making portfolios, students can save both time and tuition costs.

Portfolio Process
1. Student locates a course syllabus from a regionally accredited institution of higher education, with content and coverage that aligns with his/her knowledge, experience, and skills.
2. Student meets with their academic advisor to verify that credit for this proposed portfolio would fit into his/her academic program, and confirm their eligibility to petition for prior learning assessment (PLA)/portfolio credits.
3. Student contacts the coordinator of undergraduate prior learning assessment at 800.877.4723 x1728 or jeff.hogan@cambridgecollege.edu to obtain preliminary approval of the PLA proposal and guidance.
4. Student compiles documentation of experience and prior learning, and constructs an academic essay detailing the content and breadth of prior learning; showing rigorous examples of content mastery. This material is combined with a copy of the student’s resume, the syllabus of the course being challenged, and a completed Request for Evaluation of Prior Learning Form (available from the Coordinator of Prior Learning Assessment).
5. Coordinator of Prior Learning Assessment identifies a qualified faculty expert, who will review the portfolio and grant full or partial credit if college-level learning equivalent to the course syllabus is expressed and documented, deny credit, or return the portfolio for further documentation. Portfolios that are denied credit may be appealed in writing to the Dean of the School of Undergraduate Studies.

Cost — For portfolio assessment fees, see Tuition & Fees.
Standardized Examinations for Credit
Undergraduate credit may be awarded to Cambridge College students for CLEP and DANTES DSST exams completed with scores at or above the minimum recommended by the American Council on Education (equivalent to a grade of C). The credits earned are counted as transfer credits.

Undergraduate Certificates
Certificates taken for degree credit may be applied to a Cambridge College bachelor’s degree as program requirements allow (see degree program charts). Certificates with academic content and career development goals appropriate to a particular major may count as major electives (see program charts). Certificate credits may also count as open electives.

Certificates can be designed with partnering businesses, organizations, schools, and other institutions of higher education.

Undergraduate Policies and Procedures
Detailed policies and procedures for the School of Undergraduate Studies are posted on the MyCC web portal. Students and faculty may log in to MyCC and click on the Academic Resources tab.
Bachelor of Arts
Multidisciplinary Studies
120 credits

Program Description
The baccalaureate program in multidisciplinary studies at Cambridge College is a flexible option for students who are interested in studying across multiple disciplines. The program develops academic and workplace skills for success, and knowledge across a variety of academic fields. It is ideal for students who have broad academic interests and a desire to continue enhancing their knowledge throughout their lives. The program is very flexible, supporting each student's interests with a wide selection of liberal arts courses to choose from.

Required courses provide a practical focus to the curriculum, with courses that build academic skills and broad-based knowledge across the sciences, humanities and general studies.

Final Project — Students will complete a Capstone project focusing on an topic of personal and professional interest. The project consists of research and written work demonstrating their critical thinking and academic knowledge.

Program Outcomes
- Critical thinking, logic and analysis.
- Mathematics and quantitative reasoning.
- Written and oral communication.
- Information literacy and computer sciences.
- Understanding of the scope and relevance of the arts and humanities throughout history, and within contemporary society.
- Integration of scientific thought and analysis.
- Understanding of intercultural and intra-cultural concepts within the social sciences.

Careers and Further Study
Students will acquire a vocabulary in concepts and methods of critical thinking, and will gain the skills necessary to navigate and manage complex systems, obtain fulfilling employment, and compete in the working world. Students will develop persuasive oral communication and writing skills, and be prepared to utilize them in their employment and graduate study. With these transferable skills and broad-based knowledge, our graduates will be equipped to take on new and unforeseen challenges in this fast-paced and quickly changing world.

Our graduates go on to a wide variety of careers, often working in schools, community organizations and services, government agencies, and businesses. Many continue on to graduate study in fields ranging from education to law to business management.

Admissions requirements: High school completion or GED and other School of Undergraduate Studies requirements (see Admissions).

Online courses: No more than 49% of your Cambridge College courses may be fully-online. International students may take only one fully-online course in any term.

Degree completion: General education requirements may be satisfied by an associate’s degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.
Program Description
The Bachelor of Arts in Early Childhood Education and Care prepares students to teach within and manage early education and care organizations. This comprehensive curriculum develops the competencies defined by the Massachusetts Department of Early Education and Care as essential for leaders in this growing field. The dynamic course work addresses issues of social justice and inclusion of all children, focusing on special needs, diversity, program planning and leadership within child care settings. Electives enable students to tailor their studies to their particular career goals within the field.

Program Outcomes
Successful graduates will have a demonstrated understanding of the following competencies supporting young children (birth to 8):

- Growth and core development of children.
- Guiding and interacting with children.
- Partnering with families and communities.
- Health, safety and nutrition for young children.
- Learning environments and implementing curriculum.
- Observation, assessment and documentation.
- Program planning, development and implementation.
- Professionalism and leadership.

Careers and Further Study
Our graduates typically progress from entry level to upper level careers in state and private day care centers and pre-schools, Head-start and other agencies focused on underserved populations, and home care.

Graduates are also well prepared for graduate study in fields related to young children.

Program Description
The Bachelor of Science in Health & Wellness Promotion prepares students with the knowledge and skills necessary to educate, coach and support individuals, institutions and communities in promoting and maintaining healthy lifestyles. Through an investigation into the science of human health and the history, philosophical, and theoretical foundations of health and wellness initiatives, students gain a practical understanding of issues affecting individual and population health. Coursework emphasizes a holistic approach to health and includes elements such as nutrition, physical activity, stress, alcohol and substance abuse, and the influence of socio-economic and environmental factors on all aspects of health and well-being.

Program Outcomes
Upon completion, students will be able to work effectively with individuals, organizations, corporations and communities in efforts to enhance health, prevent disease and increase quality of life. Students will:

- Gain content knowledge in the science, history and theoretical foundations of wellness and health.
- Assess health and wellness needs; plan, implement, direct and evaluate health education and wellness programs.
- Gain communication and marketing skills in assessing, organizing and implementing health and wellness promotion programs and materials.
- Understand theories and strategies that facilitate positive lifestyle change.
- Utilize evidence-based strategies to improve health and well-being.
- Maximize the well-being of specific target populations by collaborative planning and implementation of wellness programs.
- Apply their learning through direct field experience.
- Effectively advocate for policies and practices that empower individuals and communities and sustain and reinforce health promotion efforts.

Careers and Further Study
Successful graduates will be well-positioned to work as health/wellness coaches and educators in community health initiatives, corporate wellness programs, public and private educational settings, and in fitness and wellness facilities. Graduates are further prepared for advanced studies in a wide range of health related fields such as public and community health, nursing, health education, health care management and administration, addiction studies, psychology, and human services.

Admissions requirements: High school completion or GED and other School of Undergraduate Studies requirements (see Admissions).

Online courses: No more than 49% of your Cambridge College courses may be fully-online. International students may take only one fully-online course in any term.

Program Description
The Bachelor of Science in Health Care Management presents a comprehensive management curriculum that equips students with the skills necessary to work as managers in health care institutions. This curriculum is aligned with the practical and operational needs of today’s health care institutions. Cambridge College students learn directly from practicing scholar-professionals, many of whom are distinguished health care business leaders. Faculty give students the best opportunity to learn management theory and effective, practical management operations, financial theory, tools and techniques, enabling decision making based on sound financial and managerial principles. By combining research, theory and practice, graduates will be prepared with the skills that will enable them to manage people and complex issues in the health care field.

Program Outcomes
- Critical thinking skills and problem-solving to benefit patients and health care organizations.
- Effective written and oral communication with medical personnel, policy makers, and other colleagues in the health care environment, and the public.
- Leadership and management skills required to lead effectively in 21st century health care settings.
- Informed planning and decision making.
- Ethical, legal, social, political and economic forces affecting the health care industry.
- Health-related issues, disease and public health.
- Health care policies and economics and systems in the U.S. and elsewhere.
- Computer and technology applications to improve efficiency and quality of care.
- Financial operations such as medical insurance, coding, billing, and accounting systems.
- Human resource management needs specific to health care.
- Statistical analysis.

Careers and Further Study
Graduates will be prepared for supervisory positions in health care organizations as team members, managers and administrators. The program also prepares students for graduate study in health care management.

Admissions requirements: High school completion or GED and other School of Undergraduate Studies requirements (see Admissions).

Online courses: No more than 49% of your Cambridge College courses may be fully-online. International students may take only one fully-online course in any term.

Degree completion: General education requirements may be satisfied by an associate’s degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.

Bachelor of Science

Human Services

120 credits

Program Description
The Bachelor of Science in Human Services is guided by systemic and holistic thinking, along with an appreciation of research and how it informs practice. A collaborative model of teaching and helping creates an environment where all students are encouraged to reach their potential. We do this by providing opportunities for our students to increase their knowledge and practical skills while recognizing the valuable contributions they are making in their workplaces and in their communities. Our goal is to be an integral part of the change that needs to happen to create a more just and equitable society.

Required courses provide broad-based knowledge of individuals, families and communities, with historical and multicultural perspectives. They present a unique strengths-based, systemic and culturally relevant approach to working with people effectively across many varied settings.

Internship — Students will apply their knowledge in a variety of community-based settings.

Final Project — Students will complete a Capstone project focusing on an topic related to human services. The project consists of research and written work applying academic experience to a learning project that interests and challenges them.

Program Outcomes
• Students gain the skills needed to work with people in a way that preserves their dignity and builds on their strengths, empowering them to address their concerns, leading to better outcomes.
• Students learn to identify and work with the strengths inherent in individuals, families and communities.
• Students gain practical skills for assisting people in making positive changes that will improve the quality of their lives.
• Students are prepared for personal and professional growth.
• Students have built a solid base for graduate studies in a wide variety of professional and academic fields.
• Students become effective agents of positive change

Careers and Further Study
The health and human service industry has been identified by the Bureau of Labor Statistics as an area of increasing growth in the 21st century. Students majoring in human services may find themselves working and leading in a variety of settings — with adolescents in residential programs or with the elderly in nursing homes; in the community or in health centers; as program directors; as case managers or outreach workers. They work in prevention or in treatment, in after-school programs or criminal justice programs.

Our graduates are well positioned to enter graduate studies in human services, psychology, counseling, social work and related fields.

Admissions requirements: High school completion or GED and other School of Undergraduate Studies requirements (see Admissions).

Online courses: No more than 49% of your Cambridge College courses may be fully-online. International students may take only one fully-online course in any term.

Degree completion: General education requirements may be satisfied by an associate’s degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.
Bachelor of Science
Management Studies
120 credits

Program Description
The Bachelor of Science in Management presents a comprehensive management curriculum that equips students with the skills necessary to work in for-profit and not-for-profit organizations. Our students learn directly from practicing scholar-professionals, many of whom are distinguished area business leaders. The Cambridge College practicing professional teaching model gives students the opportunity to learn both management theory and effective, practical management techniques. By combining research, theory and practice, graduates will be prepared with the skills that will enable them to manage both people and complex issues.

Required courses provide a practical framework to the management curriculum, including the history of management theory, structures of for-profit and not-for-profit organizations, and theories of leadership. Students will gain knowledge of strategic planning, diversity issues in the workplace, financial requirements, human resource planning, and ethics. Along with these skills graduates will be prepared with an understanding of marketing and sales skills, and technological advances in the corporate and not-for-profit environments.

Final Project — Students complete a culminating research project in management related to their own personal and professional interests. Students demonstrate their mastery of management content and methodology, and apply their academic experience to a learning project that interests and challenges them.

Program Outcomes
• Essential management skills, including effective professional communication, human relations, teamwork, and negotiation.
• Theoretical and practical understanding of business processes and organizational systems.
• Practical business skills in accounting, economics, ethics and finance.
• Creating work environments that foster corporate social responsibility, sustainability, and long-term growth.
• The importance of diversity in today’s global business environment, and develop skills to manage diverse organizations.
• The analysis of complex managerial and organizational situations, taking into account the larger context, strategy, policy, and ethics.
• Information systems, databases and Internet technology as management tools.

Careers and Further Study
Graduates will be prepared for employment as team members and managers within corporate and non-profit organizations. Areas of employment may include sales, marketing, finance, information technology, e-business, general management, human resources and hospitality.

The undergraduate management program additionally prepares students for graduate study in management, economics, finance, human resources, sales and marketing.

Degree completion: General education requirements may be satisfied by an associate’s degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.
Program Description
The Bachelor of Science in Managerial Accounting gives students the skills and academic background to work in managerial accounting, and to sit for the Institute of Managerial Accountants’ (IMA) Certified Managerial Accountant (CMA) examination*. The curriculum focuses on the practical skills and knowledge-base which the IMA has identified as essential to the field, and these learning outcomes and coursework are directly aligned with the practical experience and academic requirements of the CMA certification examination. Graduates will be well prepared to work in this exciting and growing field, with both the knowledge and application-based training to make important institutional decisions based on sound financial principles.

*Full IMA certification requires an earned bachelor’s degree in finance, accounting or economics, successful passing of the CMA exam, and two years of documented work experience in preparation of financial statements, financial planning and analysis, auditing (external or internal), budget preparation and reporting, corporate investment decision making, or costing analysis (this experience requirement can be earned prior to, or within 7 years of passing the CMA examination).

Program Outcomes
- Planning, budgeting and forecasting
- Performance management
- Cost management
- Internal controls
- Professional ethics for management accounting professionals.
- Financial statement analysis
- Corporate finance
- Decision analysis and risk management
- Investment decision

Careers and Further Study
Graduates of the Managerial Accounting degree are well equipped to work in finance, book-keeping and accounting positions within private, public, profit and non-profit organizations. Additionally, students are prepared for graduate studies in accounting, finance and economics.

Admissions requirements: High school completion or GED and other School of Undergraduate Studies requirements (see Admissions).

Online courses: No more than 49% of your Cambridge College courses may be fully-online. International students may take only one fully-online course in any term.

Degree completion: General education requirements may be satisfied by an associate's degree or 60 credits of prior courses that meet all general criteria for transfer; up to 90 credits may be accepted.

Bachelor of Science

Natural & Applied Sciences
120 credits

Program Description
The Natural and Applied Sciences program provides students with applicable training across scientific disciplines, enabling them to integrate scientific thought and analysis throughout their course of study. The degree is composed of courses and laboratories in four major scientific disciplines: life sciences, mathematics, physical sciences, and engineering and technology. The integration of these classical areas of science encourages students to broaden their approach to analysis and scholarship, and to develop a creative perspective in the pursuit of scientific learning and practice.

Program Outcomes
- General education in the life sciences, chemistry, physics, mathematics, and applied sciences.
- Demonstrated understanding of fundamental concepts of scientific thought, data-based reasoning, statistical inference, scientific method, logic, and critical thinking.
- Analysis and application of knowledge of biological systems, life sciences concepts and laboratory procedures, human anatomy and physiology.
- Understanding and creative approaches to the application of mathematical concepts including statistics, statistical inference, probability, and data-based reasoning.
- Understanding and evaluation of the general concepts and procedures within the physical sciences, including: fundamentals of geology and geologic systems, general astronomy, college-level chemistry and physics.
- Analysis and creative approaches to general engineering, technology trends, and the application of scientific principles to research and product development.

Careers and Further Study
Competencies across scientific disciplines provide graduates with the fundamental academic training and analytical skills to work in a variety of science-related fields such as biotechnology, biological research, information technology, health science, and environmental science. Graduates will have a strong foundation to support graduate studies within the life sciences and other scientific fields.

Bachelor of Arts
Psychology
120 credits

Program Description
The Bachelor of Arts in Psychology is set within a broad-based liberal arts framework that has a strong interdisciplinary and humanistic foundation. The curriculum is a solid preparation for professional application in clinical, educational and human services, while also serving as a strong foundation for more specialized application and focus at the graduate level.

The psychology major prepares students for life-long learning, critical thinking and effective action in the field, and helps them develop a wide range of career options and skills that emerge from a broad and comprehensive grounding in psychology as the science of human behavior. An important feature of the program is personal reflection and application of new psychological knowledge and insights to new contexts. Given the scope, intensity and rapidity of social, cultural and technological changes in our world, the need to increase our understanding of the widest possible range of human experience and behavior has never been greater or more critical.

Required courses look at the history and methodology of psychology and introduce students to broader issues related to human growth and development, learning theory, personality, motivational and group theories, and a variety of approaches to psychopathology and psychotherapy. A special emphasis of the program is critical examination of the important roles of culture, history and belief in shaping differing approaches to the study of human behavior.

Final Project — Students complete a Capstone project which is a culminating piece of research in psychology related to their own personal and professional interests. Students demonstrate their mastery of psychology content and methodology and apply their academic experience to a learning project that interests and challenges them.

Program Outcomes
● Fundamental understanding of the historical development and methodologies of modern psychology.
● Understanding and basic knowledge of major psychological theories, concepts and processes.
● Understanding of learning theory and cognition, personality, motivation and group theories.
● Understanding of a variety of perspectives regarding mental health, psychopathology, maladaptive behaviors and psychotherapy.
● Understanding of the roles of cultural, social and historical forces in shaping behavior.

Careers and Further Study
Cambridge College Psychology graduates are well prepared to enter a variety of career pathways working with people. These include clinical, educational, human service and management settings, and research. Graduates work in a wide variety of institutional and private programs and agencies.

Our graduates are additionally well positioned to enter graduate studies in psychology, counseling, social work and related fields.

Elective Concentrations

Undergraduate Concentration

Accounting ........................................ 18 credits

The Accounting Concentration helps students gain an understanding of financial theory, tools and techniques so that institutional decision making can be based on sound financial principles. This concentration gives students the fundamental skills and academic background to apply contemporary accounting principles to their workplace.

BSM200 Introduction to Business *(required first course)* ..................................... 3
BSM330 Financial Accounting .......................................................... 3
BSM332 Financial Management *(preq. BSM330)* ...................................... 3
BSM409 Budget Preparation & Reporting .............................................. 3
BSM481 Cost Management & Internal Controls ...................................... 3
BSM494 Financial Statement Analysis ................................................ 3

Undergraduate Concentration

Addiction Studies ................................. 18 credits

Addiction Studies is for counselors, case managers, residence managers, and advocates. This concentration considers the impact of substance abuse on individuals, families and communities. It explores theories regarding addiction, various treatment approaches, and the societal consequences.

Prerequisite/concurrent courses:

PSY120 Formative Ideas in Psychology .................................................. 3
PSY325 Theories of Personality .......................................................... 3

Concentration courses:

BHS401 Introduction to Addictions ...................................................... 3
BHS411 Family Systems and Addictions .............................................. 3
BHS421 Mental Health and Substance Abuse ........................................ 3
BHS360 Ethical Issues in Substance Abuse ........................................... 3
BHS302 Women and Addictions ......................................................... 3
BHS361 Adolescent Drug Prevention .................................................. 3

Undergraduate Concentration

Community Building ............................. 12 credits

Community Building is for students planning careers in community work: building and organizing, developing programs and re-creating communities. The courses present an empowering approach to working with communities to improve conditions, expand opportunities and sustain positive change, by fostering relationships and social networks.

BHS322 Dynamics of Power in Communities ..................................... 3
BHS325 Community Planning & Development ................................... 3
BHS340 Youth Development & Community Practice ........................... 3
BHS445 Leadership for Community Builders ..................................... 3

Undergraduate Concentration

Education ................................. 18 credits *(does not satisfy licensure requirements)*

EMC319 Social Foundations of Education ........................................ 3
EMC420 Strategies for Teaching ......................................................... 3
PSY310 Psychology of Learning ....................................................... 3

*Continued*
Elective Concentrations

Undergraduate Concentration

Expressive Therapies .......................... 18 credits

Expressive Therapies provides an interdisciplinary approach to psychology, human growth and the therapeutic encounter with an emphasis on the creative process as an important component of clinical insight and psychological healing. Having developed out of the specialized fields of art therapy, music therapy, dance therapy and psychodrama, the expressive therapies incorporates different expressive art modalities into a holistic, action-based approach to working with people with a broad spectrum of psychological and medical issues. Practitioners work with individuals, families and communities in a wide range of treatment settings including hospitals, clinics, community health centers, prisons, youth and geriatric institutions, as well as in private practice, often as part of treatment teams.

PSY120  Formative Ideas in Psychology ...................... 3
PSY325  Theories of Personality ................................ 3
PSY376  Psychological & Therapeutic Dimensions of the Arts .... 3
PSY403  Psychodrama & Drama Therapy .................. 3
PSY407  Principles & Process of Art Therapy .......... 3
PSY408  Movement & Healing ............................. 3

Undergraduate Concentration

Family Studies ........................................ 18 credits

Family Studies provides the knowledge and skills needed by practitioners to work effectively with the many demands families today are facing. Our emphasis on building on strengths, respecting and valuing what is important to families while providing care in a culturally humble way, serves to empower families as students learn how to assist them in the changes they are seeking. Students who focus in this area often go on to further studies in human growth and development, human services, social work, marriage and family therapy, and family policy. Students may focus on working with families or family members, on family development, advocacy, case management, or policy.

BHS315  Understanding Family & Community Systems ........ 3
BHS366  Family Interventions ........................... 3
BHS400  Family Life Cycle ............................... 3
BHS430  Families with Special Needs ..................... 3
BHS365  Ethical Issues in Working with Families .......... 3
BHS Elective ........................................... 3

Undergraduate Concentration

General Management ............................... 18 credits

The General Management Concentration provides a practical framework for understanding contemporary management theory and practice.

BSM200  Introduction to Business ......................... 3
BSM305  Principles of Managing Organizations  
or BSM430  Nonprofit Organization Management ........ 3
BSM310  Organizational Theory & Behavior ............... 3
BSM325  Marketing  
or BSM326  Strategies for Selling .................... 3
BSM335  Human Resources Management ................ 3
BSM345  Business Ethics .................................. 3

Undergraduate Concentration

Health Care Management ............................ 18 credits

Health Care Management provides students with a theoretical and practical understanding of health care administration. Students gain knowledge of economic, financial, historical, legal and scientific concepts within health care systems. The concentration covers the regulatory requirements, management of personnel and fiscal practices that insure proper management within the health care industry.

Prerequisite course: BSM200 Introduction to Business ........ 3

Concentration courses:
BSM350  Health Care Systems in the U.S. ................... 3
BSM351  Human Resource Management in Health Care ..... 3
BSM352  Health Care Economics .......................... 3
BSM354  Legal Aspects of Health Care .................... 3
SCI339  Epidemiology & Public Health .................... 3
HCM301  Health Care Policy & Reform ..................... 3
Elective Concentrations

Undergraduate Concentration
Holistic Studies ........................................ 18 credits

Holistic Studies is an integrated approach to psychology that addresses the relationship between mind, body and spirit. It draws from multidisciplinary, theoretical and cross-cultural sources including contemporary mind-body approaches to healing. Holistic studies includes expressive art therapies and views the transformative nature of the arts as an important aspect of holistic psychology. Holistic perspectives are applied to human growth and development, psychological disorders and clinical practice, wellness, and the nature of human potential.

PSY120  Formative Ideas in Psychology ................. 3
PSY325  Theories of Personality .......................... 3
PSY316  Cross-Cultural Perspectives in Psychology .... 3
PSY345  The Spiritual Dimension: Psychological & Educational Themes .... 3
PSY376  Psychological & Therapeutic Dimensions of the Arts ... 3
PSY428  Holistic Psychology: An Integrated Approach ........ 3

Undergraduate Concentration
Hospitality Management .......................... 18 credits

Hospitality Management equips students to manage staff and systems in the hospitality industry. The primary focus is on restaurant front of the house and back of the house management, and on hotel management. Students can become more valuable individual contributors, outstanding team members, and managers of organizations within the hospitality industry.

Prerequisite courses:
BSM200  Introduction to Business ........................ 3
BSM325  Marketing ...................................... 3

Concentration courses:
BSM431  Introduction to Hotel & Restaurant Operations (required first course; may be waived with permission) .... 3
BSM432  Hospitality Operations Management .................. 3
BSM433  Hospitality Marketing, Sales & Food Promotion .... 3
BSM434  Advanced Hospitality Operations ..................... 3
BSM435  Food & Beverage Cost Control ....................... 3
BSM436  Legal Issues in the Hospitality Industry ................ 3

Undergraduate Concentration
Information Technology & E-Business .................. 18 credits

Information Technology & E-Business prepares students to develop strategies for managing infrastructure design, server management, security, e-business strategy and marketing. Graduates gain an overview of the technologies for electronic commerce on the Internet and current trends with respect to the technology of the World Wide Web, and explore various e-business models.

Prerequisite course: BSM200  Introduction to Business ........ 3

BSM413  Strategic Business Planning ....................... 3
BSM406  Introduction to E-Business ........................ 3
BSM420  Internet Marketing .................................. 3
BSM460  Database Management ............................. 3
BSM470  Project Management ............................... 3
BSM475  Information Technology ............................ 3

Undergraduate Concentration
Juvenile Justice Studies .......................... 15 credits

Juvenile Justice Studies provide students interested in working with adolescents and the juvenile justice system with a solid introduction into the history of youth services, current theories of adolescent development, and the impact of community disadvantage, child abuse and neglect on behavior.

JUS350  Introduction to Juvenile Justice ................... 3
PSY359  Understanding Child Abuse and Neglect ............. 3
JUS377  Legal Processes for Reporting Child Abuse .... 1 (PSY359 required concurrently)
PSY330  Adolescents in Search of Belonging .................. 3
JUS225  Introduction to Social Justice .................... 3
Two 1-credit JUS electives ................................. 2

Continued
Elective Concentrations

**Undergraduate Concentration**

**Legal Studies** .................................................. 18 credits

**Legal Studies** introduces students to the history and function of the American legal system and provides students interested in pursuing a law career with a basic understanding and knowledge of various aspects of law school and the legal profession. Cambridge College students are introduced to diverse topics and learning that incorporate principles of social justice, civil liberties and service to the community. It is in this context that students learn about and discuss executive, legislative and judicial law and their power to both shape and reflect our understanding of our changing society, world and communities.

- JUS205  Introduction to Legal Studies  ............ 3
- SOC212  Introduction to the American Legal System  .... 3
- JUS200  Crime and Criminal Justice  ............... 3
- PSY328  Forensic Psychology  .......................... 3
- JUS435  Restorative Justice and Victim Offender Reconciliation  . 3
- One JUS elective  ............................................. 3

**Undergraduate Concentration**

**Organizational Psychology**  ............ 15 credits

**Organizational Psychology** combines psychology and management. It focuses on organizational and institutional behavior; the psychology of work and working systems, leadership and management styles; and the shifting relationships between individuals and groups. Topics include communication styles and skills, enhancing work environments, mediation and conflict resolution, and valuing human diversity in the workplace.

**Prerequisite/concurrent courses:**

- PSY120  Formative Ideas in Psychology  ............... 3

**Concentration courses:**

- PSY110  Systems Thinking in Psychology  ............... 3
- PSY325  Theories of Personality  ....................... 3
- PSY421  Psychology & Work Today  ..................... 3
- BSM310  Organizational Theory & Behavior  ............ 3
- BSM315  Diversity in the Workplace  ................... 3
- BSM465  Negotiation & Conflict Management  .......... 3

**Undergraduate Concentration**

**Peace & Justice Studies**  ............ 18 credits

**Justice Studies** is concerned with treating justice issues as a general class of social and political problems to be understood. It is through understanding of the issues that underlie injustice that society is able to create social change. It is the mission of the Justice Studies program to recognize that the fair and equitable provision of justice is the only path to a more just and humane world.

- JUS225  Introduction to Social Justice  ............... 3
- JUS345  War, Peace and Non-Violence  ................. 3
- JUS435  Restorative Justice and Victim Offender Reconciliation  . 3
- (new)  Wealth, Poverty and Inequality  .................. 3
- (new)  Special Issues in Justice Studies  ................. 3
- One JUS elective  ............................................. 3
Alcohol & Drug Counseling is for students seeking professional training in substance abuse/addictions treatment, education and prevention, leading to certification or licensure.

Careers — Addictions counseling professionals help people through public health agencies, youth services, residential treatment programs, hospitals, outpatient substance abuse programs, and homeless shelters.

Learning Outcomes — Students become familiar with addictions counseling, its professional ethics, and its role in society. They learn the 12 core functions of an addictions counselor: screening, intake orientation, assessment, treatment planning, referrals, reports and record keeping, and consultation with other professionals. They know and apply current theory and research in their field, and gain sufficient knowledge for competent interdisciplinary counseling practice. They exhibit socially-conscious behaviors, critical thinking, and effective communication skills in their work with individuals, caregivers, families, staff, and other professionals.

Courses
ADC510 Ethics & Boundaries for Substance Abuse Professionals 1
ADC505 Alcohol & Drugs in Society ............................. 3
ADC611 Family Treatment of Substance Abuse. .......................... 3
ADC601 Role of the Professional in Alcohol & Drug Treatment. 3
ADC625 Psychopharmacology in Addictions Treatment ....... 3
ADC642 Addiction Counseling .......................... 3

Practicum
Includes 300 hours of supervised practical experience in an approved substance abuse treatment program with appropriate supervision in the 12 core functions. The experience and supervisor qualifications must meet 262 CMR criteria to be accepted into an MEd.

ADC521 Practicum Seminar in Alcohol & Drug Counseling .... 3

See course descriptions under the School of Psychology and Counseling.

Admission requirements: High school diploma/GED, bachelor's, or higher degree and other School of Psychology & Counseling requirements. (see Admissions) Including:

- Interview with and approval of the SOPC Admissions Committee and acceptance by the dean.
- Interview with program chair.
- Current résumé.
- Two professional recommendations.

These courses may be accepted into a Cambridge College bachelor's or master's degree. Courses must meet current program requirements at time of matriculation.

Program co-chairs:
Colleen Goode, MEd  •  Colleen.Goode@cambridgecollege.edu
John Ciervo, CAGS  •  John.Ciervo@cambridgecollege.edu
Adult Learning, Principles of (LRN)

LRN 175 Principles and Processes of Adult Learning - 3 credits
Students explore theories of adult learning. They clarify the fit between their academic program and their learning and career needs, and see how their prior learning fits in. They assess their academic skills of critical thinking, mathematics, writing, and computer literacy. Students become independent learners who can effectively manage the structures, processes and expectations of undergraduate education.

LRN 200 Career Development and Planning - 3 credits
This course will explore the interrelationships among lifestyle, work place, and career planning and execution. Career development theories; occupational educational and personal/social information sources and delivery systems; and organization of career development programs are studied. The course will also emphasize the role of self-assessment of interests, values, and skills. Then it will move to an understanding of the steps in career decision making, and learning the necessary employability skills to obtain roles that ultimately amount to a career.

Arts (ART)

ART 200 Introduction to Studio Arts - 3 credits
This course provides essential, hands-on familiarity with the materials of art and principles of design. It focuses on the “grammar” of visual arts and art materials: line, color, texture, scale and composition, and does so especially in the media of painting, drawing and collage. It enhances your frame of reference for evaluating criteria of beauty and your ability to use and understand visual art as an expressive means of communication within and between cultures.

ART 201 Studio Art II - 3 credits
This course is a sequel to ART200. It builds on previously learned art studio skills and visual arts “grammar.” Students will be exposed to various extensions of ideas such as: art volume and space, focus, composition, pattern and placement. This course will expand the student’s experience of “seeing” and the translation of visual perception into art making, especially in media such as painting, drawing and collage. Works of art from multiple cultures will be treated. Methods and principles for learning will integrate visual literacy with written and spoken communication. The course will further the idea of visual art as a powerful collective and personal expression of the human experience.

ART 211 Experiencing the Visual and Performing Arts - 3 credits
ART211 provides an introduction to the visual and performing arts; examining the major historical developments, traditions and practices within the visual and performing arts. We explore artistic genres spanning dance, music, theater, and other visual and expressive arts. Through readings, lectures, presentations and other activities, students will develop an understanding of the theories and terminology of the major movements in the global history of the visual and performing arts.

ART 215 Introduction to the Theater - 3 credits
This course surveys major aspects of theatre from ancient Greece to the present. It includes study of significant playwrights, plays, theatre design, dramatic methods and principles. Given the public nature of drama, the relationship between the dramatic works and their cultural contexts will be explored.

ART 217 Storytelling Through Video and Film - 3 credits
This course is designed for people who want to become better film and video storytellers. It is also geared towards those who like movies and television and want to increase their appreciation of those forms. The course will introduce you to the basic building blocks of film and video language; such as, shot composition and framing, editing, sound and dialogue, and narrative structure.

ART 220 Creativity and Analysis in the Arts - 3 credits
Students learn how artists, art critics and philosophers think about and create visual arts, theatre, music and other arts. We examine the lives and works of artists, theories of creativity, and criteria for defining beauty and assessing quality. Students get direct experience of the arts through art exhibits, films, interviews, performances and other media.

ART 230 Western Arts I: A Survey of Art from Ancient Times to the Renaissance - 3 credits
Beginning with reference to ancient Minoan and Mycenaean art, this course surveys the development of Greek art to and beyond the classical period, the phases of Roman art, the Romanesque, early and late Gothic Art and the Renaissance in Europe. Students develop vocabulary and skills for the analysis of painting, sculpture and architecture, and an ability to communicate about them orally and in writing. The course examines style, technique, and iconography in their historical and cultural context, considering the religious, political, and intellectual climates expressed through the arts. We learn criteria for evaluating quality and beauty, examine how an object was made, for what purpose and audience. This course may be taken independently of ART231, Western Arts II.

ART 231 Western Arts II: Survey of Arts from the Renaissance to Post-Modernism - 3 credits
Beginning with the Renaissance, this course surveys the exciting proliferation of styles, symbolism and techniques in western visual arts during the past five hundred years. Major styles and periods include mannerism and the baroque, neo-classicism, romanticism, realism, impressionism and the many forms of modernism, among them, expressionism, surrealism, abstraction and post art. Students
strengthen their vocabulary and skills for the analysis of painting, sculpture, architecture, and gain enhanced ability to communicate about them in writing and speaking. The course examines style, technique, and iconography in historical and cultural context, considering the religious, political, social and intellectual climates articulated in the arts, including new systems of patronage and attitudes toward the public. We learn criteria for evaluating quality, beauty and accomplishment in the arts, and examine how an object was made, for what purpose and audience. ART230 Western Arts I is useful preparation but is not required.

**ART 303 Modern Theatre and Public Conscious - 3 credits**
At the dawn of the 20th Century, the idea of theatre and its role in society changed. Public spectacle about the lives of kings and queens, as well as the overheated melodramas so popular in the mid-1800s, were increasingly replaced by a subversive theatre that challenged audiences to consider their own role in society, whether "realistically," "absurdly," or "magically." Ibsen’s defiant heroes and Chekhov’s waning aristocrats gave rise to American working-class heroes (and losers) in Clifford’s Odets and Arthur Miller, the militant theatre of Bertolt Brecht, the absurd theatre of Ionesco and Beckett. Finally, the contemporary theatre must contemplated in considering what such works as Tony Kushner’s Angels in America and Home-body; Kabul and the public reception of them, have to say about us, our culture, our art, and our vision of humanity.

**ART 305 Women and Film - 3 credits**
This course focuses on how women are shown in key films of the 20th century. Films presented consider images of women that are one-dimensional (sex goddesses or saints, career women or mothers, vamps or all-American girls) as well as more complex, multidimensional characters. We explore the issue of how the star system, the Production Code, social values, and the personal vision of the directors affect women's depiction on the screen. We learn film vocabulary terms that help us discern and analyze how films use sound, visual, and narrative techniques to portray the image of women. Moreover, the course studies how and to what extent films today influence women's ideas about beauty, identity, marriage, motherhood, career, sexuality, and gender issues.

**Chemistry (CHM)**

**CHM 100 Chemistry I - 3 credits**
The purpose of this course is to introduce a foundation of chemistry, green chemistry and the molecular basis of materials. It will provide teachings in molecular structure, properties and reactivity of materials. Highlighted throughout are the “real world” applications of materials and their intentional and unintentional impacts on human health and the environment. Green chemistry, the design of products and processes that reduces or eliminates the use or generation of hazards, will be infused throughout the course. The student will come away with a basic understanding of the principles of green chemistry.

**Computer Sciences (CMP)**

**CMP 130 Introduction to Computer Applications - 3 credits**
Assessment available. This course provides a hands-on introduction to the personal computer, Windows, word processing, spreadsheet, presentation software, the Internet, and an overview of Word, Excel and Power-Point uses. Students begin with the basics of each application and progress through intermediate level.

**CMP 230 Information Literacy - 3 credits**
Prerequisite: CMP130 (course or portfolio) and familiarity with Windows and/or Mac operating system, or permission of instructor. Information literacy is necessary for lifelong learning and career advancement. It is the ability to analyze problems, research and select relevant information, create an effective presentation from that information, and, when appropriate, publish it in print or electronic formats. Students acquire the knowledge, skills, and abilities to apply principles of information literacy to their academic and professional lives. A problem-centered approach is used. Students use the Internet and e-mail news groups, file transfer and Netscape, and search engines. They learn to evaluate the credibility of information and use problem-solving paradigms.

**CMP 310 Computer and Network Support: Part I - 3 credits**
This is the first of two classes that provides the technical skills and knowledge students need to be successful in entry-level IT careers. Through a combination of lecture and hands-on work, students learn about PC hardware, operating systems, and basic networking.

**CMP 320 Computer & Network Support: Part II - 3 credits**
Prerequisite: CMP310. This is the second of two classes that provides the technical skills and knowledge students need to be successful in entry-level IT careers. Through a combination of lecture and hands-on work, students build on their existing knowledge of networking and learn PC imaging, operating system installation, and helpdesk soft skills.

**CMP 330 Web Production I - 3 credits**
This is the first of a two-part course on design and implementation of full-featured, interactive websites. Students become familiar with the principles of effective web design. They learn the tools and applications necessary to develop the front-ends to effective and dynamic web sites. Through hand coding and the use of WYSIWYG editors such as Dreamweaver, students develop proficiency in HTML, Cascading Style Sheets, and JavaScript.

**CMP 340 Web Production II - 3 credits**
This is the second of a two-part course on design and implementation of full-featured, interactive websites. Students tackle back-end issues pertaining to web development. First, they get an understanding of web/database interactions, and then learn to use various coding techniques and applications to create and manage these interactions. Moreover, students put their skills to use on various real-life projects for real external clients. Prerequisite: CMP330.
Critical Thinking (CTH)

CTH 225  Foundations of Critical Thinking - 3 credits
We learn to engage in reasoned thinking. We learn to formulate hypotheses; conceive and state definitions, and understand logical consistency and inconsistency. We explore the differences between claims of fact, value, and policy; what constitutes credible evidence; the nature of assumptions. We learn what constitutes a persuasive argument as opposed to an emotive and propagandistic one, and critically examine them. Students learn to present clear, well thought out critical arguments in writing and oral presentations. We look at the relationships among thinking, writing, speaking and listening, laying a strong foundation for improving our capacity to write, speak, and listen well.

CTH 300  Critical Thinking Through Cinema - 3 credits
This course examines the development of film as a medium for recording and shaping history, for telling primal myths and archetypes, for entertainment, politics and commerce. We consider the vocabulary and methods of film and its limitations, especially when it transfers literature from the page to the screen.

Communications (COM)

COM 322  Effective Oral Presentations - 3 credits
Through practical study and experience preparing and giving presentations, learners develop expertise and gain confidence in speaking before groups. Students gain competency in preparation, organization, time management, voice projection, enunciation, appearance, posture and body language in order to expand their professional communication skills.

Education (EMC)

EMC 200  Science in Elementary School - 3 credits
This course introduces day to day curriculum planning for sciences. Students learn the rationale, language, and ways of planning effective elementary classroom science teaching. Techniques, strategies and resources are addressed in an experiential class to develop skills that are immediately applicable in many courses 1-6.

EMC 201  Curriculum Development: Social and Cultural Studies: Elementary Grades - 3 credits
Students master the basics of developing their own social studies unit. They study essential topics and skills as stipulated in DOE frameworks. We analyze published curricula and textbooks. The skills to be developed include library skills, field trips, map-making, and neighborhood-based projects.

EMC 202  Classroom Testing and Measurement - 3 credits
Educators are experiencing greater pressure to become more knowledgeable about assessment techniques. This course introduces educational testing and measurement, including traditional teacher-made tests and newer methods. Prospective teachers try out new skills for classroom application. More experienced teachers “finally make sense” of some basic testing concepts including norm-referenced and criterion-referenced tests. We practice structuring test items and learn what constitutes content validity. We apply performance based measures and learn about portfolio assessment. An overview of basic statistical concepts increases confidence in interpreting test results. More importantly, new skills improve teaching and enhance learning.

EMC 210  Introduction to Early Education and Care - 3 credits
Students will learn about the skills necessary for being an early childhood teacher and what the profession offers and requires for career and professional growth. The topics covered include what it means to create a developmentally appropriate program for young children, issues of the daily care of children, and current and future trends of the profession. Included will be an understanding of how developmental, emotional, and educational needs of young children (birth to eight years of age) are integrated in the course of daily life.

EMC 215  Integrating Technology into Teaching and Learning - 3 credits
Technology is most effective when it seamlessly supports instruction. Standards-based software can provide key skills and concepts, give the students the opportunity to model dynamic systems, and allow them to express themselves through a variety of media. Presentation tools address a range of learning styles with visual and auditory cues. Internet resources allow learners to access original source material and provide a forum for discourse among classmates, and with the instructor. Properly integrated, technology forms a silent background for sound educational purposes.

EMC 300  Classroom Management and Discipline - 3 credits
This course is designed to support prospective teachers in the exploration of student differences in the classroom and how it impacts...
theory and learning, specifically in regards to issues of classroom management and discipline. The course will focus on issues such as classroom management techniques, group dynamics, teacher/student interrelations, leadership styles, peer group dynamics, appropriate punishment, crisis control, coping with special students, teacher/student rights, teacher authority, and communication with parents and administration. A primary objective is to examine how well-organized and managed classrooms set the stage for student learning and achievement. This course, as such, explores both the theory and practice in the field of classroom management to provide students with a theoretical foundation and personal strategies that can be effectively implemented in the elementary classroom.

EMC 301 Integrated Language Arts & Reading - 3 credits
Students investigate the reading process and the rationale for integrating listening and speaking, reading, writing, and critical thinking by practicing all of these elements. Focus is on the principles and practice of language acquisition and activities that encourage creativity and methods of developing, linking and expanding a child's encounters with literature.

EMC 304 Language, Art and Music for Children - 3 credits
Students investigate methods of developing, linking and expanding children's encounters with literature. The course also integrates art, music and drama into the curriculum of early childhood classrooms. The course includes a weekly lab in which students design and present lessons in the creative arts. Students learn many reading, art and music activities that are age-group appropriate, and how to present them to children.

EMC 306 Mathematics for the Early Education Classroom - 3 credits
The course uses the Massachusetts Frameworks as the guideline to provide instruction on how to creatively teach number concepts, patterns, shapes, space, measurement, and data collection. Students learn how mathematics connects across disciplines and how this subject can be embedded in daily activities beyond the classroom, challenging teachers to be alert to opportunities for facilitating mathematical understanding.

EMC 307 Inclusive Teaching in Early Childhood Settings - 3 credits
This course will introduce the process of achieving an inclusive classroom. Topics addressed will include: the nature of various disabilities and the laws that govern their education; how to use best-practice strategies, accommodations, motivational interventions, and differentiated instruction so that ALL students benefit from instruction; how to work with other school professionals as part of a team that supports students with disabilities, as well as students from culturally and linguistically diverse backgrounds; and how to develop the affective skills of students, including behavior management strategies for behaviorally challenged students.

EMC 308 Observing and Recording in Early Education Classrooms - 3 credits
This course will provide strategies for authentic assessments of young children in school and family settings. Appropriate use of assessment and observation strategies to document development, growth, play, and learning will be studied. Students will learn the value of using data from assessment to enhance curriculum and instruction for the class and individual child. Students will also learn to work with families and other professionals to share assessments and resulting strategies to best serve children.

EMC 315 Developing Curriculum for Young Children - 3 credits
Students will demonstrate their ability to organize the environment and plan developmentally appropriate curriculum within a high-quality learning environment to facilitate young children's learning. They will identify the range of appropriate behaviors, activities and materials and be able to implement an integrated, comprehensive, developmentally appropriate curriculum in a supportive physical and social setting for children birth through age 8.

EMC 316 Effective & Positive Learning Environments in Early Childhood Settings - 3 credits
The emphasis of this course is on using appropriate guidance techniques to promote positive behavior in childcare settings. What is critical is to understand that interventions must be based on the different developmental, cultural and self-esteem needs of children. Students will be presented with discipline models to become competent practitioners of techniques for birth-8 that match the student's personality and philosophy of learning as well as what is appropriate for the developing child. They will learn to help children develop self-regulation, self-concept, coping mechanisms, self-comfort skills, and positive interaction with peers and adults.

EMC 317 Educational Perspectives in Early Childhood Growth and Development - 3 credits
This course covers theories of child development and the developmental sequences critical for early education with emphasis on physical, sensory, language, cognitive, and social-emotional development in the context of individual differences. The course will focus on how children (birth-8) learn based on research in early brain development and the impact of adults on this learning process. Students learn how to create safe, nurturing and challenging learning environments that are developmentally appropriate and promote growth, social skills and knowledge.

EMC 318 Successful Inclusion in the Classroom - 3 credits
Students will learn about different techniques and models that promote the successful inclusion of all students in elementary and early education classrooms. Students will gain knowledge about existing federal and state laws, how to adequately understand and develop individualized education plans, plan collaboratively with other teachers to meet students’ needs, and enrich the learning environment for all.

EMC 319 Social Foundations of Education - 3 credits
The social foundations of education course is an exploration and analysis of the underlying issues within contemporary educational policies, practices, and theories. It is an attempt to ground the day-to-day realities of the classroom within larger philosophical, historical, anthropological, political, legal, and sociological contexts. Such an interdisciplinary perspective will allow students to begin to reflect upon the structures and practices of American education and provide...
a foundation from which to continue becoming reflective and critical educational practitioners.

**EMC322  Health, Safety & Nutrition for Early Childhood Settings - 3 credits**

This course will focus on health, safety and nutrition as well as preventative health maintenance of the young child. Students will learn to recognize and respond to child abuse and neglect as well as other factors that may threaten a child's safety. Students will study current theories and practice problem-solving methods and conventional applications for in-class situations. The role of culture, language and ability on health decisions and how they impact young children will be assessed. Students will develop activities and resources for a health curriculum that encompasses all aspects of the healthy child.

**EMC323  Early Childhood Program Planning and Development - 3 credits**

This course assesses the management of early childhood programs and child care centers. Topics covered include planning, managing and evaluating programs and environments for children. Subjects for discussion are marketing, record keeping, budgeting, licensing, accreditation, hiring, motivating/evaluating staff, family involvement and community collaborations. Emphasis will be placed on regulations, applicable laws, professional standards, policies and quality standards. Students will learn best practices in supervision and managing resources.

**EMC324  Partnering with Families and Communities in Early Childhood Settings - 3 credits**

This course will help students understand diverse family structures and influences and develop consultation and interpersonal skills necessary for communication with coworkers, parents and community members. Students will learn strategies to build respectful and reciprocal relationships with families and the broader community allowing them to help families navigate community resources and schools. Intervention strategies and interviewing techniques will be stressed. Discussions include dynamics of the team process, roadblocks to communication, and analysis of a school system, with subsequent in-service recommendations. Students have an opportunity to apply these learned skills while examining theory concurrently.

**EMC325  Principles of Early Childcare Administration - 3 credits**

This course will emphasize professionalism and leadership in early childcare settings, leading students to understand and adhere to ethical guidelines and professional standards. Students will learn the value of collaborative leadership where knowledge is shared, reflective practice is encouraged, decisions are informed by data, best practices are followed and diversity is valued. Students will learn to develop themselves as leaders and mentor others.

**EMC326  Supporting Diversity and English Language Learners in the Early Education Classroom - 3 credits**

This course will focus on the theory and practice of multicultural education, providing students the skills and knowledge necessary to create classrooms that best serve all children. Students will explore how children's experience is shaped by their race, gender, class, ability, religion, language, etc. They will learn to create classrooms that will embrace diversity, valuing the contributions and cultures of all students. This course will also include specific strategies relative to best practices for serving English Language Learners.

**EMC330  Literature for Children - 3 credits**

This course examines literature for children and young adults from a variety of perspectives. The literature includes classics of poetry, drama, folktales and other fiction. We seek to understand and appreciate the role that literature plays in the stages of a child’s development. Students will examine the quality of the literature, and appreciate how and why it appeals to children and young adults.

**EMC401  Teaching Mathematics in Elementary Grades - 3 credits**

This course provides elementary teachers with a strong foundation in mathematics language, principles, and teaching methods and strategies.

**EMC410  Current Issues and Topics in Education - 3 credits**

This course focuses on current issues in the field of education. Topics for this course are selected from issues and/or concerns raised by the United States Dept. of Education, professional educational organizations, and state boards of education. Students study the historical roots of the selected issues and evaluate approaches to addressing the issues.

**EMC412  Storytelling and Playmaking - 3 credits**

Students learn developmentally appropriate teaching practices through stories, writing, literature, arts, storytelling, and children’s play. Students learn to observe and record the behavior of children ages three to seven and apply their knowledge of developmental stages and the characteristics of young children with and without special needs, to an integrated language arts curriculum. The course includes methods to create a classroom environment that recognizes racial, cultural, and linguistic diversity in young children and supports their learning.

**EMC415  Multidisciplinary Approach to Content Areas - 3 credits**

Study of basic disciplines (social studies, arts and humanities, sciences) and how they may be related to enhance the teaching and learning experience including experience with designing lesson plans and effective teaching units.

**EMC420  Strategies for Teaching - 3 credits**

This course introduces students to the field of education as an entrance into the challenges and opportunities of becoming a classroom teacher. The course provides a general overview of best practices in teaching and student learning within the context of how American education is organized. This course serves as a foundation for becoming an effective and moral teacher, and, as such, emphasizes understanding of national and disciplinary standards as well as overarching codes of ethics of being a teacher. In particular, the course uses the NCATE standards to highlight the need for a teacher to possess specific content knowledge, pedagogical skills, and dispositions. The course is applicable for elementary, middle, and high school teachers and will make use of both content-independent and content-specific pedagogical methods to demonstrate and apply applicable best practices.
**EMC 402  Early Education and Care Field Experience - 3 credits**

This course is an advanced field experience that includes observation, participation, and teaching in the early childhood setting (specifically preschool and kindergarten). Emphasis is on program planning including assessment for children in early childhood education. The candidate must apply to the Early Education and Care program chair one semester in advance to enroll in this course.

**History (HIS)**

**HIS 101  World History I - 3 credits**

This course provides an understanding of early civilizations from ancient times until c. 1650. Early civilizations include Egypt, Babylonia, India, China, Israel, Greece and Rome. European coverage includes Middle Ages, Renaissance, Reformation and beginnings of the Age of Discovery. This course includes cultural, intellectual, political and economic developments, and is the basis for the 2nd term, HIS 102.

**HIS 102  World History II - 3 credits**

This course explores the historical foundations of the modern world. It reviews the Reformation, Renaissance and the effects of European trading and settlement throughout the world. It continues with the Age of Enlightenment, the American and French Revolutions, the Romantic period, nationalism, industrialization and urbanization, and the transforming 20th century movements in politics, the arts and technology.

**HIS 201  U.S. History & Constitutional Government I - 3 credits**

This course traces the development of the United States from the colonial period to the end of the Civil War, surveying the economic, political, social and cultural aspects of this development. The course covers the period of exploration, early settlements, colonial life and issues, the development of a unique political philosophy, conflict with Britain, the Revolution, the development of a government based on a new political theory and the development and problems of this new American society and government in its first seventy-five years. Constitutional development at the national and state levels is explored, with particular emphasis on the Massachusetts experience.

**HIS 202  U.S. History & Constitutional Government II - 3 credits**

This course traces the development of the United States from 1865 to its present status as a world power, analyzing economic, political, social and cultural factors. The functioning of American federal and state constitutions is analyzed, providing the knowledge and understanding needed by teachers and other professionals who interact with the public sector. The course covers the aftermath and effect of the Civil War, industrialization and its impact, waves of new immigration, western expansion, conflict with Native Americans, emergence as a world power, World War I, the Great Depression, World War II and later issues of the 20th century.

**HIS 230  A Social History of Food - 3 credits**

Throughout the world and history, people have come together over food. We are what we eat: we eat what our family, friends and society tells us is “food.” But, our ancestors did not always eat the same foods as we do now. Both the types of food and more importantly, cultures, change through time and space. How has the development of towns, the exploration of the globe, religion, the slave trade, the social presentation of self and status been expressed through food? Contemporary approaches to food world-wide will also be examined. The class will bake their own sourdough bread, visit historical sites & ethnic restaurants, do oral histories, produce a cookbook and, of course, eat lots of food!

**HIS 301  US History through the Media - 3 credits**

This course explores the cultural, technological, political, and economic transformations of American life from the early 1900s to the present through various modes of mass media. The course uses visual and print media such as film, radio, and TV to examine critical issues and phenomena such as immigration, the world wars, the civil rights movement, and the rise of consumerism. Students will evaluate the content and context of new media formats and the role that such media played on the events covered.

**HIS 302  History of the Modern Middle East and North Africa - 3 credits**

This course will explore the modern history of the Middle East and North Africa through an investigation of the historical, social, political, religious and economic forces that have sculpted the current cultural landscape across this vast region. Through readings, films, art and news reports, we will examine the impact and influence of imperialism, revolution, expansionism, hegemony, post-colonialism, nationalism, gender and modernity on the region, and develop an informed perspective of the current social and cultural realities across the Middle East and North Africa.

**HIS 310  Perspectives on Ancient Egypt - 3 credits**

Ancient Egypt figures in film, song, literature and history, but is the ancient Egypt that popular culture imagines now the same as the people saw for themselves then? Drawing upon historiography, archaeology, art history, history and comparative literature in juxtaposition with popular film, fiction and song, students will dissect images of ancient Egypt through time to come to an understanding of ancient Egypt, then and now.

**HIS 321  Historical Perspectives on Contemporary Issues - 3 credits**

This course examines and analyzes the development of political, cultural and economic issues and structures that shape current events and public discourse. Topics vary by term and may include the evolution and current nature of American political parties, of the Executive Branch, the effects of new media, globalism and others. Students learn to analyze source materials and to distinguish fact from opinion.

**HIS 343  History of Massachusetts - 3 credits**

This course focuses on major persons and events in the history of Massachusetts from Pilgrims, Puritans and Native Americans to the 20th century. Special attention is paid to the development of forms of representative government in the Colonial period and after...
independence, and to the integration of numerous immigrant groups to the Commonwealth in the 19th-20th centuries. The role of Massachusetts in driving industrial and technological change in America is considered, as is its role in inaugurating public education in America. The course satisfies a key content knowledge area for public school history teachers.

HIS 344 History and Theory of the Labor Movement - 3 credits
What are the origins of the modern labor movement? How is it changed and adapted in the 20th century? What new developments have occurred in the 21st century? What laws govern unions? What have unions done for workers? How have free trade, globalization, the economy, and current trends in political thought affected the effectiveness of unions? Is the labor movement still necessary and relevant to today's workers? This course will examine the formation of the AFL and the CIO, the merger AFL-CIO, and the new Coalition for Change. It will analyze the growth of industrialism and de-industrialism, consider the roles of race and class in the movement, and study the theories of the movement that brought it together and split it apart.

HIS 350 Introduction to Political Science - 3 credits
What is the perfect society? How much power should the government have? Is democracy the best form of government? Political science is the study of how and why people come together to form governing institutions. To understand the nature of government, political scientists study such issues as power and authority, human nature, freedom, obligations, justice and the organization of the state. In this course, we examine the work of some of the greatest political thinkers — Aristotle, Plato, Aquinas, Machiavelli, Hobbes, Rousseau, Nietzsche, Locke and Marx — and learn how they look at politics, government and the individual. The course explores a central issue of government: the difficulty of reconciling the good of an individual with the good of the public. In thinking about this question, students reflect upon the definition of justice, the nature and importance of freedom, the relation between an individual and the community, the best form of government, and the character of the ideal ruler.

Human Services (BHS)

BHS 125 Spanish for the Helping Professions - 3 credits
This course is designed for beginning level students in the helping professions such as workers in human services, community agencies, health care organizations, educators, and others who wish to learn Spanish. This course will enhance students’ ability to communicate with Spanish speaking populations in work situations related to the health and human services, education and community work. This course will offer intensive exercises in oral communication, reading, listening and written practice of the Spanish language to enhance oral proficiency. Students will not become fluent as a result of this course, but will begin the process of learning how to communicate in a culturally sensitive manner within the context of the helping professions.

BHS 208 Financial Literacy - 3 credits
This course will provide an historical perspective on the creation and expansion of the wealth and opportunity gap within the United States.

It will look at the role that education has played in narrowing the income gap, while also looking at the limitations of increased years of education in affecting change with regard to wealth. The course will seek to broaden students' awareness and knowledge of these gaps and provide concrete information and strategies for developing a solid understanding of how to create a financial base. It will cover basic economic literacy, financial planning, credit management, basic banking, home ownership, and the impact of policies that help and hinder the creation of wealth. The course will also create opportunities for students to have increased resources in the areas addressed through the guest speakers who will present on each of the content areas. In essence, understanding of the history of wealth and asset building in this country, their current financial circumstances, how to better manage their money, and take control of their financial health. It will make explicit the role that building financial health has in creating healthier families and communities, in social mobility.

BHS 300 Domestic Violence: Risks, Trends, Resources - 1 credit
Domestic violence*, also referred to as intimate partner violence (IPV), affects men, women and children of all races and social and economic levels. In 2008 domestic violence reached epidemic proportions and was declared a public health emergency in Massachusetts (Comm of MA, 2015). This course will examine recent statistical trends in reported cases of IPV, the identified risks and behaviors that may serve as cautionary indicators in relationships, and the personal, community and legislative resources available to those who are subject to physical and psychological violence. Students will be guided in exploring their personal attitudes toward domestic violence, violence and gender as well as social acceptance of psychological violence. The role of the human service professional in working with families impacted by domestic violence will be explored.

*Domestic violence is the willful intimidation, physical assault, battery, sexual assault, and/or other abusive behavior as part of a systematic pattern of power and control perpetuated by one intimate partner against another. It includes physical violence, sexual violence, threats, and emotional abuse. The frequency and severity of domestic violence can vary dramatically.

BHS 302 Women and Addictions - 3 credits
This course explores addictions that women have struggled with historically and some now common to women. We discuss the relevance of gender-specific treatment for women, the “real life” complexities of women's lives, the barriers that keep them from receiving the treatment they need, and the most common co-occurring disorders faced by women who experience addiction problems. The impact of the media is also considered. Students examine various theories in relation to treatment of substance-abusing women. A systemic approach is taken to the complex circumstances of these women's lives.

BHS 305 Introduction to Human Services - 3 credits
This course provides an overview of the history, philosophies, structures and systems of delivery for human services. Drawing from a variety of resources including case studies, students learn what the programs are, whom they serve, and how they work; they explore protocols and procedures to evaluate their success. Particular attention is paid to questions of poverty and wealth and their impact upon
Students who are working or preparing to work in education and human services are engaged through interactive learning experiences to understand the development of partnerships with schools to reach, engage, and support families. The model for community success includes building partnerships and providing supports and opportunities that promote active and positive working relationships. Students gain a vision and practical knowledge of what effective partnerships look like and how to tap into community resources. Each student designs a plan to promote school and community partnerships.

BHS 332  Dynamics of Power in Communities - 3 credits
Understanding the theory and how power is used in communities is a key factor for community builders. Developing networks, relationships and strategies must be based on knowing what the forces are and how they interact. This course takes a close look at the underlying connections among the economic, social, political and personal forces of communities as to how they relate to power and change. The course will look at political structures and systems in families, workplaces, institutions and other organizations that make up a community, and the dynamics that occur in terms of decision making and the process of change.

BHS 324  Building Community through Media - 3 credits
Understanding the potentials and functions of media, particularly media that is available at the grassroots level, offers community people ways to reach and engage one another. In collaboration with Cambridge Community Television (CCTV) a “rigorous” emphasis will be made on the use of media for building community. The course aims to broaden students’ understanding of media in general, and community media in particular, and how such media can impact a community’s understanding of, and involvement in local issues. The course provides a hands-on, multimedia approach coupled with theory to help students gain a strong appreciation for what media is, how it addresses a diverse audience, how it is used and by whom, and its powerful effect upon communities depending upon who’s making it and for what reason.

BHS 325  Community Planning and Development in an Urban Environment - 3 credits
The course will focus on community planning and development and how the process is continuous, guided, and ideally adheres to principles of community building. This course focuses on specific issues of community development where the physical and economic vitality of communities is improved through stakeholder interaction. The literature and activities used in this course will ground students in the issues and tools used to critically examine various community development approaches and projects through a community building lens. Students will be introduced to core theories and methods of city and neighborhood planning, will formulate a research design and scope of services to investigate existing conditions, and will learn how to collect and use data as part of the process of building on local assets to design effective and inclusive solutions to local needs.

BHS 327  Building Successful Organizations - 3 credits
Organizational capacity is the interaction of human capital (employees and clients) with organizational structures to solve collective problems and improve and maintain the well-being of that organization. This course will explore the concepts and practices of developing effective
and evolving organizations. The course will be highly interactive and will emphasize the sharing of experiences, ideas, and insights from students. Students will be encouraged to ground the ideas discussed by applying them to their own organizations or those they are familiar with. Critical areas of strong organizations include creating effective teams, empowering employees and those receiving services as fellow decision-makers, and addressing the many challenges that emerge when people work together.

**BHS 330 Group Facilitations for Community Building - 3 credits**
Students who work with groups whose purpose is to strengthen the capacity of communities and other structures will learn how to work with groups to address issues and reach agreement. Skills associated with group development will be covered. The course is structured to provide students with an understanding of how facilitation skills and methodology that can be used in their practice working with groups and community building initiatives. Participants will learn how to apply group facilitation theory and use interactive methods to engage the hearts, minds, and energies of diverse groups of people in finding and implementing solutions to difficult problems.

**BHS 335 Using Dialogue to Transform Communities and Organizations - 3 credits**
Dialogue is essential to all relationship building. The course is designed for students to learn the theories of dialogue, how dialogue is used to engage large groups, and to prepare students to understand the potential changes in a community that can be sparked through specific kinds of dialogue. For community change to occur it is critical to have an understanding of the fundamental concepts of dialogue, and what constitutes dialogue for the purpose of making change. The large group dialogue process is an important component for community change whereby people come together to assess situations and develop strategies.

**BHS 340 Youth Development and Community Practice - 3 credits**
This course prepares students to work with youth in a variety of programs and environments. They will learn key concepts of youth development and explore strategies that can have an impact on individual and organizational practices, and in particular, how workers include youth in decision-making, leadership initiatives, and organizational structures. Students will learn what promotes and what hinders positive engagement with young people, and how to increase youth participation and partnership in projects, programs and especially in the community.

**BHS 360 Ethical Issues in Substance Abuse - 3 credits**
Prerequisite: BHS401 or experience in the field of addictions (permission from the instructor). This course explores current ethical issues common among a substance abusing population, such as mandatory treatment, involuntary treatment, duty to warn requirements, criminalization, and perinatal addiction. The course also covers professionals’ competence, confidentiality, accountability, client welfare, emotional health/personal wellness, and financial concerns. Students begin to understand the ethical debates and the foundations the arguments are based on. This course uses as a foundational code of ethics the Principles of Professional Standards for Substance Abuse Professionals. Students gain increased awareness of the ethical issues in the field and a broader understanding of the debates; they can address client needs more holistically and engage in public discourse on the issues.

**BHS 361 Adolescent Drug Prevention - 3 credits**
This course is designed to provide a wide range of practical and theoretical information about the adolescent drug prevention programs. Student will learn about the adolescent substances of choice, extent of their drug use and abuse, and types of school-based and community-based interventions. Multicultural considerations in the development and assessment of prevention programs will also be examined. It is recommended that Introduction to Addictions be taken prior to taking this course.

**BHS 362 HIV in Contemporary Society - 3 credits**
This course provides a basic overview of HIV/AIDS and its impact on the individual, family and contemporary American society. We begin by reviewing the history of the AIDS movement and how that has shaped the politics of illness in the U.S. today. Comparisons with other social justice movements and illnesses/medical conditions are integrated throughout the course. We then look at HIV/AIDS through a variety of lenses. Through the medical lens, we view how HIV/AIDS is diagnosed and treated. As epidemiologists, we look at who is infected and what factors increase risk of infection. Through the health educator and human service worker lenses, we look at prevention strategies, case management challenges, and the mental health needs of people affected by HIV/AIDS. Lastly, we look at how civil rights and community activists respond to the legal, advocacy, and ethical issues associated with HIV/AIDS. Its impact on particular communities and population segments are also studied.

**BHS 363 Caring for Elders with Alzheimer’s and Memory Related Problems - 3 credits**
This course will provide an overview of Alzheimer’s Disease and other dementias. Students will gain understanding of common issues affecting people with Alzheimer’s and other memory related problems. They will explore some of the ways in which patients with these diagnoses have traditionally been viewed both from a medical perspective as well as a societal one. We will move from a deficit-based approach of caring and labeling those having dementia to one that defines and includes their humanness as they are now living with a dementia. Students will gain understanding and insight into the unique perception, emotion and perspective that a person living with dementia experiences. Students will learn what a habilitative approach to care is and how to incorporate it with those they care for. Issues of the environment, self-care for the care partner and communication will be addressed.

**BHS 364 Unequal Treatment: Disparities in Health and Human Services - 3 credits**
This course will examine racial and ethnic disparities in health and human services and theories as to why those disparities exist. Students will consider policies that impact quality and equity of care. Specifically we will look at Title VI of the Civil Rights Act, which states that persons will not be treated differently on the basis of race, creed,
or color; and how this important policy has been implemented and enforced over time. Students will critically review current efforts to address disparities in care and will focus on cultural competence.

BHS 365 Ethical Issues in Working With Families - 3 credits
This course explores current ethical issues that are common when working with families in a human service setting, such as child and elder abuse reporting, mandatory treatment, involuntary treatment, duty to warn requirements, research, and privacy. In addition, six areas of ethical concern are covered, including: professionals’ competence, confidentiality, accountability, client welfare, emotional health/personal wellness, and financial concerns. Students begin to understand various aspects of ethical debates, as well as the foundations the arguments are based on. The goal of this class is to increase awareness of the ethical issues within human services and develop a broader understanding of the debates. The ultimate goal is to prepare students to address client needs more holistically and to engage in public discourse on the issues.

BHS 366 Family Interventions - 3 credits
How workers intervene with families matters. This course focuses on strategies for engaging families. Students learn how to apply a strengths-based approach in helping families achieve their goals. Students will learn from others in the field who work directly with families in a variety of situations. The Family Development Curriculum (FDC) for working with families fulfills the requirement for this course.

BHS 369 Legal Issues in Human Services - 3 credits
This course surveys the intersection between legal issues, the clients served by human service agencies, and the agencies themselves. We develop an understanding of how the legal system impacts the client population with respect to various practice areas, as well as the release and exchange of information. The impact of the legal system upon the agencies and their employees is examined. We explore tensions between legal requirements and the provision of services. Finally, we examine the tools available to pursue an advocacy agenda on behalf of individuals, families and systemic reform.

BHS 378 Program Planning and Evaluation - 3 credits
Successful programs address client needs and deliver services utilizing an effective systems approach. Students discuss the issues programs face in establishing guidelines for short-term and long-term planning, recruiting and training staff, and in conducting ongoing evaluation of services. Students participate in a client/provider interview and create a program design. The course addresses systems theory, family relationships, governmental agencies and their relationship to community services, program planning, setting goals and objectives, conducting interviews and evaluations, applied critical thinking, assessment, professional writing, and grant writing. (formerly MAN424).

BHS 400 Family Life Cycle - 3 credits
Theories of growth and development are introduced and applied to the study of individuals and families. The impact of socioeconomic, cultural, ethnic, and social issues on the life cycle is discussed, emphasizing the diversity of developmental schemas. Physical, moral, cognitive, behavioral, and psychosocial development of individuals are addressed in the context of family development. Students trace developmental patterns and identify factors which facilitate or impede growth, using examples from their personal and professional lives.

BHS 401 Introduction to Addictions: Theory & Practice - 3 credits
This course presents concepts and practices related to a broad spectrum of addictions and addictive behaviors, including theoretical models of addiction, terminology, review of substances and their effects, treatment strategies and programs. The impact of culture and ethnicity on substance use and abuse is addressed. Important current issues are discussed, such as difficulties in combining mental health and substance abuse perspectives. Students learn first-hand about a variety of treatment programs through guest speakers. Attendance at least one addictions support group is strongly encouraged (AA, NA etc.).

BHS 411 Family Systems and Addictions - 3 credits
This course provides an overview of family systems, family therapy, and the history of efforts to deal with substance abuse/alcoholism in recent decades. Topics covered include theoretical models of working with families, terminology, the impact of various family members’ substance use, agencies, the process of recovery, and treatment programs. We identify methods of working with families affected by substance abuse, considering social, cultural, and environmental factors. Students learn to work systemically with parents, spouses, and children. They learn what constitutes comprehensive family treatment and the resources that are available to families, including but not limited to Al-Anon. Current research is reviewed.

BHS 420 Strategies for Change - 3 credits
This course provides theoretical frameworks for understanding the process of change and its implications for individuals and families. We look at intervention systemically and in human service agencies, substance abuse treatment programs, medical and mental health centers, and schools. Students identify barriers to change and examine all aspects of an intervention process, from assessment and treatment planning, to choice of strategies, and implementation. A variety of techniques are presented for use with individuals, families and larger groups. Preventive, problem-solving approaches are discussed as well as strategies for creating new solutions. Students hear from agents of change, analyze their own personal and professional experience, and practice techniques in class and, as appropriate, at their work sites.

BHS 421 Mental Health and Substance Abuse - 3 credits
This course explores mental health issues and multiple problems that may be common among a substance-abusing population, such as depression, PTSD, schizophrenia, personality disorders, HIV/AIDS, and homelessness. Students begin to understand major symptoms and terminology. We discuss advantages and disadvantages of assessment and diagnosis, and issues specific to gender and culture. The course develops a heightened awareness of mental health issues and a broad understanding of co-occurring disorders, enabling students to address client needs more holistically with a focus on their strengths.
BHS 430  Families with Special Needs - 3 credits
Students learn about the biological, situational, and psycho-social conditions defined as "special needs," and analyze their impact on families, communities, and other childhood environments. The history of governmental response and current laws and regulations applicable to this area are reviewed. Students become familiar with the components of individual and community programs that address special needs, including assessment and rehabilitation planning and the design of appropriate environments. Concepts of "family focus" and "family practice" are emphasized, and students hear from and interact with a number of community experts. Students develop a case study, either individually or in a group, to be presented in professionally written form and orally, in class.

BHS 434  Community Building Across Disciplines: "Portraits of Practice" - 3 credits
Given the multiple dimensions of community life students should be prepared to work with multiple disciplines, bringing community building principles and practices to these arenas. This course will bring together and focus on the potentials for various disciplines impacting community change, providing highly interactive and real world experiences to explore and understand the exciting possibilities of multidisciplinary practice. In teams, students will develop a project that has a potential impact on a community.

BHS 445  Leadership for Community Builders: Theory and Skills - 3 credits
This course will be an intensive exploration of leadership and power from personal, theoretical and historical perspectives. Class participants will reflect on their own leadership experiences, strengths and challenges. They will also develop their analytical understanding of economic, political and social forces at play nationally and locally. This course focuses on developing the skills for the 21st century collaborative and participatory leader whose job is to create the conditions for self-empowerment and leverage the wisdom and resources of multiple constituencies.

BHS 470  Human Services Field Education I - 4 credits
BHS 471  Human Services Field Education II - 3 credits
Human services field education gives students opportunity to practice knowledge and skills gained in the classroom, and to become familiar with the structure and functioning of organizations and community agencies. Under agency supervision, students provide counseling, advocacy, research, information, referral, and similar services, and then document and reflect on their activities. The accompanying seminar includes students from varied placements, who give and receive feedback on case presentations and agency and organization issues. All field sites must be approved in advance by the concentration director and close ties are maintained between the agency supervisor and the course instructor. Students wishing to use their place of employment as a site should contact the concentration director to start the approval process before signing up for this course. The parameters (number of hours, days, etc.) are negotiated between the site, the student, and the College; and a joint contract is signed. Site supervisors must be immediately available to students, and must provide weekly individual or small group supervision. Students should be at their field sites approximately 6-8 hours a week and participate in a 2-hour/week seminar. Satisfactory completion requires satisfactory work at the site and the College seminar. HS Field Education II continues HS Field Education I or covers a new or special situation; offered as a focused study.

BHS 490  Human Services Capstone - 3 credits
Prerequisites: 90 credits minimum, including WRT101 and WRT102. The Capstone is a comprehensive research project which is the culminating academic activity that helps to synthesize students' learning in the undergraduate human services program. It is an opportunity to explore a topic of personal or professional interest in human services and to create an original project or piece of research that contributes to the field. The Capstone is 25-30 pages in length and follows a research paper format appropriate to the field of study. Students work together in class and meet or communicate individually with the instructor as needed. Those who take an additional term to complete the Capstone must register for BHS491 and pass before graduating.

BHS 491  Human Services Capstone Completion - 3 credits
Second or additional term(s) as needed to complete the Psychology Capstone.

Human Services Management (MAN)

MAN 350  Principles of Supervision - 1 credit
This course explores the use of supervision as a tool for professional development in human services professions. An action-reflection model maximizes the potential for personal and professional growth. Supervisors learn techniques for providing feedback that enhances supervisees' skills, strengthens their ability to reflect on performance, and encourages goal-setting. Supervisees gain competence in the use of supervision as a method of documenting professional development and progress in accomplishing goals.
Justice Studies (JUS)

JUS 200  Crime and Criminal Justice - 3 credits
This course provides an introduction to the nature of the crime problem in the United States, including patterns of victimization and offending and the ways in which the criminal justice system responds to these behaviors.

JUS 205  Introduction to Legal Studies - 3 credits
Introduction to Legal Studies introduces students to the legal system and the legal profession in the United States. The course will explore theoretical and historical influences on the American legal system and the practice of law, the origins of the legal system in English common law, the sources of American law, including an overview of the Constitution, state and federal status, the court system, and the legislative and trial process. Students will explore the legal profession and the varied roles assumed by the legal professional in contemporary society. Students will gain an understanding of the emergence of specialized areas of law and the knowledge and skills needed to pursue a law career.

JUS 225  Introduction to Social Justice - 3 credits
Social Justice, the state where conditions are met for all of creation to survive and flourish, is the bedrock with supports all other forms of justice. This course examines the understanding of Social Justice tradition that has developed over the last century. Principles of power, community, and responsibility will be examined in light of practical political and social issues - racism, sexism, hunger, poverty, and environmental issues.

JUS 300  Working With Adolescents: Group Leadership, Concepts and Techniques - 1 credit
The purpose of this class is to provide students with a basic understanding of effective group leadership skills, concepts and techniques in facilitating educational, life skill and process groups when working with the adolescent population. Students will learn the necessary skills to effectively lead group exercises for topics specific to adolescents. Students will be able to utilize a number of proven group leadership skills to enhance engagement, provide support for change, and increased communication skills.

JUS 301  Working With Families of Court-involved Youth - 1 credit
This class will focus on the skills necessary for students working with families of adjudicated youth. This class will offer a strength based approach to providing support and skills building for the family of adolescents and will highlight the characteristics of the family system, influences on behavior and the changing family. Students will learn to use an integrated, systemic approach to engage family groups characterized by the adolescent dynamic. The impact of economic stress, divorce, family conflict, abuse and neglect, and legal issues on the family system and adolescent behavior will be explored.

JUS 302  Adolescents and Anger Management - 1 credit
This course will focus on developmentally appropriate anger management and self regulation skills youth workers can model, communicate and teach to adolescents. The class will provide students with a basic understanding of the emotion, anger, during the stage of human development known as adolescence. This class will explore root causes of anger and the negative impact it can have on healthy development and interpersonal relationships. Students will learn strategies to assist adolescents in their ability to control and express anger in a healthy pro-social manner.

JUS 303  Mass Incarceration - 3 credits
This course explores the rate of incarceration in the United States. Although the U.S. makes up only 5% of the world’s population, we hold 25% of the world’s prison population — Why? Through challenging readings, including guest speakers, this course will introduce the student to social praxis as a cornerstone for recognizing the need for blending both theory and practice in confronting injustice. Through guided independent and collective study, we can begin to provide an answer as to why so many Americans are in prison; this awareness will create pathways for action resulting in change.

JUS 342  Girls and Delinquency - 3 credits
Historically, the Juvenile Justice field has developed program services based upon the needs and behaviors of adolescent males. Within the past five years the need for more gender-specific program and treatment models has been recognized. This course presents a gendered view of the causative issues contributing to female adolescent offending and current program initiatives developed to meet the treatment needs of girls.

JUS 343  Youth and Gangs - 1 credit
The emergence in the 1980s of youth gangs in the Boston area began a youth sub-culture that has taken root in geographically diverse urban communities. Students in this course will be introduced to gang culture, its origins and meaning. The reasons youth are attracted to gang life will be explored and delinquent behavior will be viewed within the context of gang expectation. Students will learn to identify gang colors, symbols and terminology and will gain insight into the personal experience of gang membership.

JUS 345  War, Peace and Non-Violence - 3 credits
Working from an international and local perspective, this course will explore roots of war and peace, connect theory with practice and address personal as well as political implications of war, peace and non-violence. The course will touch on Just War theory, but focus on positive alternatives to war—including a Just Peace framework and the range of strategies (and ways of life) that are often grouped under the umbrella of “non-violence.” The course is an introduction, but we will offer time for participants to build community and dig more deeply into specific areas of interest through a final project.

JUS 350  Introduction to Juvenile Justice - 3 credits
This course introduces the history and principles of juvenile justice, focusing on delinquent behavior in the context of adolescence, family, and social/environmental factors. The course explores various societal responses to problem behavior from colonial time to the present, including various community-based and residential program models, and current national debates on treatment vs. punishment of juvenile offenders.
JUS 356  Youth and the Law - 3 credits
This course examines current legislative and judicial systems and practices of dealing with youth who have not reached the age of majority. Issues pertaining to due process, deinstitutionalization and waiver to the adult system are explored. Benefits and liabilities of the Massachusetts juvenile courts are analyzed.

JUS 357  Healing Circles - 1 credit
The circle process is an aboriginal and native way of being in relationship. Circles are used widely in these communities for resolving conflict and restoring community. In recent years the circle process has made inroads into communities and systems in the United States and Canada. Circles are being formed to help heal, support, connect, plan and problem solve within communities in ways that our traditional processes and methods of communicating have regularly excluded due to the nature of their structure. Whether circles happen at the kitchen table, or within classrooms and systems, the result is always a turning to one another that leaves us with a new understanding of what it means to be in a community. Its implications for what true democracy means and requires of us are powerful and great.

JUS 358  Bullying Behavior - 1 credit
Bullying behavior has recently been identified as a serious threat to the emotional, psychological and physical well-being of both victims and aggressors. This course defines bullying behaviors and examines the role of communities and educators in finding solutions and developing comprehensive plans that protect children.

JUS 360  Risk Management for Residential Programs - 1 credit
This course examines the clinical and environmental dynamics present within residential settings serving adolescents, in order to identify situations in which there is a serious risk of harm unless there is immediate intervention. Students learn to develop and implement proactive risk management strategies.

JUS 365  Adolescent Females and Cutting - 1 credit
This course studies the dynamics of the adolescent female self-mutilator in today's society. Key areas of study are: (1) What is self-mutilation; (2) Who is the self-mutilator; diagnostic factors; (3) How the disorder develops and progresses; (4) Reactions of others; (5) Attachment patterns and family dynamics; and (6) Treatment resources. Course materials are based on: Cognitive-Behavioral Treatment of Borderline Personality Disorder (M. Linehan), Self-Mutilation: Theory, Research and Treatment (Walsh and Rosen), Cutting: Understanding and Overcoming Self-Mutilation (Levenkron). The class presents clear and comprehensive information on the causes and effective treatment resources for this behavior based on the most current and relevant information from noted experts in the field.

JUS 368  American Immigration Law and Policy - 3 credits
This class explores many of the major trends in the history of American immigration and the legal and policy structures developed over time to regulate the flow of immigrant populations into the country. The course examines the politics and debates that have shaped major policy shifts since 1965, when the passage of the Immigration Act of 1965 marked a radical departure from a system of preference based on national origin, up to and including the immigration debate today. The class will be taught from a multidisciplinary perspective utilizing short readings drawn from legal and government documents, newspaper articles, historical essays, and oral histories to inspire class discussion and personal reflection.

JUS 376  Internet Research Methods for Juvenile Justice - 1 credit
Use of the internet is of great value when exploring a field as timely and diverse as juvenile justice. As the field, especially in Massachusetts, takes on a more global perspective, research and practice in countries like the U.K., Australia, New Zealand, Canada, Belgium, etc. becomes increasingly important to the learner/practitioner in a college environment. This course will explore aspects of the internet - world-wide web, usenet, listserves, ftp, etc. with a particular focus on the global dimension of Juvenile Justice.

JUS 377  Legal Process for Reporting Suspected Child Abuse - 1 credit
This course will cover the Massachusetts child abuse and neglect reporting law and regulations implementing that law. Students will learn the elements of law pertaining to what legally constitutes abuse, the responsibilities of mandated reporters in reporting suspected child abuse and neglect, what happens once a report is filed, and the laws governing child protection services.

JUS 415  Violence in American Society - 3 credits
In this course, students explore the roots of violence in this country. Students will identify risk factors for violence (e.g. interpersonal and intrapersonal violence, physical and psychological violence, social violence, war, terrorism). The risk and protective factors of violence from both current and literary examples will be discussed. They also examine existing, and construct new, strategies to prevent violence. Students explore a topic of personal interest in their final project.

JUS 425  Program Models for Adjudicated Youth - 1 credit
This course explores the history and developing thinking in the design of programs for adjudicated youth. Current program models within a continuum of care are examined. Students are introduced to the basic issues and controversies in the juvenile justice field and program models utilizing social, medical, and behavioral approaches are compared and contrasted. Students develop needs assessments and service delivery plans.

JUS 430  Global Justice for Youth - 3 credits
The UN Declaration on the Rights of the Child has been signed by all UN nations except Somalia and the United States. This course examines our basic assumptions about the rights of children. Students explore particular factors such as gender disparity, economic disempowerment, and social class assignment which contribute to the inequities in available resource options. Universal principles of human rights and social justice are introduced. In light of these principles, students are encouraged to critically research local, national, and international laws and practices related to children and adolescents with a particular emphasis on juvenile justice systems.

JUS 435  Restorative Justice and Victim-Offender Reconciliation - 3 credits
An alternative to the retributive model of justice, Restorative justice offers a reconciliation model in which the victim, the offender, and the broader community can work toward a more personal and satisfying
response to juvenile crime. The emergence and growth of several models such as balanced and restorative justice, VORP (Victim Offender Reconciliation Program), and circle conferencing are viewed within the context of adolescent offending. Attention is paid to issues of age, gender, and culture in various methods of conflict resolution.

(new) Introduction to Justice Studies - 3 credits
This course offers students an introduction to the field of justice studies. It includes an examination of moral, philosophical and political definitions of justice and injustice. The course will explore distinctions between various forms of justice, e.g., criminal, social, environmental as well as their impact on societal understanding of the concepts of justice and injustice. Central to course discussion will be the tension between morality and legality.

(new) Special Topics in Justice Issues - 3 credits
This seminar will provide students with the opportunity to develop an understanding of the justice issues inherent in contemporary social attitudes and institutions. Students will utilize Circles as a forum for in-depth discussion of selected social issues such as race, poverty, juvenile delinquency, crime, war, terrorism, the death penalty. Issues selected will vary.

(new) Wealth, Poverty and Inequality - 3 credits
This course explores differing sociological theories of why inequality exists and how it affects us, and offers alternatives toward a more economically and socially just society. While the United States is the main focus, some attention is given to global inequality. The major emphasis is on socio-economic class, including intersections of class with race and gender. Students will learn about the U.S. upper class, middle class, working class, and poverty class.

(new) Justice and Gender in World Politics - 3 credits
Women have become central figures on the world stage of justice. Once viewed as somewhat peripheral to world politics, women are now central to the discussion of international injustices and are essential decision makers and agents of change. Identification and response to the gender specific concerns of women and recognition of the culturally disparate roles they have in the international community will be explored.

(new) Circles II - 1 credit
This course is an intensive follow-up to Circles I: Introduction To Circles. Circles I is always a great and challenging beginning to community building and the sharing of stories. Circles II takes that challenge further by introducing a particular issue or situation involving harm that needs our attention, honesty and sharing in order to transform it. The first night of the course, the issue will be presented. Then together using the circle process for the remainder of the course, we will attempt to come to some agreement and action plan in a good way that will lead us on a path headed toward community rather than hopelessness and disconnectedness.

Literature (LIT)

LIT 200 Introduction to Creative Writing - 3 credits
This course explores the many ways in which fiction and non-fiction are developed, and the methods of effective storytelling. It offers a workshop environment where students work as individuals and groups to thoughtfully analyze and develop poetry and fiction in various forms, and a non-fiction memoir. Short assigned readings and discussion facilitate this process of growth and expressive, multi-faceted literacy building.

LIT 203 Introduction to Poetry - 3 credits
This course will survey the vast variety of poetic expression, from songs, storytelling and the spoken work, to modern experimental forms. Poems which confront the full range of human experience—love and death, politics and religion, comedy and tragedy - will be selected from several ages and cultures.

LIT 210 Topics in Literature - 3 credits
This course explores important themes and topics through in-depth study of literature. Topics vary from term to term, centering on themes of enduring interest that have been addressed by writers of various outlooks and styles.

LIT 215 Shakespeare - 3 credits
This course introduces the thought, dramatic techniques, language and moral psychology of the most influential writer in the English language. In this course, we slowly and carefully read some of the plays of this dramatist and poet, examining his treatment of the enduring issues of human individuality and relationships, including: parental preference and sibling rivalries; the needs, fears, and dignity of the elderly; ambition, loyalty, self-sacrifice, lust, cruelty and honesty; the ability of human beings to plan wisely while also accounting for human weaknesses and passions; the need for every individual eventually to confront a moral dilemma that will define his or her character.

LIT 230 Critical Thinking in the Humanities - 3 credits
This course explores fundamental approaches to the thinking about, creating and evaluating works in the Humanities, including literature, history, philosophy, art and religion. This course uses core texts from various periods to examine works in these disciplines to explore essential questions: “Where do we come from? What are we? Where are we going?”

LIT 330 Literature for Children
Examines literature for children and young adults from a variety of perspectives. The literature includes classics of poetry, drama, folktales and other fiction. We seek to understand and appreciate the role that literature plays in the stages of a child's development, assess the quality of the literature, and appreciate how and why it appeals to children and young adults. (formerly EMC330).

LIT 301 Exploring Our World Through Poetry - 3 credits
This course investigates the ways poetry helps us interpret and describe the world around us, our relationships with society, other
people, and ourselves. The specific forms of verse in the English language tradition will be explored, as will poetic forms in other cultural traditions which have influenced English. The social functions of poetry in various contexts will also be examined. This course helps students become more effective communicators by appreciating the ethical and aesthetic qualities in both ordinary and poetic language.

LIT 309 Divided Loyalties: Contemporary Latino/a Literature - 3 credits
Prerequisite: WRT101. This course examines the contributions to American literature made by Chicancos, Puerto Ricans, Cuban, Dominicans and other Latino/ Latina writers in the United States over the last fifty years. Through a variety of Latino/Latina writing, we will explore the ways in which these writers represent community, class, race, gender, culture, nation, and ethnicity in their works. We will also examine the ways in which Latinas(os) have manufactured identities within mainstream society, as well as the development of cultural hybrids and other forms of cultural registers. Representative works of various genres will be read and analyzed within a cultural context: the testimonial, the autoethnographic essay, the narrative (and short story), drama, poetry and film. Authors include Rudolfo Anaya, Gloria Anzaldúa, Sandra Cisneros Luis Valdez, Cristina Garcia, Julia Alvarez, Junot Díaz, Achy Obejas and Piri Thomas.

LIT 310 Gothic Fiction - Horror - 3 credits
This course explores texts, mainly fiction and poetry of the last two hundred years when a fascination with scientific theories and applied science mixed with a sense that art, nature and science might provide a new religion for human spirituality and perfection. Students read, discuss and write about the excitement and terror that arose as individuals were encouraged to create a new and better world and to acquire god-like powers. Themes include a fascination with dream states, utopian hopes, progress, emphasis on friendship, empathy, enthusiasm, alienation, and worship of nature. Authors include Poe, Keats, Coleridge, Mary and Percy Shelley, Hawthorne, H.G. Wells, and others.

LIT 311 Studies in Literary Genres - 3 credits
This course deepens the student’s initial encounter with literature by closely examining the specific ways in which the various literary genres work, why a writer might choose one genre over another, and how material may be transformed when adapted from one genre to another (when, for example, a film is based upon a novel). The course will study fiction, poetry, memoir, drama, and film. In each semester there may be a particular emphasis on one or more of these genres.

LIT 312 World Literature - 3 credits
Literature is one of the most effective ways to become familiar with cultures that are not one’s own. In literature, we are invited, on the most intimate terms, into the homes and minds of people whose experiences we might otherwise know only from headlines or school textbooks. This course examines major texts from various nations, cultures, and periods, in the most reliable and readable English translations. Both universal themes and localized concerns will be discussed, as will the social and historical contexts of each text.

LIT 314 Introduction to Western Literature - 3 credits
This course presents a study of selected major works of Europe from the ancient world and Renaissance to the present, with attention to their historical and literary settings. This course provides insights into such issues as identity, authority, emotions, relationships and social change and structures, from a broad palette of significant writers. Students develop their ability to recognize literary themes, authorial style and the connections between literature and history.

LIT 315 American Literature - 3 credits
The American literary tradition encompasses a wide variety of cultures and social classes. In this course, we examine the literary heritage, selecting significant works and authors from the colonial through contemporary periods. Emphasis is on historical background, cultural context, and the literary analysis of selected prose, poetry, and drama. Students learn to interpret, analyze, and respond to literary works in their historical and cultural contexts. Students gain substantial knowledge of the major periods, authors, and themes in American literature emphasized in the Curriculum Frameworks for Massachusetts teachers.

LIT 316 Survey of British Literature - 3 credits
This course provides an overview of great British literature across the centuries and in several genres and styles. Texts may include medieval, Renaissance, Restoration, 18th century, Romantic, Victorian and 20th century literature. In reading, discussing and writing on these exciting texts, students will strengthen their vocabulary for evaluating the quality of literary works as they grapple with social, political and psychological issues, reveal facets of the culture from which they speak and examine timeless human concerns.

LIT 318 The Modern Literatures of Africa, The Caribbean and South Asia - 3 credits
This course will survey the postcolonial literatures of Africa, the Caribbean, and South Asia since 1950. Fiction, plays, and poems will be read within the social-historical context of the long colonial experience and the often trying tensions following political independence. A major theme will be the centrality of literature—of storytelling, song, and performance—in the popular responses to social change. Readings will include the work of women and men writers from more than a dozen countries in the former colonized world.

LIT 325 African-American Literature - 3 credits
Literature has provided the most powerful and perceptive expressions of the African-American experience, from slavery to our own day. Through a rich selection of folktales, songs, short stories, novels (and excerpts), drama, autobiography and poetry, this course will explore the contradictions, defeats and triumphs of Black individuals and communities over four tumultuous centuries. As the African-American story lies at the core of the larger American story, so African-American narratives lie at the core of American literature.

LIT 400 Themes in Literature: Outsiders, Authority, Law and Injustice - 3 credits
This course focuses on the struggle by experienced and caring executives to manage people with very different backgrounds,
personal styles and issues. Each text dramatizes attempts to do justice through reason and law, tempered with compassion; focuses on the mystery of the individual personality or soul, particularly among those who have suffered loss; inquires into the nature of madness; how being reasonable itself may blur the line between sanity and insanity; whether innocence can survive in the workplace; how an outsider calls into question “business as usual”; and whether law can accommodate truth. There are ethical dilemmas, values, clarification under stress, presentation and analysis of various leadership models, attempts to gather and evaluate evidence, make moral choices, manage crisis and to comfort and resolve grief.

LIT 401  Enduring Themes in Great Literature - 3 credits
One test of greatness in literature is that it provides insights, knowledge and ways of understanding the varieties of human behavior and potential. Examining a small number of core texts in a variety of styles, students in this course will gain familiarity with themes, topics and dilemmas of timeless relevance to vital personal and professional concerns. Reading, discussing and writing about these works can help us understand and respond to issues including rites of passage, managing and delegating authority, determining effective methods of education, recognizing and mediating between divided loyalties, spiritual healing and well-being, social status and individual identity.

LIT 402  The Eastern Epic - 3 credits
This course emphasizes the study and consideration of the literary, cultural, and human significance of selected Eastern epics. An important goal of this course is to promote an understanding of the works in their cultural/historical contexts and of the enduring human values which unite the different literary traditions. The course’s pedagogy gives special attention to critical thinking and writing within a framework of cultural diversity as well as comparative and interdisciplinary analysis. The course will consider the transition from oral culture to literate culture, address questions about poetry in general, and appreciate the formative and creative analogues of the Iliad and the Odyssey.

Management (BSM)

BSM 101  Business Writing - 3 credits
The course presents an introduction to the demands of business writing. Students learn how to develop the skills for effective written business communication including idea formulation, research, outlining, drafting, revising, peer editing, and presentation skills. Students will demonstrate an understanding of the relationship between reading and writing as well as the relationship between a writer and his/her audience. They will gain a better understanding of the writing process. They will also acquire the tools to help them think conceptually, read critically, and write analytically. In the process they will learn the importance of, and how to, understand and better evaluate what they read. The course will provide opportunities to evaluate and discuss the ideas of their peers while learning to use these ideas as starting points in their own critical thinking, questioning, and idea development. This course will provide opportunities for students to understand their role as writers as well as their role as critics of each other’s writing. As this course relies heavily on discussing assigned readings and on questioning various elements and tools of the writing process, active participation is mandatory; this class will only be as successful as the students make it!

BSM 125  Computer Networking & Support Internship - 3 credits
The internship experience provides students with the opportunity to put into practice the technical and support skills that they learn in the classroom and to gain valuable business experience working in a corporate environment. Under the guidance of the instructor and the internship supervisor, the student works on a helpdesk and/or provides desktop support in a professional environment. Students continue to build their computer networking and support skills through attending learning sessions and through use of journals and other writings and research.

BSM 126  Business Essentials - 3 credits
BSM126 explores the definitions and practice of professionalism in contemporary corporate environments, and how professional behaviors and habits positively impact an individual’s success. Students learn how developing a professional persona and personal brand work to positively impact productivity and success in different professional environments, and to understand the importance of maintaining professional standards in the workplace. We review best practices and techniques for professional networking, identifying mentors and allies, developing interpersonal skills, managing corporate workplace standards through vertical and horizontal relationships, maintaining self-awareness, engaging in timely self-advocacy, and building trust with coworkers.

BSM 130  Customer Service Essentials - 3 credits
While manufacturing jobs have dwindled in the United States, the service sector has been on a rapid increase. Consequently, service related roles have been on a rapid increase. Often we think of customer service roles that are characterized as low wage, simple and repetitive. However, nothing could be further from the truth. Service roles vary from industry sector to sector. Roles range from helpdesk
functions to more sophisticated consultative roles in finance, accounting, and human resources. In the ever increasing global market, service remains a hotly contested market. All service functions and roles require in-depth customer knowledge, attentiveness to detail, quality standards and a high level of dedication to the customer. This course’s primary purpose is to equip students with the varied knowledge, skills and attitudes to be an integral part of an ever-evolving sector and organizational function.

BSM 200 Introduction to Business - 3 credits
Students learn how American business operates. The course begins with a study of business in its broader perspective, looking at the context within which American business fits, and the investment markets which provide the capital needed to grow. The external factors influencing business development and the role business plays in the world economy are examined. The course then focuses on the internal organization and the operations of American business, highlighting major issues associated with managing functional areas of a business, such as marketing, production, technology, and supply chain management. In the later part of the course, financial management, both personal and business, and financial institutions are studied.

BSM 201 Introduction to Wellness in the Workplace - 3 credits
With the cost of health care continually rising, there is increasing interest among employers to find effective ways to improve health while lowering costs. This course will provide students with an overview of the impact of bringing wellness initiatives into the workplace. In this introduction to workplace wellness, students will identify the elements of wellness, characteristics of wellness programs and the return on the investment for companies who have invested in wellness within their organizations, such as reduction of health care costs, reduced rates of absenteeism, increased productivity, improved morale and retention. They will identify how various elements of wellness can be introduced in the workplace and how organizations can sustain a culture of wellness.

BSM 225 Fundamentals of Investment Management - 3 credits
Fundamentals of Investment Management provides an introduction to the financial industry and develops an understanding of the players, markets, economic interplay, products, clients and functional processing that exist in the world of investments. Subjects covered include the history of financial services, evolution of the industry, risk and return, industry laws and regulatory agencies, how the industry makes money, credits, exchanges and redemptions.

BSM 300 Economics for Managers - 3 credits
This course provides an overview of economics and establishes a foundation and vocabulary for future courses. It gives an applied, practical introduction to macroeconomics and microeconomics. At the macro-economic level the course helps the learner understand how the American economy functions, and what impact changes in the economy may have on the individual and the organization, as well as the impact of the global economy. At the microeconomic level the course examines how individuals and firms make economic decisions. This knowledge becomes the basis of understanding key concepts of supply, demand and pricing, as well as average and marginal costs and breakeven analysis.

BSM 305 Principles of Managing Organizations - 3 credits
This course focuses on the evolution of traditional and modern management theories, practices and behaviors for planning, organizing, leading and controlling in organizations, and considers the contemporary and changing forces that challenge the practice of management. It helps students understand the importance of the environment in which managers function, and explores the processes of strategic, operational and tactical planning. It considers various organizational structures, the contexts for which they are best suited, and the role of communication, decision-making and leadership in managing organizations. It also discusses the principles of organizational control and the role of control systems in improving organizational productivity and efficiency.

BSM 310 Organizational Theory & Behavior - 3 credits
This course examines the factors which influence individual, group and firm behavior in the work place. Topics include communication, motivation, group dynamics, leadership, power, and organizational design and development. Theories and frameworks, case discussions and skill-building exercises are used to understand and apply each topic. Class sessions and assignments help participants acquire the skills that managers need to improve organizational relationships and performance.

BSM 315 Diversity in the Workplace - 3 credits
This course looks at the significance of diversity in management and the implications of diversity for how organizations are organized and how they function. The changing demographics of the workplace are examined and the significance of diversity for domestic and international business are discussed. Organizational approaches to diversity are examined and analyzed. The course attempts to engage differences within the class and help students develop leadership skills for managing diversity, including consensus building, conflict resolution and talking through differences.

BSM 320 Operations Management - 3 credits
This course covers the essentials of the operating systems of manufacturing and service organizations that convert materials and other resources into finished goods and services. Topics covered include key performance metrics, process mapping and analysis, product and process design, new product introduction, supply chain management, plant location and capacity planning, total quality and effective resource management. The goal is to understand the concept of total product life cycle management, and the effect of strategy in the operations role, as well as tactical issues such as inventory control, quality assurance and operations scheduling. The course also discusses recent developments such as computer-integrated manufacturing, flexible-manufacturing systems, and just in time inventory. It considers the interrelationship of operations decisions with marketing, finance and the overall strategy of the organization.

BSM 325 Marketing - 3 credits
In this course students master the basic principles and practices of modern marketing. The course offers a broad overview of the nature and fundamentals of marketing activity. It provides an introduction to managing the marketing activities of an organization including marketing information systems and research, the marketing organizational
system, and the marketing planning and control system. Topics include analysis of the global marketing environment of the firm, market research, customer and client analysis, target marketing and segmentation, product and service planning, pricing, communications, advertising and sales promotion, distribution management, and the development of marketing and sales strategies and plans. The use of marketing concepts and tools by nonprofit organizations is discussed.

BSM 326  Strategies for Selling - 3 credits
Successful selling requires good communication skills and an understanding of the stages of a sales call. Often a technical person who knows a product or services needs to be more effective in selling that product or service. This course presents a systematic approach to selling. This course is ideal for those who want to learn how to communicate in a more effective manner and to learn how to best present themselves and their products or ideas. The course explores the inter-relationships between the psychological and technical aspects of the sales process. It helps develop and sharpen one’s interviewing skills.

BSM 330  Financial Accounting - 3 credits
This course introduces the principles that govern financial accounting systems and the income statement and balance sheet that are the principal end products. Students learn how accounting information is used to evaluate the performance and financial status of private, non-profit and public organizations. The course emphasizes the use of accounting information by managers within the organization and by shareholders, lenders, and other outside parties. Basic accounting terms and concepts, and the language of financial management are presented as well as the essentials of the accounting process. The course also builds an awareness of the ethical, information and regulatory environment of accounting.

BSM 331  Principles and Practices of Consumer Credit - 3 credits
This course defines and examines consumer lending basics including regulations, credit policy, operations, loan closings and loan servicing, product knowledge and the decision-making process. The focus is on how to make an appropriate consumer loan by using a decision-making process which includes interviewing, investigating and knowing various loan products. This course includes lecture material and related case studies for students to develop fundamental credit skills and sound lending judgement.

BSM 332  Financial Management - 3 credits
This course provides tools for managing business funds and making decisions that will affect the financial position of an organization. Students gain an understanding of financial analysis and its use in planning and control functions. Capital budgeting, discounted cash flow, and present/future value techniques are presented as well as the capital formation process, the advantages and disadvantages of various capital structures, and the long and short term uses of capital. Students gain an understanding of the workings of financial markets and institutions, financial instruments, and the domestic and international financial environment. Prerequisite: BSM330.

BSM 333  Statistics for Business - 3 credits
Business Statistics presents the use of quantitative methods to define, analyze and choose among business alternatives. The scientific method of problem solving is presented to provide systematic analysis, selection and evaluation of business alternatives. Various statistical tools are introduced to collect, study and use information in support of rational business decision-making. Topics include decision-making under uncertainty, evaluating independent and dependent alternatives, selection of alternatives given limited resources, forecasting and simulation modeling.

BSM 334  Principles of Banking - 3 credits
This course covers the history, purpose and function of banking. It examines how banks, in today’s competitive and changing economic environment, serve the financial needs of individuals, businesses, and the government. The course will also compare the financial services offered through traditional banking institutions and other financial service providers.

BSM 335  Human Resources Management - 3 credits
This introductory course surveys what current and aspiring general managers need to know about personnel and human resource management in business and nonprofit organizations. It is for students who are exploring career opportunities in personnel management rather than experienced personnel specialists. The course covers staff recruitment and selection, performance evaluation, compensation, and management training. It considers the impact of human resource policies on productivity, employee morale and turnover. It also covers the promotion of equal employment opportunity, with discussion of recent court decisions, government regulations, and technical advances that affect the personnel management function.

BSM 340  Information Systems and Databases - 3 credits
This course presents the fundamentals of information management and provides an overview of the issues managers face in the selection, use, and management of information technologies. As economies have become globalized and competition has increased, organizations have turned with increasing frequency to information technology (IT) to help them deal with data processing and information management constraints. The first part of the course covers the basics of designing databases to serve the information needs of the enterprise. Relational database concepts are presented and students build a working database. In the second part of the course, a case study approach is used to cover topics related to the overall management of information systems such as system acquisition, requirements analysis, make-or-buy decisions, decision support systems, and the management of end-user computing.

BSM 345  Business Ethics - 3 credits
Business Ethics provides an in-depth understanding of the ethical, social and political context of organizations today. It approaches social problems with an ethical framework for choosing among alternative courses of action. The course emphasizes the application of ethical reasoning to real business and management situations, problems and decision-making.
BSM 350  Comparative Health Care Systems - 3 credits
This course surveys the historic development, organization and unique characteristics of the health care delivery system in the US. We explore the history and functions of health care providers in America; contrast that history and structure with those of other developed nations, discuss organizational patterns of health care facilities, current payment and reimbursement systems, external accrediting agencies, governmental regulation, and medical staff organization.

BSM 351  Human Resource Management in Health Care - 3 credits
This course provides an essential overview of policies, practices, and organizational structures within human resources management in health care settings. Students will compare and contrast the relationship between human resources management and general management; explore the roles, responsibilities, requirements and expectations of human resource management in health care organizations; review compensation and benefits, recruitment, selection and retention of staff, training and development, and other topics in the field of human resources management in health care.

BSM 352  Health Care Economics - 3 credits
This course is designed to give students an understanding of the fundamental characteristics, structures, policies and practices of health care economics in the United States. Students will develop an understanding of health care markets, including supply and demand, delivery, production, services, and costs. Additionally, this course explores practical economic analysis, a survey of insurance policies and programs, and a review of current regulations in health care.

BSM 354  Legal and Ethical Aspects of Health Care - 3 credits
This health law course surveys current federal and state regulatory structures and policies governing the provision of healthcare. Students will learn about professional licensure, malpractice, the provider-patient relationship, informed consent, the regulation of healthcare facilities, the organization of healthcare entities (such as integrated delivery systems), the regulation of health insurers and managed care providers, managed care liability, Medicare/Medicaid, federal self-referral and “anti-kickback” prohibitions, and other ethical topics.

BSM 355  Performance Management - 3 credits
Performance Management investigates control and performance evaluation, including revenues, costs, profits, and investment in assets. We emphasize the importance of understanding variance analysis based on flexible budgets and standard costs of operations in small, medium and large institutions. Additionally, this course reviews responsibility-accounting for revenue, operational costs, contribution and profit centers, and developing a balanced score card.

BSM 350  Comparative Health Care Systems - 3 credits
This course surveys the historic development, organization and unique characteristics of the health care delivery system in the US. We explore the history and functions of health care providers in America; contrast that history and structure with those of other developed nations, discuss organizational patterns of health care facilities, current payment and reimbursement systems, external accrediting agencies, governmental regulation, and medical staff organization.

BSM 351  Human Resource Management in Health Care - 3 credits
This course provides an essential overview of policies, practices, and organizational structures within human resources management in health care settings. Students will compare and contrast the relationship between human resources management and general management; explore the roles, responsibilities, requirements and expectations of human resource management in health care organizations; review compensation and benefits, recruitment, selection and retention of staff, training and development, and other topics in the field of human resources management in health care.

BSM 352  Health Care Economics - 3 credits
This course is designed to give students an understanding of the fundamental characteristics, structures, policies and practices of health care economics in the United States. Students will develop an understanding of health care markets, including supply and demand, delivery, production, services, and costs. Additionally, this course explores practical economic analysis, a survey of insurance policies and programs, and a review of current regulations in health care.

BSM 354  Legal and Ethical Aspects of Health Care - 3 credits
This health law course surveys current federal and state regulatory structures and policies governing the provision of healthcare. Students will learn about professional licensure, malpractice, the provider-patient relationship, informed consent, the regulation of healthcare facilities, the organization of healthcare entities (such as integrated delivery systems), the regulation of health insurers and managed care providers, managed care liability, Medicare/Medicaid, federal self-referral and “anti-kickback” prohibitions, and other ethical topics.

BSM 355  Performance Management - 3 credits
Performance Management investigates control and performance evaluation, including revenues, costs, profits, and investment in assets. We emphasize the importance of understanding variance analysis based on flexible budgets and standard costs of operations in small, medium and large institutions. Additionally, this course reviews responsibility-accounting for revenue, operational costs, contribution and profit centers, and developing a balanced score card.

BSM 401  Health Care Management Fundamentals - 3 credits
Hospitals and other health service organizations are critical to our well-being. Skilled management is required to provide these sophisticated services. Health care managers must be knowledgeable in budgeting, capacity planning, process and job simulation and quality control. The course covers the planning, coordinating and management of these complex resources and skills needed to provide quality health care at affordable costs.

BSM 402  Grant Writing and Fund Raising - 3 credits
A critical skill in business, especially for non-profit organizations, is the ability to raise money by fund raising and grants. This covers the planning and proposal development phases of grant writing, strategies for fund raising, identifying and qualifying potential donors, and grant administration. Hands-on activities provide practice in the skills of grant preparation.

BSM 403  Personal Finance - 3 credits
Personal Finance develops an understanding of the financial alternatives from which an individual must choose in making their personal financial decisions. Subjects covered include financial goal setting, budgeting, financial institutions, consumer credit, insurance and investing.

BSM 404  Social Media for Community Businesses - 3 credits
Community and small businesses often gain a competitive advantage through the use of social media that builds upon their local connections and commitments. However, small businesses typically operate without a formalized marketing department, or the necessary training to use social media as a tool to listen to and engage more effectively with their customer communities. Social Media for Community Businesses is a fundamentals course designed to provide training in the use of social media to promote service and product awareness, community engagement, and customer interaction.

BSM 405  Corporate Finance and Investments - 3 credits
This advanced finance course serves as a detailed exploration of corporate finance and investments, and covers contemporary theories and practices of financial decision-making within corporations. Topics include types and measure of financial risk, portfolio management, options and futures, capital instruments for long-term financing, dividend policy, cost of capital, raising capital, managing and financing working capital, mergers and acquisitions, and international finance. We also review cash flow estimates, discounted cash flow concepts, net present value, internal rate of return, non-discounting analysis techniques, income tax implications for investment decisions, ranking investment projects, real options, and valuation models.

BSM 406  Introduction to E-Business - 3 credits
The course explores the systems, opportunities, challenges and strategies involved in successfully developing and maintaining electronic business. Issues covered include infrastructure design, server management, implementation, security, e-business strategy and marketing. It provides an overview of the key technologies for electronic commerce on the Internet, and reviews current trends and extensions to the technology of the World Wide Web. Electronic payment systems and related issues pertaining to authentication, security and privacy are covered. Organizational applications are explored, and the different business models underlying various types of business-consumer, business-business and intra-organizational commerce applications are analyzed. Students are also introduced to the key legal, ethical and policy issues underlying the use of electronic commerce.
BSM 407  International Business - 3 credits
International Business explores the challenges of managing across national borders and the complexities imposed by operating in multiple markets during an era of rapid globalization. The course examines the ethical and cultural context within which global managers must function and the strategic, organizational, and functional challenges the international environment poses for an effective global manager.

BSM 408  Business Law - 3 credits
This course provides an overview of the U.S. legal system and discusses current issues in business law and ethics. Topics include the role of the legal system in business commerce, consumer pricing, competition and global competitiveness. Students develop knowledge of the Uniform Commercial Code as it relates to the law of sales, commercial paper, and secured transactions. Special attention is given to the importance of ethics in business and potential ethical dilemmas.

BSM 409  Budget Preparation and Reporting - 3 credits
This course introduces students to the techniques and tools used in the development and reporting of budgets. A budget is an institution or department’s structured plan which projects or anticipates the outcome or department’s structured plan which projects or anticipates the outcome or department’s structured plan which projects or anticipates the outcome or department’s structured plan which projects or anticipates the outcome. Estimated revenues and expenditures; asset receipts; liability receipts; expenditure receipts; internal revenues; internal revenue transfers; capital fund internal revenues, and interest on outstanding accounts/notes receivable. We discuss and analyze various types of expenditures, and how funds are distributed to best serve an institution’s strategic plan.

BSM 410  Entrepreneurship - 3 credits
Entrepreneurship explores the challenges and rewards of operating a small business. Areas studied include opportunity evaluation, location, marketing, financing, organizing and operating start-up and small business. Of special interest are the issues of success and growth management.

BSM 411  Planning, Budgeting and Forecasting - 3 credits
This course examines the financial planning process within private, public and non-profit institutions, and includes a review of standard budgeting concepts, annual profit plans, and supporting schedules. Students will analyze different types of budgets, including activity-based budgeting, project budgeting, and flexible budgeting. This course will also investigate top-level planning and analysis within organizations, and strategies for forecasting: including quantitative methods such as regression analysis and learning curves. Prerequisite: BSM333 Business Statistics.

BSM 412  Money and Banking - 3 credits
Prerequisite BSM300. For anyone in business it is important to understand the influence that the banking system has upon interest rates, economic growth, and price and employment stability. This course covers the banking system, credit, money and interest rates, and the interrelationship between the domestic and international financial institutions. The course begins by studying monetary systems from 5000 BC to modern times. Students learn how our economies evolved from barter societies to new forms of money such as credit cards and electronic funds transfer. Next, the course presents the commercial banking systems in the U.S. and foreign countries. Then the course covers the role of the Federal Reserve System’s and other nations’ central banks in influencing a country’s economic status. Then a more detailed analysis of bank operations is presented and the analysis is expanded to other types of financial institutions such as savings banks, credit unions, mortgage companies and government agencies. Finally, international banking institutions and international monetary exchanges are studied.

BSM 413  Strategic Business Planning - 3 credits
Strategic Business Planning explores strategic planning from the general manager’s viewpoint. The course covers the range of strategic decision-making from establishing a strategic vision and mission, setting objectives, crafting and executing a strategy to achieve the objectives and evaluating performance and initiating corrective adjustments.

BSM 415  Leadership Models - 3 credits
Constant changes in the world and fast-paced changes in technology call for effective leaders with vision. Leaders are the change agents. The course examines effective approaches to leadership. What constitutes an effective leader? What are the significant differences between leaders and managers? What importance does power hold in the transition process? The course analyzes leadership models, problem solving, ethics, strategic styles of interaction, decision-making techniques, and effective strategies for implementation of goals.

BSM 418  Internet Technologies - 3 credits
Internet Technologies presents an overview of current and emerging technologies relevant to electronic commerce. Topics include communications and networking, the Internet, programming languages, security, databases and archiving, web authoring tools, multimedia, transaction processing, search engines, and data mining. Students learn the function and interrelation of component e-commerce technologies and the modern vocabulary of e-commerce technology.

BSM 420  Internet Marketing - 3 credits
The course addresses marketing on the Internet. Integrating web marketing activities into organizational marketing strategies is a major challenge for ongoing businesses and startups alike. This course focuses on the capabilities that allow business and nonprofit organizations to develop distinctive marketing approaches on the Internet. Throughout, it emphasizes the role of Internet marketing in the overall marketing strategy of an organization as well as the need for careful integration between strategies executed in cyberspace and in the physical world. Students analyze and review Internet marketing cases and develop marketing plans that include major Internet elements.

BSM 430  Nonprofit Organization Management - 3 credits
Nonprofit organizations are making an increased contribution to our society and economy on a domestic and global level. Managers of nonprofits face many of the issues faced by for-profit entities as well as the managerial, organizational, human resource and legal issues
of nonprofits. The course explores the challenges faced by non-profit managers and approaches used to respond.

BSM 431  Introduction to Hotel and Restaurant Operations - 3 credits
Prerequisite: BSM200. This course will introduce students to hotel and restaurant industry and provide an overview of the different functions within the field. Students will gain a basic understanding of the restaurant and hospitality industry. Students will also gain an understanding of the evolution of the industry and explore current trends. The course will be delivered through a variety of lectures, site visits and class projects.

BSM 432  Hospitality Operations Management - 3 credits
Students will analyze the workings of a restaurant from all operational perspectives. These include menu design, location analysis, physical layout, front- and back-of-the-house design, and back-of-the-house work flow. This course will integrate material taught in other classes and result in an understanding of and appreciation for the complex world of successful restaurant operations.

BSM 433  Hospitality Marketing, Sales and Food Promotion - 3 credits
Prerequisite: BSM325. This course examines the principles of menu pricing, food and drink development and enhancement. The course will also provide students with the ability to properly develop marketing plans and understand how to target the appropriate customer base. Topics will include forecasting product requirements, researching menu trends, competitive analysis of restaurant concepts and how to manage the development of marketing concepts to target markets. Topics will also include personal selling by waitstaff, advertising, and public relations. Students will develop marketing plans and analyze current merchandising plans for food products and services.

BSM 434  Advanced Hospitality Operations - 3 credits
Prerequisite: BSM 431. This course will emphasize customer service, industry trends, sales, and merchandising. Students will explore the details that are necessary to create and maintain reservation and point of purchase systems. Students will learn how to plan and control inventory, learn the latest merchandising products and services and learn how to utilize customer relations management techniques and technology.

BSM 435  Food and Beverage Cost Control - 3 credits
Prerequisites: MAT102 and BSM330. This course will examine the information and skills necessary to analyze and improve the profitability of a foodservice establishment. Topics include forecasting sales, and controlling labor and food costs. Students will also analyze the complete purchasing cycle of a restaurant, beginning with product and vendor selection.

BSM 436  Legal Issues in the Hospitality Industry - 3 credits
Prerequisite: BSM200. This course gives students an overview of the legal issues surrounding the operations of a hospitality facility. Students will leave with an understanding of their legal obligations as an employer, business owner, and manager. This course will also give students an understanding of the legal concepts that are very specific to the hospitality industry such as ServSafe.

BSM 437  Current Issues and Trends in the Hospitality Industry - 3 credits
Must be taken in the student’s final semester. This course will explore issues that currently impact the hospitality industry in the local, national and international arenas. The course will deal with employee development and assessment.

BSM 438  Hospitality Industry Internship - 3 credits
Prerequisite: BSM200. The internship provides participants with practical experience within an actual food service or hotel operation.

BSM 439  Consumer Behavior - 3 credits
Focuses on the basic concepts of consumer behavior in a variety of contexts. Understanding the decision process, attitude, and behavior of buyers is essential to developing marketing plans in today’s competitive marketplace in which sophisticated customer relationship management approaches are dependent upon knowing the customer. Considers the major theoretical approaches to consumer behavior and examines how the concepts of affect and cognition, behavior, learning, and the environment can be used to design and maintain an effective marketing strategy. Offers students an opportunity to also gain a better understanding of their own buying behavior.

BSM 456  Intermediate Financial Accounting - 3 credits
Considerable attention will be given to examples from current accounting practice and the reporting requirements promulgated by the Financial Accounting Standards Board. The focus is on an external user perspective and financial accounting standards promulgated in the U.S.; however, international contrasts and/or constituencies are brought into the discussion of many of our topics. Ethical considerations and impact on various stakeholders are also an important component of our study of financial reporting practices. The course is for students preparing to become practicing accountants in either the public or private sector. In addition to prospective practicing accountants, the course provides valuable background for those looking forward to various managerial or financial careers.

BSM 460  Database Management - 3 credits
This course introduces the fundamental concepts necessary to design, use, implement and administer database systems. The course stresses the fundamentals of database modeling and design, the languages and facilities provided by database management systems, and the techniques for implementing and administering database systems. Students learn how to use SQL to create, update and query a relational database, build a database application, and perform basic database administration tasks. Data integrity and transaction controls techniques and the impact of networks and client-server architecture on database management systems are discussed.

BSM 465  Negotiation & Conflict Management - 3 credits
Networked organizations present different challenges for the negotiation and conflict resolution skills of managers. The fact that today’s networked organizations are less hierarchical and more global makes
negotiation at every level a necessity and increases the potential for conflict, while the lack of face-to-face communication and long-standing relationships make the resolution of conflict more difficult. This course examines the basic theories of integrative bargaining and problem solving and helps extend these models to the current realities of distributed work and collaboration. Through case studies and experiential exercises students analyze the processes of diagnosing conflict, planning for negotiation, and implementing solutions within networked organizations; and develop conflict resolution skills.

BSM 470  Project Management - 3 credits
This course introduces the principles of project management. In today's organizations, work is increasingly being organized in the form of temporary projects. The project manager is responsible for pulling together resources from across the organization and for delivering results on time. The course provides an overview of the basic management principles and procedures involved in starting, managing, controlling and terminating a project successfully. Topics covered include the project management process, controlling and managing a project, selecting the project team, understanding the relationships of projects to organizational goals, defining project scope, project scheduling, control and coordination techniques.

BSM 475  Information Technology - 3 credits
Technology is an integral part of every manager's work. An understanding of computer technologies is essential for today's successful manager. The course presents an overview of computer technology, its use, and strategic value across the enterprise environment. Subjects include hardware, software, security, networking and databases.

BSM 480  Small Business Accounting - 3 credits
Prerequisites: BSM330, BSM332, and BSM456. This course introduces accounting concepts and procedures relating to small business. Content includes a basic overview of the accounting cycle, data entry using manual and computerized systems, analysis and use of financial statement data.

BSM 481  Cost Management and Internal Controls - 3 credits
This course explores cost concepts, flows and terminology. Students investigate alternative cost objectives; cost measurement concepts, and cost accumulation systems including job order costing, process costing, and activity-based costing. Additionally we discuss overhead cost allocation; operational efficiency and business process performance topics such as JIT, MRP, theory of constraints, value chain analysis, benchmarking, ABC, and continuous improvement. Students will review risk assessment; internal control environment, responsibility and authority for internal auditing; types of audits; and assessing the adequacy of the accounting information system controls.

BSM 482  Internal and External Auditing - 3 credits
This auditing course will teach students the proper role of an internal and external auditor. Students will learn the value of an internal auditor in various business operations including purchasing, personnel, production and internal operations. Also the course will teach students the role of the external auditor in conducting an audit using sampling and statistical tools to evaluate the financial statements of an organization. Topics will include but are not limited to the purpose of internal/external auditing, audit pre-planning, collection of evidence and auditing industry software.

BSM 483  Taxation - 3 credits
Prerequisites: BSM330, BSM332, and BSM482. This course offers practical study of current federal income tax concepts, requirements, procedures and forms as they relate to businesses and individuals. Content includes income inclusions and exclusions, capital gains and losses, business and personal deductions and accounting methods.

BSM 484  Accounting Information Systems - 3 credits
Prerequisites: BSM330, BSM332, and BSM483. This course requires work with accounting systems to maintain books and prepare financial statements. Content includes preparation of source documents, flowcharts, journal entries, adjusting entries, general ledgers, subsidiary ledgers, bank reconciliations, depreciation schedules, payroll records, and financial statements, including the statement of cash flows. Microsoft Excel used in this course. Prior experience with the software not required.

BSM 485  Accounting Internship - 3 credits
Prerequisites: BSM330, BSM332, and BSM484. This internship experience gives students an opportunity to practice knowledge and skills gained in the classroom, and to become familiar with the structure and functioning of an organization's accounting procedures and systems. Under supervision, students provide accounting services for companies or non-profit agencies. The students and host organization will document and reflect on their activities.

BSM 490  Management Studies Capstone - 3 credits
Prerequisites: 90 credits minimum, including WRT101 and WRT102. The Capstone is a comprehensive research project which is the culminating academic activity that helps to synthesize students' learning in the undergraduate management program. It is an opportunity to explore a topic of personal or professional interest in the field of management and to create an original project or piece of research that contributes to the field. The Capstone is 25-30 pages in length and follows a research paper format appropriate to the field of study. Students work together in class and meet or communicate individually with the instructor as needed. Those who take an additional term to complete the Capstone must register for BSM491 and pass before graduating.

BSM 491  Management Studies Capstone Completion - 3 credits
Second or additional term(s) as needed to complete the Psychology Capstone.

BSM 492  Management Field Experience - 3 credits
The management field experience gives students the opportunity to practice knowledge and skills gained in the classroom and to become familiar with the actual operational functions within a for profit or not for profit entity.
BSM 493  Decision Analysis and Risk Management - 3 credits
In this course, students learn to identify and analyze types of risk in corporations, assess measures of risk, and understand concepts of management-relevant data. We evaluate cost-volume-profit analysis, marginal analysis, and make vs. buy decisions. We will also investigate concepts of pricing, and will consider income tax implications for operational decision analysis, operational risk, hazard risk, financial risk, and strategic risk.

BSM 494  Financial Statement Analysis - 3 credits
Financial Statement Analysis will teach students the tools and methods to evaluate a company’s current financial positioning and to predict potential earnings and/or losses. Students will use the skills learned to determine how an organization’s financial statements are impacted by the organization’s operations and strategies. These skills will allow the student to critically think about an organization’s performance by analyzing the financial statements. Topics will include but are not limited to cash flow statement analysis, earnings quality analysis and ration and profitability analysis.

Management: Health Care (HCM)

HCM 300  Health Insurance and Reimbursement - 3 credits
This course investigates health insurance models and the financing and delivery of healthcare services. Students explore reimbursement and payment structures, and examines insurance practices as they have evolved over time. Students discuss concepts in insurance, third-party and prospective payments, and managed care organizations.

HCM 301  Health Care Policy and Reform - 3 credits
This course examines the structure of the health system, current topics in health care reform, the policy process, and advocacy for public health. Attention will be given to disparities in access to care, the quality of care, the structure of the delivery system, the challenges of long term care and the aging population, and the drivers of cost growth.

HCM 400  Health Care Management Capstone Project - 3 credits
The Capstone is a comprehensive research project related to current issues within the health care industry. This project is the culminating academic activity that helps to synthesize students’ learning. It is an opportunity to explore a topic of personal or professional interest and to create an original project or piece of research that contributes to the field. The Capstone is 25-30 pages in length and follows a research paper format appropriate to the field of study. Students work together in class and meet or communicate individually with the instructor as needed.

Mathematics (MAT)

MAT 100  Foundations of Mathematics - 3 credits
Math100 emphasizes the central mathematical ideas of logic, data-based reasoning, pattern recognition, analysis, and rational communication. By combining real-life problem solving with mathematical operations and investigation, we develop and enhance the essential concepts underlying undergraduate mathematics. Topics include a review of multiplication and division, fractions, decimals, percents, ratios, positive and negative integers, expressions, equations and inequalities, exponents, basic graphing, geometric functions, and the fundamentals of algebraic functions.

MAT 101  College Mathematics I - 3 credits
Prerequisite: MAT100 if assessment indicates need. This course introduces students to the value of mathematics for students’ career and educational goals. Students will acquire mathematical study skills, gain strategies for problem solving, and develop a sound foundation for future mathematics coursework. The course is structured towards engaging students in active, applied, and real-life learning in order to facilitate mathematical problem solving and conceptual understanding.

MAT 102  College Mathematics II - 3 credits
This course develops students’ mathematical thinking and problem solving around issues of both mathematical content and process. Students will acquire a conceptual and practical understanding of and familiarity with numbers and operations, algebra, geometry, measurement, and basic data analysis and probability. The course focuses on supporting students’ understanding of problem solving, reasoning and proof, communication, connections, and representations. A key feature of the course is active student involvement to support communicating mathematics in everyday and academic contexts. Prerequisite: MAT101 if assessment indicates need. Challenge exam available.

MAT 200  Using and Understanding Algebra - 3 credits
This course covers the traditional topics of college algebra. In contrast to the traditional course, this course emphasizes real-life applications of mathematics, stresses understanding of concepts over practice and drill, and makes use of graphing calculators, the Internet, and other new technologies. The knowledge obtained in this course helps students understand mathematical concepts used throughout the physical and biological sciences as well as giving you a mathematical base to build on for more advanced math courses.

MAT 201  Introduction to Statistics - 3 credits
Statistics is the branch of mathematics that focuses on the collection of data, data analysis, probability, and statistical inference. In this course students will learn the principles of using data to identify patterns, ascertain distributions, conduct accurate group comparisons, and make data-based inferences and predictions. Concepts of spread, normal distribution, multi-modal distribution, standard deviation, statistical skewing, graphing, statistical significance, variance, validity, and probability will be covered.
MAT 203  Pre-Calculus - 3 credits
This course reviews and strengthens algebraic and logical reasoning skills necessary for the study of advanced math concepts. Topics include: operations with polynomials, literal equations, absolute value, linear equations, determinants, quadratic functions, synthetic division, rational functions, exponential and logarithmic functions, binomial theorem, and sequences and series. The trigonometric subsection studies topics of right triangle trigonometry, trigonometric equations, law of tangents, sines and cosines, identities and graphing of trigonometric functions. The course also explores limits and introductory ideas of rate of change.

Multidisciplinary Studies (BAM)

BAM 490  Multidisciplinary Studies Capstone - 3 credits
Prerequisites: 90 credits minimum, including WRT101 and WRT102. The Capstone is a comprehensive research project which is the culminating academic activity that helps to synthesize students’ learning in the undergraduate multidisciplinary program. It is an opportunity to explore a topic of personal or professional interest in the field of multidisciplinary studies and to create an original project or piece of research that contributes to the field. The Capstone is 25-30 pages in length and follows a research paper format appropriate to the field of study. Students work together in class and meet or communicate individually with the instructor as needed. Those who take an additional term to complete the Capstone must register for BAM491 and pass before graduating.

BAM 491  Multidisciplinary Studies Capstone Completion - 3 credits
Second or additional term(s) as needed to complete the Psychology Capstone.

Music (MUS)

MUS 100  History of Jazz - 3 credits
The purpose of this course is to familiarize students with the rich heritage of jazz, America's true art form, through historical and cultural data, examination of style, and an in-depth visual and aural evaluation of the great artists who have contributed to enrichment of society through this music.

Philosophy (PHI)

PHI 201  Introduction to Philosophy - 3 credits
How can we best understand the meaning of love, faith, friendship, truth, anger, forgiveness, or address the purpose of life? Can we know that God exists? What is justice, and do we live in a just universe? What is true happiness? What is the role and purpose of education in our lives? While we all confront these issues, few of us are able to formulate answers to them in a systematic way. When we do philosophy, we attempt to do just that. Philosophy comes from the Greek word meaning, "love of wisdom." This simple statement hints that philosophy combines passion and reason, emotion and intellect. This is why Aristotle wrote that experience of wonder is the beginning of philosophy. Nearly all human beings spend time wondering about the big issues mentioned above. All of us attempt some philosophy on our own. In this course, we work on it together. We read works by some of the people who have wondered most carefully about these issues. To do this, we develop our own capacities for rational inquiry. This means learning how to make sound arguments, ask good questions, and recognize logical errors in our own thinking and that of others. This course develops our capacity for rational inquiry and wonder so that we can confront and begin to resolve the questions and problems that matter the most to us.

PHI 235 Introduction to Philosophy Through Literature - 3 credits
This course explores the foundational questions in the Western philosophical traditions through classical and contemporary philosophical and literary texts. We address questions pertaining to the construction and practice of identity, knowledge, moral behavior, notions of beauty and justice; moreover, we examine how experiences of doubt, fate, and evil challenge these constructions.

PHI 300  Existential Philosophies - 3 credits
“Existence” literally means to step forth. Characteristic of existential philosophies is the inquiry into what it means to “step forth” in the journey of becoming a self, i.e. a journey involving freedom, anxiety, despair, risk, choice, and the joy of embracing life. The course examines writings by 19th century philosophers and writers, such as Kierkegaard, Nietzsche, Dostoyevsky, Kafka, whose texts contain existential elements that inspired the mid-20th century philosophical-cultural movement of existentialism (Sartre, Camus, Beckett) as well as the phenomenological response (Heidegger) to existentialism. Finally, the course discusses 21st century philosophical positions that both react to and are inspired by these previous philosophies.

PHI 310  Ancient Greek Philosophy - 3 credits
Both Plato and Aristotle held that all philosophy begins in wonder. This course examines the wonder that the ancient Greek felt and how it got transmuted into philosophy, that is, into the attempt to give an account of the world and human life within it. This account had to be based on principles and used a rational or logical methodology devised and applied by the intellect. But this view raised questions about the nature of the human intellect, the soul, and the nature of the knowledge which it could generate. These and related questions will be explored mainly through the works of the Pre-Socratics, Plato, and Aristotle.
PHI 315 Philosophy of Religion, Faith, Doubt and Reason - 3 credits
This course explores the human phenomena of faith, doubt, and reason primarily in their religion dimensions but also in their humanistic dimensions. We examine classical questions in Western philosophy of religion such as the various conceptions of the reality of God and challenges to these notions, the problem of evil as evidence against the existence of God; the function of religious language; and the pluralism of religious traditions. This leads to an inquiry into reason, faith, and doubt in a broader humanistic horizon where we ponder the impact of these phenomena on one’s sense of self, trust in other persons, belief in institutions, and identification with values and ideas.

PHI 318 Ethical Analysis in Contemporary Society - 3 credits
The existential question “who am I?”, perhaps the ultimate question of philosophy, is closely related to questions of morality/ethics such as “what ought I to do?” and “what are the principles for right conduct?”. We are all continually being confronted with ethical situations and dilemmas, whether we choose to respond or not. Ethics is the study of the standards of human conduct and of the foundation for judgment. As such ethics addresses issues pertaining to individual and societal norms, and it involves reflecting on the role of the self in regards to others. With this base we identify contemporary social issues that need change as well as the ways in which such change can be brought about.

PHI 320 Philosophy of Film - 3 credits
This course examines how and why we watch films. The course studies films, film theory, and philosophical texts. It covers topics related specifically to film, e.g. the structure of film, the question of how film technology impacts film content, as well as topics pertaining to the humanities, such as the roles of gender and ethnicity. Through these topics, the class looks at how films see themselves and how films develop ideas of identity, including the meaning of being a spectator.

Psychology (PSY)

PSY 110 Systems Thinking in Psychology - 3 credits
Systems thinking in psychology is introduced as a theoretical approach to understanding the relationships and interactions of individuals, families, groups, and organizations. Attention is paid to application of the systemic model and how it differs from the linear model, when studying human interactions, analyzing social problems, and developing interventions. Students apply systems theory to problems they select from their daily lives or jobs.

PSY 120 Formative Ideas in Psychology - 3 credits
The CLEP exam in Introductory Psychology is accepted as equivalent. The field of psychology is introduced and the historical development of psychology as an academic discipline and as a professional career are surveyed. The major fields of psychology are explored and applied to understanding human beings as individuals, as well as members of groups, and communities. The major methods of psychological research are introduced, including data collection and analysis.

PSY 130 Groups and Social Psychology - 3 credits
The nature and quality of individual experience can only be fully understood when simultaneously observed in its social context. This course introduces the essential sociological perspective that grows out of the psychological study of individuals and their experiences of groups, group behavior, and group membership. This perspective becomes an essential component of psychological understanding, especially as it relates to education, growth, and development. Students gain conceptual and practical knowledge of the ways groups form and develop, how they function and vie with each other, and the multi-dimensional influences groups have upon our lives.

PSY 210 Developmental Psychology - 3 credits
The CLEP exam in Human Growth and Development is accepted as equivalent. This course helps students understand the ways in which people from various cultures and countries develop and change over their lifetimes. Students focus on particular topics such as cognition, social development, or identity, and follow the topic across the lifespan. In this way, we get away from a “stage theory” approach and focus instead on the variety of ways that people live out developmental scripts. Students are introduced to terms and concepts which are basic to a cross-cultural view of development, such as developmental orientation, cross-cultural “perspective,” and a systems approach. These concepts are applied to each topic area, so that students learn, for example, how cognitive development is affected by living in different cultures and how one’s identity is influenced by the various systems within which we live. In addition to reviewing readings and discussion, each class features a group exercise to help students understand and apply information and concepts.

PSY 251 Infant and Toddler Development - 3 credits
This course covers infant and toddler development in the context of family life cycle issues and factors relating to the larger social environment. Physical, cognitive, social, personal and moral development are addressed, along with the resulting implications for creating optimal
out-of-home care environments. Multicultural and multi-linguistic influences are considered throughout, and students become familiar with major child and family policy areas. The course focuses on general developmental trends and issues, and students bring in questions from their personal and professional lives. Students also learn report-writing and understanding of assessments.

PSY 310 Psychology of Learning - 3 credits
The conditions of learning are explored, from the prenatal through adolescence and early adulthood, emphasizing cognitive and emotional development. Current views of behavioral change and the learning process are introduced. The theoretical models of Piaget, Pavlov, and Erickson are covered. Students formulate original ideas and incorporate established theories to develop a better understanding of concepts and assist with transferring theory into practice. Topics include the nature-nurture controversy, Maslow’s hierarchy of needs, effects of prenatal development on learning, cultural and environmental effects of development, and multicultural awareness.

PSY 311 Group Dynamics and Diversity - 3 credits
Prerequisite: PSY120 recommended. This course examines the psycho-social dimensions of groups and explores the impact of diversity on group formation and process. Students use the classroom and/or other groups to which they belong as laboratories to study and apply the concepts learned in class. The course builds on the knowledge gained from PSY110.

PSY 315 Research in Psychology - 3 credits
Strongly recommended: at least two psychology courses including PSY120 or permission of instructor. This course introduces students to the major research findings that have had significant influence on the development of psychology as the science of human behavior throughout the twentieth century. Students will learn about the history and philosophy of specific research topics, research questions and methodologies and how they have affected the scope and direction of psychological knowledge and the practice of psychology as a profession. Particular attention is paid to the impact of culture and epistemological models implicit in both quantitative and qualitative research methodologies and how they have influenced the direction of research in the field of psychology.

PSY 316 Cross-Cultural Perspectives in Psychology - 3 credits
This course introduces cross-cultural, traditional, and psycho-spiritual views on human growth and development, wellness and illness, healing and belief, the ritual process, the roles of healers, altered states of consciousness, and comparative models of self-realization. Drawing from a wide range of cultures and perspectives, the course emphasizes the internal coherence of these views and how individuals experience and use them in their own lives and settings. Given recent trends in diversity and cross-cultural encounters, it has become critical to understand the views of those who embrace radically different ideas about the world we all share. Special emphasis is given to the practical implications of this understanding in a variety of human service, educational, and therapeutic settings.

PSY 317 Community Psychology - 3 credits
This course provides an introduction to the field of community psychology. Community psychology is concerned with how individuals and groups interact within their environments and how issues of health and the well-being of community members are addressed in response to shifting social and historical conditions, including crisis situations. Community psychologists seek to systematically understand people within their larger social worlds and as an applied discipline, work towards optimizing both individual and collective aspects of mental health. We will examine how community psychologists emphasize prevention of psychological distress, work towards empowering persons and communities often having few resources, and develop strategies to deal with a wide variety of social and environmental issues that impact individual lives.

PSY 321 Child Development: Themes and Topics - 3 credits
This course will examine human growth and development from birth through adolescence. Students will be provided with an overview of the key concepts and theories that comprise the field of child development through lectures, selected readings and films, and through a variety of educational activities that involve students’ own observations and experiences. We will study the work and theoretical models that have historically described child development drawn from some of the most influential authorities in the field and locate their observations within the context of prevailing social and historical trends. Recent developments and research directions in child development will be incorporated in the content and topics presented in class. The didactic materials and class assignments will enable students to develop pragmatic perspectives about children which can facilitate their own professional goals and aspirations.

PSY 325 Theories of Personality - 3 credits
This course is an introduction to the study of personality and examines a broad range of theoretical explanations for understanding personality development. Students will learn both historical and contemporary approaches to understanding personality including: psychoanalytic, humanistic-existential, social-cognitive, behavioral, biological and feminist perspectives and will also examine the impact of culture on personality development. The course will examine similarities and differences between various theories through case studies and students will be encouraged to explore the relevance of the material to their professional and personal understanding.

PSY 328 Forensic Psychology - 3 credits
This course is an introduction to the field of forensic psychology and examines how psychological theory and practice intersect with the law, the legal system and the field of criminal justice. It will offer a broad perspective of the field and will cover the role that psychology has played in a number of related areas including: theories of crime and criminal behavior, the nature of eyewitness testimony, criminal investigation, the psychological evaluation and understanding of criminal suspects and jury selection.

PSY 330 Adolescents in Search of Belonging - 3 credits
In this course we look at adolescents in traditional and non-traditional families and residential treatment communities. We explore the
adolescent search for a sense of belonging in and beyond the family, and for acceptance and inclusion in adult society. We discuss the developmental tasks of adolescence including sexual maturation, identity, and autonomy. We explore adolescent culture, role development, and societal attitudes to adolescents. We research community responses to teen parenting, depression and suicide, substance abuse, and delinquent activity. We look at prevention, intervention, and restoration in the context of community systems.

PSY 332  Learning to Say Goodbye: Death, Dying and Grief in the 21st Century - 3 credits
Nothing is more profoundly human than the experience of loss and the awareness of our own mortality and those around us. It is unique, personal and informed by our community, our culture, and our sense of history. The ways in which society has experienced, processed and expressed such awareness will be examined through a review of centuries of literature, poetry, music and prayer. We will look at the cultural and historical rituals and beliefs that influence the manner in which we approach an understanding of our own mortality and the multiple losses we experience throughout our lives. While considering topics of grief, bereavement, aging and the dying process, emphasis will be placed on the complex bioethical questions of end of life care in the 21st Century. Among the topics to be considered are hospice care, palliative care vs. aggressive medical treatment, DNR orders, physician assisted death, organ donation, health care proxy and living wills. These topics will be considered from multiple perspectives including those of science, religion, culture and law.

PSY 340  Changing Lives: Psycho-Social Perspectives of Women - 3 credits
Students are introduced to women’s issues, including current debates in feminist theory and the changing role of women in social institutions. The course addresses a wide range of theoretical perspectives, including psychology, social psychology, literature, and women’s studies.

PSY 345  The Spiritual Dimension: Psychological and Educational Themes - 3 credits
Educators, clinicians and human service providers need to understand the impact of spiritual experience and religious traditions upon the lives of the people we work with and to recognize how such understanding is intrinsic to new and emerging holistic views of development. This interdisciplinary course explores the impact of the spiritual dimension upon education, psychological understanding, and development. Starting with the voices of children, our study draws from the psychology of religion, anthropology, education, and the humanities to examine the experiential core intrinsic to spiritual life. Special emphasis is given to helping students find practical ways to incorporate this learning into their professional activities.

PSY 351  Adolescents and Addiction - 1 credit
Within the framework of adolescent development, students are introduced to cognitive, personality, behavioral, social/environmental and biological/genetic risk factors which may contribute to adolescent addiction. Stages of substance abuse progression are discussed, as well as screening, assessment, prevention, and treatment strategies. Recovery is presented as a developmental process.

PSY 352  Sexual Activity as At-Risk Behavior - 1 credit
This class studies the developmental, familial, and societal influences on the sexual behavior of teens. It covers STD, HIV and AIDS, teen pregnancy and teen prostitution. Students learn to identify the risks and warning signs of “high risk” sexual behavior among adolescents; they gain the basic knowledge and skills to begin an intervention.

PSY 353  Suicide Assessment - 1 credit
This class covers developmental issues unique to adolescence, characteristics of youth who are at risk for suicide, and stressors including mental illness, family, and cultural issues. Students gain an elementary understanding of the dynamics present within a suicidal adolescent and the basic skills to provide safety and a complete suicide assessment. They are introduced to community referral, supports and prevention strategies.

PSY 354  Crisis Intervention - 1 credit
This course exposes students to the dynamics present in situations in which there is a risk of serious harm or death to self or others unless there is immediate intervention. Students examine crisis assessment and intervention techniques, with emphasis on techniques appropriate to adolescents.

PSY 359  Understanding Child Abuse and Neglect - 3 credits
This course is an overview of child abuse, neglect, and interventions targeted to this social problem. This course will assist the student in understanding, through case studies and readings, contemporary definitions of child abuse, neglect, sexual abuse, institutional abuse, adolescent abuse and catastrophic maltreatment. Child abuse will be discussed in context of family stress and the course will examine the historical role of societal intervention. Additionally, childhood neglect and abuse and their impact on delinquent behavior will be discussed. The course will review theories related to family relationship and attachment, community empowerment and disadvantage and the impact on adolescent growth.

PSY 376  Psychological and Therapeutic Dimensions of the Arts - 3 credits
This course explores the psychological dimensions of the arts, creativity, and art-making and how the expressive arts are included in contemporary psychological thinking and therapeutic encounters. Using current and cross-cultural examples, we explore how music, dance, theater, painting, poetry, and theater deal with fundamental aspects of human experience and how this awareness informs our psychological understanding of human growth and development and the inner life. We consider how current psychological practice incorporates the arts in therapy and how creative art therapists work. Implications of this study are incorporated into the student’s professional work.

PSY 377  Psychology and Applied Neuroscience - 3 credits
In this course, students will learn about recent advances in brain science and their applications in the fields of psychology, human services, and education. With recent research in neuroscience, a variety of psychological theories and methods can be better understood in terms of what we know about the how the brain functions. This understanding can be applied in a variety of contexts, both personal
and professional. The course will include both theory and experien-
tial activities to help students understand how neuroscience can be
applied in a variety of psychological contexts and populations.

PSY 378 Psychology of Behavioral Addictions - 3 credits
Behavioral Addictions refer to chronic, compulsive or impulsive behav-
iors that result in severe negative consequences for a person and may
be associated with a variety of normal, healthy behaviors of daily life
with regard to: food, money, exercise, sex, work, computer gaming
or other activities using technology and other means. This course will
introduce students to the emerging field of Behavioral Addictions,
the current state of research and understanding as to its underlying
causes and expressions and the treatments that have emerged to
help those who suffer from a variety of addictive behaviors. Similar
to the more commonly known effects of alcohol or substance abuse,
normal, healthy behaviors of daily life can also become dysfunctional
when a person becomes overly preoccupied or unbalanced with
them either by overly engaging in these activities or by avoiding them.
Application of treatments to specific populations will be a major focus
of the course.

PSY 390 Psychology of Aging - 3 credits
The life phase of old age is characterized by a dynamic interplay of
internal and external adaptations including often, a prevailing sense of
loss: loss of one’s capabilities and skills, one’s physical abilities and
health, the loss of friends, spouse or social world and of course, the
increasing sense of the loss of one’s own future. And yet, Erik Erikson
has also described old age at its best, as a time for the gathering of
wisdom and the deepening of personal integrity which can be passed
on to others for all to benefit. What does it mean to age “success-
fully”? What are the challenges, the rewards and the stresses of aging
and how do they affect one’s psychological experience of oneself
and of those around an aging individual? In what ways can old age
challenge or fulfill one’s sense of oneself? This course will examine
the components of successful aging as well as the psychological stress-
sors older adults may experience as they travel through the last phases
of the life-cycle. Topics include the influence of age on cognitive
processes, personality and psychological well-being. Special attention
will be paid to the impact of culture, gender, and socioeconomic as
one looks at the psychology of aging and we will describe strategies
to reduce isolation and increase social interaction for the elderly.

PSY 395 Psychology of Race - 3 credits
This course explores the psychological and social factors that influ-
ence how we perceive race and how differing notions about race
affect our interactions with people from different racial or ethnic
groups. The course begins with an interdisciplinary examination
of ideas about race, including biological, cultural and perceptual
constructs. Cultural transmission theories including meme theory are
used to examine how beliefs about race are acquired, reinforced and
expressed. We explore the neuropsychology of perception and attribu-
tion theory to better understand how race influences our personal
and social experience. We will consider the application of this under-
standing within a variety of psychological and educational contexts.

PSY 396 The Psychology of Women - 3 credits
This course critically examines psychological, behavioral and
socio-cultural factors that impact women’s lives across the lifespan.
Students will learn about sex differences in brain and neuropsycho-
logical development, stereotypical gender roles and communication
styles, gender differences in relationship expectations and goals and
issues related to women’s sexuality. Historical and current research on
the psychology of women will be examined.

PSY 400 Personnel Psychology: Diversity and Empowerment
- 3 credits
Managers and their organizations are trained to tap the full potential
of the wide ranging talents and perspectives of their increasingly diverse,
global workforces. Emphasis is on the management of diverse work-
forces and teams in profit and nonprofit organizations, and public and
private workplaces. Students explore the principles and practices
needed to develop people and work productively in organizations
increasingly characterized by differences of color, gender, culture,
style, and approach.

PSY 402 Themes in Adult Development - 3 credits
This course explores the development of emotional maturity, using
concepts drawn from biological psychology, psychoanalytical theory,
and cognitive-behavioral theory. The class identifies biological
underpinnings of emotional maturity and focuses on early develop-
ment, roadblocks, and unconscious pressures that contribute to the
development of, resistance to, or retardation of emotional intelligence.
Small groups study emotional maturity in the context of counseling,
teaching, or the workplace.

PSY 403 Psychodrama and Drama Therapy - 3 credits
Prerequisite: at least nine prior psychology credits.
This course will provide a theoretical and skills-based overview of the
uses of psychodrama and drama therapy and how they are therapeu-
tically applied with a range of populations and psychological issues.
We will examine the basic concepts and philosophy originating with
J.L. Moreno, the founder of psychodrama, as well as other drama
therapy pioneers to better understand the process and complexities
of action-based psychotherapeutic modalities. In addition, psycho-
drama and drama therapeutic perspectives will be explored within the
framework of individual, group, family, creative arts therapy and com-
community healing applications. This is a highly experiential, action-based
class which combines theoretical and practical considerations of what
psychodrama offers within the therapeutic encounter.

PSY 407 Principles and Practices of Art Therapy - 3 credits
This course addresses the foundations of art therapy including its his-
tory, major theoretical perspectives, pioneers in the field, and clinical
application. The significance of the therapeutic alliance is covered,
as well as skills to enhance the therapeutic relationship. The clinical
application (individual and group) of art therapy to children, adoles-
cents, adults, and families is examined. The diagnostic application of
art therapy is also explored.

PSY 408 Movement and Healing - 3 credits
Drawing from recent theoretical and clinical developments in body-
oriented psychotherapy and dance/movement therapy, this course
explore the psychological, creative and spiritual dimensions of the body and how it is central to contemporary developments in psychological thinking and approaches to healing. We explore how movement and the body are connected with fundamental aspects of psychological awareness and how this impacts upon our emotional, social, creative and spiritual lives. We examine how current body-oriented approaches to psychology inform our understanding of growth and development, education, psychological diagnosis and treatment in areas such as trauma, body-image, eating disorders, depression, anxiety, and developmental delays.

**PSY 409  Family Mediation Techniques - 1 credit**
Conflicts among family members are particularly stressful for adolescents. This course offers techniques for successful mediation of family disputes. Emphasis is placed upon introduction of strong communication skills for family members. The role of the mediator is presented as an unbiased facilitator in the family’s attempt to resolve conflict.

**PSY 410  Theories of Motivation - 3 credits**
This course examines current research and theoretical models of motivation in relation to the factors that give rise to, sustain, and direct behavior. Emphasis is on achievement and competence motivation and understanding diverse motivational needs of individuals and groups. Theoretical models explored include Elton Mayo and the Harvard Studies' impact of cooperation, camaraderie, participation and communication; Douglas McGregor's impact of management philosophy; Chris Argyris' impact of the organization; Abraham Maslow's hierarchy of human needs and high performance teams; Robert White (competence); Stanley Schachter (affiliation); and David C. McClelland (achievement). Topics for discussion and field analysis include: concepts of the self; environment; commitment and contribution; career counseling and planning; emotional maturity, needs, and security; human energy and shared vision; assessing and measuring achievement.

**PSY 411  Conflict Prevention in a Multicultural World - 3 credits**
Prerequisite: PSY110 recommended. Techniques and methods of understanding and addressing conflict in diverse groups, organizations, and communities are explored. The course helps students develop the characteristics and skills of a good negotiator/mediator, who can effectively facilitate constructive changes in themselves, their families, workplaces, and communities. Theories and methods are applied to the classroom experience and off-campus settings, as appropriate. Students examine their assumptions about people who are different from themselves and explore how those assumptions influence how they interact with, and are perceived by other people. This course builds upon systems thinking.

**PSY 412  Perspectives in Psychopathology - 3 credits**
This course surveys the history of attempts to categorize “deviance,” introduces the current model which emphasizes pathology, and discusses selected syndromes (e.g., schizophrenia, depression). We also look at the mental health practices and social service systems for adults and children that have historically resulted from diverse concepts of “abnormal” behavior. Students explore the stress, coping, and resiliency model for viewing human behavior. This paradigm looks at the whole person, with both strengths and deficits, in an environment with factors that foster or debilitate resiliency. Students use this holistic model to assess individual case studies and develop strengths-focused intervention strategies. They grapple with the complexity of individual lives and the mysterious human psyche, and actual cases.

**PSY 421  Psychology and Work Today: Introduction to Industrial and Organization - 3 credits**
The DANTES exam in Organizational Behavior is accepted as equivalent. This course provides an overview of organizational psychology and examines how general psychological principles operate among individuals in social and organizational settings. The course provides in-depth application of theories and concepts in Organizational Psychology to public and private work settings, and profit and non-profit organizations. Learners acquire competencies based on practical applications of behavioral science research findings in motivation, decision-making, problem-solving, employee development, working conditions, and employee safety and health in the workplace.

**PSY 426  Self-Care for Helping Professionals - 3 credits**
Students learn about the impact of stress on physical and mental health, job functioning and learning, family and other relationships. Students learn ways to deal with the stress that is often inherent in the helping professions. Concrete skills help them take better care of themselves and pass these skills on to others. Topics addressed include stress management and relaxation techniques, physical activity, nutrition, time, cognitive restructuring, and attitude. Whether you work in human services, health care, schools, or corporate America, this course gives an understanding of stress and stress management and practical applications for you and your clients.

**PSY 428  Holistic Psychology: An Integrated Approach - 3 credits**
This is a course on integrative approaches across the healing disciplines, focusing on integrating body, mind and spirit in a variety of psycho-educational, human services, and healing contexts. Students learn a multidimensional approach to healing that integrates different techniques, therapeutic orientations and approaches. The course combines theory and research, experiential learning, and practical application of new techniques. We explore new information about ourselves, the ways we approach our professions, and how we can apply this knowledge in our work with various populations.

**PSY 433  Existential Psychoanalytic Theory and Life - 3 credits**
This course will examine major topics in psychoanalysis and existential therapy. The course focuses on both traditional and current developments in the field. There will be a review of the work of Sigmund Freud, Medard Boss, Rollo May and Viktor Frankl. Why do people do the things that they do? How can we free ourselves from our compulsion to repeat certain behavioral and emotional patterns? We’ll explore the powerful forces that compel us to “act out” unconscious scripts. Issues covered will include: the repetition compulsion of addictions, the tyranny of anxiety and fear, the possibility of purpose and freedom, acceptance and commitment, love and will, and the relationship between “dreaming” and authentic living. A willingness to develop self-reflection and self-analytical skills is required.
PSY 470  Psychology Internship I - 3 credits
PSY 471  Psychology Internship II - 3 credits

Psychology Internships give students the opportunity to practice knowledge and skills gained in the classroom and to experience firsthand the practical applications of how psychology and psychological skills are practiced professionally in a wide variety of settings. All Internship sites and student’s activities must be approved in advance by the program director and close ties are maintained between the on-site agency supervisor and the course instructor.

PSY 490  Psychology Capstone - 3 credits
Prerequisites: 90 credits minimum, including WRT101 and WRT102. The Capstone is a comprehensive research project which is the culminating academic activity that helps to synthesize students’ learning in the undergraduate psychology program. It is an opportunity to explore a topic of personal or professional interest in psychology and to create an original project or piece of research that contributes to the field. The Capstone is 25-30 pages in length and follows a research paper format appropriate to the field of study. Students work together in class and meet or communicate individually with the instructor as needed. Those who take an additional term to complete the Capstone must register for PSY491 and pass before graduating.

PSY 491  Psychology Capstone Completion - 3 credits
Second or additional term(s) as needed to complete the Psychology Capstone.

Public Health & Wellness (PHW)

PHW 300  Introduction to Wellness and Health Promotion - 3 credits
This course introduces students to the concepts, theories and research related to wellness and health promotion. We will examine the state of health, our current model of care in the U.S. and the implications for adopting a wellness or health promotion approach. Students will research factors that influence wellness and health promotion, such as nutrition, exercise, stress reduction and sleep. We will explore wellness and health promotion initiatives and challenges related to implementing and sustaining them within various settings and with diverse populations. Future trends and efforts towards prevention will be explored. Students will research career opportunities in prevention, health maintenance, education and promotion, such as health and wellness coaching.

PHW 301  Understanding Obesity - 3 credits
This course explores the current epidemic of obesity; what factors influence the development and persistence of this public health problem and what efforts are underway to address the weight of the nation. This course will include a review of the literature on the burden, causes, consequences and prevention of obesity for both children and adults. We will explore how we got here, the costs we currently encounter and why individual will power is not enough to change this epidemic. Stigma, bias and environmental factors that impact obesity will be examined. Students will identify and develop effective prevention strategies.

Religion (REL)

REL 230  Religions of the World - 3 credits
The religious impulse expresses itself in innumerable systems of thought, belief and behavior in which people seek to give an account of the world, the forces of nature, and understand the meaning of human existence in every cultural and historical epoch. This course explores the philosophical, historical and cultural foundations of the world’s major religions and in doing so, builds a framework in understanding the many ways religions offer prescribed ways of knowing, seeing, and being in the world. Interdisciplinary in nature, the course draws from the fields of history, philosophy, anthropology, sociology, psychology and the arts, as we examine how religion continues to shape and influence an astonishing range of human motivation and activity. The course will include study of the major religious traditions of the world: Christianity, Judaism, Islam, Buddhism, Hinduism, Taoism, Confucianism, indigenous native religions, shamanism, and the new religious movements found in the contemporary world.

REL 300  Religion, Justice, & Globalization - 3 credits
This class will seek to equip students with the resources to better understand religion’s role in globalization. This will be achieved in two ways. First, we will spend time learning about the historical set of beliefs and rituals belonging respectively to Judaism, Christianity, Islam, and Buddhism in order that we grasp the theological values and assumptions which define their worldviews. Second, we will read authors whose work represents attempts to address from within their traditions some of the most controversial issues emerging from globalization. As a result of these readings, class discussion, and assigned writing, students will develop a knowledge base and set of critical faculties so that they may independently evaluate the various roles which some of the world’s religions have come to play in the debates surrounding globalization.

REL 301  World Mythology - 3 credits
This course explores the origins and functions of mythologies across the world as well as throughout history. By examining such recurring mythological themes as the hero’s quest and stories of world beginnings and endings, we inquire into what myth means to us, and as such we inquire into processes of meaning-making and identity construction. We consider various interpretative theories often applied in the study of myth and how interpretation shapes the meanings of myth.
Sciences (SCI)  (See also Chemistry)

SCI 131  Physical Science - 3 credits
This course provides education and training in the scientific method and opportunity to master the fundamentals of chemistry, physics and astronomy. This includes the study of atomic theory and structure, formation of compounds, chemical equations, acid and bases, and behavior of gases, as well as classical mechanics, kinematics, mechanical energy, magnetism and electric forces, reflection and refraction of light. The course emphasizes the effects of these contributions in science on modern living.

SCI 138  Physical Geology - 3 credits
This course provides an overview of the physical features, components, and geologic dynamics of the planet Earth. Topics include a study of rock and mineral types, volcanism, plate tectonics, and the physical effects of glaciers, oceans, rivers, wind, volcanoes, and earthquakes. Additionally, aspects of resource utilization and management, and the geologic histories of other planets in our solar system will be explored. SCI138 is an introductory course, suitable for students with a limited knowledge of physical geology.

SCI 210  The Nature of Inquiry in the Natural and Social Sciences - 3 credits
This course explores the fundamental content and processes scientists use to understand the natural and social world. We explore scientific method and conduct guided experiments in the natural sciences and inquire into a problem of interest using biological and social perspectives, observation, classification of information, measurement, inference, development of a hypothesis, experimentation, conclusion, and communication of findings.

SCI 214  The Elements of Geography - 3 credits
A study of the major elements of physical and human geography, with an overview of the world's regions. Emphasis is on global relationships and distributions, both environmental and cultural. This includes climates, natural vegetation, land forms, cultural origins and diffusions and economic patterns. Survey of weather elements as a basis of the regionalization of world climate as well as an examination of the human imprint on the environment.

SCI 215  Physics I - 3 credits
Physics is the study of matter, energy, and their interactions. This is a practical introductory course that explores the laws and principles of physics through investigation of everyday objects. Topics covered include: energy and motion, light and color, sound and music, electricity and magnetism. We explore these topics by questioning how everyday objects such as clocks, violins, air cleaners, flashlights, radios, and televisions work.

SCI 216  Introduction to Chemistry: Chemical Equations to Food Calories - 3 credits
Chemistry is the science of the composition, structure and properties of substances. This course is an introduction to the basic concepts of chemistry, designed for students lacking previous chemistry training or whose background may require an extensive review. We examine chemistry principles and learn how they affect everyday events.

SCI 224  Fundamentals of Astronomy - 3 credits
A comprehensive approach to past and current astronomy: early astronomy, the distribution and properties of the stars, their life cycles and our galaxy. The course also encompasses the solar system, other galaxies, asteroids, comets, meteors, variable stars, x-ray stars, pulsars and quasars, as well as current space exploration and the latest discoveries and theories.

SCI 225  General Biology - 3 credits
This course survey lays the foundation for the study of the life sciences, including biology, biochemistry, biotechnology, health sciences, and other specialized life science fields. The course begins with the study of cellular structure, single-celled organisms, cellular metabolism, and reproduction, and then proceeds to the study of tissues and more complex organisms including multi-cellular plants, fungi and animals. Additional topics include genetics, evolution, ecology and the interrelationships between organisms and their environments.

SCI 225L  General Biology Lab - 1 credit
The hands on component of SCI 225 introduces students to laboratory techniques used in the study of general biology. The laboratory follows lecture topics presented in SCI225 and takes a systemic approach to the study of general biology.

SCI 230  Anatomy and Physiology I - 3 credits
SCI230 provides a systemic approach to the major anatomical and functional components of the human body, and is designed to help students understand how these systems function together in health and disease. Topic coverage includes basic medical and diagnostic terminology, histology, and an in-depth examination of the body’s anatomical and physiological systems including the integumentary, skeletal, muscular, nervous, and circulatory systems.

SCI 230L  Anatomy and Physiology Lab - 1 credit
Prerequisite: enrollment in SCI 230. This hands-on component of SCI 230 introduces students to laboratory and dissection techniques used in the study of human and comparative anatomy. The laboratory follows lecture topics presented in SCI 230, and takes a systemic approach to the study of anatomical structure and function.

SCI 231  Marine Biology - 3 credits
SCI231 is designed to introduce students to the principles of marine biology, oceanography and marine ecology. It is broad in scope and covers a number of diverse topics including basic oceanography, pelagic and coastal ecology, and the taxonomy and biology of marine invertebrates, fishes, reptiles, seabirds, and mammals. Additional course topics include a review of New England's history as a maritime economy, global conservation concerns, and responsible oceanic resource management. A background in general biology is recommended.

SCI 235  Principles of Health & Wellness - 3 credits
An exploration of the psychological, emotional, spiritual, physical, behavioral, environmental and social health aspects of everyday living. Through self assessment inventories, students examine their health behaviors, identify problems and recommend lifestyle changes. Students refine their decision-making skills to help them make more healthy choices.
Educated decisions on personal and community health problems including drug and alcohol misuse and abuse. Students become knowledgeable on health-related topics enabling them to become educators themselves. Community health services, functions, eligibility or access are explained.

**SCI 240 Systems of Thought in Science: How They Shape Our World - 3 credits**
This survey course facilitates students' acquisition of the knowledge of theories and applications in cosmology, evolution, mathematics, life sciences, physics, and religion and science. Students examine the development of these domains of science, how they are converging and informing each other, and gaps in this convergence, which sometimes create contradictions within the various domains. Students explore how science affects social systems at the individual, community, and global level. Special focus is directed towards the pivotal connection between science and culture, and the systemic effects on education, government, domestic and international politics, economics, health care, family and community systems, and religion.

**SCI 300 Principles of Ecology - 3 credits**
Ecology is the study of the interactions between organisms and their environment, and the way in which these interactions determine the distribution and abundance of organisms. This course presents an introduction to the basic principles and outlines the essential principles of ecology from the theoretical fundamentals to their practical applications. The course is designed to present a comprehensive overview of all aspects of ecology, including evolution, ecosystems theory, practical applications, plants, animals, biogeochemical cycles, and global change. The science of ecology is examined from three levels: ecology of the individual, ecology of populations, and ecology of systems. Since ecologists often play a significant role in constructing and evaluating conservation or environmental management programs, we incorporate the application of ecological theory to current environmental problems throughout the course. The course will combine lectures and group learning dealing with both the theory of ecology and applied issues with a practical component of laboratory and field projects.

**SCI 301 Global Ecology - 3 credits**
This course will explore and analyze current global environmental issues and their existing and potential solutions. Human population growth, food production, energy use and conservation, air and water pollution, desertification, deforestation and climate change will be the topics of classroom discussion, class exercises, and field trips. Historic and current knowledge and understanding of each issue; its relationship to ecological and human social systems, and current potential solutions will be examined. The use of critical thinking skills and a problem solving process will be introduced and practiced throughout the course. Each global issue will be addressed through student research and solution proposals. The purpose of the course is to introduce students to current global environmental issues and their impact upon human well being, ecological health and contemporary culture. Students will explore and analyze current global environment issues through selected readings, critical thinking and a problem solving process. Students will be challenged to explore their role and potential solutions to the presented global environment issues.

**SCI 302 Wetland Ecology - 3 credits**
Wetland Ecology provides students with an introduction to the nature and function of wetlands and their conservation and management. Students will be introduced to: history of wetland loss in the U.S., wetland classification, wetland identification and delineation, biological adaptations to wetlands, wetland soils, hydrology and plants, human impacts on wetlands and the importance of wetlands in the water cycle and health of the environment. Wetland functions, the restoration of wetland functions, and the laws protecting wetlands will be reviewed during classroom discussion, exercises and field trips.

**SCI 303 History of Technological Innovation - 3 credits**
SCI303 traces the progression of technological development from its earliest examples to the current cutting edge of scientific and technological advances. Students will learn about the history of technological achievement, and consider that history within the context of the latest advancements in engineering, computing, medicine, robotics and other technologies. In addition, we will explore what emerging approaches are currently being developed, how they are being imagined, and why.

**SCI 308 Principles of Engineering - 3 credits**
Principles of Engineering is the process of applying scientific principles to the conception, design, construction and implementation of machines, technologies, structures, devices and materials. It is a broad field with many sub-fields, including but not limited to: mechanical engineering, electrical engineering, computer engineering, genetic engineering, civil engineering, aerospace engineering and chemical engineering. This course introduces students to the general theory, methods and processes of engineering, and explores the various applications of scientific engineering principles. Topics include the history and development of engineering principles, mechanics, design, construction, implementation and the integration of technologies into modern society.

**SCI 310 Scientific Inquiry - 3 credits**
This integrated course encompasses certain aspects of physics, chemistry, astronomy, earth sciences and emphasizes general principles and their application to real-world situations. This course is for students who have had some exposure to one or more of the basic sciences and are interested in a basic understanding of a variety of scientific fields and how they can be applied.

**SCI 311 The Science of Exercise - 3 credits**
This course provides an historical perspective on physical activity and fitness, and how changes in lifestyle, technology and other factors that have contributed to a more sedentary lifestyle and related health concerns. Students will examine various forms of physical activity and will be introduced to exercise physiology, the ways in which physical activity impacts biology, including physical health, mental health and the brain. The literature on various forms of exercise and the impact on health will be examined including but not limited to endurance,
Cambridge, MA  •  617.868.1000  •  www.cambridgecollege.edu

flexibility, strength, stamina, cognition, memory. We will investigate current trends in exercise, by factors such as age, culture and gender, and whether these factors are considered in our efforts to influence rates of physical activity.

SCI 335  Topics in Biology: Understanding Human Genome Project - 3 credits
Prerequisite: SCI225 or permission of instructor. This course is an investigation of the human genome project. We commence with a discussion of molecular biology. After achieving a command of the language of molecular biology, we study how the human genome was sequenced. To examine the method first hand we visit a DNA sequencing facility, meeting and observing scientists actively performing DNA sequencing techniques. We spend the last part of the term exploring how the data gathered from the human genome project impacts society, specifically discussing various benefits and drawbacks.

SCI 336  Drug Discovery: From the Laboratory to the Pharmacy - 3 credits
Prerequisite: SCI225 of permission of instructor. This course examines the journey of a variety of pharmaceuticals from their discovery to their use in everyday life. Students discuss how drugs are discovered and how scientists study, manufacture, proceed through clinical trials and the Food and Drug Administration approval processes. We investigate how certain drugs affect our bodies/cells and fight disease states. Throughout the term a variety of different pharmaceutical classes are discussed including but not limited to over-the-counter drugs, prescription drugs, “life-style” drugs, anti-viral drugs, allergy medications, and chemotherapeutic agents.

SCI 337  Microbiology - 3 credits
This course focuses on the principles of medical microbiology and is designed to familiarize the student with the biology, ecology, and behaviors of microbes and viruses in human health, medicine, and biotechnology. This course is designed for premed biology concentrators, nursing students, and students looking to receive comprehensive training in medical microbiology. Topics include the general principles of microbial growth; the evolution and classification of microbes and viruses; the natural ecology of microorganisms; pathogenesis, diagnosis, and treatment, and the use of microorganisms in biotechnology and medicine.

SCI 337L  Microbiology Lab - 1 credit
This one credit laboratory is the counterpart to SCI337. Microbiology. This lab focuses on the principles of microbiology and is designed to familiarize the student with the biology, ecology, behaviors, and the use of microbes and viruses in human health, medicine, biotechnology, and in nature.

SCI 338  Urban Ecology - 3 credits
The urban environment is characterized by highly altered landscapes and ecosystem function, and requires a specialized approach to its ecological study. Urban Ecology explores the distinctive human-generated ecological conditions and processes that typify urban environments, and presents evaluative methods unique to these highly-altered ecosystems. Course topics include: urban microclimates; water, carbon and nutrient cycles in the urban setting; urban vegetation; urban wildlife; urban soils; aquifer recharge and subsidence; and urban water and air quality. After gaining an understanding of how urban ecosystems function, students will explore current management techniques and policies which work to mitigate the adverse effects of altered landscapes on urban ecosystems.

SCI 339  Epidemiology and Public Health - 3 credits
Epidemiology and Public Health introduces the foundations of epidemiology and biostatistics as applied to the study, monitoring and maintenance of public health. This course focuses on the foundations and methods of epidemiologic investigation; accurate sampling, analysis and presentation of data, and the use of classical statistical approaches to describe the health of populations. Topics include the dynamic behavior of disease; outbreaks, spread, epidemics, pandemics, and control strategies. Additionally, this course discusses and reviews epidemiologic study designs, cause and effect, treatment efficacy, and ethical and legal issues in epidemiology.

SCI 400  Ethology: Principles of Animal Behavior - 3 credits
Prerequisite: general biology or permission of instructor. Ethology is the branch of zoology that focuses on the scientific study of animal behavior. This course is designed to introduce students to the specialized field of animal behavior analysis and the various conditions that shape both simple and complex behavioral constructs. In this course students explore animal behavior through the study of function, causation, development, and evolutionary history. We consider in-depth studies of fixed action patterns, animal communication, and imprinting, and use these analyses to shed light on the development of behaviors throughout vertebrate and invertebrate taxa.

SCI 406  Evolutionary Biology - 3 credits
Prerequisite: general biology or permission of instructor. This advanced course in biology explores the history, dynamics and analysis of evolutionary theory. It is broad in scope, and includes topical reviews of fitness, functional analysis, adaptation, optimization theory, selection theory, and the ethics of predictive modeling in sociobiology. Additional discussions of modern views and applications of evolutionary theory to business models, interpersonal relationships, and the development of human culture will be included.

SCI 233  Anatomy & Physiology II - 3 credits
SCI233 serves as a continuation of Anatomy and Physiology I, and provides an in-depth study of body systems and system interactions. Topical coverage includes medical and diagnostic terminology, and an examination of the body’s anatomical and physiological systems including the respiratory, endocrine, lymphatic, immune, digestive, excretory and reproductive systems. It is systemic in its approach and requires the successful completion of SCI 230 in order to enroll.

SCI 233L  Anatomy & Physiology II Laboratory - 1 credit
The SCI233L laboratory provides students with continued hand-on experience within the study of anatomy and physiology, and consists of advanced dissection techniques, histology, and other related procedures.
Sociology (SOC)

SOC 120 Cross-Cultural Communication - 3 credits
Drawing on cross-cultural research in psychology, anthropology, and education, this course considers the role of culture in shaping and interpreting a wide range of verbal and non-verbal communication behaviors. We examine the physical, psychological, aesthetic and social dimensions of the communication process, how different cultures understand, symbolize and utilize them, and how specific meanings and the kinds of modalities employed in communication processes affect individual, collective, and inter-group experiences.

SOC 201 Cultural Anthropology - 3 credits
How do societies and cultures work? How do we know how to behave? What are the rules that make our society function? Do these rules differ from other societies? How do minority groups fit in? Cultural anthropology asks all these questions, and the process of discovering answers changes the way students think about themselves and their actions in society. Students analyze the behavior of people in groups and realize that practices contrary to their own may be logical from another’s point of view.

SOC 212 Introduction to the American Legal System - 3 credits
To be effective citizens, employees, parents, and members of society we must comprehend the conceptual frameworks of the law and its implications in our daily lives. This course introduces legal concepts and activities, and their pragmatic applications: contract law, civil rights law, employment law, family law, and patient rights. We also discuss how the United States Constitution impacts contemporary legal issues including government regulation of private business, separation of church and state, right to privacy, government funding of educational and religious institutions, and property rights versus environmental and other governmental constraints.

SOC 215 Language and Society: Introduction to Linguistic Anthropology - 3 credits
Language is so essential to culture that it is the only topic to which anthropology devotes an entire branch of study. Linguistic anthropologists examine the role language plays in society, linguistic structural components, and how languages evolve over time and in different circumstances. In this course we explore such questions as: Could society exist without language? What does language allow us to do? Why are people the only animals to speak? Or are we? Are our brains wired for language or is it something we are taught? Through discussion, direct observation/experimentation and readings, students will understand the relationship between our linguistic abilities and the nature of our humanity.

SOC 260 Themes in Sociology - 3 credits
This course develops specific themes in sociology to better understand sociology as a way of understanding the world. Sociology is a field of study that explains social, political, and economic phenomena in terms of social structures, social forces, and group relations. This course will serve as an in-depth examination of a set of contemporary issues, including themes of socialization, culture, the social construction of knowledge, inequality, race and ethnic relations, poverty, education, and political sociology.

SOC 302 Martin, Malcolm and the Movement - 3 credits
This course examines and analyzes the development of selected political and economic issues and structures that shape current events and public discourse. Topics vary by term and may include the evolution of the American political parties, of the Executive Branch, the effects of new media, globalization and others. Students learn to analyze source materials and to distinguish fact from opinion. This semester, historical perspectives on contemporary issues will focus on two central figures of the civil rights movement, Martin Luther King, Jr. and Malcolm X. This course seeks to critically examine the social context, the philosophical and ideological framework of Martin Luther King Jr. and Malcolm X. Through biographical and historical analysis, students will develop a greater appreciation of the two historical figures. In addition, we will critically evaluate and relate the methods of each to contemporary U.S.A. and Third World racial, social, political and economic problems. We will read and study the assigned material and bring to class questions on issues that we wish to critically examine through writings and class discussions. Your attendance and active participation is therefore crucial in this course. The instructional modes in class will be based primarily upon lectures, discussion/debates, DVDs, and audiotapes.

SOC 311 Images of Women - 3 credits
This course studies the ways in which women are seen historically and in the world today. This course draws from literature, sociology, anthropology, speeches, advertising and other forms of mass communication. Study of traditional images of women in both eastern and western cultures contributes to an understanding of the origins and basis of gender roles. Self-imaging and self-empowerment are significant components in this course.

SOC 322 Women in the Workforce - 3 credits
Women have contributed significantly to this country’s social, political and economic history through their roles in the workforce. This course will trace women’s roles as workers from the 18th century to the present time, detailing the difficulties they have faced, the evolution of their roles, and their accomplishments. It will examine their leadership in reform movements and unions, and relate their work to the students’ lives and experiences as workers and educators.
Spanish (SPA)

SPA 100  Spanish I - 3 credits
Spanish I serves as an introductory course to spoken and written Spanish. This course covers four important aspects of new language acquisition: listening, speaking, reading and writing. Students are immersed in a highly interactive environment where they learn Spanish through associative and mnemonic methods rather than direct translation into their mainstream language. This innovative method encourages students to think in Spanish and to understand rather than translate the message into their native languages. Course coverage includes vocabulary, grammar and verb conjugation, and idiomatic expressions that are in common use for the Spanish native speaker. Pronunciation, articulation and enunciation are emphasized throughout the course.

Writing (WRT)

WRT 101  College Writing I - 3 credits
Through challenging readings, class discussion, small group collaboration, and different forms of writing, students learn the skills and process of “thinking on paper.” They learn to construct an argument or discussion that supports a clear thesis and present it effectively in a well-organized essay that observes the conventions of written English. They write academic papers that analyze and synthesize the issues suggested in two or more readings. Critical reading, critical thinking, research skills, and forms of documentation are also introduced.

WRT 102  College Writing II - 3 credits
WRT102 acquaints students with the academic research paper as both process and product. The course begins with an intensive review of the strategies and techniques for writing an academic essay that are covered in WRT101 and then moves to selecting and narrowing a topic, preliminary research, and establishing a focus for a 12-15 page argument research paper. The final paper includes an abstract, an introduction, discussion, conclusion, and references. Students learn how to write an annotated bibliography and use APA documentation for in-text citations and references.

WRT 201  The Craft of Research - 3 credits
Prerequisites: WRT101, 102 or equivalent.
WRT201 acquaints students with the academic research paper both as process and product. This includes selecting and narrowing a topic, preliminary research, and establishing a focus for a 110-15 page research paper. Throughout the process, students use information literacy skills to analyze problems, research and select relevant information, and evaluate the credibility of that information. Primary research is introduced. The final paper includes an abstract, an introduction, literature review, discussion, conclusion, and references. The course focuses on the use of APA documentation for in-text citations and references.
The SCHOOL of EDUCATION (SOE) provides a variety of graduate programs including: (1) educator preparation for those seeking licensure either to teach or lead at the school/district-level in Massachusetts; 2) certificates and professional development for experienced educators; and 3) degree options for advanced studies in education without certification. SOE programs use an adult education model for teaching and learning specific to the College’s historical traditions and are designed for those either currently in the field or career changers interested in teaching, leading, and working in education-related settings. Programs embrace the prior experience and knowledge of those enrolled as new possibilities are explored with peers, faculty, and the broader educational community.

Mission and Values
The School of Education is committed to graduate education that integrates theory and practice to create strong learning communities supportive of the professional growth of teachers, leaders, and others working in the field of education. The goal is for graduates to lead well regardless of setting and be effective agents of change within the schools, districts, and communities served. This work is guided by the following principles:
- Innovation
- Diversity
- Academic Excellence
- Social Justice
- Integrity
- Building Community

Community and Faculty
A broad based and inclusive community, the SOE attracts a highly diverse group of students and faculty, providing a rich teaching and learning environment for all. Faculty members are all experienced teachers, school administrators, community educators, and scholar-practitioners passionate about teaching, academic leadership, and student success. Faculty care deeply about making a difference in the lives of others and work to inspire the same among the students served. Loyal to the College’s historical roots, faculty use integrative approaches to teaching and learning. The methods used enhance the critical thinking, communication skills, and effectiveness of educators for responsiveness to the diverse population of learners in the schools, districts, and communities served. Like faculty, many students are experienced educators seeking certification or advanced studies in education. Others are career changers and/or work in settings related to education.

Program Selection
Applicants are asked to carefully review all requirements for the academic program selected. In consultation with the program chair, make informed choices when selecting the best program for your specific situation, individual needs, and career goals. Clearly distinguish between programs leading to licensure certification in Massachusetts and those offered for advanced studies. Note that some programs in advanced studies parallel those for certification and are known as “non-licensure” options. Prospective students are therefore encouraged to contact the program chair about specific requirements and seek their counsel as decisions are made.

Academic Advising and Professional Seminar
Academic advising for the SOE rests with the program chair and designated faculty teaching professional seminars (aka “Pro-Sem”) for the area enrolled. To ensure that everyone is on track for academic success, incoming students are strongly advised to attend New Student Orientation for the term enrolled. The SOE also holds group advising sessions each term for continuing students prior to registration and other meetings supportive of program completion. However, the first point of contact for questions regarding the program and advising is the program chair. Program chairs are available to answer questions about the program, handle concerns, and to facilitate your success.

Additional advising is provided by faculty in Pro-Sem. During this time, faculty also mentor students for the culminating project required for degree completion. The project varies depending on the program, yet most refer formally to this as an Independent Learning Project (ILP). A few programs reference the project differently, but all involve reflection, research, and writing specific to academic area enrolled.
For programs leading to licensure, students also complete electronic portfolios and other documentation specific to their licensure. In all programs, students work collaboratively as peers, provide support for and advise each other, and build long-lasting relationships that span throughout the program and many years thereafter. Professional Seminar is therefore essential to the Cambridge College traditions and SOE advising experience.

Lastly, faculty teaching courses within each program also advise students on matters specific to the course and provide professional support for careers in education. Both at the College and SOE level, a variety of events are held including speakers, presentations, colloquia, roundtable discussions, and panel sessions to further enhance the campus experience and assist students with career advancement.

Communication Competency
Cambridge College is committed to producing graduates who think critically and communicate clearly in verbal and written form. Performance expectations include positive communication with individuals, within teams, and when interacting with others online (e.g., via email and virtual learning environments). Given that written expression is a complex endeavor that takes time and practice, a writing assessment is conducted by the College and students are, as needed, referred during courses for writing support. While enrolled, students can improve their communication and literacy skills to gain the most from their learning experience and to assist their completion of the culminating project. Faculty with expertise in writing also tutor students and guide them through the writing process.

Transfer Credit
Courses from other institutions submitted for transfer credit must meet all general criteria for transfer upon entry and match current academic requirements, especially for licensure programs. See Transfer of Credit section for more information.

Academic Programs and Policies

Educator Preparation — All SOE Licensure Programs for Teachers and Leaders
Programs leading to certification are aligned with national and state standards, accrediting agencies, and policies for licensure required by the Massachusetts Department of Elementary and Secondary Education (ESE); all programs are state-approved by state regulatory agencies. As such, program requirements are subject to change during a course of study and students are asked to consider this possibility and plan accordingly once enrolled in one of the licensure programs offered.

All applicants to licensure programs must consult the designated program chair prior to program entry and before course registration. Unless all requirements are fully met with evidence submitted to the appropriate department in the School of Education upon admission into the College, prospective candidates must first enroll in the non-licensure program that parallels that of the licensure area.

Requirements for Program Entry
Entry into one of Cambridge College's educator preparation programs for licensure requires evidence of successful completion of the Communication and Literacy Massachusetts Test for Educator Licensure (MTEL), and a minimum Grade Point Average (GPA) of 3.0 in the most recent degree program.

Evidence of the Communication and Literacy MTEL requirement includes a copy of the official document noting the “pass score” or verification page from the Educator Licensure and Recruitment (ELAR) system maintained by the Massachusetts Department of Education and Secondary Education. Evidence of the GPA upon College entry includes the official transcript of a prior undergraduate or graduate degree with a 3.0 GPA or better. Additionally, the prospective candidate must provide the Massachusetts Education Personnel ID (MEPID).

Those admitted into the College having successfully met all program requirements including the MEPID, MTEL, and GPA requirement may enter into the licensure program of choice provided that the evidence is submitted with the application and verified by the appropriate program chair.

Those entering the College without having met the program requirements must register first in the non-licensure program aligned with their desired area of study. Once all requirements are satisfied, including the MEPID, MTEL, and GPA must first meet with the designated program chair and complete a Declaration of Candidacy form along with a Change of Program to the licensure area sought. For those enrolled in a non-licensure program, evidence for the GPA requirement is a 3.0 (i.e., Grade “B” or better) in at least two courses taken in the non-licensure program aligned with the licensure program for which candidacy is declared. The Declaration of Candidacy and Change of Program Form must signed by the candidate and the designated program chair in the area of licensure sought and requires the approval of the dean or designee. Both forms must be submitted and handled by the program chair or department head for review and further processing with the School of Education and College. Students seeking candidacy in any of the licensure programs are advised to take the Communications and Literacy MTEL within the first semester of enrollment at Cambridge College. MTEL Workshops are available each term for a nominal fee to facilitate student success.

Once enrolled in educator preparation programs, candidates for licensure must maintain an overall GPA of 3.0 or better for the remainder of the program. Should the GPA drop below 3.0, an academic warning will be issued and the candidate placed on academic probation. If not resolved prior to the Practicum, the candidate must return to the non-licensure degree option.

No candidate can complete or graduate from the approved program for licensure selected without maintaining a GPA of 3.0 or better at Cambridge College.

Students who complete a non-licensure option cannot be endorsed for licensure.

Electronic Performance Portfolio
Candidates for licensure are also required to maintain an electronic performance portfolio using the TaskStream system established by the SOE. Included in the portfolio is evidence of program completion and documentation of key assessments and field experiences (including all Pre-Practicum, Practicum, and Practicum Seminar). The electronic portfolio is reviewed by designated program chairs and faculty working with candidates in the Professional Seminars.

Pre-Practicum field experiences are documented in the electronic portfolio using the SOE Pre-Practicum Forms designated for each program. The forms require signatures from the faculty member assigned to mentor the pre-practicum for a particular course and the candidate’s advisor.
Candidates also document the Practicum and Practicum Seminar, which require an assessment of successful performance by a licensed/certified educator in the area of licensure sought and a licensed/certified Cambridge College supervisor.

All field experiences submitted to TaskStream are monitored by the SOE Pre-Practicum/Practicum Coordinator with routine reports submitted to the department head of either Teacher Education or Educational Leadership. Advanced Studies & Strategic Initiatives with a copy to the Dean, School of Education and the Director of the Office of Institutional Research and Planning.

Approval to Enter Practicum
Prior to enrolling in the Practicum and Practicum Seminar, approval from the designated chair is required. Candidates should complete an Application for Practicum Placement Form at least one term prior to the Practicum and secure the chair’s consent. Candidates in Cambridge may submit the form directly to the program chair. Those in Lawrence and Springfield submit the form to the regional education coordinator who then secures the chair’s approval. The Chair then submits the form to the SOE Coordinator for Pre-Practicum and Practicum who generates a list of approved Practica and submits this to the Registrar.

The chairs and designated leaders work with the candidate to complete the process and to assign a licensed program supervisor to observe the candidate’s work during the Practicum. Briefing sessions and required Practicum Orientation are also held to help students understand the process and ask questions related to their readiness for licensure certification. As needed, the Coordinator of Pre-Practicum/Practicum works with candidates to secure placements in area districts and schools.

State Policies
Candidates are also responsible for complying with all policies and procedures of the Commonwealth of Massachusetts and the school/district where they wish to conduct Pre-Practicum hours or seek a Practicum placement, including:
- Educator Licensure and Recruitment (ELAR) Account
- Massachusetts Educator Personnel ID (MEPID number)
- Fingerprinting (see below)
- Criminal Offender Record Information (CORI) check (see below)
- Insurance, and
- Immunizations

Fingerprinting and Criminal Offender Record Information (CORI)
Candidates in licensure programs are required to complete fingerprinting prior to entering schools for field experiences, practicum, or clinical/internships. This includes all students, including those in early childhood classes and care centers or any of the SOE and SOPC licensure programs. See your program chair and advisor (Pro-Seminar leader) for details related to this process.

Additionally, all students are required to complete a CORI (Criminal Offender Record Information) check when entering schools for observations. This is completed by visiting the Human Resources or Superintendent’s Office in the school district of choice and is submitted directly at this level prior to entering a school for pre-practicum observations.

Legal Status
Legal status as a U.S. citizen or lawfully admitted resident is required for a license from any state agency; see Title 8, U.S. Code Section 1621. This rule applies to all licensure types: teacher, administrator, or counselor.

Non-Licensure options
Pre-practicum field experiences embedded in course work are also required for students enrolled in non-licensure options. Students are advised to consult the program chair for specific requirements.

Requirements Specific to Licensure in Teacher Education
The Practicum in all concentrations leading to initial licensure in the Commonwealth of Massachusetts must be completed:
- In a school that uses the Massachusetts Curriculum Frameworks;
- Under a licensed, supervising practitioner who holds the same license for which the candidate is preparing; and
- With supervision and on-site visitation by licensed Cambridge College faculty.

The Practicum is guided and evaluated by both a licensed/certified teacher in the classroom and by a licensed/certified Cambridge College supervisor; site locations selected are subject to state regulatory requirements.

Before registering for Practicum, candidates are required to:
- Pass all state-required tests for the license sought;
- Complete the Sheltered English Immersion (SEI) licensure requirement. Either:
  - Take the SEI/RETEL course offered by ESE within their district or pass the SEI MTEL with official documentation submitted.
  - OR take SEI 605 at Cambridge College as a part of the approved program.
- Complete the pre-practicum (i.e., 75 or more hours of directed field-based training in conjunction with selected courses); and
- Pass all required courses including Independent Learning Project.

Requirements Specific to Licensure in Educational Leadership
For licensure in educational leadership, in addition to the standards previously noted, those in Educational Leadership are based on the Educational Leadership Constituent Council (ELCC) and follow the Massachusetts Department of Elementary and Secondary Education’s (ESE) Guidelines for the Preparation of Administrative Leaders. The ultimate goal is to create competent, caring, and qualified leaders responsive to unique needs of the schools, districts, and communities served.

The Educational Leadership program is therefore designed to develop exceptional leaders who exhibit clear evidence of having met the performance indicators and standards established by ESE and are expected to meet the field. Graduates are therefore expected to promote the learning growth and academic achievement of all students and their respective staff.

To exit the program, candidates for licensure certification in Educational Leadership must have evidence of the Communications and Literacy MTEL and all requirements verified for program completion.
Additionally, all candidates for licensure are required to complete the Sheltered English Immersion (SEI) licensure requirement either by taking the SEI/RETEL course offered within their district or the SEI MTEL with official documentation from ESE submitted or by taking SEI 705 at Cambridge College as a part of their approved program.

Candidates seeking licensure as a principal or assistant principal are further required to complete the Massachusetts Performance Assessment for Leaders (MA-PAL). The MA-PAL is completed as a part of required coursework, primarily during pre-practicum and practicum experiences. Enrollment in MA-PAL occurs upon program entry with all requirements due prior to program completion.

As a part of the approved program, candidates complete an Action Research Project (ARP) as a part of their final professional seminar.

**Advanced Studies**
The SOE also provides programs for seasoned teachers and leaders who wish to advance their studies or their passion for teaching and learning. Those leading to the Master of Education (MEd) include:

- Interdisciplinary Studies
- Teaching Skills & Methodologies
- School Nurse Education

**Programs in Advanced Studies do not lead to licensure in teaching or leadership.**

**School Nurse Education**
The School Nurse Education program is offered as a summer institute and brings educators from around the country and from abroad for an intensive summer institute experience. Students spend a “summer sabbatical” with the best teachers, and experience Boston, Cambridge, and New England while working towards a higher degree, professional advancement, and potential for increased income. They then return to their schools with a new network of professional colleagues and friends, renewed and empowered to improve their classrooms, school systems, and their own lives.

**Site, Facilities and Services**
Cambridge College holds the Summer Institutes at a site in greater Boston with the facilities and services needed to support our academic programs. Cambridge College supplies or arranges for the audio-visual and computer equipment used for classroom instruction.

**Begin in the Summer Term**
The academic work begins with hybrid courses in the summer term. Coursework begins online, followed by an on-site, intensive residence, concluding with online learning. Students typically complete courses and a professional seminar with their faculty advisor and other educators and school professionals in their field. They also get academic support and participate in other academic activities.

**Finish the Degree**
Students continue the degree through online learning during the academic year and return for a residency in the second summer. (Some students with transfer credits may be exempted from the second residency.)

**Doctorate in Education**
The EdD in Educational Leadership equips practitioner-scholars to become more effective leaders through improved analytical and research skills. It develops community-oriented and culturally competent leaders who epitomize the ideal of the practitioner-scholar. Our goal is to develop a new generation of social justice leaders in education who work collaboratively to find research-based solutions to the complex challenges facing K-12 school systems. For information please contact: soe@cambridgecollege.edu.

Currently, the doctoral program is under review, and applications are not currently being accepted.

**Partnerships**

**The Evergreen Center and Beacon Services**
The Cambridge College School of Education partners with the Evergreen Center and Beacon Services in Milford, MA to expand the special education opportunities for teachers working with students diagnosed with autism or other autism spectrum disorders. Through this partnership, the SOE offers a master’s degree, an approved course sequence, and practicum fieldwork supporting our students’ efforts towards earning board certification of behavior analysis (BCBA).

**The Evergreen Center** is a residential treatment center and school serving students diagnosed with autism and related developmental disabilities. At the Evergreen Center, the standard for success is a lifestyle centered in community participation. Evidence-based applied behavior analytic procedures are employed to achieve academic outcomes recommended by the National Center on Educational Outcomes and the adaptive behaviors that enhance independent living skills. All staff receive specialized training in behavioral and educational procedures designed to develop self-help, academic, and vocational skills that may be applied in fully integrated community settings. Presentation of effective treatment techniques developed by Evergreen staff members have been reported at professional conferences throughout the country.

**Behavioral Education, Assessment, and Consultation (BEACON Services)** is a private practice of behavioral educators founded on the principles of applied behavioral analysis (ABA). BEACON is committed to using only empirically validated approaches for the treatment of autism and related disorders. The agency provides intensive home and school-based education, behavioral consultation, behavioral assessment, and training services for early interventionists, parents, and public schools. BEACON works with public schools to develop partnership programs supporting their efforts to provide high quality ABA services to children and families. BEACON is committed to the dissemination of applied research completed in educational settings through presentations at regional, national, and international conferences.

Master of Education

Early Childhood Teacher of Students With & Without Disabilities (PreK-2)

For licensure: 45 credits, 4 terms full-time  •  Non-licensure: 37 credits, 3 terms full-time
• Program approved by the Mass. Dept. of Elementary & Secondary Education (ESE)

Program Description — The Early Childhood PreK-2 program is for students who plan to teach in private and/or public schools. They are prepared with the appropriate skills and knowledge that will assist them in pursuing their initial license in Early Childhood PreK-2 With and Without Disabilities.

Learning Outcomes — Students learn the principles of early childhood education, including developmentally appropriate lessons and activities for educators working with children in preK-grade 2 settings. Students are introduced to practices appropriate for children with learning disabilities and for diverse students (not limited to English language learners). Students learn to work with parents and administrators to provide a solid program in the various academic areas to enhance the abilities of their children.

Careers — Graduates who have completed the licensure option are able to apply for initial licensure and are qualified for employment in private preschool/Kindergarten as well as in public schools to teach in the early childhood arena.

Admission requirements: Bachelor’s degree and other general requirements.

Required to enter program for licensure:
• Massachusetts Educator Personnel ID (MEPID) number.
• Pass Massachusetts Communication & Literacy Test.
• 3.0 GPA at entry; maintained throughout program.

Non-licensure option: All program components are required (including pre-practicum hours) except for the SEI, Practicum Seminar, and MTEL exams.

Program and course schedule subject to change.

Program chair: Mary Garrity, EdD • mary.garrity@cambridgecollege.edu • Teacher Education Department

Professional Seminar & Project ................. 9 credits
ECE691-693  Professional Seminar (3 terms @ 2 credits)
ECE800  Independent Learning Project (take with Seminar III)

Courses ........................................ 28 credits
ELE500  Teaching Phonological & Phonemic Awareness & Phonics (0 credit; prereq. lab for ECE612)  . . . every term
ESP592  Adapting Materials for Students w/Disabilities in Gen Ed Classrooms (1 credit)  . . . . every term
ESP594  Collab & Consultation Techq (2 credits)  . . . . every term
ECE612  Developmental Reading for Early Childhood Birth to Eight  . . . . Fall, Summer
MAT618  Math Essentials  . . . . . . . . . . . . . . . . . . . every term
MAT623  Teaching Numerical & Geometric Structures  . . . . . . . . every term
ESP512  Inclusion & Behavior Management  . . . . Fall, Summer
ELE594  Integrating Physical Education into Early Childhood & Elementary Curriculum (1 credit)  . . . . Fall, Summer
ELE620  Integration of Children’s Literature in Early Childhood & Elementary Curriculum  . . . . Fall, Summer
ECE600  Development of Young Children  . . . . Fall, Spring
ELE653  Teaching Science & Technology in Early Childhood & Elementary Curriculum  . . . . Fall, Spring
ELE656  Teaching Social Science, History & Multicultural Education in Early Childhood & Elementary Curriculum  . . . . Spring, Summer

Practicum Prerequisites
• Pass all teacher tests required by the state for this license.
  Massachusetts: Communication & Literacy, Early Childhood, and Foundations of Reading (MTEL).
• SEI605  Sheltered English Immersion or ESE-endorsed course or SEI MTEL.
• Pass all required courses including Independent Learning Project.
• Pre-Practicum — 75 hours in diverse settings (0 credit).

Practicum (licensure students only) ............... 5 credits
ECE790  Practicum — 400 hours (3 credits)  . . . . . . . Fall, Spring
Guided and evaluated by a licensed/certified early childhood teacher in the classroom and a Cambridge College early childhood supervisor. Practicum locations are subject to ESE regulations and must be approved by the program chair. Students are responsible for discussing options for practicum with the program chair.

ECE791  Practicum Seminar (2 credits)  . . . . . . . Fall, Spring
Electronic exit portfolio (Taskstream) required for credit.

(All courses @ 3 credits except as noted.)
Master of Education

Elementary Teacher (1-6)

For licensure: 46 credits, 4 terms full-time  •  Non-licensure: 38 credits, 3 terms full-time
• Program approved by the Mass. Dept. of Elementary & Secondary Education (ESE)

Program Description — The Elementary Teacher 1-6 initial licensure program is for students who plan to teach in public schools or collaboratives. Students are prepared with appropriate skills and knowledge that will assist them in pursuing their initial license as an Elementary Teacher 1-6.

Learning Outcomes — Students learn the principles and knowledge needed by elementary educators, including strategies for teaching students with diverse abilities and languages in the various academic areas. This includes working in cooperative learning groups and co-teaching exercises that transfer into the classroom. Students will look at research on best practices for today's classrooms and teacher's accountability.

Careers — Graduates who have completed the licensure option are able to apply for initial licensure and are qualified for employment in public schools and collaboratives, teaching elementary grades 1-6.

Admission requirements: Bachelor's degree and other general requirements.

Required to enter program for licensure:
• Massachusetts Educator Personnel ID (MEPID) number.
• Pass Massachusetts Communication & Literacy Test.
• 3.0 GPA at entry; maintained throughout program.

Non-licensure option: All program components are required (including pre-practicum hours) except for the SEI, Practicum, Practicum Seminar, and MTEL exams.

Program and course schedule subject to change.

Program chair: Mary Garrity, EdD • mary.garrity@cambridgecollege.edu • Teacher Education Department

Professional Seminar & Project ................. 9 credits
ELE691-693 Professional Seminar (3 terms @ 2 credits)
ELE800 Independent Learning Project (take with Seminar III)

Courses ......................................... 29 credits
ELE500 Teaching Phonological & Phonemic Awareness & Phonics (0 credit; preq. lab for ELE521) . . . every term
ELE521 Development of Reading & Writing Skills for Early Childhood & Elementary Curriculum . . Fall, Summer
ELE594 Integrating Physical Education into Early Childhood & Elementary Education (1 credit). . . . . . Fall, Summer
ELE620 Integration of Children's Literature in Early Childhood & Elementary Curriculum . . . Fall, Summer
ELE510 Developmental Psychology. . . . . . . . Fall, Spring
MAT618 Math Essentials . . . . . . . . . . . . . every term
MAT623 Teaching Numerical & Geometric Structures. . . . . . . every term
MAT708 Diagnosis & Remediation of Learning Problems in Mathematics . . . . . every term
ELE630 Classroom Management with Models of Teaching. . . . . . . . . . Fall, Spring
ELE653 Teaching Science & Technology in Early Childhood & Elementary Curriculum . . . Fall, Spring
ELE593 Integration of Visual Arts for Early Childhood & Elementary Curriculum (1 credit) . . . Spring, Summer
ELE656 Teaching Social Science, History & Multicultural Education in Early Childhood & Elementary Curriculum . . . Spring, Summer

Practicum Prerequisites
• Pass all teacher tests required by the state for this license, Massachusetts: Communication & Literacy, General Curriculum, math sub-test, and Foundations of Reading (MTEL).
• SEI605 Sheltered English Immersion or ESE-endorsed course or SEI MTEL.
• Pass all required courses including Independent Learning Project.
• Pre-Practicum — 75 hours in diverse settings (0 credit).

Practicum (licensure students only) ...................... 5 credits
ELE790 Practicum — 400 hours (3 credits)
Guided and evaluated by a licensed/certified elementary teacher in the classroom and a Cambridge College elementary supervisor. Practicum locations are subject to ESE regulations and must be approved by the program chair. Students are responsible for discussing options for practicum with the program chair.
ELE791 Practicum Seminar (2 credits)
Electronic exit portfolio (Taskstream) required for credit.

The Teacher Education Program at Cambridge College is awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.
English as a Second Language (PreK-6 or 5-12)

For licensure: 39 credits, 4 terms full-time  •  Non-licensure: 34 credits, 3 terms full-time
•  Program approved by the Mass. Dept. of Elementary & Secondary Education (ESE)

Program Description — Massachusetts and U.S. classrooms include students whose first language is not English. English language learners (ELLs) face learning a new language and culture while simultaneously meeting the same academic standards as English-speaking classmates. The Teaching English as a Second Language program prepares knowledgeable, compassionate, committed educators who create learning environments that work for ELLs and value their contributions. This program is for educators who want to get to know these students and help them learn. Faculty are veteran professionals with broad knowledge of language acquisition and cultural factors that affect learning, and experience with best classroom practices. They model relevant pedagogy, encouraging students to value their prior knowledge as a foundation to discuss new ideas, read and write critically, collaborate, apply new skills, and demonstrate and assess their own learning.

All courses in the ESL program present nationally recognized research-based models for first and second language learning that address the curriculum and developmental characteristics of students in grades PreK-6, 5-12, and adult levels. Participants explore the implications for teaching and learning at each level, and apply the course concepts to their target level.

Learning Outcomes — Students will understand language acquisition; cultural factors affecting achievement; and current theory, research, and best practices for English literacy. They will use research-based ESL methods to help ELLs achieve proficiency in English, and Sheltered English Instruction (SEI) strategies to enable them to meet content standards. Students will plan curriculum, deliver effective instruction, manage a classroom, promote equity, and meet professional responsibilities.

Careers — Candidates who complete the ESL licensure program are qualified to teach ESL in schools, educational collaborations, and community programs. They are also qualified for the Massachusetts SEI Teacher Endorsement. Non-licensure graduates are able to provide ESL support and tutoring in schools; and to teach/tutor ESL in other settings including higher education intensive ESL, other countries, immigrant support programs, and workplace ESL.

Professional Seminar & Project  ..................... 7 credits
ESL691N-ESL692N  Professional Seminar (2 terms @ 2 credits)
ESL800  Independent Learning Project (take with Seminar II)

Courses  ..................................................  27 credits

Recommended order of study:
ESL631  Second-Language Acquisition & Culture
ESL610  Linguistics & Language Variations
ESL615  Methods & Materials for English as a Second Language
ESL635  Sheltered English Instruction & Assessment
ESL625  Technology for Linguistically Diverse Classrooms
ESL650  Teaching Content to ESL Learners
ESL620  Teaching Reading & Writing to ESL Students
ESL630  Equitable Assessment of ESL Learners
ESL640  Identification & Instruction of ESL Learners with Disabilities & Limited Formal Schooling

Practicum Prerequisites
•  Pass all teacher tests required by the state for this license. Massachusetts: Communication & Literacy and English as a Second Language (MTEL). Take English as a Second Language test (MTEL) in Year 2.
•  Pre-Practicum — 75 hours in diverse classroom settings (0 credit).
•  Pass all required courses (includes Sheltered English Instruction).

Practicum  (licensure students only)  ..................... 5 credits
ESL790  Practicum — 300 hours (3 credits)
Guided and evaluated by a licensed/certified ESL teacher in the classroom and a Cambridge College ESL supervisor. Practicum locations are subject to ESE regulations and must be approved by the program chair. Students are responsible for discussing options for practicum with the program chair.
ESL790A  Practicum (PreK-6)  or  ESL790B  Practicum (5-12)
ESL791  Practicum Seminar (2 credits)
Electronic exit portfolio (Taskstream) required for credit.

(All courses @ 3 credits except as noted.)

Admission requirements: Bachelor’s degree and other general requirements.

Required to enter program for licensure:
•  Massachusetts Educator Personnel ID (MEPID) number.
•  Pass Massachusetts Communication & Literacy Test.
•  3.0 GPA at entry; maintained throughout program.

Non-licensure option: All program components are required (including pre-practicum hours) except for the SEI, Practicum, Practicum Seminar, and MTEL exams.
Program Description — This certificate provides an opportunity to explore the field of teaching English as a second language. Participants learn ESL concepts, principles, theories, and classroom practices that are effective in helping immigrants of all ages to learn English and succeed in a new culture. Note: If a student later enrolls in the Cambridge College ESL M.Ed. program, these courses will be considered for transfer toward meeting the program requirements.

The certificate, or individual courses, will provide key information and strategies (Sheltered English Instruction/SEI) that licensed K-12 teachers can use in teaching their content area to English language learners. With approval from a school or district, the courses may be included in the professional development documentation that supports a teacher’s application for 5-year re-licensure.

ESL631  Second-Language Acquisition & Culture
ESL620  Teaching Reading & Writing to ESL Students
ESL635  Sheltered English Instruction & Assessment
ESL630  Equitable Assessment of ESL Learners

(All courses @ 3 credits.)
Master of Education

General Science (1-6 or 5-8)

For licensure: 38 credits, 5-6 terms full-time  •  Non-licensure: 32 credits, 3 terms full-time
• Program approved by the Mass. Dept. of Elementary & Secondary Education (ESE)

Program Description — The General Science Education program provides essential science content, integrated with best practices in hands-on, inquiry-based science education. The curriculum is firmly rooted in the Massachusetts science education model with a balance of earth, life, physical and engineering sciences. Students experience a blend of seated and online content science courses.

Learning Outcomes — Students will understand the principles guiding modern scientific thought, and master science content knowledge. They will design and conduct scientific inquiries to test scientific hypotheses, using appropriate tools and techniques to gather, analyze, and interpret data. They will develop descriptions, explanations, predictions, and models using evidence, communicate scientific procedures and explanations. Students will know how science, technology, and math inform each other and serve as mechanisms for inquiry into the nature of the universe. Students will understand historical and philosophical theories in science, and identify common misconceptions. They will identify socially important issues including the impact of technology on our environment.

Teachers will use professional “best practices” in teaching inquiry-based science. They will develop a balanced approach to hands-on science instruction using appropriate methodology. They will learn to engage students of varied learning styles and abilities.

Careers — Elementary science specialist, grades preK-5; middle school general science teacher/earth, life, physical and engineering sciences, grades 5-8; science museum educator, nature center specialist/guide, aquarium and zoo educator.

Professional Seminar & Project .................7 credits
ESE691-692  Professional Seminar (2 terms @ 2 credits)
ESE800  Independent Learning Project (take with Seminar II)

Science Methods..................................15 credits .. 12 credits 
Licensure courses @ 3 credits grades 1-6 grades 5-8
MAT623  Teaching Numerical & Geometric Structures.
SCI680  Attaining Science Literacy.
option for 1-6: SCI680 or ELE653 Teaching Sci & Technol in Early Childhood & Elem Curric

Methods & Materials for Teaching:
SCI682  Life Science
SCI684  Earth Science
SCI686  Physical Science

Science Content.................. choose 8 credits . . . . 11 credits 
Confer with advisor before choosing courses. Be sure to address your weakest areas of science content.

Online courses @ 1 credit
SCI591  Intro to Online Science Learning
SCI601  Aquatic Ecology
SCI603  Electricity & Magnetism
SCI607  Structure of the Earth
SCI609  Transfer of Energy
SCI613  Earth in the Solar System
SCI629  Practical Meteorology
SCI619  Teaching Project-Based Science
SCI627  Teaching Chemistry Through Inquiry

In-class course option @ 3 credits
SCI688  Methods & Materials for Teaching Middle School Chemistry

All courses offered at least once/year.

Practicum Prerequisites
• Pass all teacher tests required by the state for this license.
Massachusetts: Communication & Literacy test and:
1-6: Successful completion of coursework
5-8: General Science 5-8 MTEL exam
• SEI605  Sheltered English Immersion or ESE-endorsed course or SEI MTEL.
• Pre-Practicum — 75 hours in diverse settings (0 credit).
• Pass all required courses.

Practicum (licensure students only) ....................5 credits
SCI790  Practicum – 300 hrs in an elementary (1-6) or middle school (5-8) science classroom (3 credits)
Guided and evaluated by a licensed/certified general science teacher in the classroom and a Cambridge College general science supervisor. Practicum locations are subject to ESE regulations and must be approved by the program chair. Students are responsible for discussing options for practicum with the program chair.

SCI790A  Practicum 1-6  •  SCI790B  Practicum 5-8

SCI791  Practicum Seminar (2 credits)
Electronic exit portfolio (Taskstream) required for credit.

Admission requirements: Bachelor's degree and other School of Education requirements.

Required to enter program for licensure:
• Massachusetts Educator Personnel ID (MEPID) number.
• Pass Massachusetts Communication & Literacy Test.
• 3.0 GPA at entry; maintained throughout program.

Program subject to change.

Non-licensure option: All program components are required (including the pre-practicum hours) except for the SEI, Practicum, Practicum Seminar and MTEL exams. Two additional credits are required as electives specific to science content. These courses must be selected in consultation with the program chair. MAT623 may be replaced with electives specific to the program.

Program chair: John Papadonis, MS  •  john.papadonis@cambridge-college.edu  •  Teacher Education Department

The Teacher Education Program at Cambridge College is awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Cambridge, MA  •  617.868.1000  •  www.cambridgecollege.edu
Graduate Certificate

STEM: Science, Technology, Engineering and Mathematics
12 credits, 2 terms or more part-time

Program Description — The Stem Certificate in Science, Technology, Engineering and Mathematics provides early childhood, elementary, special education and middle school educators with the core background skills and content knowledge necessary to become highly-qualified mathematics, science and engineering educators serving our younger students.

The courses combine math, science and engineering content with methodology at the elementary and middle school levels. The 12 graduate credits include both seated and online courses, making for a very user friendly learning experience.

Learning Outcomes — Participating teachers will:
- Gain significant mastery of science content, preparing their students for the Massachusetts grade 5 and 8 MCAS exams and for science and technology challenges into their future.
- Integrate earth, life and physical science concepts to solve engineering problems.
- Apply design process steps to solving engineering and science problems.
- Recognize and use connections, relationships and patterns among mathematical ideas; and use representations to model and interpret physical and technical phenomena.
- Gain the necessary mathematical skills in order to become highly qualified and competent teachers of elementary and middle school mathematics.

Careers — After the completing the STEM certificate program, teachers may wish to add a Massachusetts state certification in Mathematics (1-6), Mathematics (5-8), General Science (5-8), or Mathematics/Science (combo 5-8) by taking and passing the appropriate Massachusetts MTEL exam.

Science and Engineering Courses ...............6 credits
- ELE653 Teaching Science & Technology in Early Childhood & Elementary Curriculum
- SCI619 Teaching Project Based Science (online, 1 credit)

Choose two science content courses (online, @1 credit):
- SCI 601 Aquatic Ecology
- SCI 613 Earth in the Solar System
- SCI 617 Earth’s History
- SCI 603 Electricity & Magnetism
- SCI 607 Structure of the Earth

Mathematics Courses .........................6 credits
- MAT603 Arithmetic to Algebra: Developing Math Patterns & Ideas
- MAT708 Diagnosis & Remediation of Learning Problems in Math

COURSE SCHEDULE — All courses offered at least once/year.

Admission requirements: Bachelor’s degree and other general requirements.

Satisfactory academic progress — All students must maintain a minimum GPA of 3.0 or be placed on academic probation.

Program subject to change.

Tuition discount: Candidates must enroll for the entire 12-credit program to receive a tuition discount of 30%. (Full tuition is charged for part-time enrollment, and the discount is applied in the final term retroactively to all 12 credits.)

For more information please contact:
- John Papadonis, MS • john.papadonis@cambridgecollege.edu

(All courses @ 3 credits except as noted.)
Initial Licensure • Non-Licensure

Master of Education

Health/Family & Consumer Sciences (All Levels)

For licensure: 38 credits, 4 terms full-time • Non-licensure: 33 credits, 3 terms full-time • Program approved by the Mass. Dept. of Elementary & Secondary Education (ESE)

Program Description — The Health/Family & Consumer Sciences initial licensure program prepares health educators to be proficient in the Massachusetts Professional Standards for Teachers, the National Health Education Standards, and the American Association of Health Education/National Council for Accreditation of Teacher Education standards.

Learning Outcomes — Our graduates are experts in health education content, able to conduct a needs assessment, plan and implement curriculum, assess student learning, coordinate school health, advocate for health education, and serve as a resource to the school, students and their families, and the community.

Our students graduate with confidence in their ability to teach comprehensive skills-based health education as a component of coordinated school health. They know how to identify student risk factors and help young people reduce their risky behavior and improve their personal health and academic performance.

Careers — Graduates teach (preK-12) and work as health educators in many settings: local health departments, hospitals and clinics, business and industry. In colleges, they also teach courses and conduct research.

Admission requirements:
• Bachelor's degree and other general requirements (see Admissions).
• Program prerequisite: course in anatomy and physiology. If not completed prior to admission, it may be completed concurrently.

Required to enter program for licensure:
• Massachusetts Educator Personnel ID (MEPID) number.
• Pass Massachusetts Communication & Literacy Test.
• 3.0 GPA at entry; maintained throughout program.

Non-licensure option: All program components are required (including pre-practicum hours) except for the SEI, Practicum, Practicum Seminar, and MTEL exams.

SEI is not required for initial licensure in Health/Family & Consumer Science.

Program and course schedule subject to change.

Program chair: Mary Connolly, CAGS, CHES • mary.c.connolly@go.cambridgecollege.edu • Teacher Education Department

Academic Catalog 2016-2017 • Sep 20, 2016

129
Program Description — This Health Education certificate is for physical educators, community and public health educators, wellness and fitness center employees who want current knowledge of health and how to teach it effectively. Students learn to teach skills-based health education based on the performance indicators of the National Health Education Standards.

Two courses are required and two are selected from the initial licensure courses of the Health and Family & Consumer Sciences master's program.

Learning Outcomes include increased competency in health education content and teaching skills.

Required Courses ........................................ 6 credits
EHE620 Curriculum Implementation in the Health Classroom .................................. Fall
EHE630 Growth & Development, Human Sexuality & Family Management Skills .......... Fall

Electives in Health Education .......... choose 6 credits
EHE610 Principles of Health Promotion & Disease Prevention: Public Health Issues ........ Fall
EHE640 Promoting Wellness: Building Positive Health Behavior .............................. Spring

(All courses @ 3 credits except as noted.)
Master of Education

Library Teacher

For licensure: 41 credits, 4 terms full-time ● Non-licensure: 33 credits, 3 terms full-time ● Program approved by the Mass. Dept. of Elementary & Secondary Education (ESE)

Program Description — The Library Teacher program prepares library teacher candidates who share a commitment to improving student learning and providing exemplary school library programs that engage children and teachers in the development of information, media, and technological literacy skills and lifelong learning values. School libraries today provide 21st century learning environments that ensure that students and staff are effective and ethical users and creators of ideas and information. By working with classroom teachers to plan, deliver, mediate, and assess student learning, library teachers have crucial roles to play in amplifying and deepening classroom lessons with the variety of resources and specialized skills available to them.

Learning Outcomes — Our library teacher candidates are prepared to develop and promote quality school library programs. They understand and apply multiple technologies for individual and group learning, empowering students to be critical thinkers, enthusiastic readers, skillful researchers, and ethical users of information. They understand the history and current role of school libraries in education and learning. They are ready for leadership roles in teaching and information literacy, technological literacy, and media literacy. They work closely with other educators to instill a love of learning and reading, ensure equitable access to information resources, and to develop knowledge and skills needed to stimulate and integrate quality reading and inquiry skills into classrooms, labs, and libraries.

Careers — Graduates choose from a number of library and technology related careers including school librarians, media center directors, information and media literacy consultants, library technicians, library aides, media technicians, publishing assistants, educational software sales, and fee-based information services.

Admission requirements: Bachelor’s degree and other general requirements.

Required to enter program for licensure:
● Massachusetts Educator Personnel ID (MEPID) number.
● Pass Massachusetts Communication & Literacy Test.
● 3.0 GPA at entry; maintained throughout program.

Online courses: With the exception of SEI605 and ELM790-791 up to 15 credits may be taken online from the courses listed.

Non-licensure option: All program components are required (including pre-practicum hours) except for the SEI, Practicum, Practicum Seminar, and MTEL exams.

Program and course schedule subject to change.

Program chair: Donna Guerin, MED ● donna.guerin@cambridgecollege.edu ● Teacher Education Department

Practicum Prerequisites
● Pass all teacher tests required by the state for this license. Massachusetts: Communication & Literacy (MTEL).
● SEI605 Sheltered English Immersion or ESE-endorsed course or SEI MTEL.
● Pass all required courses including Independent Learning Project.
● Pre-Practicum — 75 hours embedded in courses, in diverse elementary, middle and high school settings (0 credit).

Practicum (licensure students only) ............... 5 credits
ELM790 Practicum — 300 hours .................... Fall, Spring

In a school library, divided into two 150-hour experiences at two of the three school levels (elementary, middle, high school).

Guided and evaluated by a licensed/certified library teacher in the classroom and a Cambridge College supervisor. Practicum locations are subject to ESE regulations and must be approved by the program chair. Students are responsible for discussing options for practicum with the program chair.

ELM791 Practicum Seminar (2 credits) ............. Fall, Spring
Electronic exit portfolio (Taskstream) required for credit.

(All courses @ 3 credits except as noted.)
Master of Education
Mathematics (1-6, 5-8, or 8-12)

For licensure: 41 credits, 4 terms full-time  ●  Non-licensure: 33 credits, 3 terms full-time
●  Program approved by the Mass. Dept. of Elementary & Secondary Education (ESE)

Program Description — The Mathematics Education program prepares students to effectively teach mathematics at the elementary (1-6), middle (5-8), and high school levels (8-12). Students learn the concepts, language, and procedures of mathematics; and develop competence in mathematics and interest in applying it to the world around them. The program builds on the College’s successful student-centered curriculum that links theory and practice in a collaborative learning environment.

Learning Outcomes — Teacher candidates will understand and apply mathematical problem solving processes and construct rigorous mathematical arguments. They will understand how mathematics is best learned and taught, supporting positive attitudes towards the subject. They will make connections among ideas in mathematics and other fields. They will use varied representations of mathematical ideas to communicate mathematical thinking and deepen students’ understanding. They will embrace technology as an essential tool for ideas to communicate mathematical thinking and deepen students’ understanding. They will understand relationships among quantities, use measurement concepts and tools, spatial visualizations and geometric modeling. They will understand data analysis, statistics, and probability. For middle and high school levels, they will also understand concepts, techniques and applications of the calculus and discrete mathematics.

Careers — The program is ideally suited for: a) adults who want to work with and help children learn the language of mathematics; b) current teachers who wish to add mathematics as a new subject area; c) those wishing to become National Board Certified mathematics teachers, mathematics coaches, mathematics specialists, and mathematics coordinators/directors; d) non-mathematics majors who wish to earn a highly qualified title to their academic experience to enhance and broaden their teaching careers; and e) career changers who wish to pursue a more meaningful career in working with children. Teachers of mathematics at all school levels remain in high demand nationally; and individuals coming from careers in business, engineering, finance and the military are often very successful in relating the importance of the mathematics they teach, to the real world they have worked in for many years.

Admission requirements: Bachelor’s degree and other general requirements. Applicants for levels 5-8 and 8-12 must take a Cambridge College math placement test. Based on test results and program chair’s recommendation, selected lower level math courses may be required before initial licensure courses.

Required to enter program for licensure:
● Massachusetts Educator Personnel ID (MEPID) number.
● Pass Massachusetts Communication & Literacy Test.
● 3.0 GPA at entry; maintained throughout program.

Non-licensure option: All program components are required (including pre-practicum hours) except for the SEI, Practicum, Practicum Seminar, and MTEL exams.

Program and course schedule subject to change.

Master of Education

School Nurse Education

32 credits, 4 terms full-time • In Massachusetts, this degree may lead to school nurse professional licensure. In other states, this program does not satisfy licensure requirements. You must check with your state licensing/credentialing authorities.

Program Description — Inspired by increased responsibilities of school nurses in the past decade, our M.Ed. in School Nurse Education strengthens the knowledge of school nurse professionals. The curriculum focuses on nursing processes with school age children, management and evaluation of school health programs, leadership skills, research in the field, and legal and ethical issues in this unique nursing specialty.

The program builds upon the standards of the National Association of School Nurses and reflects competency requirements outlined by the Massachusetts Department of Elementary and Secondary Education (DESE).

Learning Outcomes — Students will discover their learning style and strengths, becoming lifelong learners. They will make sense of previous experiences and build on them to integrate new information, skills, and attitudes. They will gain competencies in research and analysis, and understanding of evidence-based health program outcomes, practice protocols and policies. They will serve more effectively as nurses and educators of children and adults from diverse backgrounds with diverse needs, creating learning environments and presentations. They will have a network of relationships with fellow learners, Cambridge College faculty, and the faculty of their own schools, a ready resource for their career growth in collaborative school health leadership.

Careers — Graduates will grow in confidence and competence in their professional role as an expert school health manager and leader in each of their school systems. They are encouraged to publish in professional journals, present at local and national conferences for educators and school nurses, develop and initiate new policies/health care protocols within their school districts, mentor new school nurse hires, and apply for and advance into formal leadership roles.

Admission requirements:
• Bachelor’s degree and other general requirements (see Admissions)
• Registered nursing license (RN).

Program and course schedule subject to change.

Program chair: Patricia Johnson, RN, EdD • Patricia.Johnson@cambridgecollege.edu • Teacher Education Department

SUMMER 1 on site................................. 14 credits
ESN691 Professional Seminar I .................. 2
ESN660 Principles, Process, Prac:ctc of School Health Mgt . 3
ESN710 Dealing With Grief & Loss: Role of Educators & School Nurses. ................. 3
ESN725 Legal Responsibilities & Ethical Issues for School Nurses . 3
ESN780 School Nurse Leadership in School & Community. . . . 3

FALL 1 online learning............................ 5 credits
ESN692 Professional Seminar II .................. 2
ESN750 Evaluation of School Health Programs. ................. 3

SPRING 1 online learning........................... 7 credits
ESN693 Professional Seminar III .................. 1
ESN800 Independent Learning Project. ................. 3
One elective ........................................ 3

SUMMER 2 on site.................................. 6 credits
Two electives ...................................... 6

All courses 3 credits except as noted.

Electives must be in health, family & consumer sciences, instructional technology, counseling psychology, school guidance, special education, or teaching skills and methodologies. If courses in these areas are not available, other courses in education may be taken as electives with program chair’s approval.

Nine transfer credits in education or nursing may be accepted as electives. Transfer courses must meet all general criteria for transfer (see Transfer of Credit).

Program changes effective Summer 2012.

No more than 15 credits can be completed through Cambridge College online learning courses.

If you enter in the fall or spring, work with program chair to choose electives and begin research for the Independent Learning Project.

(All courses @ 3 credits except as noted.)
Autism/Behavior Analyst

Master of Education • Post-master's Certificate

Autism/Behavior Analyst

MEd: 38 credits, 6 terms • Post-master's certificate: 19 credits

BCBA course sequence approved by the Behavior Analyst Certification Board. • This degree program is for national certification and is not applicable for initial licensure.

Program Description — Autism is becoming more prevalent in our society and the need for specialists dedicated to serving this population is growing rapidly. This program provides knowledge of the autism spectrum and the skills necessary to meet the needs of individuals with autism. By completing the Behavior Analyst program, students meet the course requirements to sit for the BCBA examination, earning a credential that is in high demand.

Learning Outcomes — Students will demonstrate knowledge of applied behavior analysis (ABA) and associated scientific principles that govern human behavior and the treatment of individuals with autism spectrum disorders (ASD). Students will demonstrate knowledge of clinical, educational, and ethical issues pertaining to the application of ABA across a broad range of treatment contexts and behaviors.

Careers — Graduates, who also complete the supervised fieldwork requirements and successfully pass the BCBA exam, will be able to work in a wide range of educational and clinical treatment settings as a Board Certified Behavior Analyst.

Autism & Special Education Courses ........ 19 credits

- All courses 3 credits except as noted.
- This course sequence is strongly recommended.

*ESP705 is completed over two terms, with credit applied in the second term of enrollment for course completion.

(Less courses @ 3 credits except as noted.)

Admission requirements: Bachelor’s degree or higher and other general requirements (see Admission). In addition, a master’s degree in behavior analysis, education, or psychology is required for the BCBA Certificate.

Professional work experience: Current employment in a BCBA-related setting is required for the field experiences specific to the BCBA Certificate. This includes having a BCBA certified professional supervise work during this period.

Licensure: Massachusetts does not grant teaching licensure in this area.

Student responsibility: Enrollment in the BCBA course sequence requires a high level of professional acumen and decorum. It is assumed that all enrolled understand that requirements align with national expectations established by the Behavior Analyst Certification Board. Supervision and field experiences are essential to the program completion, with all requirements specific to the national standards established by the Board at the time of application for the BCBA certification.

Program and course schedule subject to change.

Program chair: Mary Garrity, EdD • mary.garrity@cambridgecollege.edu • Teacher Education Department
Teacher of Students with Moderate Disabilities & Applied Behavior Analysis

- For licensure: (PreK-8) 51 credits, (5-12) 54 credits; 4-5 terms full-time
- Non-licensure: 40 credits, 3-4 terms full-time
- Program approved by the Mass. Dept. of Elementary & Secondary Education (ESE)
- BCBA course sequence approved by the Behavior Analyst Certification Board.
- Graduates are eligible to sit for the BCBA examination.

Program Description — The Teacher of Students With Moderate Disabilities & Applied Behavior Analysis program offers a unique opportunity for educators to become licensed special educators and certified behavior analysts. The program prepares special educators and behavior analysts to be caring and competent in the classroom with the essential and critical skills to understand the use of diverse curriculum design and development and also provide all the services necessary to implement behavior plans in schools. Graduates are prepared to become highly motivated educators who are practitioners of educational innovation, and meet the regulations for licensure of Teacher of Students with Moderate Disabilities (preK-8 and 5-12). They are prepared to take the exams required by the Behavior Analyst Certification Board.

Outcomes — Graduates demonstrate the knowledge, skills and values necessary to enable their students to excel academically and socially. They understand how moderate disabilities affect progress in learning academic content of the general curriculum that their non-disabled peers learn. They understand their responsibility to provide strategies for their students to access the regular education curriculum. They are also prepared to become behavior analysts upon completion of the BACB exam.

Careers — Students who complete this program will be eligible for licensure to teach in grades Pre-K-12 as a co-teacher, a consulting teacher or a teacher of record in resource room settings. They will also be able to become certified behavior analysts with a teaching license, creating opportunities for multiple opportunities for employment in fields which are in extremely high demand.

*ESP705 is completed over two terms, with credit applied in the second term of enrollment for course completion.

(All courses 3 credits except as noted.)
Admission requirements: Bachelor’s degree or higher and other general requirements (see Admission). In addition, a master's degree in behavior analysis, education, or psychology is required for the BCBA Certificate.

Required to enter program for licensure:
- Massachusetts Educator Personnel ID (MEPID) number.
- Pass Massachusetts Communication & Literacy Test.
- 3.0 GPA at entry; maintained throughout program.

Professional work experience: Current employment in a BCBA-related setting is required for the field experiences specific to the BCBA Certificate. This includes having a BCBA certified professional supervise work during this period.

Non-licensure option: All program components are required (including pre-practicum hours) **except** for the SEI, Practicum, Practicum Seminar, and MTEL exams.

Students are responsible for:
- Monitoring and understanding the requirements established by the Behavior Analyst Certification Board and for ensuring that their program of study complies with all requirements for BCBA certification.
- Discussing options for licensure practicum with the program chair or regional site director prior to enrollment.
- Supervision and field experiences specific to national standards at the time of application to the BCBA.

In addition, graduates must pass the BCBA examination to become a Board Certified Behavior Analyst.

Program and course schedule subject to change.

Program chair: Mary Garrity, EdD • mary.garrity@cambridgecollege.edu • Teacher Education Department

(All courses @ 3 credits except as noted.)
Master of Education • Graduate Certificate

Autism Specialist

36 credits, 3 terms full-time • This program does not satisfy licensure requirements for K-12 public school teachers.

Program Description (MEd) — Teachers in general education and special education today are working with more and more students diagnosed with Autism Spectrum Disorders (ASD). This program answers the growing need for more understanding and better preparation for those working with students with severe disabilities. It is designed for experienced teachers and para-professionals, to enhance their working knowledge of the field. It also provides opportunities to explore new opportunities this knowledge would provide. **This is not a licensure program and does not lead to BACB certification.**

Learning Outcomes — Graduates will demonstrate knowledge and understanding of autism, behavioral issues and severe special needs.

Careers — This program will enhance the skills and understanding of:
- Experienced special educators, wanting more information to better serve the needs of this growing population.
- General educators who wish to work more effectively in their inclusion classes.
- Para-professionals currently working with students with severe disabilities, to gain a better understanding of the autistic needs and behavioral issues of the students they serve.
- Anyone wanting to know more about this growing field.

Autism Specialist Certificate .................. 18 credits

Program Description — The Autism Specialist Certificate provides an opportunity for teachers, administrators and parents to gain understanding and professional expertise to better support the growing numbers of K-12 school students with autism spectrum disorders. This course work supplements training/licensure for those employed in substantially separate classrooms. It is also very helpful for para-professionals working in special education classrooms.

Note: If a student later enrolls in the Autism Specialist M.Ed., these courses may be accepted into the degree.

Course schedule for Cambridge, subject to change.
Master of Education

Educational Leadership

For licensure 39 credits, 4 terms full-time  •  Non-licensure 32 credits, 4 terms full-time  •  Program approved by the Mass. Dept. of Elementary & Secondary Education (ESE) for  •  Superintendent/Assistant Superintendent (all levels)  •  Principal/Assistant Principal (levels PreK-6, 5-8, 9-12)  •  Supervisor/Director (at level of prerequisite license)

Program Description — The MEd in Educational Leadership (school administration) reflects current standards established by the Educational Leadership Constituent Council (ELCC) and the Massachusetts Department of Elementary and Secondary Education (DESE). The program prepares aspiring and experienced leaders for schools and districts in P-12 settings who have demonstrable skills in instructional leadership, management and operations, family and community engagement, and fostering of a professional culture. The ultimate goal is to create competent, caring and qualified educators, based on the principles of the Teacher Education Accreditation Council. Certification components are aligned exclusively for licensure in the Commonwealth of Massachusetts.

Outcomes — Graduates: (a) demonstrate a realistic understanding of the expectations and responsibilities of site-based administrators, (b) promote the learning of all students, and (c) support the professional growth and success of staff by cultivating a shared vision that makes effective teaching and learning the central focus of education. Graduates also work effectively, safely, and efficiently to use resources to implement appropriate curriculum, staffing, and scheduling; establish partnerships with families, community organizations, and other stakeholders supportive of the mission specific to the school and district; and to nurture and sustain a culture of reflective practice, high expectations, and continuous learning for all involved.

Careers — Graduates qualifying for administrative licensure typically receive leadership and policy-related positions in P-12 public school settings. Most commonly, graduates become teacher-leaders, assistant principals, and principals or pursue management positions in organizations and agencies specific to education. Similarly, graduates with the MEd non-licensure typically pursue leadership positions in private and charter schools; workforce development, training, or policy. Some later return to complete certification requirements in the CAGS program in order to pursue positions in public schools and districts.

Note that administrative license is required for employment half-time or more as a director, department head, or curriculum specialist.

MEd—Licensure

Program Entry

Evidence of successful completion of the MA Communications and Literacy (MTEL) test and GPA requirement are required for program entry. If the MTEL is not available, students seeking certification in School Administration must first matriculate into the non-licensure pathway, then complete a Change-of-Academic Program signed by the Chair, Educational Leadership and Dean, School of Education once this requirement is met.

Practicum Prerequisites

• Declaration of an area of certification filed with the program chair.
• Successful completion of all courses with a grade of “B” or better.
• SEI705 Sheltered English Immersion for Administrators or successful completion of the SEI RETELL or SEI MTEL.
• Documented completion of all Pre-Practicum hours embedded in courses appropriate to the area of certification.

Practicum

Once all prerequisites are successfully completed, candidates for licensure in one of the certification areas for the MEd in Educational Leadership must complete a Practicum Placement Form and be approved for a placement by the Chair, Educational Leadership. Guided and evaluated by a licensed/certified and practicing school administrator and a Cambridge College supervisor, completion of the practicum includes documented evidence of application, synthesis, and evaluation of all performance standards specific to one area of certification:

- EAD790A  Sup't/Asst Sup't (all levels)
- EAD790B  Princ/Asst Princ (PreK-6)
- EAD790C  Princ/Asst Princ (5-8)
- EAD790D  Princ/Asst Princ (9-12)
- EAD790E  Superv/Dir (at level of prerequisite license)

Program Completion

To exit the program, candidates are required to have met all requirements for program entry, practicum pre-requisites, and the practicum, including the required Independent Learning Project (ILP).

Specifically, a total of 500 hours of field experiences, including the Pre-Practicum and Practicum, is required for all levels listed for Superintendent/Assistant Superintendent and Principal/Assistant Principal. For certification as a Supervisor/Principal, a total of 300 hours is required.

Additionally, candidates for Principal/Assistant Principal are required to have successfully completed the Massachusetts Performance Assessment for Leaders (PAL). All candidates submit an electronic portfolio by uploading all documents specific to key assignments and evidence of certification in TaskStream.

MEd—Non-Licensure

If licensure is not desired, candidates sign a waiver stating that they understand they will not be eligible for licensure upon degree completion. All program components are required except for the MTEL, SEI, Practicum, and, specific to principals/assistant principals, the MA-PAL.

Admission requirements:

• Bachelor’s degree and other general requirements (see Admission).
• Three full years of specific employment.

Required to enter program for licensure:

• Massachusetts Educator Personnel ID (MEPID) number.
• Pass Massachusetts Communication & Literacy Test.
• 3.0 GPA at entry; maintained throughout program.

Program and course schedule subject to change.

** Required for Superintendent/Assistant Superintendent. For certification as Principal/Assistant Principal or Supervisor/Director, the course may be taken either as elective or an appropriate substitution can be made with another graduate-level course approved by the program chair.

(All courses @ 3 credits except as noted.)
CAGS in Educational Leadership

Certification of Advanced Graduate Studies

For licensure 38* credits, 4 terms full-time  ●  Non-licensure 36 credits, 4 terms full-time  ●  Program approved by the Mass. Dept. of Elementary & Secondary Education (ESE) for  ●  Superintendent/Assistant Superintendent (all levels)  ●  Principal/Assistant Principal (levels PreK-6, 5-8, 9-12)  ●  Supervisor/Director (at level of prerequisite license)

Program Description — The Certificate of Advanced Graduate Studies (CAGS) program in Educational Leadership is a post-master’s option designed for educators to advance their knowledge and skills specific to leadership in P-12 schools and districts. The focus is to advance teaching and learning through school transformation in one of three concentrations: (1) school administration, (2) curriculum, or (3) special education. The program is based on standards upheld by the Educational Leadership Constituent Council and follows the Massachusetts Department of Elementary and Secondary Education’s (ESE) Professional Standards for Administrators. Emphasized is the role power and politics play in schools and districts along with research skills and data analysis required to support and advance caring, competent, and qualified teachers and school leaders.

Outcomes — Graduates: (a) demonstrate a knowledge of and sensitivity to school and system organization; (b) understand that improving teaching and learning is an intricate process that requires a willingness to change, an educational vision, and persuasive communication; (c) pursue action research and data collection to inform decision making and create meaningful professional development for faculty; and (d) explore technology, inclusive strategies for reaching a diverse student body, and develop skills in teaching students with special needs and those for whom English is a second language. As a result, graduates perceive their educational setting as part of a larger system and are able to identify workable solutions for positive change supportive of teaching and learning.

Careers — Graduates enter into the full range of school leadership positions in public, private, and charter schools and in corporate and community education. Positions held include teacher-leaders, department chairs, assistant principal, and principal. In addition, graduates hold offices at the district level as coordinators, directors, assistant superintendents and superintendents.

An administrator license is required for employment half-time or more as director, department head, or curriculum specialist.

All students who enter CAGS must select a concentration and submit a signed Declaration of Intent by the end of their first term of enrollment. All students must consult the program chair and have their approval prior to submitting the Declaration of Intent.

Requirements for CAGS—Non-Licensure

All CAGS components are required except for those specific to licensure (e.g., the Massachusetts Communications and Literacy MTEL, SEI, and/or MA-PAL).

Requirements for CAGS—Licensure

● Minimum GPA of 3.0 (must be maintained throughout the program.)
● Massachusetts Educator Personnel ID (MEPID) number.
● Evidence of Successful Completion of the Massachusetts Communications and Literacy (MTEL).
● Declaration of Intent specifying the concentration and, if applicable, the type and level of licensure sought.

Program Completion Requirements — For program exit:

● All CAGS requirements for licensure must be met, including those outlined for program entry, all CAGS courses, and field experiences (e.g., pre-practicum and practicum).
● Shelters English Immersion or successful completion of the SEI RETELL or SEI MTEL offered through the ESE.
● A total of 500 hours of field experiences, including the Pre-Practicum and Practicum, in the role and level of certification sought for all levels of licensure for the Superintendent/Assistant Superintendent and Principal/Assistant Principal. A total of 300 hours is required for Supervisor/Director.
● Massachusetts Performance Assessment for Leaders (PAL) — required of candidates seeking certification as a principal or assistant principal.
● Exit Performance Portfolio via TaskStream

Admission requirements:

● Master’s degree in education or a closely related field with minimum cumulative GPA of 3.0 for all graduate work attempted, and a bachelor’s degree.
● Three full years of specific employment.
● And all other Educational Leadership/CAGS requirements. (See Admissions).

Required to enter program for licensure:

● Massachusetts Educator Personnel ID (MEPID) number.
● Pass Massachusetts Communication & Literacy Test.
● 3.0 GPA at entry; maintained throughout program.

*Not including EAD720 required for Superintendent/Assistant Superintendent certification.

Program and course schedule subject to change.

Program chair: Charles Grandson, EdD  ●  charles.grandson@cambridgecollege.edu  ●  Educational Leadership, Advanced Studies, and Strategic Initiatives Department

## Doctor of Education (EdD)

### Summer 1  4-week cohort residency
- **EDL830** Educational Leadership & Social Justice ........... 3
- **EDL850** Contexts for Qualitative & Quantitative Research Methodologies ........................................... 3
- **EDL900** Introduction to Doctoral Studies ...................... 1
- **EDL910** Doctoral Research Seminar I: Strategies & Tactics. ........ 3

### YEAR 1  Fall
- **EDL920** Doctoral Research Seminar II: Research in the Public Interest .............................................. 1
- **EDL810** Transformative Educational Leadership ............. 3
- **EDL860** Qualitative Research Methods & Design ............ 3

Doctoral elective possible.

### YEAR 1  Spring
- **EDL930** Doctoral Research Seminar III: Reflective Inquiry as Stance .................................................. 1
- **ED 870** Quantitative Research Methods and Design ........ 3
- **EDL892** Systems Approaches to Educational Leadership .... 3

### Summer 2  5-week cohort residency
- **EDL940** Prospectus Development for Doctoral Candidacy .... 3
- **EDL840** Social & Cultural Foundations of Educational Leadership . 3
- **EDL880** Advanced Qualitative Research  
  or **EDL890** Advanced Quantitative Research .................. 3

### YEAR 2  Fall
- **EDL895** Ethical Leadership in Education Systems ............ 3
- **EDL950** Dissertation Proposal Seminar I—Fall (asynchronous and in-person). .......................... 2

Two doctoral electives possible.

### YEAR 2  Spring
- **EDL820** Collective Bargaining & Conflict Resolution ........ 3
- **EDL960** Dissertation Proposal Seminar II—Spring (asynchronous and in-person) .......................... 2

Two doctoral electives possible.

### YEAR 3  Fall and Spring  Dissertation Completion & Defense
- **EDL790** Dissertation Research & Writing ...................... 3 or 4
- **EDL980** Dissertation Completion & Defense ..................... 3 or 4

Doctoral elective possible.

### Doctoral Electives
Selected courses offered as needed for cohort interests.
- **ECL803** Advanced Technologies in Education Systems .... 3
- **EDL805** Educational Evaluation & Assessment Systems .... 3
- **EDL815** Instructional & Curricular Leadership .............. 3
- **EDL825** Leading Learning Organizations & Adult Learners .... 3
- **EDL891** History: Education Policy & Reform .................. 3
- **EDL893** School Finance & Fiscal Management ......... 3
- **EDL894** Policy, Power, & Politics Seminar ............ 3
- **EDL896** Special Topics ........................................ 1-4

Applications are not currently being accepted.
The INTERDISCIPLINARY STUDIES program enables students to develop their own program in consultation with a faculty advisor to augment their knowledge and professional skills and, in some instances, prepare for a career transition. Students select courses from among the College’s offerings in any or all disciplines. They are expected to articulate a rationale for each course selected. (Note: the program cannot prepare students for licensure.)

Assessment — Students meet with their faculty advisor to assess their progress in meeting their program goals as part of a formative evaluation process.

Independent Learning Project — Students will research and write about a topic that supports their post-graduate endeavors and/or personal growth.

Learning Outcomes — Students who complete the degree requirements for Interdisciplinary Studies will be able to:

- Integrate information and knowledge from interdisciplinary perspectives.
- Demonstrate advanced cultural competence.
- Improve higher order cognitive skills, capacity for independent thinking, and autonomous action.
- Employ meta-cognition in the classroom, the work place, and life circumstances.
- Demonstrate advanced critical thinking skills by making profound connections between and among seeming dissimilarities as required for effective analyses and performances in social, professional, and cultural contexts.
- Appreciate and enjoy questions, ambiguity, and paradox.
- Interrogate world views and become cognizant of ethical dimensions of human systems, institutions, issues, and dilemmas.

Careers — Our graduates pursue a wide variety of jobs that involve a significant element of educating. They are tutors and teachers; personal, academic, and athletic coaches; actors; family advocates and mediators; clergy; college faculty and administrators; and more. They work in schools and colleges, nonprofit organizations and human services, the criminal justice system; religious organizations, community planning and development, and corporations.

Admission requirements: Bachelor's degree and other general requirements (see Admission).

Changing program: If entering Interdisciplinary Studies from another Cambridge College graduate program, students must consult with the program chair to plan their program. The following (at minimum) must be taken within Interdisciplinary Studies:

- Final Professional Seminar: EED692 or 693
- Independent Learning Project: EED800
- One 3-credit course in EED, EDU, or ENG.

Professional Seminar & Project ................. 9 credits
EED691-693 Professional Seminar (3 terms @ 2 credits)
EED800 Independent Learning Project
(take with Seminar II or III, no exceptions)

Theory & Practice ............................... 2 credits
EED590-591 Theory & Practice of Education — Fall and Spring only
(2 terms @ 1 credit)

Preparing for Success ......................... 3 credits
EED604 Graduate Level Writing for Social Science Research:
Writing your ILP

Foundation Courses ......................... choose 6 or more credits
EED564 Motivation & Teaching: Theories & Practices
EED610 Strategies for Teaching Critical Thinking Across the Curriculum
EED647 Human Brain, Human Learning
EED705 Multicultural Diversity Issues in Workplace & Classroom

Elective Courses .......................... choose up to 12 credits
With approval of their seminar leader, appropriate dean, appropriate program chair, and the IS program chair, students may take no more than:

- Four 3-credit courses in any program outside of the School of Education.
- Two 3-credit Independent Studies courses.
- Two 1-credit courses.

With approval of their seminar leader, appropriate program chair, and the IS program chair, students may take courses in other School of Education programs.

If 12 external transfer credits are accepted:

- Professional Seminar is reduced to two terms: EED691-692
- EED800 Independent Learning Project required
- Theory & Practice is reduced to one credit: EED590 or 591
- Four 3-credit courses required: EED, EDU, ENG courses (others by permission)
- Program may be completed in two terms.

Program NOT approved by the Mass. Dept. of Elementary & Secondary Education (ESE).

Program chair: Diane Harper, MA • Diane.Harper@cambridgecollege.edu • 617.873.0259 • Educational Leadership, Advanced Studies, and Strategic Initiatives Department

All courses 3 credits except as noted.
Master of Education

Teaching Skills & Methodologies
32 credits, 3 terms full-time ● This degree program does not satisfy licensure requirements for K-12 public school teachers.

TEACHING SKILLS & METHODOLOGIES is a program for mid-career teachers.

Outcomes — Students gain current, strategic skills and knowledge that can revitalize teachers’ classrooms.

Students effectively research, write and submit a professional, master’s project that enhances the students’ learning for post graduate endeavors;

Careers — K-12 teachers and college faculty will benefit from Teaching Skills and Methodologies. (The program does not lead to licensure.)

Admission requirements: Bachelor’s degree and other general requirements (see Admission).

12 transfer credits may be accepted: Transfer courses must meet all general and current criteria for transfer (see Transfer of Credit). Three credits must be in content courses; nine credits must be in up-to-date teaching skills and methodologies.

If nine or more transfer credits are accepted, the Professional Seminar is reduced to two terms and the Theory & Practice of Education to one credit.

Program subject to change.

Program chair: Diane Harper, MA ● Diane.Harper@cambridgecollege.edu ● 617.873.0259 ● Educational Leadership, Advanced Studies, and Strategic Initiatives Department

Professional Seminar & Project ...............9 credits
EED691-693  Professional Seminar (3 terms @ 2 credits)
EED800 Independent Learning Project (take with Seminar III)

Theory & Practice .........................2 credits
EED590-591 Theory & Practice of Education — 2 terms @ 1 credit

Skills & Methodologies .................choose 12 credits
Some of these courses are offered each term.

EED503 Teaching Children With Different Learning Styles
EED564 Motivation & Teaching: Theories & Practices
EED610 Strategies for Teaching Critical Thinking Across the Curriculum
EED615 Introduction to Integrative Learning & Learning Styles
EED628 Effective Schools
EED704 Seminar in Current Educational Issues
EED705 Multicultural Diversity in Workplace & Classroom
EED710 Strategies for Teaching Alternative Assessment Across the Curriculum
EIT712 Using Educational Technology to Improve Teaching & Learning in Math, Science & Language Arts
ELE630 Classroom Management with Models of Teaching
ESP701 Students with Disabilities & the Visual Arts

Content Electives ......................... choose 9 credits
Choose content courses in literature, English, social studies, mathematics, science, health, literacy, English as a second language.

Course offerings plan for Cambridge, subject to change without notice. Other Cambridge College locations set their own schedules but offer the same program of study.

Not applicable for licensure
Autism . . . . See Special Education.

Educational Leadership (EAD)
(School Administration)

EAD 662 Contemporary Issues and Topics in Educational Administration - 3 credits
The effective educational administrator actively pursues further study in his/her field. By so doing, the administrator strives to acquire a knowledge base which will help deal with contemporary issues that will affect students, staff, community and the organization of the school. This course, therefore, features research and in-depth discussion of topics of immediate concern to the educational administrator. The topics may include, but will not necessarily be limited to strategic planning, organizational change, effective staff development, team building, outcomes based learning, the use of data for decision making, interpersonal skills necessary for site-based management, teacher evaluation, issues of equity, and community relationships. Practicum hours of directed field-based training required.

EAD 684 Selection, Development, and Supervision of Educational Personnel - 3 credits
This course alerts students to the wide range of activities covered by the term “personnel management” and presents the best of current practices in the field. Students are prepared to select, develop and supervise teachers and other staff effectively. The school is presented as a learning organization - a place where all are supported in continuous growth and describes the administrator's role in creating that culture. Formative and summative techniques for feedback about performance are emphasized. The course also includes the topics of the legal and ethical aspects of evaluation, hiring and dismissal. The importance of the administrator's role as an instructional leader is emphasized. Practicum hours of directed field-based training required.

EAD 688 Legal Aspects of School Administration - 3 credits
This course explores the legal principles which apply to current educational practice. It specifically deals with issues of students' rights and teachers' rights which impact and influence the operation of schools and the related tension created by multiple structures. Laws/ regulations and court decisions related to free speech, equal rights, and school discipline are studied. In addition, laws and policies dealing with IDEA (special education) and No Child Left Behind are examined in depth. Practicum hours of directed field-based training required.

EAD 690 Finance and Business Administration for the School Administrator - 3 credits
This course prepares educators to understand and effectively manage the fiscal aspects of a school or school district. The work focuses on school finance as a matter of public policy and law, the different sources of school financing, and the funding mechanism at various levels of government. Proposition 2 1/2, the Massachusetts foundation budget process, financing procedures in other states, and the financing of charter, choice and voucher programs are examined. In addition, educators study school budgets, the role of the school's community in developing and establishing the budget, and different approaches to the budgeting process. Finally, educators address the issues of plant management, custodial care, building maintenance, preventive maintenance, scheduling, energy management, collective bargaining and purchasing of materials for plant management. Practicum hours of directed field-based training required.

EAD 691N Professional Seminar I: School Administration (Initial) - 2 credits
This seminar focuses on the development of leadership and human relationships within the school and community. Attention is paid to personal aspects of leadership such as style, dealing with stress, time management and the moral responsibility of school administrators. Students also discuss educational topics and issues of current interest. (This theme continues through all four terms.) Students are introduced to basic research skills such as use of on-line and professional libraries and the conventions of APA style for writing papers and the Independent Learning Project (ILP). Pre-practicum hours of directed field-based training required.

EAD 692N Professional Seminar II: School Administration (Initial) - 2 credits
Prerequisite: EAD691N. This second seminar emphasizes the development and functioning of organizations and the study of organizational behavior. Attention is paid to the leader’s role in culture and climate. Students examine the culture and climate of their own work setting within frameworks reviewed in the seminar. Students learn how to prepare and write the literature review for the ILP.

EAD 693N Professional Seminar III: School Administration (Initial) - 2 credits
Prerequisite: EAD692N. This third seminar emphasizes the study of introducing and supporting change efforts in schools. Topics include managing change, dealing with varying attitudes toward change and institutionalizing change. Supporting topics include the use of vision, goal setting, identifying priorities, allocating resources and collecting data on learning. Students learn principles of basic research design and should develop the initial draft of their ILP this term. Those students completing a practicum in this term will present it in the seminars, providing a basis for the discussion of the relationship of action research to the reality of school reform. Practicum hours of directed field-based training required.
EAD 694N Professional Seminar IV: School Administration (Initial) - 2 credits
Prerequisite: EAD693N. The final seminar emphasizes linking practice and theory. Particular attention is paid to processing the issues and questions that arise during the practicum experience. Interpersonal aspects of leadership are revisited in the context of the field experience. Students discuss issues connected with obtaining a leadership position including resumes, the interview process and contracts. The ILP is completed and presented to the members of the seminar, providing a basis for the discussion of the relationship of action research to the reality of school reform. Practicum hours of directed field-based training required.

EAD 712 Curriculum Development, Assessment & Improvement for the School Administrator - 3 credits
Pre-practicum: Fifteen hours of directed field-based training is required. Development, assessment and improvement of curriculum to engage students in the learning process and prepare them to be active contributors in the information age is a challenge for school administrators nationwide. This course familiarizes students with proven practical techniques, methods and strategies for developing, implementing and evaluating curriculum. Current theories, research and practices related to effective teaching, curriculum designs and frameworks, and national state standards are explored. Internet resources and research sites are examined to aid students in understanding the complexities of curriculum development. Students also address different learning styles, cultural awareness, ethnic minorities, equity issues, and the use of community resources while designing and evaluating curriculum. Practicum hours of directed field-based training required.

EAD 720 Advanced Systems Theory - 3 credits
It is essential that educational administrators in the central office understand systems theory and the dynamics of complex social entities such as schools and school systems. With knowledge of the system and subsystems that make up the total school organization, a school leader will be able to understand better the impact that decisions have on the entire school organization and therefore manage change more effectively. This course is required of all candidates for the license of Superintendent and Assistant Superintendent. Practicum hours of directed field-based training required.

EAD 782 Reconceptualization of Schools for School Administrators - 3 credits
Students examine the historical and metaphorical forces responsible for the shaping of our modern schools, changes in the dominant values, school culture and the culture of organizations in general. Attention is paid to changing roles and expectations of school administrators, pressures for school reforms, the role of school committees and boards and the use of data in change efforts. Emphasis is placed on considering change as a complex problem. Practicum hours of directed field-based training required.

EAD 790A Practicum (Supt/Asst Supt) (All Levels) 300 hours - 5 credits
Superintendent License, all levels, 300 hours. Prerequisites: Pre-practicum, all initial licensure courses, pass all teacher tests required for this license by Massachusetts: Communication and Literacy Test-MTEL). Professional Seminar III or IV required concurrently: EAD693 or 694.

Effective Fall 2003: 300 hours in the role and at the level of the license sought, under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The College supervisor and the cooperating practitioner plan the practicum with the student to achieve the minimum 300 hours at the practicum site. At least 95% of these hours will include direct administrative responsibility. Some of the hours may be logged during the school vacation periods when students are not present, and other administrative tasks such as scheduling, budget preparation and similar tasks are being performed. No more than 80 hours of the 300 should be logged during vacation periods. This practicum experience provides field-based training for students pursuing licensure as district superintendents/assistant superintendents. Students work with the guidance and support of an experienced school administrator and observe his/her administrative strategies in action. Students reflect on their own professional growth and examine theory through actual practice. During the practicum, the cohort group continues to meet in the Professional Seminar. This support system serves as a forum for discussion of administrative experiences, problems and solutions and provides opportunity to share ILP experiences. The student prepares an Exit Performance Portfolio to document the experiences. Evaluation is based on current standards for licensure. Practicum hours of directed field-based training required.

EAD 790B Practicum (Principal/Asst Principal) (Pre K-6) 300 hours - 5 credits
Principal License, levels PreK-6, 300 hours. Prerequisites: Pre-practicum, all initial licensure courses, pass all teacher tests required for this license by Massachusetts: Communication and Literacy Test-MTEL). Professional Seminar III or IV required concurrently: EAD693 or 694.

Effective Fall 2003: 300 hours in the role and at the level of the license sought, under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The College supervisor and the cooperating practitioner plan the practicum with the student to achieve the minimum 300 hours at the practicum site. At least 95% of these hours will include direct administrative responsibility. Some of the hours may be logged during the school vacation periods when students are not present, and other administrative tasks such as scheduling, budget preparation and similar tasks are being performed. No more than 80 hours of the 300 should be logged during vacation periods. This practicum experience provides field-based training for students pursuing licensure as principal/assistant principal(preK-6). Students work with the guidance and support of an experienced school administrator and observe his/her administrative strategies in action. Students reflect on their own professional growth and examine theory through actual practice. During the practicum, the cohort group continues to meet in the Professional Seminar. This support system serves as a forum for discussion of administrative experiences, problems and solutions and provides opportunity to share ILP experiences. The student prepares an Exit Performance Portfolio to document the experiences. Evaluation is based on current standards for licensure. Practicum hours of directed field-based training required.
EAD 790C  Practicum (Principal/Asst Principal) (5-8) 300 hours - 5 credits
Principal License, levels 5-8, 300 hours. Prerequisites: Pre-practicum, all initial licensure courses, pass all teacher tests required for this license by Massachusetts: Communication and Literacy Test-MTEL. Professional Seminar III or IV required concurrently: EAD693 or 694.

Effective Fall 2003: 300 hours in the role and at the level of the license sought, under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The College supervisor and the cooperating practitioner plan the practicum with the student to achieve the minimum 300 hours at the practicum site. At least 95% of these hours will include direct administrative responsibility. Some of the hours may be logged during the school vacation periods when students are not present, and other administrative tasks such as scheduling, budget preparation and similar tasks are being performed. No more than 80 hours of the 300 should be logged during vacation periods. This practicum experience provides field-based training for students pursuing licensure as district principal (5-8). Students work with the guidance and support of an experienced school administrator and observe his/her administrative strategies in action. Students reflect on their own professional growth and examine theory through actual practice. During the practicum, the cohort group continues to meet in the Professional Seminar. This support system serves as a forum for discussion of administrative experiences, problems and solutions and provides opportunity to share ILP experiences. The student prepares an Exit Performance Portfolio to document the experiences. Evaluation is based on current standards for licensure. Practicum hours of directed field-based training required.

EAD 790D  Practicum (Principal/Asst Principal) (9-12) 300 hours - 5 credits
Principal License, levels 9-12, 300 hours. Prerequisites: Pre-practicum, all initial licensure courses, pass all teacher tests required for this license by Massachusetts: Communication and Literacy Test-MTEL. Professional Seminar III or IV required concurrently: EAD693 or 694.

Effective Fall 2003: 300 hours in the role and at the level of the license sought, under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The College supervisor and the cooperating practitioner plan the practicum with the student to achieve the minimum 300 hours at the practicum site. At least 95% of these hours will include direct administrative responsibility. Some of the hours may be logged during the school vacation periods when students are not present, and other administrative tasks such as scheduling, budget preparation and similar tasks are being performed. No more than 80 hours of the 300 should be logged during vacation periods. This practicum experience provides field-based training for students pursuing licensure as principal (9-12). Students work with the guidance and support of an experienced school administrator and observe his/her administrative strategies in action. Students reflect on their own professional growth and examine theory through actual practice. During the practicum, the cohort group continues to meet in the Professional Seminar. This support system serves as a forum for discussion of administrative experiences, problems and solutions and provides opportunity to share ILP experiences. The student prepares an Exit Performance Portfolio to document the experiences. Evaluation is based on current standards for licensure. Practicum hours of directed field-based training required.

EAD 800  Independent Learning Project: School Administration - 3 credits
Prerequisites: EAD691-693. The Independent Learning Project (ILP) is a culminating learning experience that helps school administrators integrate their personal and formal learning and their professional experiences into a meaningful whole. It reflects the general guidelines for school administrators and articulates the individual's educational and administrative philosophy. The project is research and action based on a focused topic chosen by the student within the area and level of licensure sought. It engages students in sustained research into school administration. Parts of the project may be implemented during the practicum.
Elementary Education (ELE)

ECE 600 Development of Young Children - 3 credits
An introduction to the child, from birth to age eight, as a learner with needs to explore and communicate, as well as to develop social competence. Explanation of current themes/theories of child development is provided with special emphasis on understanding children’s developmental levels through childhood. Topics covered include: conception, heredity and prenatal development, infant development, the child in the family, toddlerhood and early childhood. Observation in a childcare center or preschool setting is a requirement of this course.

ECE 612 Developmental Reading for Early Childhood Birth to Eight - 3 credits
This course will emphasize the development of children’s reading and writing skills from pre-kindergarten to grade two and the learning environment that supports the development of such skills. The relationships between the theories and current research on emergent literacy, oral language, vocabulary development, comprehension, the reading and writing processes and assessment will be reviewed and analyzed by the members of this course. In addition, participants will review and discuss the following topics: balanced literacy, effective teaching strategies, use of research-based programs, Sheltered English Immersion, literature-based instruction, use of different assessment tools to inform instruction, standards-based instruction, the Common Core, fiction, and non-fiction genres and differentiated instruction.

ECE 691 Professional Seminar I: Early Childhood - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in early childhood education. This seminar sets the foundation for future seminars. It continues to engage students in developmentally appropriate practices that meet the needs of young students with and without disabilities as well as English Language Learners PreK to grade 2. Students will learn instructional strategies that incorporate various movements, visual, performance and language arts as part of an integrated program. The cohort studies professional standards and subject matter knowledge for early childhood teachers and the requirements for state licensure. Students integrate their learning from classes, research, and observations. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ECE 692 Professional Seminar II: Early Childhood - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in early childhood education. This seminar continues to engage students in developmentally appropriate practices that meet the needs of young students with and without disabilities as well as English Language Learners PreK to grade 2. Students will learn instructional strategies that incorporate various movements, visual, performance and language arts as part of an integrated program. The cohort studies professional standards for early childhood teachers and the requirements for state licensure. Students integrate their learning from classes, research, and observations. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ECE 693 Professional Seminar III: Early Childhood - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in early childhood education. This seminar explores ways to create a standards-based, inclusive early childhood setting. The seminar explores multicultural education, inclusive teaching, assessment strategies, management techniques and parent-community relationships. There is a continuation of planning teaching strategies for language arts, math, and science and classroom management. The cohort continues to study the professional standards, subject matter knowledge for early childhood teachers, and the requirements for state licensure. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ECE 790 Practicum: Early Childhood (preK-2) 400 hours - 3 credits
400 hours. Prerequisites: Pre-practicum 75 hours, all initial licensure courses, pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently. Students must participate in the role and at the level of the license sought, under a supervising practitioner with the appropriate license, with Cambridge College supervision. The practicum experience provides student teachers with an opportunity to gain insights into the profession, refine their teaching skills, and to master the current Professional Standards for Teachers by working with young people in public schools and classrooms. Students work with the guidance and support of an experienced educator and by observing his/her instructional and classroom management strategies, utilize contemporary teaching techniques and differentiate instruction to meet the needs of all learners in action. Students develop instructional strategies and align lesson plans with the Massachusetts Curriculum Frameworks/Common Core Standards, appropriate curriculum materials, classroom management skills, strategies for creating a learning environment that fosters an appreciation of diversity and interactive learning. Students reflect on their own professional growth and examine theory through actual classroom practice. An Exit Performance Portfolio/ePortfolio documents their experiences.

ECE 791 Practicum Seminar: Early Childhood - 2 credits
Students must participate in the role and at the level of the license sought, under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The practicum experience provides student teachers with an opportunity to gain insights into the profession, refine their teaching skills, and to master the current Professional Standards for Teachers by working with young people in public schools and classrooms. Students work with the guidance and support of an experienced educator and by observing his/her instructional and classroom management strategies, utilize contemporary teaching techniques and differentiate instruction to meet the needs of all learners in action. Students develop instructional strategies and
align lesson plans with the Massachusetts Curriculum Frameworks, appropriate curriculum materials, classroom management skills, strategies for creating a learning environment that fosters an appreciation of diversity and interactive learning. Students reflect on their own professional growth and examine theory through actual classroom practice. An Exit Performance Portfolio documents their experiences.

ECE 800 Independent Learning Project: Early Childhood - 3 credits
The Independent Learning Project is a culminating learning experience that helps educators integrate their personal and formal learning with their professional experiences into a meaningful whole. It reflects the general guidelines for early childhood educators and articulates the individual's educational and administrative philosophy. The project is research- and action-based, on a focused topic chosen by the educator, within the area of licensure. It engages educators in sustained research into educational practice and curriculum development in early childhood education.

ELE 500 Teaching Phonological and Phonemic Awareness and Phonics - 0 credit
This course is a prerequisite for ELE521. This course will emphasize the development of children's phonemic awareness, phonological awareness and phonics skills and the learning environment that supports the development of such skills. It will also cover concepts of print, explicit/implicit instruction, analytic/synthetic methods, word analysis skills, the alphabetic principle, and language development.

ELE 510 Developmental Psychology - 3 credits
This course explores basic theories and concepts in cognitive, social, emotional, and physical development from childhood to adolescence; and the characteristics and instructional implications of moderately and severely disabling conditions. These theories are then applied to instruction, with emphasis on Piaget's theory of cognitive development. Students explore multiple theories of intelligence and learning, and strategies for a curriculum reflecting the diverse intellectual needs of children as learners. The stages and characteristics of child development are introduced and students apply this knowledge to the classroom through the use of integrated curriculum. Participants investigate methods of systematic observations and recording of child behavior in light of childhood development theories, and utilize this information in their planning and implementation of instruction. Pre-practicum hours of directed field-based training required.

ELE 521 Development of Reading & Writing Skills for the Early Childhood & Elementary Curr. - 3 credits
Prerequisite: ELE500. This course will emphasize the development of children's reading and writing skills in the primary to upper elementary grades and the learning environment that supports the development of such skills. The relationships between the theories and current research on emergent literacy, oral language, vocabulary development, comprehension, the reading and writing process and assessment will be reviewed and analyzed by the members of this course. In addition, participants will review and discuss the following topics: whole language, balanced literacy, effective teaching strategies, use of research-based programs, literature-based instruction, use of different assessment tools to inform instruction, standard-based instruction, federal funding, culture and democracy. Pre-practicum hours of directed field-based training required.

ELE 593 Integration of Visual Arts for the Early Childhood & Elementary Curr. - 1 credit
The Arts enable teachers to better engage their students while also addressing student's different learning styles and allowing student creativity to flourish. This course will give participants an introduction to using the visual arts as a vehicle for learning in the classroom. Teachers will learn ways to use the arts and art materials as a pathway toward gaining knowledge and using higher order thinking skills. Presentation of material will be part reading, part lecture and part hands on participation and exploration. Students will leave the course with a deeper understanding of art materials, art language and how to use visual arts in the early childhood and elementary classroom that includes special needs and ESL students.

ELE 594 Integrating Physical Ed. in Early Childhood & Elementary Education - 1 credit
This course reflects current thinking and practices in physical education for the classroom teacher. Emphasis is on the importance of quality physical education programs and to raise awareness of teachers combining their expertise and content to integrate with other disciplines.

ELE 595 Integration of Children's Lit. in Early Childhood & Elementary Curr. - 3 credits
This course introduces some of the best literature—children's, young adult, adult and contemporary—and helps children become lifelong learners and readers. Students gain knowledge of the Massachusetts English Language Arts Curriculum Frameworks/Common Core Standards. Many genres of literature are explored, along with basic literacy elements and techniques including the necessary basics of the English language with emphasis on correct grammar, usage and composition. Lesson plans and models for teaching literature are presented. Pre-practicum hours of directed field-based training required.

ELE 620 Classroom Management with Models of Teaching - 3 credits
Participants learn strategies and techniques for managing students in the classroom. Students observe, analyze, and discuss a variety of teaching models including information processing, group investigation, social inquiry, inductive models, non-directive teaching models and problem-solving. Emphasis is on interpersonal relations, arrangement of space, management of time, working with individual students, small group and large group structures and working with content and process. The Massachusetts Frameworks and teacher licensure competencies are taught to fully support teacher/student learning and instruction techniques. An historical approach to elementary education in America is researched in the course. One to two hundred years of teaching/learning techniques, legislation, and philosophies are discussed and paralleled with contemporary educational issues and guidelines for student learning. Pre-practicum hours of directed field-based training required.

ELE 653 Teaching Science & Technology in Early Childhood & Elementary Curr. - 3 credits
This course provides the knowledge, tools and methods for making early childhood and elementary science an exciting, hands-on learning experience for children. Educators learn how to develop lessons that address student experimentation and design techniques using readily available materials. Safe laboratory practices for the
classroom are also addressed. A standards-based approach to science education is our template for lesson development, covering the major domains in science: life, physical, earth, inquiry-applied and engineering technology, and historical scientific discoveries in each area. Alignment of curriculum is emphasized; national benchmark standards in elementary science are also supported. Analysis of elementary summative science assessments, based on the National Science Standards is incorporated in the coursework. Pre-practicum hours of directed field-based training required.

This course prepares educators to teach social studies that includes the multicultural contributions of the world. They gain skills and varied methods for teaching basic information in social studies, history and geography. They gain a basis for researching issues in social studies and history that give their students more universal perspectives. The materials chosen are appropriate to the Massachusetts Curriculum frameworks/Common Core Standards in history and social studies. Educators will gain the basic information and know the principles for teaching social sciences, history and geography as outlined in the Massachusetts regulations for educator licensure. Pre-practicum hours of directed field-based training required.

ELE 691 Professional Seminar I: Elementary Education (Initial) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in elementary education. This seminar introduces the student to a variety of perspectives including historical, socio-cultural and development. Students investigate topics that include learning theories, diversity, teaching models and approaches. A focus for this seminar is the professional teaching standards, subject matter knowledge requirements for state licensure relating to elementary students (1-6). Students integrate their learning from classes and observations and become reflective practitioners. The seminar leader is the students' academic advisor and guides them through their graduate program and supports students' work on their independent learning projects. Pre-practicum hours of directed field-based training required.

ELE 691N Professional Seminar I: Elementary Education (Initial) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in elementary education. This seminar introduces the student to a variety of perspectives including historical, socio-cultural and development. Students investigate topics that include learning theories, diversity, teaching models and approaches. A focus for this seminar is the professional teaching standards, subject matter knowledge requirements for state licensure relating to elementary students (1-6). Students integrate their learning from classes and observations and become reflective practitioners. The seminar leader is the students' academic advisor and guides them through their graduate program and supports students' work on their independent learning projects. Pre-practicum hours of directed field-based training required.

ELE 691P Professional Seminar I: Elementary Education (Prof.) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in elementary education. This seminar leader is the students' academic advisor and guides them through their graduate program. The cohort studies professional standards for elementary teachers, and the requirements for state licensure. They also look at related questions such as what it means to be an educator today, and how educators can work in the organizational culture of schools and contribute to social progress. Students integrate their learning from classes, workshops, and experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students' work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ELE 692 Professional Seminar II: Elementary Education (Initial) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in elementary education. This seminar builds upon the first seminar. It continues to engage students in developmentally appropriate practices that meet the needs of students with and without disabilities as well as English Language Learners PreK to grade 2. Students will learn instructional strategies that incorporate technology and various academic areas as part of an integrated program. The cohort studies professional standards for elementary teachers and the requirements for state licensure. Students integrate their learning from classes, research, and observations. The seminar also supports students' work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ELE 692N Professional Seminar II: Elementary Education (Initial) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in elementary education. This seminar builds upon the first seminar. It continues to engage students in developmentally appropriate practices that meet the needs of students with and without disabilities as well as English Language Learners PreK to grade 2. Students will learn instructional strategies that incorporate technology and various academic areas as part of an integrated program. The cohort studies professional standards for elementary teachers and the requirements for state licensure. Students integrate their learning from classes, research, and observations. The seminar also supports students' work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ELE 692P Professional Seminar II: Elementary Education (Prof.) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group
of students with a faculty leader licensed in elementary education. This seminar leader is the students’ academic advisor and guides them through their graduate program. The cohort studies professional standards for elementary teachers, and the requirements for state licensure. They also look at related questions such as what it means to be an educator today, and how educators can work in the organizational culture of schools and contribute to social progress. Students integrate their learning from classes, workshops, and experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ELE 693 Professional Seminar III: Elementary Education (Initial) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in elementary education. This seminar explores ways to create a standards-based curriculum, education evaluation in an inclusive classroom setting. The seminar explores multicultural education, inclusive teaching, assessment strategies, management techniques and parent-community relationships. There is a continuation of planning teaching strategies for language arts, working with math manipulatives, and effective classroom instruction. The seminar leader is the students’ academic advisor and guides them through their graduate program. The cohort continues to study the professional standards and subject matter knowledge for elementary teachers and the requirements for state licensure. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished project.

ELE 693N Professional Seminar III: Elementary Education (Initial) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in elementary education. This seminar explores ways to create a standards-based curriculum, education evaluation in an inclusive classroom setting. The seminar explores multicultural education, inclusive teaching, assessment strategies, management techniques and parent-community relationships. There is a continuation of planning teaching strategies for language arts, working with math manipulatives, and effective classroom instruction. The seminar leader is the students’ academic advisor and guides them through their graduate program. The cohort continues to study the professional standards and subject matter knowledge for elementary teachers and the requirements for state licensure. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished project.

ELE 693P Professional Seminar III: Elementary Education (Professional) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. This program is designed for students who have completed 3 years of work in a public school. They have completed the mandated one year induction program and an additional year of mentorship by a licensed teacher. The course is designed to focus on the latest research in teaching methodologies, updated curriculum materials, current issues in educational practice and policy, special topics. The program enhances the teachers’ knowledge of pedagogy, content, and critical inquiry skills that lead to greater pupil achievement. The seminar promotes and supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing to completion. The seminar leader approves the finished projects.

ELE 790 Practicum: Elementary Education (1-6) 400 hours - 3 credits
400 hours. Prerequisites: Pre-practicum 75 hours, all initial licensure courses, Pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: Students must participate in the role and at the level of the license sought, under a supervising practitioner with the appropriate license, with Cambridge College supervision. The Practicum experience provides student teachers with an opportunity to gain insights into the profession, refine their teaching skills, and to master the current Professional Standards for Teachers by working with young people in public schools and classrooms. Students work with the guidance and support of an experienced educator and by observing his/her instructional and classroom management strategies, utilize contemporary teaching techniques and differentiate instruction to meet the needs of all learners in action. Students develop instructional strategies and align lesson plans with the Massachusetts Curriculum Frameworks/Common Core Standards, appropriate curriculum materials, classroom management skills, strategies for creating a learning environment that fosters an appreciation of diversity and interactive learning. Students reflect on their own professional growth and examine theory through actual classroom practice. An Exit Performance Portfolio/ePortfolio documents their experiences.

ELE 791 Practicum Seminar: Elementary Education - 2 credits
Practicum required concurrently: ELE790. Exit Performance Portfolio required for credit. The seminar for classroom experience supports students’ growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks and become familiar with the current reforms, changes in state regulations on educator licensure, and teachers’ Code of Ethics. Students present an Exit Portfolio as part of their evidence of the preservice preparation experience.

ELE 800 Independent Learning Project: Elementary Education - 3 credits
The Independent Learning Project is a culminating learning experience that helps educators integrate their personal and formal learning and their professional experiences into a meaningful whole. It reflects the general guidelines for elementary educators and articulates the individual’s educational and administrative philosophy. The project is research- and action-based, on a focused topic chosen by the educator, within the area of licensure. It engages educators in sustained
research into educational practice and curriculum development in elementary education.

**English as a Second Language (ESL)**

**ESL 601 Academic Access for English Language Learners - 1 credit**
This course will be part of a four-course series to prepare elementary teachers to teach mathematics and science so that all their students can meet (or exceed) grade level academic standards. The course will focus on key topics regarding how English Language Learners (ELLs) learn academic concepts while they are developing language proficiency. Participants will become aware of common characteristics of ELLs, ways in which they vary, and how this affects teaching and learning. They will understand how ELLs learn a first and second language. The class will explore ways to use students’ background knowledge to help them learn new concepts and academic vocabulary. They will discuss classroom organization and instructional strategies that can help ELLs learn math and science, and how to address issues that pose a challenge. Participants will learn to differentiate assessment to enable ELLs to demonstrate science and math knowledge at all levels of English proficiency. Finally, participants will consider ways for teachers to interpret ACCESS Test results and WIDA English Language Development Standards in planning instruction that addresses the needs of ELLs.

**ESL 610 Linguistics and Language Variations - 3 credits**
This course introduces the study of language as it applies to the professional preparation of teachers. Participants will examine the different analytical levels of language and consider their role in the development of linguistic and academic proficiency in English of language-minority students from grades preK-12. The will explore how various factors (regional, socioeconomic and developmental factors) play a role in language variation and bilingualism or multilingualism. In addition, participants will demonstrate their understanding of the structure of language (phonology, morphology, semantics, syntax, and discourse analysis). Participants will also apply linguistics concepts to assess second language learners’ proficiency levels to guide how to differentiate their instruction for ELLs of varying proficiency levels.

**ESL 615 Methods and Materials for English as a Second Language - 3 credits**
This introductory course provides an overview of second language instruction methods, including major trends in twentieth-century language teaching; alternative approaches and methods; and communicative approaches to teaching. Much of the focus will be on how to teach the language domains of listening, speaking, reading, writing, and the form-focused instruction (grammar) with the beginning and early intermediate learners in mind. Pre-practicum hours of directed field-based training required.

**ESL 620 Teaching Reading and Writing to ESL Students - 3 credits**
This course will provide a comprehensive analysis of reading and writing theory with practical classroom applications for ESL learners preK-12. This will enable students to provide a balanced, comprehensive program of instruction with explicit and meaningfully applied instruction in reading, writing, and related language skills and strategies for ESL learners. A balanced approach to reading and writing includes explicit instruction in basic reading skills and comprehension strategies. The course will explore theory and practice through discussion, demonstration, and other strategies. In addition, participants will better understand how cultural and linguistic differences affect literacy development and how to implement literacy instruction that motivates students. Pre-practicum hours of directed field-based training required.

**ESL 625 Technology for Linguistically Diverse Classrooms - 3 credits**
Due to the rapidly changing demographics in our classrooms, teachers face the challenge of working with culturally diverse and multi-level populations at grade levels preK-12. Technology, both low-tech and high-tech, can facilitate the adaptation and differentiation of the core curriculum to assure that English language learners (ELLs), including those with disabilities, gain access to the content material. This course reviews a range of technological techniques that can be integrated into the mainstream, bilingual, SEI (sheltered English instruction) or ESL classroom that will help scaffold and accelerate the ELLs’ learning. Participants will have an opportunity to experiment with these techniques, analyze the use of such techniques, and draw conclusions about the best practices made available by the various technologies. They will also explore the teaching/learning theories that informed the development and use of these technologies in the classroom. The use of various technologies for sheltered instruction will be considered within the framework of general best practices, based on the concepts of UDL (universal design for learning).

**ESL 630 Equitable Assessment for ESL Learners - 3 credits**
Assessment of English Language Learners (ELLs) is affected by federal/state regulations, including state-wide adoption of the WIDA ACCESS Test for ELLs. Course participants will understand laws and issues pertinent to the education of ELLs, and use of tests, performance tasks and self-assessments for identification, placement, and reclassification of ELLs. They will learn to interpret ACCESS results, consider the effects of socio-cultural, psychological, political, and individual learning variables, and apply these to design differentiated assessment measures that enable ELLs to use academic language in demonstrating content knowledge and English proficiency. Participants will have the opportunity to observe and interact with ESL students in field-based classroom situations.

**ESL 631 Second Language Acquisition and Culture - 3 credits**
This course provides an overview of the study of language as it applies to second language acquisition and second language learning. It enables participants to understand the principles of language acquisition and language learning to facilitate the learning of English for students with various language skills and cultural backgrounds in content classrooms. The course will focus on different analytical levels of language and their impact on cognitive academic language proficiency from preK through grade 12. This course will explore educational theory of language development and address how to best work with students from various language skills. Participants will discuss how culture influences our attitudes and approaches to education. Issues of language and culture will be covered as they...
relate to the academic development of second language learners in a sheltered instruction classroom. Participants will also have an opportunity to put into practice their personal awareness of social, political, and cultural constraints on teaching ELLs. Culturally relevant pedagogy for the academic development of English language learners will be strongly emphasized. Pre-practicum hours of directed field-based training required.

**ESL 635**  Sheltered Instruction and Assessment - 3 credits

This course is designed for teachers and administrators experiencing the challenge of meeting the academic needs of multilevel, diverse classrooms PreK-12 that require sheltered instruction techniques and state mandated assessment instruments for English language learners (ELLs). This course will provide participants with multiple opportunities to learn and apply sheltering content instruction strategies to enable ELLs to meet grade level academic standards by utilizing the Sheltered Instruction Observation Protocol (SIOP) as demonstrated in national research on best practices for effective instruction. Pre-practicum hours of directed field-based training required.

**ESL 640**  Identification and Instruction of ESL Learners with Disabilities - 3 credits

This course will provide a framework for developing a comprehensive system for the assessment and instruction of ESL learners preK-12 with disabilities and/or limited or interrupted formal schooling. Participants will gain an understanding of the second language acquisition process, literacy development in the second language, culture, alternative assessment measures, and appropriate instructional methodology for ESL learners with disabilities and/or ESL learners with limited or interrupted formal schooling. They will identify key issues in the assessment and instruction of ESL learners with disabilities and/or limited or interrupted formal schooling, including under-representation and over-representation in special education, appropriate assessment measures, and legal responsibilities. Participants will have the opportunity to discuss the use of alternative assessment measures for distinguishing between disability, literacy development, and developmental process of second language learning. They will also develop appropriate second language instruction for ELLs with disabilities and/or limited formal schooling.

**ESL 650**  Teaching Content to ESL Learners - 3 credits

This course provides educators working with second language learners a theoretical and practical framework for integrating academic language development into content area instruction in grades preK-12. Students will be presented with an overview of instructional concepts and approaches that recognize the role that language plays as the major medium of instruction and learning including language across the curriculum, CALLA (cognitive academic language learning approach), process writing, cooperative learning and cognitive instruction. Participants will have guided practice in using and applying effective teaching strategies that support the linguistic and academic development of ESL learners within the context of the content area classroom. They will learn how to plan and deliver instruction to help ESL learners understand academic content, develop academic language, increase higher order thinking skills, and strategically apply learning strategies.

**ESL 691N**  Professional Seminar I: English as a Second Language (Initial) - 2 credits

The professional seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader experienced in teaching English language learners (ELLs). The seminar is a forum for discussion of professional issues in education of ELLs. Students integrate and reflect on their learning from classes, workshops, and experience. The seminar also supports students’ work on their independent learning projects, from identifying topics relevant to their course of study, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

**ESL 692N**  Professional Seminar II: English as a Second Language (Initial) - 2 credits

The Professional Seminar is a signature element of the adult learning model, grounding learning in a cohort group of students with a faculty leader experienced in teaching English language learners (ELLs). The seminar is a forum for discussion of professional issues in education of ELLs. Students integrate and reflect on their learning from classes, workshops, and experience. The seminar also supports students’ work on their independent learning projects, from identifying topics relevant to teaching ESL, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

**ESL 693N**  Professional Seminar III: English as a Second Language (Initial) - 2 credits

The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader who has experience in the field of English as a Second Language. This seminar leader is the students’ academic advisor and guides them through their graduate program. The cohort studies professional standards for ESL teachers, and the requirements for state licensure — PreK-6 and 5-12. Participants integrate their learning from courses, workshops, and experience. The seminar also supports students’ work on their independent learning projects from identifying topics relevant to teaching ESL, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

**ESL 790A**  Practicum: ESL (PreK-6) 300 hours - 3 credits

Prerequisites: Pre-practicum, all initial licensure courses, Pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: ESL791. ESL790A (levels PreK-6) — 300 hours Exit Performance Portfolio required for credit.

The Practicum experience is in the role and at the level of the license sought, under a cooperating ESL teacher, with Cambridge College supervision. The Practicum experience provides student teachers opportunities to gain insights into the profession and to master the current Professional Standards for Teachers by working with English Language Learners in public schools and classrooms. Students work with the guidance and support of an experienced educator and by
observing his/her instructional and classroom management strategies in action. Students develop instructional strategies for a variety of learning formats, appropriate curriculum materials, classroom management skills, strategies for creating a learning environment that fosters an appreciation of diversity and interactive learning. Students reflect on their own professional growth and examine theory through actual classroom practice. An Exit Performance Portfolio documents their experiences.

ESL 790B Practicum: ESL (5-12) 300 hours - 3 credits
Prerequisites: Pre-practicum, all initial licensure courses, Pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: ESL791. ESL790A (levels 5-12) — 300 hours Exit Performance Portfolio required for credit. The Practicum experience is in the role and at the level of the license sought, under a cooperating ESL teacher, with Cambridge College supervision. The Practicum experience provides student teachers opportunities to gain insights into the profession and to master the current Professional Standards for Teachers by working with English Language Learners in public schools and classrooms. Students work with the guidance and support of an experienced educator and by observing his/her instructional and classroom management strategies in action. Students develop instructional strategies for a variety of learning formats, appropriate curriculum materials, classroom management skills, strategies for creating a learning environment that fosters an appreciation of diversity and interactive learning. Students reflect on their own professional growth and examine theory through actual classroom practice. An Exit Performance Portfolio documents their experiences.

ESL 791 Practicum Seminar: English as a Second Language - 2 credits
Prerequisite: Practicum required concurrently. The seminar for classroom experience supports students’ growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks and English language Proficiency Benchmarks and Outcomes, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure. Exit Performance Portfolio required for credit.

ESL 800 Independent Learning Project: English as a Second Language - 3 credits
The Independent Learning Project is a culminating learning experience that helps educators to integrate their personal and formal learning and their professional experiences into a meaningful whole. It reflects the general guidelines for ESL teachers and articulates the individual’s educational and administrative philosophy. The project is research- and action-based, on a focused topic chosen by the educator, within the area of licensure. It engages educators in sustained research into educational practice and curriculum development; parts of the project may be implemented during the practicum.

General Science

See Science (ESE, SCI)

Health/Family and Consumer Sciences (EHE, HEA)

EHE 610 Principles of Health Promotion and Disease Prevention: Public Health Issues - 3 credits
Many common, communicable, and chronic diseases may be avoided through prevention. Teacher candidates learn the knowledge and skill required to teach children how to develop and maintain healthy practices and behaviors and avoid diseases and subsequent disabilities. Working with public and community health agencies, candidates identify the personal prevention practices; children and adolescents need to protect themselves, their families, and communities from life-threatening and disabling conditions. 10 hours of pre-practicum field experience required.

EHE 620 Curriculum Implementation in the Health Classroom - 3 credits
Implementing skills-based health education in the health classroom provides teacher candidates with the knowledge and skill to design and implement skills-based health education based on state and national standards. Candidates learn to access and analyze youth risk behavior data, use backwards design, infuse performance indicators, and plan assessment and instruction, including a skills-based unit and lesson plans. This pedagogy helps students in the school and community develop and maintain healthy behaviors. 10 hours of Pre-practicum field experience is required. 10 hours of pre-practicum field experience required.

EHE 630 Growth & Dev, Human Sexuality and Family Management Skills - 3 credits
The teacher candidate learns how pre-natal development, infant and child care, parenting skills, consumer and environmental health issues affect developing adolescents and their families. The candidate learns to teach skills and age and culturally appropriate information about growth and development, the reproductive system, human sexuality, maintenance of reproductive health, knowledge of and skills to prevent sexually-transmitted diseases, early sexual experimentation, and unintended pregnancy. Diversity in sexual orientation and gender identity are also examined and discussed. 10 hours of pre-practicum field experience required.

EHE 640 Promoting Wellness: Building Positive Health Behavior - 3 credits
How do good nutrition, increased physical activity and the prevention of tobacco use affect lifetime health? In this course, teacher candidates learn how improved nutrition, levels of physical activity, and total body fitness impact learning and prevent cardiovascular and pulmonary disease in later years. The course includes identifying key nutrients, analyzing media messages, utilizing dietary and fitness guidelines and designing strategies to develop and monitor progress in achieving personal goals for lifetime health behavior. 10 hours of pre-practicum field experience required.
EHE 650  Preventing Unintentional Injury & Violence - 3 credits
Accidents are a major source of death or disability for youth. The teacher candidate learns how to teach the knowledge and skills necessary to help youth avoid injury at home, in the school, neighborhood, and larger community. The course focuses on interpersonal and institutional violence prevention. Candidates examine youth violence research, behavioral surveys, resources for students affected by violence, science-based curricula, negotiation and mediation skills, bullying, sexual harassment, domestic violence, sexual assault, homophobia and racism. 10 hours of pre-practicum field experience required.

EHE 660  Family and Interpersonal Health: Promoting Mental Health Through School-Based Intervention - 3 credits
A growing number of young people are experiencing mental and emotional problems which interfere with academic success. The teacher candidate learns to identify youth needing a school based intervention and how to refer to professional counseling, psychological and social services. The candidate investigates and assesses student assistance models and access to community mental health services as well as practicing strategies that assist youth to build resilience, communicate constructively with peers and families, manage stress, and seek help. 10 hours of pre-practicum field experience required.

EHE 670  Improving School Health Through Coordination - 3 credits
The effectiveness of comprehensive skills-based health education is increased when it is a part of a coordinated approach where school staff, administration, family and the community cooperate, collaborate and coordinate efforts to support the health of students, staff, and the school community. In this course, the teacher candidate learns how to build and implement a coordinated school health program by using data, information technology, research, and collaboration while recognizing the unique academic, cultural and language needs of students. Five hours of pre-practicum field experience required.

EHE 680  Teaching Skills for Risk Reduction and Positive Behavior Change - 3 credits
In order to reduce adolescent risk factors, the teacher candidate understands the factors that contribute to the behavior then strategizes to increase protective factors such as functional health knowledge and skill. This course trains the teacher candidate to use the state and National Health Education Standards to reduce risk and increase positive behavior change. The candidate also reviews research and practice about the development of youth leadership, social responsibility, and community service. 10 hours of pre-practicum field experience required.

EHE 691N-P  Professional Seminar I: Health/Family/Consumer Science (Initial) - 2 credits
During the first term of the professional seminar, the teacher candidate develops insight into the role of the health educator and acquires the skills needed to become a lifelong learner and health literate teacher. Course content addresses the importance of academic excellence in health education, the unique challenges and issues in school health education, professional development, and networking. The participants generate the content, class discussion, and problem-solving regarding teaching skills-based health education.

This course is aligned with portions of the Content Knowledge and other components of the National Board for Professional Teaching Standards.

EHE 692N-P  Professional Seminar II: Health/Family/Consumer Science (Initial) - 2 credits
During the second term of the professional seminar, students, through case studies and class discussions, learn to develop and implement school health policies and procedures that impact the health status of students and classroom health education programs. The case study method results in an objective view of problematic issues and suggestions for new approaches and solutions. The group continues to network, discuss and problem-solve local, state, national and global current health issues that affect school health policies.

This course is aligned with portions of the Content Knowledge and other components of the National Board for Professional Teaching Standards.

EHE 693N-P  Professional Seminar III: Health/Family/Consumer Science (Initial) - 2 credits
In the third term, instruction focuses on school, community, and public health. The candidate learns about the influence of social factors on health, the contribution of public health, the role of promoting
health education locally, in the state and in the country, service on advisory committees, and membership in professional organizations. Candidates explore strategies to encourage students to promote the health of self and others in their schools, families and communities.

**EHE 693P  Professional Seminar III in Health/Family/Consumer Science (Prof) - 2 credits**
In the third term, students focus on school, community and public health. The candidate examines the influence of social factors on health, the contribution of public health, how to advocate for health education, serve on committees, and participate in professional organizations. Candidates learn to encourage students to promote their health in a variety of settings.

This course is aligned with portions of the Content Knowledge and other components of the National Board for Professional Teaching Standards.

**EHE 701  Current Research on Interrelationship of Risk Factors - 3 credits**
This course investigates youth risk behaviors and protective factors. Students analyze societal, psychological, family, and environmental influences as well as the inter-relationship between depression, tobacco use, drug and alcohol use, violent behavior and sexual activity. Students investigate strategies that build skills and support services available in the school and community.

The course is aligned with the Content Knowledge and Differentiation in Instruction components of the National Board for Professional Teaching Standards.

**EHE 702  Quality Programming in Physical Education - 3 credits**
Opportunity to learn, meaningful content, and appropriate instruction are the three components of a quality physical education program. With these components in place, students improve mental alertness, academic achievement, and enthusiasm for learning. Students design a quality program according to the National Association for Sport and Physical Education, SHAPE America, and the U.S. Department of Health and Human Services.

The course is aligned with the Content Knowledge and Differentiation in Instruction components of the National Board for Professional Teaching Standards.

**EHE 703  New Perspectives in Teaching Human Sexuality - 3 credits**
Students investigate trends in comprehensive sexuality education. Issues addressed include: cultural and religious attitudes about teaching sexuality, gender identity, homophobia, strategies for building support for gay, lesbian, bisexual and transgender youth, and building acceptance of diverse family structures. Students learn to cope with sensitive issues and strategies for involving parents.

The course is aligned with the Content Knowledge and Differentiation in Instruction components of the National Board for Professional Teaching Standards.

**EHE 704  Best Practices in the Physical Education Program - 3 credits**
A key to successful quality physical education programming is the implementation of best practices which include standards-based assessments, curriculum, and instruction. Students use the National Standards for K-12 Physical Education and the Appropriate Instructional Practice Guidelines K-12, to identify and apply best practices.

The course is aligned with the Content Knowledge, Differentiation in Instruction, Teaching Practice and Learning Environment and Effective and Reflective Practitioner components of the National Board for Professional Teaching Standards.

**EHE 705  Promoting Wellness in a Media-Saturated Society - 3 credits**
In this course, students analyze how media influences youth decisions regarding alcohol and other drugs, injury, violence, tobacco use, nutrition, physical activity, and risky sexual behaviors and design content and skill instruction to decrease these risk factors.

The course is aligned with the Content Knowledge and Differentiation in Instruction components of the National Board for Professional Teaching Standards (NBPTS). The key assessment may serve as the foundation of a NBPTS submission.

**EHE 706  Assessment in Physical Education - 3 credits**
In well-designed standards-based assessment, students demonstrate what they know and are able to do. This course focuses on performance based assessment and assists professionals with gathering data from pre/post assessments, formative and summative assessments, and standards-based instruction to improve teaching and learning in physical education.

The course is aligned with the Content Knowledge, Differentiation in Instruction, and Effective and Reflective Practitioner components of the National Board for Professional Teaching Standards.

**EHE 707  Violence Prevention in Today’s School Environment - 3 credits**
In this course, students analyze school violence, discuss the policy and legal ramifications of school incidents, review strategies to prevent or de-escalate bullying and harassing behavior, exchange ideas about strategies that work, and develop effective approaches for their classrooms and schools.

The course is aligned with the Content Knowledge, Differentiation in Instruction, and Effective and Reflective Practitioner components of the National Board for Professional Teaching Standards.

**EHE 708  Adventure Education - 3 credits**
This course, aligned with the National Board for Professional Teaching Standards, deepens knowledge of the value of experiential learning by combining adventure education or a comparable workshop with an implementation plan. Participants and the instructor select workshops. When finished, a completion certificate is submitted. If training was completed in the past, the participant has professional development in adventure education or is working as an adventure education instructor, a confirmation letter is required.
EHE 709  Interdependence betw. the Ecological Environment & Human Health - 3 credits
Personal and society behavior affects individual, family, community, and global health through energy use, water use, waste disposal, food production and care of the natural environment. Students investigate strategies for teaching youth about conservation of the environment and effects of inattention on the future health of all people.

The course is aligned with the Content Knowledge, Differentiation in Instruction, and Effective and Reflective Practitioner components of the National Board for Professional Teaching Standards.

EHE 711  Evaluation of School Health Programs - 3 credits
The evaluation of school health programs involves a comprehensive examination of the strengths and needs of a program and a design to address each. This course presents the theory and practice of program evaluation with an emphasis on coordinated school health design, implementation, diagnosis, and action plans.

EHE 713  Assessing Health Literacy - 3 credits
To promote the health literacy of youth, students design and implement skills-based health education. Through backwards design, students access and analyze youth risk behavior data, select standards to decrease the risk then design assessment and instruction. Students learn to use formative assessment, provide effective feedback, and design summative performance assessments.

The course is aligned with portions of the Content Knowledge, Differentiation in Instruction, and Effective and Reflective Practitioner components of the National Board for Professional Teaching Standards.

EHE 714  Assessment in the Health Classroom - 3 credits
Assessment in the Health Classroom provides the knowledge and skill to use formative and summative assessment in the health classroom to enhance teaching and learning. Using assessment as a step in backwards design trains educators to target standards, then plan assessment and instruction. This strategy results in a student centered, interactive learning environment that focuses on achieving proficiency in the National Health Education Standards.

EHE 715  Moving Toward Cultural Proficiency in Health Education - 3 credits
Health educators examine the range of cultures in their classrooms and how they impact student health. Educators learn strategies and skills to create culturally relevant curricula by understanding cultural identity and examining racial, sexual, and gender identity models. Students assess cultural competency and apply theory to practice.

The course is aligned with portions of the Teaching Practice and Learning Environment component of the National Board for Professional Teaching Standards.

EHE 716  Health Education for the Language-Diverse Classroom - 3 credits
Health Education for the Language Diverse Classroom provides educators with the knowledge and skill to help all children become proficient in the state and National Health Education Standards. The language diverse classroom provides challenges for the health educator. Participants learn to use their new skills to enhance teaching and learning and meet the needs of all students.

The course is aligned with portions of the Content Knowledge and Differentiation in Instruction components of the National Board for Professional Teaching Standards.

EHE 717  21st Century Technology Skills for Health Educators - 3 credits
21st Century Technology Skills for Health Educators provides the knowledge and skill to use technology to transform the health classroom into an interactive, student centered learning environment. Educators learn to use digital tools to capture student interest, and differentiate instruction to enhance learning for all students.

The course is aligned with portions of the Content Knowledge and Differentiation in Instruction components of the National Board for Professional Teaching Standards.

EHE 800  Independent Learning Project: Health/Family/Consumer Science - 3 credits
The candidate defines a problem in health education, establishes a problem statement, and researches a solution. In this marriage of theory and practice, the candidate demonstrates the ability to apply learning to professional work in the field. The professional seminar provides support to the candidate’s progress in research and writing.

In the professional licensure program, this course is aligned with portions of the Content Knowledge and other components of the National Board for Professional Teaching Standards.

HEA 790  Practicum: HFCS (300 hours: 150 elementary and 150 secondary) - 3 credits
The practicum experience, supervised by Cambridge College, is in compliance with the ESSE Candidate Assessment of Performance guidelines and occurs during the spring and fall semesters at the level of the license being sought, All. The program supervisor and the supervising practitioner collaborate to help the candidate complete the minimum 300 hours (150 elementary; 150 secondary) at the practicum site. The practicum student is supported by the Practicum Seminar, HEA 791, taken concurrently with this course.

HEA 791  Practicum Seminar: Health/Family/Consumer Sciences - 2 credits
The practicum seminar, taken concurrently with practicum, supports the teacher candidate assuming the teaching role during practicum. The seminar provides backing for the teacher candidate during practicum and, through collaboration with peers and the practicum seminar instructor, finds solutions to pedagogical questions while utilizing current academic research and practices. Candidates discuss the
implementation of state and national standards and become familiar with recent developments in local, state and global health education issues.

Interdisciplinary Studies, Teaching Skills & Methodologies (EDU, EED) See also Electives section (below).

EED 503 Teaching Children with Different Learning Styles - 3 credits
This course discusses various learning styles of children from infants to teenagers. The course reviews the internal and external environment responsible for the development of learning styles and how we can provide a positive environment to inculcate good habits and learning styles and how to recognize children's learning styles in order to facilitate learning. Current research and literature are reviewed.

EED 512 Inclusion and Behavior Management - 3 credits
In this course students learn the basic components of an effective inclusionary program. In addition, they understand the etiology of learning problems and strategies to remediate these problems. They learn how to fully include students with disabilities in the regular classroom. Emphasis is on learning behavior management skills that are effective with both regular and special education students.

EED 518 Effective Classroom Discipline Strategies - 3 credits
Educators will evaluate their expectations for students' behavior and learn practical strategies to increase student responsibility, self-control and self-management. Teachers will learn how to create a classroom environment that will allow them to spend the major part of their contact time in instructional activities.

EED 520 Civil Rights and Social Justice: The History of the Civil Rights Movement - 3 credits
This course is an historical review of the civil rights movement. Participants come to understand the context and conditions under which African American children live. Topics covered include desegregation of public schools, the tactics of nonviolence, the role of young people in the movement, the struggles for the right to vote, the relationship between protest and legislative action, affirmative action, the 1967 uprising in Detroit, the founding of the Black Panthers, Malcolm X, the connections between the war in Vietnam and the problems of poverty in the United States, and the call for black power. Participants view the video series Eyes on the Prize and discuss the societal implications of the civil rights movement. Social justice and social responsibility are the key concepts which serve as a model for action. Participants create curriculum resources which can empower teachers and students.

EED 544 The Teacher as Artist - 3 credits
Materials fee. This course provides classroom teachers with the basic concepts and methodology of traditional art experience. This class has been a constant source of inspiration to those with "limited" art experience as well as to those who are practicing art teachers. The course is committed to the philosophy that you need not be an "artist" to take this course because you already are one. Activities include an introduction to drawing and color theory, creative visualization, and a final symbolic self portrait.

EED 564 Motivation and Teaching: Theories and Practices - 3 credits
The strategies teachers use in many classrooms to reinforce learning are based on the theory, "If you learn this, then I will give you that." Much of what is taught is reinforced by extrinsic rewards such as praise, kisses and hugs, or gold stars. However, many teachers feel frustrated because they want children to love learning and to see learning as a reward in and of itself. This course will examine current research and theoretical models which can help educators understand how to develop a child's intrinsic desire to learn by satisfying certain needs we all have within us.

EED 584 Images and Information: An African American Woman's Notebook - 3 credits
Literature-based curriculum can develop a student's critical reading and writing skills using entire novels as a method of discovery and a source of information. This course will explore novels written by African American women from autobiographical, historical, and cultural perspectives unique to the Black woman's experience. These novels trace the lives of contemporary African American women who made their marks on society.

EED 590A/591A Theory & Pract of Educ: Parenting and Teaching Issues - 1 credit
This course will address important issues in parenting and raising positive children. There will be discussions of parenting and teaching in the home and classroom. It will address development stages of children and adolescence. A key question for discussion, What do children expect from themselves and their parents in the area of education, social settings, familial relationships, friendships and getting along with siblings. All are welcome! Teachers are parents and parents are teachers with their various roles in children and young adult lives.

EED 590B/591B Theory & Pract of Educ: Researching Your Independent Learning Project - 1 credit
This course will focus on research methods, ILP requirements, and technology integration as you research and write the ILP. The following will be covered: identifying a topic; defining key words; searching the online library for journal articles; identifying scholarly sources for research; preparing a webliography; developing a research plan; writing a literature review; and using the American Psychological Association (APA) format for in-text citations and references.

EED 590C/591C Theory & Pract of Educ: Diversity Issues in the Workplace - 1 credit
The purpose of this course is to educate the public and create an environment that is appreciative of its diverse population and influence positive change. This course will address the following issues: national origin, age, sex discrimination, religion, disability, race, creed, ancestry and language. It is the hope of this course to help increase and heighten your level of awareness with regard to all the unique skills, cultural differences, one's presentation free from harassment of any kind and differences are accepted and valued.
Critical thinking is approached through a holistic model that stresses creative and analytic strategies. Participants consider cognitive development issues informing the design of instructional materials and methods which promote higher-order thinking. Practical strategies for immediate classroom application are a priority. An open environment promotes collegial exchange that builds on professional experiences while cultivating new skills that engage students in active learning and independent thinking.

**EED 615 Introduction to Integrative Learning and Learning Styles - 3 credits**
This course introduces a full-spectrum, whole-brain learning and teaching method known as integrative learning. This highly effective model of teaching has resulted in enhanced teacher motivation, creativity, positive attitude, improved school climate and organizational transformation in many schools and corporations. Learning styles research is used to assist educators and trainers to design effective teaching strategies for learners with different learning styles.

**EED 617 Foundations of Social Justice - 3 credits**
What are the norms and values that characterize a socially just society? This course is designed to explore this question. We will examine justice under the follow contexts: theories of justice, principles and scope of social justice, why social justice matters, the machinery of social injustice, targeting injustices, identifying inequities on the basis of social group memberships, advocating for social justice, and teaching social justice. This course heightens awareness of contemporary social issues and helps learners develop action plans that foster action for socially just principles. We examine values, discuss social commitment, and develop critical thinking and social inquiry skills necessary for engaging in social justice action for social change.

**EED 618 Integrative/Accelerated Learning: Classroom Applications - 3 credits**
This course helps teachers develop effective instructional strategies to address the various learning styles found in classrooms. Educators study current brain-based research about memory and learning and how to translate this research into classroom practice. Integrative/accelerative learning theories are explored and used to create a carefully orchestrated positive learning environment. Techniques and activities are incorporated into lessons to increase understanding and recall, including multi-sensory teaching strategies, experiential activities, dramatic and improvisational activities, music, speaking clearly and effectively, and educational kinesiology exercises.

**EED 628 Effective Schools - 3 credits**
This course helps students attain a basic understanding of the major dimensions of effective schools. The class examines research findings and personal reflections of noted educators on the determinants of effective schooling in which all children learn; where teacher and other school employee satisfaction is at a high level; and where public confidence in the schools is very strong. Particular emphasis is on the pivotal role of school administrators, teachers, parents and students in the development and maintenance of effective schools.

**EED 636 Re-Reading Global Oppression: the Last 500 Years - 3 credits**
This course examines, from a systems perspective, the last 500 years of socio-political, psychological, cross-cultural, educational, religious, and economic dimensions of various world atrocities that have led to
and continue to sustain current oppression of diverse peoples across the globe. It is designed to prepare learners to be knowledgeable about and to challenge individual, group, and institutional biases and how these contribute to discrimination and oppression. Equally important, this course will examine the adaptive strategies and strengths of oppressed/marginalized groups and will assist students in understanding the complex nature of their own personal values, beliefs, and behaviors that may limit their ability to practice effective methodologies in their schools, communities, and areas of work. Students critically analyze both written and visual texts that include but are not limited to documentaries, film, poems, novels, essays, trade cards, advertisements, etc. This course is both reading and writing intensive; written and oral work challenge learners to move beyond reflecting on personal experience alone to identify and challenge contemporary systems of oppression.

EED 644 Theories of Leadership for Educ./s and Administrators
Leadership is defined as working through and with people to accomplish organizational goals; it represents a blend of theory and experiential activities. Participants discuss leadership, motivation, effective use of personal and organizational power, and teacher empowerment. Learning is supported through sharing new ideas, debating current issues and understanding certain trends in managerial practice and leadership behavior.

EED 647 Human Brain, Human Learning - 3 credits
This introductory course in brain-compatible teaching and learning will entail a review of some of the latest research findings from the neurosciences, cognitive psychology, information science, psychobiology and neurolinguistic programming. The goal of this course is to provide educators and trainers with the opportunity to learn about the role of the brain/mind in the learning process so that they will be able to read and understand current brain/mind research and apply some of the findings to their teaching practice. Some time will also be spent on accelerated learning techniques. The course would be appropriate for educators of all grade levels and subject areas as well as for corporate trainers and other trainers of adult learners.

EED 663 Teaching Social Studies: the United States Through the Media - 3 credits
This intensive survey course explores social, political, economic, and cultural values of the United States from Colonial times to the present through an examination of electronic and print media. Topics include but are not limited to Colonial times, the pre-industrial North, the Antebellum South, the westward movement, the Civil War, Reconstruction, and immigration/migration, World War I and the Depression, Prohibition, the rise of the white gangster/heroe, the Harlem Renaissance, World War II, Civil Rights, Vietnam, and the Women's Movement, the rise of domestic and global terrorism, etc.

EED 680 America Through Its Literatures - 3 credits
This intensive survey course explores literary depictions of America (the United States) through literature. The texts may include short stories, poems, plays, books, film, music, advertising, television, political speeches, and comic strips. The class develops pedagogical strategies to introduce students to mythologies, dystopias, deconstruction, hauntologies, palimpsests, panopticism, hybridity, colonial and post-colonial debates, and the ways in which authors create parallel universes to comment on the America we now inhabit. Students become aware of other Americas that exist in parallel with our own, realities from which many of our students come.

EED 681 Visualizing Social Justice - 3 credits
This intensive course explores the different ways that artists of different persuasions have treated the subject of social justice both at present and in the past. The term “visualizing” is meant to include all of the arts (i.e., the “visual arts,” drama, dance, literature and poetry, music, etc.). The class develops pedagogical strategies to introduce students to methodologies and philosophical vehicles and to integrate such methods into their own curriculum.

EED 691-693 Professional Seminar: Education- three terms @ 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader. The seminar is a forum for discussion of professional issues in education, such as what it means to be an educator today, and how educators can work in the organizational culture of schools and contribute to social progress. Students integrate their learning from classes, workshops, and experience. Transformed by reflection, readings, and discussion, students become reflective practitioners and lifelong learners. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

EED 699 Language and Literacy for Teachers K-12 - 3 credits
This course considers modern approaches to a balanced literacy program, including reading, writing, listening, and speaking. It gives an overview of the historical unfolding of the transmission and transaction approaches to learning and teaching reading and writing. It reviews recent research on the development of language and literacy in childhood and youth. Based on this, students investigate best practices at different stages — emergent literacy, the guided reading stage, and methods such as literature circles for independent readers and older students. Modern strategies are reviewed, such as authentic assessment, new approaches to phonics and spelling, writing as process, and the reading-writing connection.

EED 704 Seminar in Current Educational Issues - 3 credits
This course defines some concepts, philosophies, that serve as foundations for structuring schools and learning environments, including: humanistic education, essentialism, perennialism, progressivism, social reconstructivism, and critical theory. The seminar also examines critical practical realities including: change, the economy, technology and science, leisure and work, communications, the human population, ecology, government and politics, values and lifestyles. Students explore and evaluate school/learning environment structures and teaching strategies, and they make compelling arguments for their professional points of view.

EED 705 Multicultural Diversity Issues in the Workplace and Classroom - 3 credits
This course studies (1) ethnic-cultural history, (2) prejudice, biases and value systems, and (3) the appreciation of diversity in professional skills and personal strengths. Students discuss teaching cultural
diversity in various learning environments, and individuals’ power in realizing differences and similarities. Students explore ethnicity, race, gender and class from an historical and contemporary perspectives. The class looks at teaching styles and ways to manage culturally diverse classrooms. The importance of building students’ self-esteem and sensitivity to their varied learning styles are addressed. Students should come prepared with a brief overview of their ethnic/cultural history (e.g., photo albums, letters, journals, and family trees).

EED 710 Alternative Assessment Strategies Across the Curriculum - 3 credits
This course enhances educators’ ability to develop a conceptual framework of assessment procedures to improve their teaching techniques for the wide variety of learning styles found in the classroom today. Assessment is an important component of our educational system. However, many educators are now questioning the heavy emphasis on standardized tests and the decreasing attention to the value of classroom assessment. Dissatisfied with the current methods of assessment, and motivated by the desire to improve public education, educators, policy makers, parents, and community members are focusing increased attention on how we go about determining what our students know and can do, from kindergarten through grade 12.

EED 800 Independent Learning Project - 3 credits
The Independent Learning Project (ILP) is a comprehensive, culminating learning experience in the master’s program. Students relate their learning experiences in the Master of Education to their experiences as educators and to their professional development interests. The ILP may take a number of forms: a traditional thesis, a professional or curriculum project for use in the classroom, or a creative project with discussion of its pedagogical value. The Professional Seminar leader provides support, advice, and oversight throughout the ILP process; the seminar group and some of its activities provide additional support.

ENG 701 Integration of Reading and Writing With Children's Literature - 3 credits
This course is designed to allow teachers to revisit literature as an expression of the imagination and creativity, as well as critical/expository writing and to assist teachers in integrating reading and writing skills/competencies with the teaching of children’s literature. By recognizing the value in teaching reading and writing with authentic, well-written literature, having rich and varied vocabulary, teachers will learn to integrate the teaching of reading and writing with both literary and expository written and “visual” texts. It will address language arts, specifically reading and writing, as primary areas of concern in the Massachusetts Common Core Standards and Teacher Licensure Objectives.

Library Teacher (ELM)

ELM 509 Overview of the School Library Program - 3 credits
The course introduces the vision, mission and role of the 21st century school library program in the teaching and learning process. It also examines the library teacher’s anticipated roles and responsibilities as: teacher, information specialist, instructional partner with classroom teachers, and program manager. Emphasis is on the evolution of school library programs; the development of school library policies; the teaching of literacy, particularly information, media and technology literacy; collaboration strategies with teachers, community agencies and the public library; evaluation of the program and services. Other topics include: access to resources, facility design, budget, equity, ethics, needs assessment, strategic planning and advocacy to ensure a quality program. Pre-practicum hours of directed field-based training required.

ELM 515 Evaluation, Selection and Management of Learning Resources - 3 credits
The course examines the collection development process, policies and procedures for the acquisition and maintenance of print, digital, online and government and community resources that support the teaching and learning process and best meet the needs of all learners, including English language learners. Emphasis is on organization of the collection including: the standards and systems for the creation and maintenance of records, the classification system, subject headings, bibliographic/authority control; MARC21, the components of automated library systems. Additional topics covered are: professional library selection tools; collection evaluation; identification of user needs; the relationship between the curriculum and the collection; cooperative collection development with faculty and the public library; funding; intellectual freedom; equity of access. Pre-practicum hours of directed field-based training required.

ELM 517 Literature for Young Adults - 3 credits
This survey course introduces classic and contemporary literature considered appropriate for young adults, that bridges the gap between children's and adult books. It provides educators with the knowledge and skills needed to integrate young adult literature into classrooms and libraries. Thematic approaches are explored along with practical activities to promote lifelong reading, writing and appreciation of literature. Critical review sources and selection tools are also examined along with the standards and systems for the creation and maintenance of records.

ELM 521 Reference Resources - 3 credits
The course provides skills and knowledge needed to search and manage reference collection resources in print, digital, subscription and online web format that support the curriculum and the needs of diverse students and staff in a K-12 school environment. Library teacher candidates learn to evaluate and use text-based and electronic reference resources that support curriculum based learning projects. They also become familiar with numerous print and digital as well as government and community resources. The reference interview and information skills instruction methods are also considered.
**ELM 523  Children's Literature - 3 credits**
The course enhances and extends students' knowledge of literature for children through in-depth involvement with books. The course focuses on selection, evaluation, and methods of sharing and discussing various types of literature, using print and other media. Students read widely from a broad range of literature and develop methods of incorporating literature into classroom and library experiences. Critical review sources and selection tools are also examined along with the standards and systems for the creation and maintenance of records.

**ELM 532  New Technologies in the School Library - 3 credits**
This hands-on course explores the role of technology in the teaching and learning process, particularly the ways technology can help teachers and students communicate and collaborate and become good consumers, contributors, and creators in a digital age. Topics include: access to online databases, educational use of the Internet, copyright and ethical issues, major issues in media literacy, and the role of the library teacher as a technology leader. Pre-practicum hours of directed field-based training required.

**ELM 533  Information Literacy - 3 credits**
The course focuses on the integration of information literacy standards into the school library program and the teaching of information literacy skills, their theoretical foundations, and the strategies to teach these skills to K-12 library users. The library teacher candidate examines instructional design and strategies, national and state information literacy standards and skills, exemplary information search models, and learner assessment methods. Pre-practicum hours of directed field-based training required.

**ELM 561  Production of Instructional Materials - 3 credits**
This hands-on course introduces multimedia technology and its instructional uses in designing authentic learning environments. Library teacher candidates gain experience creating multimedia projects for classrooms, school libraries, colleagues and students. They examine a variety of Web 2.0 tools, presentation software and tools for teaching. Basic production vocabulary and concepts of media literacy are also studied.

**ELM 691  Professional Seminar I: Library Teacher K-12 - 2 credits**
**ELM 692  Professional Seminar II: Library Teacher K-12 - 2 credits**
**ELM 693  Professional Seminar III: Library Teacher K-12 - 2 credits**
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader. The cohort studies professional standards for school library teachers, licensure requirements and process, and the job search. It also links them with wider networks in the field. Students integrate their learning from classes, workshops, and experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners.

**ELM 693N  Professional Seminar III: Library Teacher K-12 - 2 credits**
The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

**ELM 791  Practicum Seminar: Library Teacher K-12 - 2 credits**
Prerequisites: Pre-practicum, pass all initial licensure courses, pass all teacher tests required by Massachusetts for this license. 300 hours in a school library; divided into two 150 hour experiences at two of the three school levels (elementary, middle, high school). Practicum Seminar required concurrently.

**ELM 790  Practicum: Library Teacher K-12 300 hours - 3 credits**
Prerequisites: Pre-practicum, pass all initial licensure courses, pass all teacher tests required by Massachusetts for this license. 300 hours in a school library; divided into two 150 hour experiences at two of the three school levels (elementary, middle, high school). Practicum Seminar required concurrently.

**ELM 800  Independent Learning Project: Library Teacher - 3 credits**
The Independent Learning Project is a culminating learning experience that helps educators integrate their personal and formal learning and their professional experiences into a meaningful whole. It reflects the general guidelines for library teachers and articulates the individual's educational and administrative philosophy. The project is research and action based, on a focused topic chosen by the educator, within the area of licensure. It engages educators in sustained research into educational practice and curriculum development; parts of the project may be implemented during the practicum.
Mathematics (EME, MAT)

EME 691N  Professional Seminar I: Mathematics Education
- 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader. The cohort studies professional issues in teaching mathematics, national standards and student achievement in mathematics. Students explore what they are learning, brainstorm about applications, and reinforce each other's focus and enthusiasm as teachers. They integrate their learning from classes, workshops, and experience. Transformed by reflection, readings, and discussion, students become reflective practitioners and life-long learners.

EME 692N  Professional Seminar I: Mathematics Education
- 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader. The cohort studies professional issues in teaching mathematics, national standards and student achievement in mathematics. Students explore what they are learning, brainstorm about applications, and reinforce each other's focus and enthusiasm as teachers. They integrate their learning from classes, workshops, and experience. Transformed by reflection, readings, and discussion, students become reflective practitioners and life-long learners.

EME 693N  Professional Seminar I: Mathematics Education
- 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader. The cohort studies professional issues in teaching mathematics, national standards and student achievement in mathematics. Students explore what they are learning, brainstorm about applications, and reinforce each other's focus and enthusiasm as teachers. They integrate their learning from classes, workshops, and experience. Transformed by reflection, readings, and discussion, students become reflective practitioners and life-long learners.

EME 800  Independent Learning Project: Mathematics Education
- 3 credits
The Independent Learning Project is a culminating learning experience that helps mathematics teachers to integrate their personal and formal learning and their professional experiences into a meaningful whole. It reflects the general guidelines for mathematics teachers and articulates the individual's educational and administrative philosophy. The project is research- and action-based, on a focused topic chosen by the student, within the area and level of licensure. It engages educators in sustained research into educational practice and curriculum development in mathematics; parts of the project may be implemented during the practicum.

MAT 602  Differentiating Elementary Mathematics Instruction for Mixed Ability and English Language Learners - 1 credit
This course will focus on selected mathematics Common Core concepts and the skills that students tend to have problems with in learning; and will contain concrete teaching activities and methodology suggestions that can increase student achievement. It will offer ideas on introducing students to the language of mathematics so that they are able to understand higher order concepts. Mathematics content instruction will be integrated with special education and ESL strategies such as differentiated instruction (DI), Response to Intervention (RTI), and Sheltered English Immersion (SEI) to model effective co-teaching and inclusion techniques that could be implemented in the classroom setting.

MAT 603  Arithmetic to Algebra: Developing Patterns and Ideas (K-8) - 3 credits
This course explores the relationship between the study of arithmetic and of algebra in grades K-8. Teachers explore selected mathematical concepts at an adult level and discuss how children develop an understanding of it. They explore ways to facilitate classroom learning, and effective activities and materials that enhance learning of algebraic concepts and skills. They learn how to use vertical acceleration to connect arithmetic to algebra.

MAT 605  Technology in Mathematics Learning and Teaching (K-12) - 3 credits
Prerequisites: MAT607, 609, 611 & 613 or program chair's approval. This course provides teachers with a strong foundation in effectively using technology in mathematics classrooms, K-8. They develop and implement comprehensive lessons for teaching mathematical concepts and skills using calculators, graphing calculators, computer graphing, algebra and geometry software, and internet resources. This course makes educational technology an integral component of the teaching, learning, and assessment of mathematics instruction and learning. Pre-practicum hours of directed field-based training required.

MAT 607  College Algebra - 3 credits
This course focuses on the major components of a college level course in algebra: real, rational, and irrational numbers; linear, radical, and quadratic equations and inequalities; functions and graphs; polynomial, rational, exponential, and logarithmic functions; conic sections; systems of equations and inequalities; and sequences and series. Pre-practicum hours of directed field-based training required.

MAT 609  Euclidean Geometry - 3 credits
This course emphasizes the fundamental ideas of Euclidean geometry with a focus on logic, observations, predictions, and conclusions. Significant geometric properties and concepts are explored through the systematic presentation of the axioms, definitions, constructions, and theorems of classical geometry. Major topics include: the foundations of geometry, direct proofing techniques, triangles, parallel lines, and polygons, right triangles and the Pythagorean theorem, circles, and solid geometry. Pre-practicum hours of directed field-based training required.

MAT 611  Calculus I - 3 credits
This course focuses on trigonometric and calculus concepts by providing numerical, graphical, and algebraic approaches for a clear understanding and mastering of the material. Course activities are placed in a context of real-world problems which enable students to create mathematical models that will help them understand the world.
MAT 617 Calculus II - 3 credits
This course begins with a thorough review of the Calculus I. It then proceeds to cover integration techniques in some depth. This will include integration-by-parts, u-substitution, and trigonometric-substitution. Power series and their applications are covered as well. Prerequisite: MAT 611.

MAT 631 Non-Euclidean Geometry - 3 credits
This course focuses on why no formula solution to the quintic equation is possible by presenting all the concepts necessary for the construction of Galois Theory. This includes the study of finite groups, fields, and field extensions. Consideration is also given to various morphisms; as well a rings and integral domains. Some time is spent on classical algebra including exact solutions to the cubic and quartic polynomials. Prerequisite: MAT 607 or program chair’s approval.

MAT 708 Diagnosis & Remediation of Learning Problems in Mathematics (K-12) - 3 credits
This course examines the nature of mathematics learning, major types of mathematics learning problems, and their etiology. It discusses possible causes of these problems and suggests remediation strategies that teachers and parents can use to help children learn mathematics more effectively. Teachers focus on selected areas of mathematics at the K-8 levels that challenge children, and on how to remediate and facilitate mathematics learning in classroom and one-to-one settings.
MAT 790A Practicum: Mathematics Teaching (1-6) 300 Hours - 3 credits
Effective Fall 2012: 300 hours (previously 150 hours). Prerequisites: Pre-practicum, pass all initial licensure courses; pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: MAT791. The seminar for classroom experience supports students’ growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure. Exit Performance Portfolio required for credit.

MAT 790B Practicum: Mathematics Teaching (5-8) 300 Hours - 3 credits
Effective Fall 2012: 300 hours (previously 150 hours). Prerequisites: Pre-practicum, pass all required mathematics courses and EME800; pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: MAT791. The seminar for classroom experience supports students’ growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure. Exit Performance Portfolio required for credit.

MAT 790C Practicum: Mathematics Teaching (8-12) 300 Hours - 3 credits
Effective Fall 2012: 300 hours (previously 150 hours). Prerequisites: Pre-practicum, pass all required mathematics courses and EME800; pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: MAT791. The seminar for classroom experience supports students’ growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure. Exit Performance Portfolio required for credit.

MAT 791A Practicum Seminar: Mathematics Teaching (1-6) - 3 credits
Effective Fall 2012: 300 hours (previously 150 hours). Prerequisites: Pre-practicum, pass all required mathematics courses and EME800; pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: MAT791. The seminar for classroom experience supports students’ growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure. Exit Performance Portfolio required for credit.

MAT 791B Practicum Seminar: Mathematics Teaching (5-8) - 3 credits
Practicum required concurrently: MAT790B. The seminar for classroom experience supports students’ growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure. Exit Performance Portfolio required for credit.

MAT 791C Practicum Seminar: Mathematics Teaching (8-12) - 3 credits
Practicum required concurrently: MAT790B. The seminar for classroom experience supports students’ growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks, develop the skills necessary for the teacher tests, and become familiar with the current reforms and changes in state regulations on educator licensure. Exit Performance Portfolio required for credit.

School Nurse Education (ESN)

ESN 610 Principles of Health Promotion and Disease Prevention: Public Health Issues - 3 credits
School Nurses are key leaders in implementing national and state regulations that impact school wellness. In this course, students will explore the implementation of the Coordinated School Health Model to analyze policies and procedure in their schools that promote health issues and health practices to strengthen partnerships within the school community. Students will also investigate the relationship between public health and school settings in relation to meeting the needs of diverse student populations as well as investigating local and national funding opportunities available to support school wellness initiatives.

ESN 660 Principles, Process, and Practices of School Health Management - 3 credits
In this course, students will combine nursing theory and apply knowledge acquired in the practice setting. They will develop effective strategies using the nursing process to analyze the impact of...
significant medical, psychological, cultural and social problems on
the population of school aged children. Consideration will be given to
how the major cultural and societal issues affecting children impact
the practice of nursing within the school practice setting. Students
will engage in research from both a global and local perspective.

Using the nursing process to define the issues, students will suggest
effective short and long-term interventions, including public policy
interventions to address these problems and devise an evaluation
system that insures continued and progressive program improve-
ment. In addition, students will become familiar with the eight major
component categories of the Coordinated School Health Model
and to recognize the importance of collaborating with professionals
in other school service areas to provide effective and coordinated
interventions aimed at individual children as well as the larger school
population. The impact of school nursing services on student
outcomes will be explored. Using the goals of “Healthy People
2020”, students will analyze the relationship between specific data in
relationship to the 2020 goals and design a health promotion/health
education program to address the needs of a specific student popula-
tion. Emphasis will be placed on the leadership role of the nurse as
she/he interacts with other professionals and political leaders within
her/his community and on the state and national level.

ESN 691  Professional Seminar I: School Nurse Education
- 2 credit

Professional Seminar I (PSI) establishes a learning community that
addresses the problems of isolation of school nurses, as well as,
identification of the future mission of the profession. This seminar
provides the context in which a cohort of students can interpret their
experiences and transform them into knowledge, constructs, skills,
attitudes and values. The seminar is a developmental process chal-
 lenging students’ existing philosophies and practices. The PSI is a
model of support to students’ personal and professional lives, where
current personal and professional growth issues are raised and dis-
cussed. Learning is facilitated in a supportive, risk-free environment.
With guidance of the seminar leader, students will define and clarify
the final project design of the independent learning project (ILP) and
develop an action plan to ensure satisfactory completion.

ESN 692  Professional Seminar II: School Nurse Education
- 2 credits

Professional Seminar II (PS2) is conducted entirely online. It requires
students to have and apply a consistently strong work ethic and a
determined action plan for progressing according to the submission
deadline schedule requirements established and provided to them
during PS I. During PS2, students will be required to extend their
ILP topic research to complete their literature review (minimum of 10
pages) to include a minimum of 10-12 scholarly sources, and to write
their reference page. They will also be required to finalize and com-
pose their methodology and design and create the body (stand-alone
intervention or initiative) of their ILP during the PS2.

ESN 693  Professional Seminar III: School Nurse Education
- 1 credit

Professional Seminar III (PS III), in addition to allowing students to
complete the remaining portions of the ILP, including the statement of
learning/summary and conclusions, appendices, abstract and table
of contents, will allow students to develop an assessment plan to
use in evaluating the effectiveness of their projects. The assessment
plan will specify the goals of the ILP project and establish reasonable
and measurable evaluative criteria based on those goals. Students
will also design a timetable for implementing their projects, along with
identifying key stakeholders, those individuals who would be expected
to lend support to the project and a rationale behind their motivation
for such support. Students will also identify any barriers/blocks in the
form of policies, regulations, people, current cultural standards/prac-
tices and traditions; and fiscal, time and space constraints, that need
to be anticipated to ensure their ILPs’ success. Students will post
their abstracts so that they can obtain feedback on their ILP projects
from their nursing colleagues, allowing them to expand the impact of
their projects beyond their own schools’ communities.

ESN 710  Dealing with Grief & Loss: Role of Educators, Counsel-
ors, and Nurses - 3 credits

This course assists the professional school staff member in support-
ing students dealing with grief and loss. Course participants identify
the issues that influence our society in dealing with grief and loss and
recognize the physical, psychological, social and cultural manifesta-
tions of grief. Participants learn how our understanding of death and
loss is influenced by developmental age, cultural and social factors.
The course focuses on how issues of grief and loss are present in the
school environment and explores approaches to help the students
cope with loss in a variety of situations.

ESN 725  Legal Responsibilities & Ethical Issues for School Nurses
- 3 credits

This course is an analysis of federal, state and municipal legal man-
dates which affect school health programs. It will include a review
of professional standards and an examination of the ethics of care,
advocacy, equity, confidentiality, responsibility, accountability, and
other ethical issues, which affect the school health program, school
children and their families, and the school nurse.

ESN 780  School Nurse Leadership in the School & Community
- 3 credits

Overview of the professional roles of the school nurse. Introduction to
leadership theory, process and outcomes with special emphasis on
critical thinking, decision-making, and change. Examination of inter-
disciplinary initiatives within the school and community. Introduction to
the National Association of School Nurses and state associations.

ESN 800  Independent Learning Project: School Nurse Education
- 3 credits

The Independent Learning Project is a culminating learning experience
that helps school nurse educators to integrate their personal and
formal learning and their professional experiences into a meaningful
whole. It articulates the individual’s educational and administrative
philosophy. The project is research- and action-based, on a focused
topic chosen by the school nurse educator. It engages the student
in sustained research into educational practice and curriculum
development.
Science (ESE, SCI)

ESE 691  Professional Seminar I: General Science - 2 credits
During Professional Seminar 1, the middle school science teacher will learn how to incorporate science content and hands-on methods of presentation. Special focus will be directed to: science safety in the middle school setting, the design process, engineering standards (the integration of life, earth and physical sciences to the art of problem solving/engineering). Attention will be directed to the “best practices” model of standards-based science instruction in the middle school classroom. Integration of mathematics in the middle school science classroom. Reinforcement of the use of the metric system as a tool in science. The introduction of the Independent Learning Project and research methods will be addressed.

ESE 692  Professional Seminar II: General Science - 2 credits
Professional Seminar 2 will continue to be directed to best practices in inquiry-based science in the middle school setting, the design process, engineering standards engineering standards (the integration of life, earth and physical sciences to the art of problem solving/engineering). In addition, new topics including mapping and navigation, the integration of the museum in the curriculum, science of the compass, use and fabrication of a clinometer, seismology and the appropriate use of current hands-on technology in the middle school classroom. Special attention will be directed to the pedagogy related to science teaching (the professional standards for teachers). Those standards as identified by the National Science Teaching Standards will be covered. ProSem 2 continues to guide the research and writing of the Independent Learning Project to completion.

ESE 800  Independent Learning Project: General Science - 3 credits
The Independent Learning Project is a culminating learning experience for students at Cambridge College. It helps students define, re-define, and address a problem in general science education at the grade (1-6) or (5-8) level. They develop a problem statement and proceed to use research skills: library resources, computer databases; planning and organization; consultation with experts in the field to solve the problem. The Professional Seminar provides a vehicle for the gradual development of thinking about prominent issues in the field that are of concern to students. Students, through reading and discussion, as well as practical experiences in the classroom and in the school, develop the theme of the ILP and questions which need to be answered. The ILP represents a tangible, symbolic culmination of the Cambridge College learning experiences. It demonstrates the ability to apply learning derived from coursework, seminars and workshops to professional work in education. It is a marriage of theory and practice, original thought and focused research. The ILP requires the student to create an original project which contributes to the body of knowledge on a topic and reflect on what he or she has learned from the entire experience. The project enables students to develop skills in time management, critical thinking and professional writing which they may not previously have had.

SCI 591  Introduction to Online Science Learning - 1 credit
This course introduces students to the principles of teaching and learning science as defined by the National Science Education Standards and the 2012 Framework for K-12 Science Education, and to the ways in which these principles can be implemented in an online environment. Students explore how online teaching and learning can capitalize on diverse learning styles and multiple intelligences. They assess their own experiences, abilities, learning styles and intelligences to evaluate theappropriateness of online learning in their own professional development. They analyze the standards which are used to guide instruction in their local districts and states, comparing them to the National Science Education Standards. Finally, they use the National Science Education Standards’ vision of professional development to design their own plan for future professional growth including online learning where appropriate.

SCI 600  Cell Biology - 1 credit
This course examines the origin, evolution, fine structure and function of cells. Beginning with single celled organisms such as archaea and bacteria, the student looks at how cells conduct the processes necessary for life. Students examine the processes through which eukaryotic cells differentiate into tissues, organs and systems and review the basics of continuity and genetics. Enzyme function and physiology are linked to genes. Finally, students explore the future of cell biology.

SCI 601  Aquatic Ecology - 1 credit
Online course. This course leads teachers to investigate principles of ecology through examples from fresh water, marine, and other water environments. Content includes interactions among living organisms, energy flow within and among living communities, dynamics of adaptive evolution, and survival strategies. Week one focuses on the variety of water habitats from rain puddles to oceans. Week two examines adaptations of organisms for survival in water. Energy flow and interactive relationships among producers, consumers, and decomposers are featured in weeks three and four. The final course week considers the human impact on aquatic environments. Each course participant becomes an in-depth expert in at least one ecosystem.

SCI 603  Electricity and Magnetism - 1 credit
This course explores concepts in electricity and magnetism by addressing basic topics and fundamental misconceptions. Topics include electrostatic charging; charge separation and its role in electric pressure, current electricity, and the circuits through which it moves; Ohm’s Law; schematic diagrams; and current that flows from wall outlets—all leading to exploration of the intimate relationship between magnetism and electricity.

SCI 605  Water Quality - 1 credit
The earth is covered with water, but the quantity available for use by earth’s living inhabitants is limited. Natural and human impacts restrict our access to clean water. This course explores the factors that affect our water supply and solutions that may maintain it. Week one reviews the basic chemistry of water on earth, relating the effects
The development of the heliocentric model. Week two features an in-depth look at the moon, our partner in space and the explanations for such phenomena as eclipses, phases, and tides. Week five concludes with the current ideas about the formation of the solar system with a close-up look at the star of our solar system, the sun.

**SCI 607  Structure of the Earth - 1 credit**
Online course. This course examines the physical earth including its internal structure and the processes that make it an ever-changing place. Week one begins by looking at rock formation and its characteristics. The second week explores sedimentary, igneous and metamorphic processes and their contribution to the rock cycle. Week three takes a close-up look at constructive forces of earthquakes and volcanoes and at weathering, erosion, and other destructive forces that re-shape earth’s surface. Finally, in week four, the learner digs deep into the inner depths of the planet to examine plate motion and plate tectonic theory and in week five a geological locale project pulls together greater understanding of the forces which help shape and drive our dynamic earth.

**SCI 609  Transfer of Energy - 1 credit**
Online course. This course focuses on the National Science Education Standards’ approach to energy and its transformation between forms. Week one begins with common misconceptions in the types and characteristics of energy forms. Week two deals with the transformation of energy and applies this transfer to conservation of energy and fallacy of perpetual motion machines. Week three takes a close-up look at heat to explore the fundamentals of this energy form. Week four shifts focus to sound waves as pressure waves and light, both sun and man made, and a review of electromagnetic spectrum. Week five opens with Rube Goldberg machines, looking at energy transfer devices and energy usefulness and efficiency.

**SCI 611  Ocean Science - 1 credit**
The oceans dominate our planet, influencing every aspect of Earth’s environment. This course reviews the physical sciences, geology, and biology of the oceans emphasizing a systemic approach. Week one reviews the basic geography and geology of the Earth’s oceans and the forces that shape and propel ocean waters. Week two looks at the water in the ocean, its chemistry, and what is dissolved in it. The mysteries of the ocean depths are explored in week three, with investigations of how humans explore the world beneath the ocean surface. Week four examines the effect of Earth’s oceans on climate and on the land. In week five, learners examine ocean life and investigate the effects of ocean environments on the living things within the water.

**SCI 613  Earth in the Solar System - 1 credit**
Online course. Learn more about our neighborhood in space. This course examines the earth’s relationship to the sun, moon, and other planets in the solar system. The first week focuses on earth-bound celestial observations and the origins of modern astronomy, including the development of the heliocentric model. Week two features an online course. This course presents the advantages of project-based science, guidelines on how to succeed in using this instructional and assessment approach, and strategies for customizing for individual school settings. Week one presents comparisons between traditional and project-based science curriculum and includes management issues and requirements for student success. Week two deals with student projects that involve science, society and decision-making and connections to service learning. Assessment and evaluation of student projects are the focus of week three. In weeks four and five, teachers develop a unit of instruction for use with their own classes and to share with online colleagues.

**SCI 615  Forces in Motion - 1 credit**
Online course. Focusing on conceptual understanding, Week one introduces kinematics, the study of how things move on a straight path. Week two advances this understanding into accelerated motion and introduces inertia. During this week, gravity is introduced within a multi-disciplinary arena. Week three continues this dynamics, the study of forces and why things move, and looks at inertia, mass, and weight. Week four presents opportunities to measure forces and to examine their effects. Coverage includes Bernoulli’s principles, friction, terminal velocity, and buoyancy. Week five explores the everyday world with its focus on mechanical advantage, work, and simple machines.

**SCI 617  Earth’s History - 1 credit**
Online course. This course focuses on the basic geologic principles that have shaped the history of the earth, integrating thematic content in the life and earth sciences with a chronological approach. Week one sets the stage with a review of basic geological principles and field geology. Week two presents the earth’s first billion years with the formation of the earth and moon. Reading the fossil record is covered in week three with evolution and extinction providing the major themes. The Proterozoic and Paleozoic eras are the focus of week four, and the Mesozoic and Cenozoic eras are covered in week five.

**SCI 619  Teaching Project-Based Science - 1 credit**
Online course. This course presents an introduction to project-based science, guidelines on how to succeed in using this instructional and assessment approach, and strategies for customizing for individual school settings. Week one presents comparisons between traditional and project-based science curriculum and includes management issues and requirements for student success. Week two deals with student projects that involve science, society and decision-making and connections to service learning. Assessment and evaluation of student projects are the focus of week three. In weeks four and five, teachers develop a unit of instruction for use with their own classes and to share with online colleagues.

**SCI 627  Chemistry Through Inquiry - 1 credit**
This course focuses on the national science education content standards for physical science and “science as inquiry”. As teachers do hands-on science investigation, read science background, and participate in discussions, they will enhance their own science content knowledge and develop an inquiry-based approach to science learning.

**SCI 629  Practical Meteorology - 1 credit**
This course examines meteorology from a practical perspective. The course is cross-disciplinary when appropriate and is especially designed for educators who have degrees and backgrounds in sciences other than meteorology. The course combines technical explanations of weather and climate phenomena with practical
SCI 680    Attaining Science Literacy - 3 credits
This course addresses science literacy by (1) examining the development of the knowledge and skills needed to understand the natural world and to intelligently participate in decisions that affect it, (2) considering science as a way of knowing and as a basis for thinking and problem-solving, and (3) reviewing strategies for promoting science literacy in school programs. Course content includes practical and theoretical constructs with emphasis on connecting theory to practice, applying conceptual understandings to individual teaching settings, and developing skills for independent professional development and scholarship. Pre-practicum hours of directed field-based training required.

SCI 682    Methods and Materials for Teaching Life Science - 3 credits
Educators will develop competency in the skills and methods used in the teaching of natural science. Basic concepts in chemistry, biology, and ecology will be illustrated with applications suitable for the classroom. Educators will demonstrate their knowledge of concepts, methods, and classroom management of the experiences that help their students construct understandings in these areas. Pre-practicum hours of directed field-based training required.

SCI 684    Methods and Materials for Teaching Earth Science - 3 credits
Educators will develop competency in the skills and methods used in the teaching of earth science. Basic concepts in astronomy, geology, geography, and paleontology will be illustrated with applications suitable for the classroom. Educators will demonstrate their knowledge of concepts, methods, and classroom management of the experience that helps their students construct understandings in these areas. Pre-practicum hours of directed field-based training required.

SCI 686    Methods and Materials for Teaching Physical Science - 3 credits
Educators will develop competency in the skills and methods used in the teaching of physical science. Basic concepts in matter and energy will be illustrated and supplemented with a rich assortment of activities suitable for the classroom. Educators will demonstrate their knowledge of concepts, methods, and classroom management of the experiences that best help their students construct understandings in these areas. Attention will be given to the construction and understanding of inquiry skills as they apply to traditional classroom experiments and activities. Pre-practicum hours of directed field-based training required.

SCI 688    Methods and Materials in Teaching Middle School Chemistry - 3 credits
Seated course: This course will focus on providing middle school science teachers with a clear understanding of scientific inquiry and basic chemistry concepts. Grade level appropriate activities will be highlighted with special consideration for the middle school classroom environment and safety issues. Fundamental chemistry concepts discussed and reinforced with experimentation will include: physical properties and physical change, states of matter, density, solutions, mixtures, compounds, chemical change and the applications our elements to technology. This will be a lab-centered course. Pre-practicum hours of directed field-based training required.

SCI 689    Teaching Elementary/Early Childhood Science and Technology with Integration of Mathematics, Special Needs and ELL - 1 credit
This course provides the knowledge, tools and methods for making early childhood and elementary science an exciting, hands-on learning experience for children. The framework for this course is based on the Massachusetts Frameworks for Science Technology Standards (2013) for Elementary Classroom Educators. The integration of mathematics and science will receive special focus. Participants will learn how to utilize science and math tools of the trade in solving simple scientific problems. In addition to providing teachers with essential science content, suggestions for providing meaningful, science learning opportunities for students with moderate special needs and English Language Learners will be addressed.

SCI 790A    Practicum in Science Levels (1-6) 300 hrs - 3 credits
300 hours, levels 1-6. Prerequisites: complete pre-practicum with 75 or more hours of directed field-based training in conjunction with selected courses, pass all required courses, pass all teacher tests required by Massachusetts for this license. Practicum Seminar required concurrently: ESE790.

The practicum, required for all concentrations that lead to Massachusetts initial licensure, must be completed in a school that uses the Massachusetts Curriculum Frameworks and Next Generation of Science Standards (NGSS).

Practicum hours must be in the role and at the level of the license sought under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The Practicum experience provides student teachers with an opportunity to gain insights into the profession and to master the current Professional Standards for Teachers by working with young people in public schools and classrooms. This Practicum experience is geared primarily for those teachers seeking the position of elementary science specialist. The content delivery within this experience is aligned to the Next Generation of Science Standards at the PreK to 6 level of comprehension.

Students work with the guidance and support of an experienced science teacher and by observing his/her instructional and classroom management strategies in action. Students develop instructional strategies for a variety of learning formats, align lesson plans with the Massachusetts Curriculum Frameworks/NGSS, appropriate curriculum materials for the science teacher, classroom management skills, strategies for creating a learning environment that fosters an appreciation of diversity and interactive learning. Students reflect on their own professional growth and examine theory through actual classroom practice. An Exit Performance Portfolio documents their experiences. The Exit Performance Portfolio and its artifacts will be uploaded to a web-based portfolio system/Task Stream.
The practicum, required for all concentrations that lead to Massachusetts initial licensure, must be completed in a school that uses the Massachusetts Curriculum Frameworks and Next Generation of Science Standards (NGSS).

Practicum hours must be in the role and at the level of the license sought under a cooperating practitioner with the appropriate license, with Cambridge College supervision. The Practicum experience provides student teachers with an opportunity to gain insights into the profession and to master the current Professional Standards for Teachers by working with young people in public schools and classrooms. This Practicum experience is geared primarily for those teachers seeking the position of middle school science/engineering technology instructor”. The content delivery within this experience is aligned to the Next Generation of Science Standards at the 5-8 level of comprehension.

Students work with the guidance and support of an experienced science teacher and by observing his/her instructional and classroom management strategies in action. Students develop instructional strategies for a variety of learning formats, align lesson plans with the Massachusetts Curriculum Frameworks/NGSS, appropriate curriculum materials for the science teacher, classroom management skills, strategies for creating a learning environment that fosters an appreciation of diversity and interactive learning. Students reflect on their own professional growth and examine theory through actual classroom practice. An Exit Performance Portfolio documents their experiences. The Exit Performance Portfolio and its artifacts will be uploaded to a web-based portfolio system/Task Stream.

As evidence of the Practicum experience, each student will develop an Exit Portfolio as an integral part of the Practicum Seminar. The Exit Portfolio will be contained and uploaded to a web-based evaluation program called Task Stream. Each student will open their own Task Stream account and contribute the necessary academic artifacts and evidence that demonstrates their competency as they complete their fieldwork experience in the science classroom. The artifacts and evidence can be viewed in Task Stream.

Sheltered English Immersion (SEI)

SEI 605  SEI (Sheltered English Immersion) Content License Endorsement Course - 3 credits

This Sheltered English Immersion (SEI) Content License Endorsement Course is designed for educator licensure candidates in all core academic areas, to prepare them to address the needs, and build on the multilingual and multicultural assets, of a diverse and ever-changing student population in Massachusetts. The course is a key element of the Massachusetts RETELL initiative (Rethinking Equity and Teaching for English Language Learners). RETELL also includes statewide implementation of the WIDA ELD (English Language Development) standards, and the WIDA-ACCESS assessment tools.

Participants will be introduced to ELD standard and WIDA tools, and will practice applying research-based SEI instructional strategies as they teach their content to English language learners (ELLs). They will also be introduced to a variety of professional growth opportunities to prepare them to extend their learning by making SEI the focus of professional practice within the new educator evaluation process.

SEI 705  Supervision of Sheltered English Immersion Instruction for Administrators - 2 credits

Participants in the Cambridge College Administrator License program will be prepared to effectively serve English language learner students (ELLs). Participating students will be knowledgeable and able to administer, supervise and promote effective classroom strategies that maximize learning for ELLs. Participants in the Cambridge College Administrator License program will evidence an understanding of major trends in the twenty-first century language teaching and recognize the domains of listening, speaking, reading, writing and form focused instruction (grammar) for ELLs.
Special Education (ESP)

ESP 512  Inclusion and Classroom Behavior Management - 3 credits
In this course students learn the basic components of an effective inclusionary program. In addition, they understand the etiology of learning problems and strategies to remediate these problems. They learn how to fully include these students in the regular classroom. Emphasis is on learning behavior management skills that are effective with both regular and special education students. Pre-practicum hours of directed field-based training required.

ESP 592  Adapting Materials for Students W/Disabilities in Gen Ed Classrooms - 1 credit
This course introduces students to adapting materials and modifying curriculum as identified in students' Individual Education Programs (IEP). Models of inclusion and teaching techniques for students with disabilities in general education classrooms will be explored and developed. Teachers engaged in special educators and general education discuss solutions to difficult problems focusing on academic interventions in subjects such as math, reading and writing skills. In addition, students in this class develop strategies to increase participation of their students in inclusive classrooms by lessening anxiety and frustration and teaching strategies to create a positive learning environment. They will also work together to design reasonable classroom accommodations, realistic alternatives, positive models of classroom management, and adapting assessments. They will demonstrate understanding through class discussion and lesson presentation.

ESP 594  Collaboration and Consultation Techniques - 2 credits
The course explores the concept of school and community working together as partners to support each other in a strong coalition. A school district serves several smaller communities in one, and rarely does a community act as a single entity. To establish and sustain community and school linkage is critical to an effective partnership. The course explores the core mission of public schools and creates an environment that helps young people learn and achieve at high standards. The community school approach supports young people's academic, social, and interpersonal goals by creating an effective learning atmosphere. Schools are a microcosm of societal values and community philosophy that daily affects students' lives. The power structure of a community — its formal and informal networks and the people in them — that makes things happen is studied.

ESP 600  Treating Children with Language Delays - 2 credits
Key techniques to treat children with language delays will be presented along with instructional strategies that enhance communication skills. Approaches such as joint attention skills, turn taking, language stimulation, and play skills will be explored. Since families and care givers play a primary role in a child’s language development, ways to involve and provide assistance to these important adults will be emphasized.

ESP 601  Typical Development of Language and Communication Skills - 2 credits
Theories of language development and the communication process will be explored. A focus on typical language growth and development in children birth to five years of age will correlate with techniques designed to facilitate acquisition of language skills. Milestones such as language form, language content and language use will be discovered and analyzed through observing and listening to young children.

ESP 606  Psycho-Educational Assessment for Teaching Exceptional Students - 3 credits
Pre-practicum: 10 hours required: directed field-based training. This course increases educators’ ability to assess various educational test instruments, understand outcome data, analyze various data sets and make hypotheses, and formulate academic goals and objectives. Educators develop a conceptual framework in which to understand their students’ academic needs and develop appropriate interventions based upon testing outcome data. A general understanding of statistics, ethics, and test construction is introduced for evaluating various assessment instruments and the appropriateness of their use. Students utilize formal and informal assessments, standardized instrumentation, and screening instrumentation to gather data and formulate appropriate interventions and accommodations for various educational plans. Pre-practicum hours of directed field-based training required.

ESP 607  Foundations in Special Education - 1 credit
This course would be the first of four courses for elementary teachers around the teaching of mathematics and science. It will concentrate on some new and some tried and true strategies for teaching all of the students in the class as schools implement the Common Core. It will introduce the participants to students with learning and language difficulties and how very often their disabilities hamper understanding of complex and often abstract concepts that are part of the study of mathematics and science. It will explore how they function within the schools and will explore how they learn best and what strategies have proven to be most effective. It would be research-based and will identify best practices for reaching these students (e.g. universal design for learning, differentiated instruction, RTI, SEI).

ESP 610  Autism: History, Prevalence, Diagnosis and Characteristics - 3 credits
This course examines current research and theoretical models that focus on typical and atypical development of children. Emphasis is on understanding the child with autism in terms of psychological, intellectual, social, and physical development. The historical problem of biological versus psychological causation of autism will be examined along with trends in autism research that continue to this day. This course would focus on autism as a neurological developmental disorder characterized by an impairment in social interaction, communication skills, and in behavior. Autism is acknowledged as a “spectrum” disorder meaning that children with autism may range from extremely low cognitively to highly intelligent with little or no language to communicate to being highly verbal. The cause(s) of autism is not known at this time, with 9 out of 10, for whom the cause is idiopathic. Autism Spectrum Disorder is the fastest growing developmental disability with 1 in 150 children now being diagnosed with autism. It is more
common than Cerebral Palsy, Down Syndrome, and Childhood cancers combined.

ESP 615 Assistive Technology: Modifying the Curriculum for Diverse Learners - 3 credits
How do we as educators implement the mandated requirements of the Individuals with Disabilities Education Act that calls for assistive technology to be considered in each Individualized Education Program (IEP)? Educators in this course examine assistive technologies and the federal laws affecting the education of students and children with disabilities. They look at assistive technologies addressing seating and positioning, access to the technology, augmentative and alternative communication (low-tech and high-tech). Educators will also look at curriculum modifications using technology, and software that addresses these modifications and individual learning styles. They will have a comprehensive understanding of the various augmentative and alternative communications (AAC) methodologies, including the appropriate use of aids and devices.

ESP 616 Communication Disorders - ASD - 3 credits
Communication-based disabilities are a diagnosing criteria of Autism spectrum disorders, diagnoses with similar characteristics, and are commonly seen in severe levels of developmental delay. Not only do communication difficulties greatly impact life-long educational, social, and vocational opportunities, they are closely associated with the presence of challenging behaviors such as aggression and self-injury. Following a review of typical and atypical language development, physiological, environmental, and psychological theories of language development will be presented. This course will examine criterion-based and peer-normed communication assessments, effective language-based teaching strategies for children with severe disabilities, and alternative communication forms such as picture exchange communication system, sign language, and other non-vocal communication systems. In addition, students will be introduced to the following: Provision of family-centered services; impact of culture on work with individuals with disabilities and their families; and recommended practices/framework for assessment and facilitation of communication for individuals with ASD.

ESP 621 Assessment and Appraisal Process - ASD - 3 credits
Effective instruction is difficult to implement in the absence of effective assessment and appraisal data. The goal of this course is to introduce candidates to several educational and functional assessments that are frequently used to establish skill strengths and deficits in children with autism spectrum disorders and diagnoses with similar characteristics. Such tools as the Psycho-educational Profile, 3rd edition (PEP-111), Assessment of Basic Language and Learning Skills Revised (ABLLS-R), and the Vineland Adaptive Behavior Scales, classroom edition, will be reviewed and interpreted. Along with an emphasis on these assessments, this course will stress considerations of student specific goals including variables such as, needs in the home setting, activities of daily living, vocational training, and an independent and self determined adult life.

ESP 622 Basic Applied Behavior Analysis ASD - 3 credits
The basic principles of applied behavior analysis relevant to the design and implementation of behavioral interventions in educational and human service environments will be presented in this course. Behavioral principles such as schedules of reinforcement, measurement techniques, analysis and interpretation of behavioral data, ethical, and pragmatic issues will be covered. Students will critique the validity and usefulness of behavioral research to applied problems. The course will provide credit hours towards eligibility for the behavior analysis certification examination.

ESP 625 Behavior Management - ASD - 3 credits
Individuals diagnosed with autism spectrum disorders and diagnoses with similar characteristics frequently manifest challenging behaviors that inhibit learning and access to many life long opportunities. This course will introduce students to the functional behavior assessment (FBA) process and intervention through the use of positive behavior intervention and support (PBIS). The dynamic intervention formats utilize the scientifically supported techniques of PBIS across a three tier level of need that includes school wide support, secondary support for at – risk students, and individual interventions. Individual interventions will be developed utilizing the principles of applied behavior analysis (ABA). The course will emphasize the use of least restrictive, non-aversive, researched supported techniques that take into account a whole child perspective, intervention for teaching functional equivalent skill deficits, increasing appropriate behavior, and decreasing challenging behaviors.

ESP 630 Social and Psychological Perspectives in Autism Spectrum Disorders - 3 credits
Social deficits are one of the defining characteristics of autism, including Asperger's syndrome, and most are almost always associated with other autism spectrum disorders and similar diagnoses. This course will introduce candidates to social skills intervention through a whole family approach focusing on both students with deficits associated with global delay as well as higher functioning students who demonstrate deficits primarily or exclusively in the area of social skills. This class will take into account the needs of not only the student, but also the siblings, parents, separated parents, extended family relationships, household economic needs, and culturally specific variables that make up the landscape of the dynamic American family.

ESP 635 Teaching and Curriculum Development/Students with Severe Disabilities - 3 credits
This course will emphasize diagnosis, assessment and best educational practices in teaching persons who are diagnosed with severe intellectual disabilities, multi handicaps and autism. A focus on legal provisions, regulations and program standards in unbiased assessment as well as work on specialized terminology used in assessment of this special population will be noted. A special focus on the Massachusetts Alternate Assessment preparation will be developed. Adaptive behavior scales will be discussed. Students will be apprised of the specialized policies regarding students with extensive disabilities concerning referral and placement procedures.
ESP 636  Teaching, Social Science, History and Multicultural Education in Grades 5-12 - 3 credits
This course prepares special educators to co-teach and consult in the area of social studies that includes the major factors of historical development. This course addresses the many multicultural contributions of those who settled the colonies and formed the new nation. Students gain skills and varied methods for teaching basic information in social studies, history and geography. They gain a basis for researching issues in social studies and history that give their students more universal perspectives. The materials chosen are appropriate to the Massachusetts Curriculum frameworks/Common Core in history and social studies. Educators will gain the basic information and know the principles for teaching social sciences, history and geography as outlined in the Massachusetts regulations for educator licensure.

ESP 662  Principles of Language Development; Bridging Differences and Disorders - 3 credits
This course develops a thorough understanding of how children acquire language and how language develops over the life span. Language acquisition is one of the most important domains within the sciences of the mind. Developments in cognitive neuroscience have made it evident that language, once acquired, is not static, but rather has constant neural reorganization. Students develop an overview of the course of language development, biological foundations for language, the major linguistic systems individuals must acquire, and finally the methods of study for language development. Theories of first and second language acquisition and development are introduced. Because there is no single process of language acquisition, students are exposed to different theories of semantic development, phonological development, morphological development and syntax. Students come to understand the relationship between language acquisition, language impairment, and treatments of children with communicative handicaps are also discussed. Pre-practicum hours of directed field-based training required.

ESP 660  Pedagogy in Reading and English Language Arts - 3 credits
This course develops a thorough understanding of the fundamental principles of English language arts, focusing on the interrelationships among reading, writing, speaking and listening. The course also focuses on the student as a learner and the processes involved in content reading and literacy. There is a direct correlation between the growing social and cultural diversity in today’s contemporary society, children and families need to expand literacy activities to provide a range of options available to them in work and life. Diagnostic tools and classroom techniques for assessing, decoding, encoding, comprehension, literacy and fluency skills are explored, along with related theories and research, and developmentally appropriate practices. The language arts are incomplete without making connections to all parts of the curriculum. Pre-practicum hours of directed field-based training required.

ESP 689  Theories of Typical and Atypical Human Development - 3 credits
This course examines current research and theoretical models that focus on typical and atypical development of children. Emphasis is on understanding children’s psychological, intellectual, and physical development. Piaget’s theory of cognitive development is examined along with more recent investigations and adaptations. Theories of the role of context (physical, social and cultural impacts on development) are compared. The course also investigates the impact of developmental theories on the education of children with disabilities. Formulation of developmentally appropriate Individual Educational Programs is discussed. Pre-practicum hours of directed field-based training required.

ESP 691  Professional Seminar I: Special Education - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in moderate needs special education. This seminar leader is the students’ academic advisor and guides them through their graduate program. The cohort studies professional standards for special needs teachers, and the requirements for state licensure as a Teacher of Students with Moderate Disabilities - Prek-8 and 5-12. The cohort studies professional standards for special needs teachers, and the requirements for state licensure in moderate special needs - Prek-8, 5-12. Students integrate their learning from classes, workshops, and field experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ESP 691N  Professional Seminar I: Special Education (Initial) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in moderate needs special education. This seminar leader is the students’ academic advisor and guides them through their graduate program. The cohort studies professional standards for special needs teachers, and the requirements for state licensure as a Teacher of Students with Moderate Disabilities - Prek-8 and 5-12. The cohort studies professional standards for special needs teachers, and the requirements for state licensure in moderate special needs - Prek-8, 5-12. Students integrate their learning from classes, workshops, and field experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ESP 691P  Professional Seminar I: Special Education (Professional) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in moderate needs special education. This seminar leader is the students’ academic advisor and guides them through their graduate program. The cohort studies professional standards for special needs teachers, and the requirements for state licensure as a Teacher of Students with Moderate Disabilities.
- Prek-8 and 5-12 The cohort studies professional standards for special needs teachers, and the requirements for state licensure in moderate special needs - PreK-8, 5-12. Students integrate their learning from classes, workshops, and field experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ESP 691S  Professional Seminar I: ASD - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a qualified faculty leader. This seminar leader is the students’ academic advisor and guides them through their graduate program. Students integrate their learning from classes, workshops, and field experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects. The first semester emphasizes the development of leadership and human relationships, and the impact for the special educator with an emphasis on understanding the most recent literature and findings on the autism spectrum. Students become aware of prevalent and current learning theories. There is an emphasis on the adult learner as a teacher. Discussion focuses on the growth and development of the professional, the functioning of organizations, the study of organizational behavior, and how special education, in particular, students with ASD “fit” within the organizational structure of the education system.

ESP 692P  Professional Seminar II: Special Education (Professional) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a faculty leader licensed in moderate needs special education. This seminar leader is the students’ academic advisor and guides them through their graduate program. The cohort studies professional standards for special needs teachers, and the requirements for state licensure as a Teacher of Students with Moderate Disabilities - Prek-8 and 5-12. The cohort studies professional standards for special needs teachers, and the requirements for state licensure in moderate special needs - Prek-8, 5-12. Students integrate their learning from classes, workshops, and field experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ESP 692S  Professional Seminar II: Special Education (Initial) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College and continues the student’s graduate program. It grounds learning in a cohort group of students with a faculty leader licensed in moderate needs special education. This seminar leader is the students’ academic advisor and guides them through their graduate program. The cohort continues to studies professional standards for special needs teachers, and the requirements for state licensure in moderate special needs PreK-8 and 5-12. Students integrate their learning from classes, workshops, and experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become competent, caring, qualified educators, reflective practitioners and lifelong learners. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ESP 692N  Professional Seminar II: Special Education (Initial) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College and continues the student’s graduate program. It grounds learning in a cohort group of students with a faculty leader licensed in moderate needs special education. This seminar leader is the students’ academic advisor and guides them through their graduate program. The cohort continues to studies professional standards for special needs teachers, and the requirements for state licensure in moderate special needs PreK-8 and 5-12. Students integrate their learning from classes, workshops, and experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become competent, caring, qualified educators, reflective practitioners and lifelong learners. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects.

ESP 692S  Professional Seminar II: Special Education (Initial) - 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a qualified faculty leader. This seminar leader is the students’ academic advisor and guides them through their graduate program. Students integrate their learning from classes, workshops, and field experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. The seminar leader approves the finished projects. The first semester emphasizes the development of leadership and human relationships, and the impact for the special educator with an emphasis on understanding the most recent literature and findings on the autism spectrum. Students become aware of prevalent and current learning theories. There is an emphasis on the adult learner as a teacher. Discussion focuses on the growth and development of the professional, the functioning of organizations, the study of organizational behavior, and how special education, in particular, students with ASD “fit” within the organizational structure of the education system.

ESP 693  Professional Seminar III: Special Education (Initial) - 2 credits
Additional term of professional seminar that may be required depending on student's experience and progress.
ESP 693N  Professional Seminar III: Special Education (Initial)  
- 2 credits
Additional term of professional seminar that may be required depending on student’s experience and progress.

ESP 693P  Professional Seminar III: Special Education (Professional)  
- 2 credits
Additional term of professional seminar that may be required depending on student’s experience and progress.

ESP 693S  Professional Seminar III: ASD  
- 2 credits
The Professional Seminar is a signature element of the adult learning model at Cambridge College. It grounds learning in a cohort group of students with a qualified faculty leader. This seminar leader is the students’ academic advisor and guides them through their graduate program. Students integrate their learning from classes, workshops, and field experience. Transformed by the resulting knowledge, competencies, attitudes and values, students become reflective practitioners and lifelong learners. The seminar also supports students’ work on their independent learning projects, from identifying topics, to guiding the research and writing, to completion. ESP 695  Laws and Regulations Pertaining to Special Education  
- 3 credits
This course will review all special education laws (IDEIA, 2004, and specific regulations such as 34 C.F.R. 300; 603 CMR 28:00) regarding the pre-referral and referral of a student, and the development of an Individual Education Plan (IEP). Additionally, the course will discuss the relevance of Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA, 1990), the Family Education Rights and Privacy Act (FERPA), as well as the procedures for Special Education Appeals relating to public schools’ obligations to provide Free and Appropriate Public Education (FAPE) for students with disabilities. An additional emphasis in this course will be on students with a diagnosis of Autism and the process for developing IEP’s for these students in the Least Restrictive Environment (LRE), using theories and strategies for including students in general education classrooms. Special attention shall be paid to the particular state legislation governing special education. Pre-practicum hours of directed field-based training required.

ESP 698  Laws and Regulations Pertaining to Behavioral Intervention and ABA  
- 1 credit
This course reviews special education laws and specific regulations regarding behavioral intervention and applied behavioral analysis (ABA) including early intervention (EI) for infants until age 3, the public school referral process, for special education services, referral, evaluation and eligibility determination for children with disabilities on the autism spectrum, and the development of an Individual Educational Program (IEP).

ESP 701  Students with Disabilities and Visual Arts  
- 3 credits
This course is for teachers who work with students with special needs. It focuses on how they can use the visual arts as an innovative approach to facilitate their students’ learning and understanding. Teachers explore how the visual arts can accommodate different learning styles by providing alternative entry points in which to learn and understand the required curricula. This approach incorporates the theory of multiple intelligences. Teachers develop an understanding of how the visual arts can help motivate students to learn, foster self-esteem and self-expression, develop motor coordination skills and enhance social skills. This is a hands-on class in which teachers become familiar with a variety of art materials, for example clay, paints, pastels, charcoal, and simple print-making techniques. They also gain a basic understanding of the principles of art history. They learn how to develop lessons and alternative assessment instruments that incorporate the visual arts. A visit to the Fogg Museum is included.

ESP 704  Ethics and Professionalism in Applied Behavior Analysis  
- 3 credits
This course prepares students for the ethical and professional practice of applied behavior analysis. Students will learn about the foundations of ethical and professional behavior to ensure a high quality of practice in both behavior analysis and education in general. The Behavior Analyst Certification Board Guidelines for Responsible Conduct will be reviewed in detail. Ethical dilemmas and case studies will be presented for behavior analysts working in a variety of educational and therapeutic settings. Professional issues such as representation of one’s self and the field of behavior analysis, collaboration with other professionals, relationships with colleagues and clients, the evaluation of treatment and instructional procedures, and interpersonal communication will be explored. Learning activities will include synchronous instruction (lectures, group exercises, role play), asynchronous instruction (video lecture, responding online to questions and peer review of responses) and project-based instruction (writing exercises or papers). Students will take an active part in forums and problem solving ethical issues.

ESP 705  Fluency Seminar ABA Certification Track  
- 1 credit
This one-credit course is designed to strengthen students’ ability to demonstrate key core knowledge competencies in the field of applied behavior analysis. During the course of the semester students will engage in a number of fluency based instructional activities that will enable them to demonstrate knowledge in all of the BCBA task list content areas. Students will be required to practice these skills both during class sessions and via software specifically designed to support fluency training and competence demonstration. Students must demonstrate proficiency in each of the task list content areas in order to successfully pass this course.
ESP 721  Using Multiple Intelligences and Accelerated Learning in Teaching English Language Arts, Math, History and Science - 3 credits
Special education teachers learn to apply multiple intelligence and accelerated learning instructional strategies in teaching to the content area standards. Teachers get an overview of Howard Gardner’s multiple intelligence theory and its implications. They also experience Lozanov’s accelerated learning structures and translation to brain-based teaching. Teachers learn to select, evaluate, and use teaching and assessment differentiation strategies to meet the needs of special education students in regular education classrooms. They design multiple intelligence and accelerated learning lessons to engage students in acquiring specific knowledge and skills.

ESP 722  Clinical Applications of Applied Behavior Analysis - ASD - 3 credits
Contemporary developments and issues in ABA including behavior change strategies, recent developments in ABA, generalization and ethical use of treatment methodologies are addressed. Part of the educational qualifications required to sit for the behavior analysis certification examination.

ESP 723  Implementing Behavior Analysis in Educational Settings - ASD - 3 credits
Focuses on the clinical practice of applied behavior analysis in a variety of settings. The application of the principles of Applied Behavior Analysis in educational and treatment settings will be examined and the unique issues presented in these contexts will be reviewed and discussed. These issues include functional behavior assessments, ethics of practice, staff/parent training, and behavioral education in public schools.

ESP 724  Research Design in Applied Behavior Analysis - ASD - 3 credits
This course focuses on research design and study of human behavior. You will learn about the characteristics of science and the rationale for having behavior as the focus. You will be exposed to issues related to measurement, specific research designs, and the important issues (such as variability) associated with designs. You will learn how to accurately analyze and interpret research data from a variety of research experiments. Related issues relevant to identifying functional relations among environmental and behavioral variables in behavior analysis will also be explored. This course provides credit hours toward educational qualifications required to sit for the behavior analysis certification examination.

ESP 726  Advanced Applied Behavior Analysis - ASD - 3 credits
Prerequisites: Graduate status; enrollment in BCBA certification preparation program or permission; and ESP622. Extends the study of basic applied behavior analysis. Concentration on behavior change strategies. Specific strategies for accelerating and decelerating behaviors will be reviewed. Issues of generalization of behavior change will be explored. A focus on research strategies will be included. You will also write a review of the literature focusing on a particular procedure designed to develop new behavior or to decrease behavior.

ESP 790A  Practicum: Special Education (PreK-8) 300 hours - 3 credits
300 hours in an inclusive general education classroom or 75 hours in an inclusive general education setting and 225 in a separate or substantially separate setting for students with moderate disabilities. The Practicum experience is in the role and at the level of the license sought, under a supervising practitioner with the appropriate license, with Cambridge College supervision. The Practicum experience provides student teachers opportunities to gain insights into the profession and to master the current Professional Standards for Teachers by working with young people with moderate special needs in public schools and classrooms. Students work with the guidance and support of an experienced educator and by observing his/her instructional and classroom management strategies in action. Students develop instructional strategies for a variety of learning formats, appropriate curriculum materials, classroom management skills, strategies for creating a learning environment that fosters an appreciation of diversity and interactive learning. Students reflect on their own professional growth and examine theory through actual classroom practice. An Exit Performance Portfolio documents their experiences.

ESP 790B  Practicum: Special Education (5-12) 300 hours - 3 credits
300 hours in an inclusive general education classroom or 150 hours in an inclusive general education classroom and 150 hours in a separate setting for students with moderate disabilities. The Practicum experience is in the role and at the level of the license sought, under a supervising practitioner with the appropriate license, with Cambridge College supervision. The Practicum experience provides student teachers opportunity to gain insights into the profession and to master the current Professional Standards for Teachers by working with young people with moderate special needs in public schools and classrooms. Students work with the guidance and support of an experienced educator and by observing his/her instructional and classroom management strategies in action. Students develop instructional strategies for a variety of learning formats, appropriate curriculum materials, classroom management skills, strategies for creating a learning environment that fosters an appreciation of diversity and interactive learning. Students reflect on their own professional growth and examine theory through actual classroom practice. An Exit Performance Portfolio documents their experiences.

ESP 791  Practicum Seminar: Special Education - 2 credits
Practicum required concurrently: ESP790 A/B. Exit Performance Portfolio required for credit. The seminar, based on the Professional Standards for Teachers in Massachusetts and those of the Council for Exceptional Children (CEC) provides opportunities for classroom experience and supports students’ growth as they assume the teaching role. It is the setting for students to interpret their field-based experiences and transform them into skills, knowledge constructs, attitudes and values. The seminar provides a cohort/support for students to address problems and find solutions, while utilizing current academic research and practices. They master understanding and practice of the Massachusetts Curriculum Frameworks, and become familiar with the current reforms and changes in state regulations on educator licensure. Through this experience they become competent, caring and qualified educators.
ESP 800 Independent Learning Project: Special Education - 3 credits
The Independent Learning Project is a culminating learning experience that helps educators integrate their personal and formal learning and their professional experiences into a meaningful whole. It reflects the general guidelines for teachers of students with moderate disabilities and articulates the individual's educational and administrative philosophy. The project is research and action-based, on a focused topic chosen by the educator, within the area of licensure. It engages educators in sustained research into educational practice and curriculum development; parts of the project may be implemented during the practicum.

ESP 800B Supervised Learning Project - 2 credits (new course)
The Supervised Learning Project is a culminating learning experience that helps educators/behavior analysts integrate their personal and formal learning, along with their extensive field work into a meaningful whole. Students will integrate their experiences into a field-based research document which reflects the area of study and of licensure. It is project-based and is combined with a poster demonstration.

Electives Offered in the School of Education (EDU, EED, ENG, EIT, etc.)

General Educational Studies

EDU 612 From Writing to Reading - 3 credits
This introductory course gives an overview of basic perspectives on writing instruction in 8-12 classrooms, emphasizing the use of writing as a bridge to reading. The focus is on technical features of language, movement between the particular and the global, making of sentences, and text structure.

EDU 622 Active Assessment for Active Reading - 3 credits
This course offers an overview of formative and summative reading assessments for middle and high school students. Educators are provided with practical information on developing, interpreting, and scoring alternatives to traditional tests to inform reading instruction. This course combines practical discussion with theoretical information on the rationale for active assessments. It enables educators to explore questions and gain ideas that they can immediately use in their classrooms.

EED 503 Teaching Children with Different Learning Styles - 3 credits
This course discusses various learning styles of children from infants to teenagers. The course reviews the internal and external environment responsible for the development of learning styles and how we can provide a positive environment to inculcate good habits and learning styles and how to recognize children's learning styles in order to facilitate learning. Current research and literature are reviewed.

EED 536 Moral Development in Children - 3 credits
What is “excellent” moral behavior? Is it natural biological inclination? Divine/natural” gift? Culturally learned behavior? A combination? We build our discussions around these questions and refer to works by Coles, Dewey, Glasser, Kohlberg, Montessori, Piaget, Vygotsky, and others, especially in regard to children’s moral development from birth through puberty, especially children in grades K-6. Students prepare a short case study from their own teaching, parenting or counseling, illustrating the adult’s role in cultivating some aspect of moral development in a child. The class puts together an informal guide for colleagues that challenges our ingenuity — especially in our republic’s strict separation of church and state and teachers having taken on, in many cases, the roles of parents and clergy.

EED 560 Models of Teaching - 3 credits
Course participants observe, analyze, and discuss a variety of teaching models including information processing, group investigation, social inquiry, inductive models, nondirective teaching models and problem-solving. Within each of these general categories, ways of using learning activities, materials and media are explored. Improving skills in presenting information, asking questions, soliciting and incorporating feedback into curriculum planning, as well as using students’ interests and ideas in designing learning activities and developing ways of evaluating what has been learned are reviewed. This course is appropriate for teachers of any grade level and subject matter and anyone whose job involves the development of workshops, training seminars, lectures or other types of presentations.

EED 586 How to Teach and Reach All Students Using Multiple Intelligences - 3 credits
Revitalize your teaching with methods which will help all of your students to learn more easily in less time. Model units will be presented based on Howard Gardner’s Multiple Intelligence Theory, which capitalizes on the student’s natural learning style. Lessons in math, language arts, science and social studies will be demonstrated through active participation.

EED 623 Classroom Management Using Accelerated Learning - 3 credits
Accelerated Learning is used to explore strategies for creating an environment, which supports students and minimizes teacher stress. Traditional strategies including control of movement, time and space management, establishing effective rules, interpersonal relationships, small and large group dynamics, behavior modification, as well as relaxation, mood setting, win-win solutions and a range of alternative methods of intervention and curriculum strategies are explored through role play, group activities, multi-media and readings.

EED 642 Succeeding with the Resistant Student
Teachers are excellent because of how they teach, not what they teach. Students learn the “hows” to help the most resistant students love school, believe in their own ability to succeed, and always want to do their best. Many of these strategies are simple movements and activities that are easily used in grades PreK-12 and with adult learners. The course draws on the activities of Brain Gym, Neuro-Linguistic Programming, and the latest brain research to maximize learning.
Teachers using these strategies report an average of 50% reduction in class disruptions, improved achievement, and special education students moving to regular education.

**Instructional Technology**

**EIT 711  Advanced Technologies in Education - 3 credits**
This course focuses on the impact of a worldwide information-intensive society on education policy and planning. Students study practical and theoretical issues pertaining to educational technologies. The course surveys practical applications for managing organizational information systems and databases. From a theoretical perspective, it focuses on using new technologies to serve various pedagogical philosophies and the impact of new technologies on instructional design, teaching, and school reform.

**EIT 712  Using Educational Technology to Improve Teaching and Learning - 3 credits**
Through discussion, use of the latest hardware and software, participants explore computer based multimedia and communications technologies that enhance classroom instruction. This course is geared for PreK-12 teachers to experiment with the tools of the classroom with emphasis on math, science and language arts. Software and internet applications are explored, including best practice applications. Focus is on developing technology-based thematic units that integrate theory, practice and standards in the language arts, science, and math classroom. Recent developments in technology integration regarding math and language with the No Child Left Behind Act are discussed.

**Literacy**

**EDU 632  Understanding Reading K-5 - 3 credits**
This course introduces theoretical and instructional issues in reading development. Participants will engage in reflective, critical considerations of students' diverse needs as readers. Strong emphasis will be given to the social nature of reading, thus children learn to read best within a rich and rigorous interactive community of learners in which teachers learn from their students. Topics include: a study of reader capacities that help explain variations in comprehension outcomes (e.g. short term memory, reading fluency, vocabulary, background knowledge, and motivational factors); text features that impact comprehension; the purposes of reading that define comprehension outcomes (e.g., reading to learn, applying knowledge, engagement); and the social context of reading.

**EDU 635  Developing Writing Skills in the Early Childhood Years - 3 credits**
In this course teachers and pre-service teachers are introduced to the writing components essential to a balanced literacy program. Topics include: interactive writing, writing workshop, conferring with student authors, content area writing, reading-writing connections, writing with special education and bilingual students, and assessing student writing. Students take part in a writing mini-workshop, keeping a writing notebook to gather seed ideas, developing one idea into a piece of writing, meeting in response groups, revising and publishing the piece in a group anthology. Throughout the semester, they draw from their experience to inform their teaching. Students are expected to complete readings, keep a reflection journal and a writers' notebook and design a unit of study for writing workshop.
School Administration (ECA)

ECA 701 School Management and the Law - 3 credits
This course focuses on the understanding of the local, state and federal laws which guide the successful administration and management of a comprehensive school system including fiscal responsibilities and collaborative structures. Attention is also paid to federal and state laws and issues associated with collective bargaining. Particular emphasis is given to Massachusetts laws relevant to education including the Education Reform Act of 1993, NCLB, its revisions and other such laws. Students will examine legal issues to develop understandings and skills needed to be an effective school administrator during these times of challenging change. Practicum hours of directed field-based training required.

ECA 703 Managing Financial Resources - 3 credits
This course focuses on fiscal management issues in schools and school systems. Specific topics include financial accounting, preparation and interpretation of financial statements, financial analysis and accounting, budgeting, cost containment, and strategic planning. Proposition 2 1/2 of Massachusetts, the Massachusetts foundation budget process and such financial support structures and funding formulas will also be examined. The financing of charter, choice and voucher programs will be studied as well as importance of and the methods for addressing issues of plant and equipment maintenance. Practicum hours of directed field-based training required.

ECA 704 Effective Schools - 3 credits - 3 credits
This course helps students acquire a basic knowledge and understanding of the concept of effective schools and related theories and ideas. Participants develop a definition of an effective school and identify the dimensions and factors that characterize effective schools. This is accomplished by examining the research findings and personal reflections of noted educators. Particular emphasis is placed on the pivotal role of teachers, parents, and students in the school administrator’s conceptualization of an effective school. Students use a variety of stimulating and helpful case studies to examine how theory is translated into practice, as they develop and test their own convictions about the values that shape the life of an effective school. Practicum hours of directed field-based training required.

ECA 720 Advanced Systems Theory - 3 credits
It is essential that educational administrators in the central office understand systems theory and the dynamics of complex social entities such as schools and school systems. With knowledge of the system and subsystems that make up the total school organization, a school leader will be able to understand better the impact that decisions have on the entire school organization and therefore manage change more effectively. This course is required for all candidates for the Superintendent/Assistant Superintendent license. Practicum hours of directed field-based training required.

ECA 725 Instructional Leadership: Supervision & Admin. of Ed. Personnel - 3 credits
Educational leaders in all roles must see their purpose as improving student learning. This course focuses on practices that curriculum leaders can use to create a culture where all educators see their role as improving student learning. Best practices in formative and summative evaluation of staff are investigated. Students learn methods and laws connected with the selection, hiring, support and dismissal of staff. Particular attention is given to the role of professional development and its implementation, including mentoring for new teachers. Pre-practicum hours of directed field-based training required.

ECA 805 Practicum Seminar I: School Administration Non-Licensure - 3 credits
Students who are not seeking administrative licensure but who wish to complete a school administrative CAGS are required to complete a two-term, non-supervised practicum. This is the first course in the sequence. The student and research advisor will design an individualized plan for completing this practicum requirement, but the College will not provide an on-site supervisor. Students who complete this course will not be eligible for licensure endorsement by Cambridge College.

ECA 805A Practicum Seminar I: Superintendent/Asst Supt. (All Levels) 300 hours - 3 credits
The first of two courses, this is 150 hour supervised practicum in a school setting under the guidance of a practitioner. This practicum allows the development of administrator competencies specific to the superintendent/assistant superintendent position at all levels of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students’ practicum sites and specifically on issues of the superintendency. An Exit Performance Portfolio documents the experiences. Evaluation is based on current standards for licensure.

ECA 805B Practicum Seminar I: Principal/Asst Principal (PreK-6) - 3 credits
This is the first of two 150 hour supervised practicums in a school setting under the guidance of a practitioner and a college supervisor. This practicum allows the development of administrator competencies specific to the principal/assistant principal position at the elementary level of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions in each semester is required during the practicum. The seminars,
combined with the field experience, focus on current issues in the students’ practicum sites and specifically on issues of the principalship. An Exit Performance Portfolio documents the experiences. Evaluation is based on current standards for licensure.

ECA 805C  Practicum Seminar I: Principal/Assistant Principal (5-8) - 3 credits
This is the first of two 150 hour supervised practicums in a school setting under the guidance of a practitioner and college supervisor. This practicum allows for the development of administrator competencies specific to the principal/assistant principal at the middle school level of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the middle school level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions in each semester is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students’ practicum sites and specifically on issues of the principalship. An Exit Performance Portfolio documents the experiences. Evaluation is based on current standards for licensure.

ECA 805D  Practicum Seminar I: Principal/Asst Principal (9-12) - 3 credits
The first of two courses, this is a 150 hour supervised practicum in a school setting under the guidance of a practitioner and college supervisor. This practicum allows the development of administrator competencies specific to the principal/assistant principal position at the high school level. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions in each semester is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students’ practicum sites and specifically on issues of the principalship. An Exit Performance Portfolio documents the experiences. Evaluation is based on current standards for licensure.

ECA 805E  Practicum Seminar I: Supervisor/Director (All Levels) - 3 credits
The first of two courses, this is 150 hour supervised practicum in a school setting under the guidance of a practitioner and college supervisor. This practicum allows the development of administrator competencies specific to the supervisor/director position. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions in each semester is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students’ practicum sites and specifically on issues of the supervisor/director position. An Exit Performance Portfolio documents the experiences. Evaluation is based on current standards for licensure.

ECA 806  Practicum Seminar II: School Administration Non-Licensure - 2 credits
Students who are not seeking administrative licensure but who wish to complete a school administration CAGS are required to complete a two term, non-supervised practicum. This is the second course in the sequence and should be completed in conjunction with the Action Research Project. The student and the research advisor will design an individualized plan, but the College will not assign an on-site supervisor. Students who complete this course will not be eligible for licensure endorsement by Cambridge College.

ECA 806A  Practicum Seminar II: Superintendent/Asst Supt. (All Levels) 300 hours - 2 credits
This is the second of two 150 hour supervised practicums in a school setting under the guidance of a practitioner. This practicum allows the development of administrator competencies specific to the superintendent/assistant superintendent position at all levels of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students’ practicum sites and specifically on issues of the superintendent. An Exit Performance Portfolio documents the experiences. Evaluation is based on current standards for licensure.

ECA 806B  Practicum (Principal/Asst Principal) Pre K-6 300 hours - 2 credits
This is the second of a 150 hour supervised practicum in a school setting under the guidance of a practitioner and college supervisor. This practicum allows the development of administrator competencies specific to the principal/assistant principal position at all levels at the elementary level. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions in each semester is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students’ practicum sites and specifically on issues of the principalship. An Exit Performance Portfolio documents the experience. Evaluation is based on current standards for licensure.

ECA 806C  Practicum (Principal/Ass’t Principal) 5-8 300 hours - 2 credits
This is the second of two 150 hours supervised practicums in a school setting under the guidance of a practitioner and college supervisor This practicum allows the development of administrator competencies specific to the principal/assistant principal position at the middle school level of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the middle school level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions each semester is required during the
practicum. The seminars, combined with the field experience, focus on current issues in the students’ practicum sites and specifically on issues of the principalship.

ECA 806D  Practicum (Principal/Asst Principal) 9-12  300 hours  
- 2 credits
This is the second of two 150 hour supervised practicums in a school setting under the guidance of a cooperating practitioner. This practicum allows the development of administrator competencies specific to the principal/assistant principal at the high school level. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in school administration at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students’ practicum sites and specifically on issues of the principalship.

ECA 806E  Practicum(Supervisor/Director) All Levels 300 hours  
- 2 credits
This is the second of two 150 hour supervised practicums in a school setting under the guidance of a practitioner. This practicum allows the development of administrator competencies specific to the supervisor/director position at all levels of the educational system. The practicum provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact at the district level and its relationship to and impact on state, district, and school policies and practices. Attendance at four seminar sessions is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students’ practicum sites and specifically on issues of the supervisor/director.

ECA 807  Applied Action Research Project: School Administration  
- 1 credit
This course, taken in the student’s last term, requires the student to complete the Action Research Project, a program implementation or curriculum development plan, and present the results in a public presentation to students.

---

**Curriculum and Instruction**

ECC 705   Curriculum Design and Renewal for the 21st Century  
- 3 credits
This course explores the issues and problems that curriculum leaders face when trying to develop, implement, and evaluate curriculum for elementary, middle, and high schools. Participants examine existing curriculum models and approaches to curriculum renewal and discuss current concerns faced by curriculum developers. Special focus is placed on building a knowledge of research on effective approaches to curriculum change; identifying and understanding key issues in curriculum development; developing leadership skills for K-12 school settings; and examining challenges of leadership in curriculum development. Practicum hours of directed field-based training required.

ECC 706   Critical Thinking and Problem Solving - 3 credits
This course explores critical thinking and problem solving as cornerstones of education reform movements and vital skills for students in the new millennium. It offers a unique opportunity for experienced teachers to consider their individual classroom instructional practices in the context of broader political and social change by exploring the work of theorists who emphasize transformative dimensions of reflective judgment in adult learners. A primary focus is the design of instructional formats and learning environments that foster these essential skills. This advanced course examines philosophies, epistemological constraints and methods of assessing higher order critical thinking skills.

ECC 707   Meeting the Challenge of School Restructuring  
- 3 credits
This course focuses on the practice of continual school renewal. Emphasis is placed on building the collaborative relationships necessary to bring about significant school change that leads to school improvement. Participants focus on building strong teams within the school community and on techniques for problem solving and negotiation leading to positive outcomes for all parties. Participants also explore methods for effectively communicating with various stakeholders who impact student learning. Practicum hours of directed field-based training required.

ECC 708   Learning Theories and Instructional Design - 3 credits
This course for experienced educators provides a forum to examine a wide range of learning theories. Students learn instructional designs using a models that is both robust and flexible, making them appropriate for use throughout K-12. Students explore behavioral, cognitive, and constructivist theories, and balance new discoveries with older theories that are still relevant. In addition, students examine developments in collaborative and cooperative learning as they relate to the design process. Using concepts from their own curriculum, students complete an instructional design project. Students then present their projects to the class, explaining their experience with the particular design process used and share the learning theories incorporated into the design. Practicum hours of directed field-based training required.
Alternative Assessment: Theory and Practice - 3 credits
This course explores alternative assessment. It answers the questions regarding what assessment is, what it does and what it measures. Assessment types and strategies are studied along with multiple assessment uses. Students gain a thorough understanding of portfolio techniques, open ended questions and the design, use, and evaluation of performance tasks. They explore assessment procedures such as exhibition, interview, journals, observation, peer assessment, and self-evaluation. Students are encouraged to use with confidence alternative assessment strategies in the classroom as an integral component of the curriculum-instruction-assessment link.

Assessment, Developing and Evaluating Curriculum - 3 credits
All educational leaders regardless of their position within a school system should have the ability to lead instruction. This course provides a better understanding and practices related to the real-world application of instructional leadership in regard to curriculum. The course strengthens the knowledge, skills, and dispositions of educators as instructional leaders, and provides practice in identifying and researching current and emerging curricular issues. Beginning with the premise that instructional leaders are essential in creating thoughtful learning communities of adults and students, this course focuses on the standards of leadership, models of curriculum designs that promote achievement for all students, data to inform decisions about instruction, and current issues that impact teaching and learning. Practicum hours of directed field-based training required.

Educational Leadership Practicum I: Curriculum & Instruction - 150 hours - 3 credits
Prerequisites: ECL800 and ECL801.
This is the first half of a 300-hour individually structured field experience in a school setting that emphasizes a commitment to continued learning. This practicum is completed in the third semester and provides opportunity for experienced professionals to become fully immersed in examining how theory and practice interact in the design, implementation and assessment of curriculum development. Attendance at four seminar sessions is required during the practicum. The seminars, combined with the field experience, focus on current issues in the students’ practicum sites. With a cooperating practitioner, students design learning opportunities focused on their professional development goals for leadership in curriculum and instruction. The seminar advisor must approve the design. Students continue work on their Action Research Project, begun in ECL800 and 801, with a focus on conducting such research at the school site.

Educational Leadership Practicum II: Curriculum & Instruction - 150 hours - 2 credits
Prerequisite: ECC805 and completion of all concentration courses, or permission of the coordinator.
This course is a continuation of ECC805 and requires attendance at four seminar meetings. During this course, students work to complete the Action Research Project.

Applied Action Research Project: Curriculum & Instruction - 1 credit
This course, taken in the student’s last term, requires the student to complete the Action Research Project, a program implementation or curriculum development plan, and present the results in a public presentation to students.

Educational Leadership

Foundations of Social Science Research - 3 credits
The information in this course supports the research design and analysis of data for completion of the Action Research Project. The emphasis is on familiarizing students with methods of research and data analysis. Examples of quantitative and qualitative methods are presented. Students explore techniques used in the identification of research problems, the formulation of hypotheses, the construction and use of data-gathering instruments, the design of research studies, and utilization of statistical procedures. Students will learn commonly used statistical procedures, including introductory computer applications for data analysis. Each student designs an Action Research Project which includes: identifying a topic relevant to his or her field, conducting a literature review, and writing an introduction, a purpose statement, method and procedure. School administrators write a school improvement plan. Special educators write a program implementation plan. Professionals in curriculum and instruction develop a curriculum development plan. Pre-practicum hours of directed field-based training required.

Advanced Graduate Research Seminar - 3 credits
Prerequisite ECL800.
Students begin implementing their research designs that were created and approved in ECL800. They systematically organize inquiries demonstrating connections between theory and professional practice in an organization or school setting. Students design and implement quantitative and/or qualitative research methodologies as they apply research theory to gathering, analyzing, and summarizing data that will inform policy and leadership decision-making in the workplace. Students receive ongoing support during research and have a learning environment that helps them develop their projects successfully. This seminar serves as a learning lab, allowing students to experience peer learning and support. Students discuss their research designs, share resources, questions, ideas, and concerns, and sense one another's progress. Students complete a culminating capstone learning project in the form of an Action Research Project or a program evaluation. Capstone projects are presented to the class for review.

Advanced Leadership - 3 credits
This advanced leadership issues course merges leadership theory with practice to examine leadership roles in educational settings. Using case studies and problem-solving techniques, students actively examine a wide variety of current leadership issues that impact the ability of educational institutions to fulfill their public trust. State and professional educational leadership standards are examined. Topics include practical considerations of collective bargaining, managing student and staff diversity, budgeting, legal issues, and implementing
school reforms from the perspective of an educational leader. Practicum hours of directed field-based training required.

ECL 803 Advanced Technologies in Education - 3 credits
This course focuses on the impact of a worldwide information intensive society on education policy and planning. Students study practical and theoretical issues pertaining to educational technologies. The course surveys practical applications for managing organizational information systems and databases. From a theoretical perspective, it focuses on using new technologies to serve various pedagogical philosophies and the impact of new technologies on instructional design, teaching and school reform. Practicum hours of directed field-based training required.

ECL 804 Advanced Leadership in Policy and Practice - 3 credits
This course explores the educational policy making process at the federal, state and local level. Students examine the educational leader's role in policy design, advocacy and formulation. Simulations and scenarios from class members, practitioners and research are used to inform the creation of educational policy in complex situations involving competing constituencies. Leadership skills are challenged by the opposing perceptions of stakeholders vying for scarce resources and by the need to identify an appropriate theoretical context from which to work toward policy formation to solve problems. Students gain skills in identifying educational issues in the context of practical problems, and to strategize, implement, and assess policy outcomes that directly impact teaching and learning environments. Practicum hours of directed field-based training required.

ECL 807 Applied Action Research Project: Educational Leadership - 1 credit
This course, taken in the student's last term, requires the student to complete the Action Research Project, program implementation or curriculum development plan and present the results in a public presentation to students.

Special Education Administration

ECS 712 Advanced Psycho-Educational Assessment & Education Planning - 3 credits
Students learn to select, use, and interpret appropriate evaluation techniques, instruments, and technologies. A case study approach is used to administer and interpret formal and informal assessments. The results of various evaluative procedures are used to assess and improve the effectiveness of programs and personnel. Students learn to use developmentally appropriate formal and informal assessments for mild and moderate special needs children. Practicum hours of directed field-based training required.

ECS 713 Administration of Special Education Programs - 3 credits
This course uses various service delivery models as they relate to children and young adults with handicapping conditions in a school setting. This course emphasizes facilities and curriculum adjustments, staff roles, methods and content for in-service training, and the use of a team approach. Field trips to observe and evaluate programs may be required. Students become well versed in the requirements of federal and state laws and regulations related to special education. Practicum hours of directed field-based training required.

ECS 714 Collaboration and Consultation Techniques - 3 credits
This course introduces interpersonal communication skills for working with teachers, outside agencies, and families of students from diverse backgrounds. Students are exposed to political structures and regulations for improving a school and/or community. Students review research findings on public relations programs involving educational systems, businesses, industry, and governmental agencies. This course emphasizes the role of the administrator in developing a comprehensive program of school community relations for the administrative unit. Practicum hours of directed field-based training required.

ECS 716 Philosophical and Psycho-Social Foundations of Education - 3 credits
Participants study the basic assumptions underlying educational goals, content, and process. They explore the relationship between knowledge, learners, and metacognition. The functioning of educational institutions in their social and cultural milieu is examined from anthropological and sociological perspectives. A school is viewed as a social system. Students examine the influences upon the educational enterprise of the stratification system, youth cultures, race, religion, language, and values. Practicum hours of directed field-based training required.

ECS 805 Practicum/Seminar I: Special Education Admin. Non-Licensure - 3 credits
Students who are not seeking administrative licensure but who wish to complete a special education administration CAGS are required to complete a two-term, non-supervised practicum. This is the first course in sequence. The student and the research advisor will design an individualized plan for completing this practicum requirement, but the College will not assign an on-site supervisor. Students who complete this course will not be eligible for licensure endorsement by Cambridge College.

ECS 805S Practicum/Seminar I: Special Education Administration (300hrs) Licensure - 3 credits
150 hours. Prerequisite: Completion of all course work. Exit Performance Portfolio is required for credit. Students complete field experience in a school setting under the direction of a licensed administrator of special education. They perform a range of administrative activities under the direction of the on-site administrator. This course facilitates the application of theory to practice in a real life situation. Each student maintains a journal and generates an exit portfolio showing the implementation of requisite standards into practice. Students present their research action plans during Seminar II.

ECS 806 Practicum/Seminar II: Special Education Admin. Non-Licensure - 2 credits
Students who are not seeking administrative licensure but who wish to complete a special education administration CAGS are required to complete a two-term, non-supervised practicum. This is the second course in the sequence and should be completed in conjunction with
the Action Research Project. The student and the research advisor will design an individualized plan for completing this practicum requirement, but the College will not assign an on-site supervisor. Students who complete this course will not be eligible for licensure endorsement by Cambridge College.

**EDL 805 Educational Evaluation and Assessment Systems - 3 credits**

In the current age of accountability, educational leaders are required to be more skilled in assessment and evaluation than their predecessors were* (Williamson & Redish, 2009, p. 77). Educational leaders in today's educational world, irrespective of level are expected to develop assessment and accountability systems to monitor student progress and monitor the impact of educational programs through the evaluation processes embedded within the accountability system (cf. ELCC Standard 2). The same applies for management and operational systems (ELCC Standards 3 and 4). To paraphrase comments regarding knowledge management in the Malcolm Baldrige National Quality Award Education Criteria (2009-2010), in simplest terms, how knowledge is generated, used, accessed, and managed acts as core competencies for the institution’s “brain center,” particularly in terms of aligning programs and offerings with strategic objectives (cf. p. 41). This course provides students with a detailed background on assessment evaluation processes and techniques in order to be able to implement, maintain, generate, and analyze data to create meaningful information that assists in institutional decisionmaking and provide assurance that performance expectations are met.

**EDL 810 Transformative Educational Leadership - 3 credits**

This course surveys a range of leadership theories that have influenced and continue to influence American society in various ways. The course provides opportunities to understand and apply leadership principles to influence educational decisions that advance social justice. This course challenges leaders to serve as catalysts for the establishment of learning communities designed to promote a sense of mutual care, social responsibility, and moral courage. Students will study change and how to anticipate, understand, plan and implement change to achieve goals. This course will build leadership capacity and enable the creative leader to use his or her talents to help empower others to identify and use their talents. Students will read both primary source materials and critically analyze leadership theories.

**EDL 815 Instructional & Curricular Leadership - 3 credits**

In today’s world, Instructional and curricular leadership is the responsibility of all, administrators and teachers. Teachers, other educational professionals, and administrators need a strong understanding of and set of skills encompassing many of the activities previously thought to be only the responsibility of administration such as program and teacher evaluation, the formulation of learner outcomes and the evaluation of how these outcomes are met, research informed instruction, community partnering and relationships, and advocating for teacher learning. This course focuses on providing students with a background in teaching as well as administration those competencies that allows them to be effective leaders within the classroom, the school, the district, and the community.

**EDL 820 Collective Bargaining & Conflict Resolution - 3 credits**

School leaders report that much of their interaction takes the form of problem solving, conflict resolution and negotiating. This course presents the principles necessary for effective behaviors in these areas in both formal and informal situations. In addition, the role of the administrator in collective bargaining and in the interpretation and maintenance of contract and personnel policies is addressed. Topics addressed include: school/community culture, conflict resolution, collective bargaining and contract maintenance (grievance, mediation and arbitration), as well as principles of power, justice and fairness. The course will examine how collective bargaining may be used as a tool for advocating socially-just policies and practices and balancing conflicting interests in pursuit of fairness and equity.

**EDL 825 Leading Learning Organizations and Adult Learners - 3 credits**

Ever since Senge’s seminal work came out (1990) on learning organizations, one of the key aspects of leadership preparation is learning the intricacies of what the term actually means. In an educational setting, the concept of learning organization can mean slightly different things to different people based on the focus of attention. This course explores the characteristics of learning organizations emphasizing the role teachers and other professionals play within the educational

---

**Doctor of Education Courses**

**ECS 806S Practicum/Seminar II: Special Education Administration (Licensure) - 2 credits**

150 hours. Prerequisite: Completion of all course work. Exit Performance Portfolio is required for credit. Students complete field experience in a school setting under the direction of a licensed administrator of special education. They perform a range of administrative activities under the direction of the on-site administrator. This course facilitates the application of theory to practice in a real life situation. Each student maintains a journal and generates an exit portfolio showing the implementation of requisite standards into practice. Students present their research action plans during Seminar II.

**ECS 807 Applied Action Research Project: Special Education Administration - 1 credit**

This course, taken in the student’s last term, requires the student to complete the Action Research Project, program implementation or curriculum development plan and present the results in a public presentation to students.
system. Working with adult learners requires different approaches and thinking regarding how they learn and perform their duties; therefore, prominence is given to how to create a culture of learning that leads to excellence. Creating and maintaining a learning culture takes great effort and a special commitment on the part of all within the educational system, which is why specific techniques and theories are presented in detail.

EDL 830 Educational Leadership and Social Justice - 3 credits
Schools have long been regarded as a key instrument in the struggle for social justice in American life. Horace Mann described public schools as the great “balance wheel in the social machinery,” and public schools were founded on the belief that equal educational opportunity could preserve social harmony and bring to fruition democratic goals. This course asks how well the schools and the societal values that schools mirror have accomplished this task, while exploring ways that leaders can more effectively develop strategies to challenge the roots of oppression and injustice. We will discuss what the expression, “all children can learn,” means in theory and practice, and we will analyze organizational, social, and economic policies to determine how they support or undermine this commonly held belief. We will discuss how school leaders can collaborate with parents, community agencies and other institutions to work for social justice, and we will examine ways leaders can. Finally, we’ll consider the challenges faced by school leaders as they apply policies and resources so that all children have equal opportunities, expectations, and encouragement to learn.

EDL 840 Social and Cultural Foundations of Educational Leadership - 3 credits
This course will support students’ understanding of and engagement in the process of becoming informed educational leaders and effective scholar-practitioners. Through sustained investigation and dialogue grounded in the philosophical, social science, and historical literature on American schooling, the class will examine the changing purposes of schooling and the evolving roles of educational leaders. Readings of classic and contemporary texts will align with substantive in-class discussions and written analysis to prepare educational leaders to view schools within the larger context of American ideological commitments and political realities. Additionally, this course serves to support students’ dissertation scholarship through a close examination of ideas and events that are foundational to the forming of theoretical and conceptual frameworks for a variety of research areas.

EDL 850 Contexts for Qualitative and Quantitative Research Methodologies - 3 credits
Educational leaders must be able to make sound decisions based on meaningful data and proven research. In this course students learn the quantitative and qualitative research skills needed in today’s climate of school accountability. Students will review the core strategies of both quantitative and qualitative methodologies and consider how these strategies may be used to inform school/district decision making. Students will study the meaning of data-driven decision making. Students will be introduced to the concept of research as a powerful force for achieving social justice.

EDL 860 Qualitative Research Methods and Design - 3 credits
Prerequisite: EDL 850. This course introduces first year doctoral students to the foundations and methodologies of qualitative research. Course topics include philosophical underpinnings of qualitative research; planning for a qualitative research project; negotiating entry to the field; ethics of conducting research, data collection and analysis techniques (i.e. interviewing, observations, content analysis, focus groups); and writing/presenting qualitative research. The course includes field based exercises and assignments involving participant observation and interviewing. It also includes the analysis and presentation of qualitative research data.

EDL 870 Quantitative Research Methods and Design - 3 credits
Prerequisite: EDL 850. This course is designed to introduce first year doctoral students to the quantitative research skills required of effective, executive educational leaders. Students study the descriptive and inferential statistical methods often used in research in education. Areas of study will include sampling, probability, variables, reliability and validity, confidence intervals, hypotheses testing, correlation and regression. Students will be introduced to data analysis techniques using a computer and statistical software package (e.g., SPSS). The goals of the course are to: provide students with the analytical tools necessary to become effective, critical consumers of educational research; and to enable students to oversee and supervise staff in the preparation, development, and dissemination of evaluative research.

EDL 880 Advanced Qualitative Research - 3 credits
This course is designed for second year doctoral students who have identified qualitative research as the appropriate methodology for their dissertations. This seminar style course will delve in greater depth into specific qualitative traditions selected by each student for his or her dissertation. Students will read primary source methodology literature, while exploring the foundations of the selected methodology and the scholarly debates surrounding the evolution of underlying philosophies and techniques. Students will also explore in-depth qualitative techniques and examine how specific qualitative traditions influence the nature of the research problem, the articulation of research questions, and the application of common qualitative research techniques. Data analysis will be explored in depth, and students will be expected to demonstrate competence in advanced analysis techniques and writing. The course includes field based exercises and assignments, culminating in the development of a methodology section for their dissertation proposal. Prerequisite: EDL 860.

EDL 890 Advanced Quantitative Research - 3 credits
This course is designed to provide students who are pursuing research or doing their dissertation based on quantitative research techniques. Students who are interested in pursuing mixed methods research with a fair amount of quantitative analysis are also encouraged to take this course. The course begins with a review of descriptive and inferential statistics, ANOVA and MANOVA, linear regression, and other techniques presented in EDL 870, the pre-requisite for this course. The focus is to provide doctoral students with an advanced understanding of these statistical techniques to allow for a better understanding of which technique to select and better understand the analysis that results from utilizing these techniques when conducting your research.
EDL 891  History: Education Policy and Reform - 3 credits
This course provides historical perspectives on the social forces and ideological commitments that shape contemporary educational issues and problems. In so doing, the course offers students as future leaders a deeper sense of context and process when faced with the prospect of educational policy change. While providing a basis for understanding the historical development of education policy and reform efforts in terms of political, social, economic, and ideological change, the course provides an introduction, too, to historical research practices and historiographical issues that pertain to American education. Numerous opportunities are provided for deeper insights into the issues of educational exclusion/inclusion of various groups (cultural, racial, religious, ethnic, gender, national, disabled), as well as the social justice implications that accrue from a thorough examination of our educational past.

EDL 892  Systems Approaches to Educational Leadership - 3 credits
This course will combine elements of organization, leadership, decision making and change theory. A focus will be on the identification of the major teaching and learning systems of schools and school districts and the related complex network of subsystems. An educational leader must be able to identify major and support systems all of which exist in social, economic, legal, cultural and political contexts. Positive transformation of education is a function of leadership style, communications, group dynamics, motivation, power and the change process. The school leader's knowledge of the school system and the outside environment as a whole will inform decision making that is sensitive to all levels of the educational organization.

EDL 893  School Finance and Fiscal Management - 3 credits
This course is designed to provide a comprehensive review of economic and financial management issues in p-12 educational systems. The course will review traditional sources of funding for schools (local, state and federal) and nontraditional sources such as foundations and school/community partnerships. The major emphasis will be on budget administration and facility management, applying these issues to different educational environments and concerns impacting educational systems in this current social and political environment.

EDL 894  Policy, Power, and Politics Seminar - 3 credits
This course provides an advanced discussion of discipline based frameworks to analyze policy formation, steering, and impacts. The course emphasizes purposes, processes, contents and outcomes of policy and power relationships through the context of political interactions in the education sector. The perspectives are selected based on currency (timeliness), pervasiveness of the issues impacting education, how the interpretation of policy impacts the status quo as well as frames alternatives for change, and provides insights as to how educational leaders will need to respond in order to influence policy and act as advocates for students and staff. Therefore, the course considers the power and limits of policy and ways people in different positions inside and outside the educational systems/institutions might influence policy.

EDL 895  Ethical Leadership in Education Systems - 3 credits
Educational leaders are faced with ethical dilemmas and difficult decisions on a daily basis as they work to balance the educational needs of students with the interests, influences and demands of multiple stakeholders within schools and communities at large. The need for ethical leadership in educational organizations and communities has never been greater. Through scholarly reading, case studies, discussion and other formats, this course provides doctoral students with the opportunity to discover how educational praxis and social justice can provide a powerful moral compass for educational leaders facing complex demands in school organizations, as well as at the local, state and national level.

EDL 896  Special Topics - 1-4 credits
This course is for students who wish to pursue special research projects in collaboration with a faculty member. It may only be taken with the approval of the program director. Project requirements are based upon agreement between the student and faculty member with whom the student will be working.

EDL 896A  Special Topics: Contemporary Issues in Education - 1-4 credits
This course is for students who wish to pursue special research projects in collaboration with a faculty member. It may only be taken with the approval of the program director.

EDL 896B  Special Topics: Quantitative Systems - 1-4 credits
This course is designed for students who are pursuing research and/or doing their dissertation based on quantitative research techniques. Students who are interested in pursuing mixed methods research with a fair amount of quantitative analysis are also encouraged to take this course. The course addresses specific needs requested by the student to help complete the student’s dissertation project or quantitative research skills. Doctoral students will be provided with an advanced knowledge base of selected statistical techniques to allow for a deeper understanding of which technique(s) to select, and to better understand the analysis that results from utilizing these techniques when conducting their own research.

EDL 900  Introduction to Doctoral Studies - 1 credit
This course serves as an introduction to the dissertation process for all Cambridge College doctoral students. It provides an opportunity for students to explore both the big picture of what it means to be a doctoral student and the specifics of the doctoral process at Cambridge College. This course is meant to complement doctoral coursework in general and the doctoral seminar in particular. Readings, seminars, and online coursework (individual and collaborative) will provide the student with the opportunity to develop a solid grounding for future research, reflection, and action in their doctoral studies.
EDL 910  Doctoral Research Seminar One: Strategies and Tactics - 3 credits
The goal of this course is to introduce the new doctoral cohort to the realities that are part of the transformative doctoral experience. Although previous degrees were “earned,” one “takes” a doctoral degree, reflecting the transformation from student to practitioner-researcher through a three-year experience that culminates in the completion of a research project that makes an original contribution to educational praxis. In support of this journey, this course introduces the student to a variety of topics, including but not limited to understanding scientific and social scientific research paradigms; tools of inquiry and search strategies; research problems that matter; sorting through the social scientific body of literature relevant to researchable educational problems. The course will be grounded by an interactive pedagogic discussion approach based on advance reading of assigned text by the students, focused summation of main points by study groups and professors, and continuing dialogue grounded by questions brought by class members and professors.

EDL 920  Doctoral Research Seminar Two: Research in the Public Interest - 1 credit
(formerly Dissertation Seminar II) This course helps students understand and appreciate the difference between social advocacy and social research in the public interest. The first step that we will be to examine the history of educational research and how educational leadership research came to the place we are today among other academic niches. Education and the study of education have historically occupied a contentious and shifting ground between social science and the humanities, and the early 20th century history of educational research as a sub-discipline indicates that it was prone to emulate the sciences in the early days in order to carve out an area of academic respectability in academe. This course is designed to allow doctoral students to continue exploration of potential topics leading to a researchable question that may become the basis for the dissertation. It also introduces discussion of the “Why bother?” questions that relate to purpose and significance of research: 1) are you considering a topic that has value as measured by its potential contribution to the public interest, 2) does your research interest have social justice implications?

EDL 930  Doctoral Research Seminar Three: Reflective Inquiry as Stance - 1 credit
Self-reflection and reflection on experienced phenomena as the starting point of practitioner research are the foci of this seminar. Based in epistemology and ontology, this course assists the student in discovering how he or she perceives and understands experience, and then frames it for use in practice, praxis, and research. With this self-knowledge the student develops a position—a stance—from which he or she will initiate dissertation research. Prerequisite: 920.

EDL 940  Prospectus Development for Doctoral Candidacy - 3 credits
In this course, students will pull together theory and methodology from their first year of study and will develop a prospectus for their doctoral dissertation. The prospectus will be comprised of an articulated and organized plan for the dissertation that includes the introduction with research problem, preliminary research question(s), significance for educational leadership, and social justice implications of the proposed research. The prospectus will also include a review of the most important scholarly research and a preliminary discussion of methodology, with a rationale for the methodology selected. The prospectus will become the basis for the dissertation proposal and for the selection of the doctoral chair and committee.

EDL 950  Dissertation Proposal Seminar I—Fall (Asynchronous and In-Person) - 2 credits
This course is for the student who requires additional time to complete the dissertation after EDL 940.

EDL 960  Dissertation Proposal Seminar II—Fall (Asynchronous and In-Person) - 2 credits
A dissertation proposal is generally considered as the bedrock for doctoral research, development and writing of an academic dissertation. It functions as a “work plan, justification for the study, evidence of ability, request for commitment, contract, and as partial dissertation draft, depending on the kind of inquiry. The purpose of this seminar is therefore to guide students to identify and explain the components of a dissertation proposal; assist them in constructing the needed elements and guide them in combining the pieces to produce a complete and convincing proposal based on their areas of study” (David & Nick, 2005). The seminar is specifically for those doctoral students who have completed their prospectus and have been moved to doctoral candidacy. The course will be evaluated through class participation, and a final draft proposal based on their dissertation topics.

EDL 970  Dissertation Research and Writing - 4 credits
This course is for the student who requires additional time to complete the dissertation

EDL 980  Dissertation Completion and Defense - 4 credits
This course is for the student who requires additional time to complete the dissertation after EDL 940.
School of Management

The SCHOOL OF MANAGEMENT offers graduate programs that develop managerial skills and knowledge to prepare students for improved management performance, increased advancement opportunities, and more effective leadership in private, public and not-for-profit organizations. Students with professional or technical experience expand their managerial training as they assume leadership positions. Those with more limited formal experience gain valuable managerial and leadership skills and competencies to enhance their opportunities for potential growth and advancement.

Mission — The School of Management at Cambridge College seeks to develop aspiring and practicing managers who are values-driven and adept at working with people and organizations in a diverse global world.

Academic programs — The School of Management offers the Master of Business Administration (MBA), the MBA Healthcare, and Master of Management (MM) degree with several concentration options; as well as graduate certificate options.

Adult Learning
Students bring their unique experiences of management in the workplace, home, and community to the classroom and examine them using academic perspectives, producing a very powerful integration of management theory and practice.

Diversity and Collaborative Learning
The student body and learning environment are highly diverse by design. In stimulating, interactive classroom environments, students learn how to help people with diverse skills and backgrounds work together effectively as teams; and this collaboration makes organizations and businesses more successful.

Admission, Assessment and Orientation
Admission counselors give applicants an overview of the College’s academic programs and assist with the application process. Applicants will meet with an admission committee once they have submitted all required application materials. Once accepted, students must complete required assessments to help determine their individual program of study. A staff advisor is available to assist students until they have been assigned a faculty advisor.

A writing assessment is conducted to ensure that entering students (degree candidates and certificate students) demonstrate graduate level English language communication and writing skills. If assessment indicates need, additional coursework will be required. Tutoring services are also provided.

Orientation — New students are required to attend School of Management Orientation, held just before each term begins.

Advising, Leadership Seminar and Capstone
The seminar leader is the student’s academic advisor for the duration of the program and has responsibility for advising the student on academic planning, signing off on leaves of absence and graduation clearance. The advisor schedules periodic individual meetings with the student.

Leadership Seminar — The seminar is a key feature of graduate study at the School of Management. Each cohort of students stays with their seminar leader/faculty advisor throughout the four-term seminar/capstone series. They share and apply their learning from the workplace and management courses. Students learn to assess their own strengths and abilities, and create academic and professional development plans that build teamwork, leadership, and communication skills.
Capstone Seminar — The Graduate Management Capstone Seminar provides support for students’ work on the Capstone project (formerly Independent Learning Project). The Capstone project is undertaken towards the end of the student’s program, and after specific program core requirements have been met. The Capstone project enables students to demonstrate their learning from courses and seminars through a designed application-oriented experience.

Practicum/Internship
Students in a master’s degree program who have limited work experience in their desired career field may choose to take one or more practicum/internship courses as electives, after they have completed two terms of study in the program. Students are responsible for identifying the job or position, and must consult with their advisor regarding the relevance of the position for their program of study. Students and their advisor work out the details of their practicum course contract which must approved by the dean. International students who opt for practicum/internship courses must meet all regulations for authorized Curricular Practical Training (see International Students).

Course Delivery and Scheduling
School of Management courses are delivered in a number of modes. Some courses meet weekly in the afternoons or evenings over the duration of the term. Others are available in a weekend intensive format, meeting intensively during specified weekends. Some courses are offered completely online with no class meetings, while others are available in a hybrid or blended learning format with a combination of classroom interaction and online work. Some courses are available in more than one mode, but not all courses are available in all modes.

Course Waivers
MBA — Students with a bachelor's degree in business from any regionally accredited school will be permitted to waive the foundations courses in the MBA program if they have previously completed equivalent courses within the last seven years with a grade of B or better. Such waivers will reduce the number of credits they must complete to earn the MBA degree.

MM — In the MM program, students may be permitted to substitute more advanced courses for 500-level courses in the MM program if they have previously completed equivalent courses within the last seven years with a grade of B or better. Such waivers will not reduce the number of credits the students must complete to earn the MM degree. Requests for waivers must be made to the dean of the School of Management no later than the end of the student’s first term in the MM program.

Advanced Standing
Graduates of the Cambridge College BS in Management Studies, Managerial Accounting or Health Care Management who matriculate into the MM or MBA programs may qualify for advanced standing in the graduate program and thus reduce the number of credits to be taken by a maximum of six credits. They may qualify to place out of one or two courses in the management core curriculum provided that they have:
- Completed their bachelor’s degree within the past seven years.
- Have completed equivalent upper level coursework with a grade of B or better.
- Earned a minimum GPA of 3.0 in the bachelor’s program.

Students applying for advanced standing must complete an Application for Advanced Standing and submit it along with their application for admission into the degree program. More details regarding course equivalencies can be obtained from the chair of the undergraduate management programs or the dean of the School of Management.

This program will no longer be available starting from the Fall of 2017.

Professional Development Certificate Option
Students desiring only coursework focused in a specific field of study may earn a certificate in one of several areas. Certificate courses, taken within three years of matriculation, may be accepted into a degree program if they meet current requirements. An earned bachelor’s degree is required to transfer graduate credit into a degree program. (See also Transfer of Credit).

Sigma Beta Delta Honor Society
Master of Management students with GPAs in the top 20% of their graduating class, and who show evidence of leadership or community service are eligible for induction into Sigma Beta Delta, the national honor society for business and management students.

Management Education for Organizations
Academic programs and courses may be tailored to meet the needs of private and public organizations. An organization may select courses from the catalog to meet its needs for staff training and/or to serve its mission and clients. We can focus the course content and activities on the organization’s particular situation, or more broadly, as needed.
Master of Business Administration

45-54 credits • 5 terms full-time

Program Description — The Master of Business Administration prepares students with the practical skills and academic knowledge-base that are essential for meaningful business and managerial careers. Working managers and emerging professionals will earn the degree that is the recognized workplace standard for leadership and management, and the competencies to survive and thrive in today’s complex and uncertain business or organizational settings. Students will learn to deliver value by using business intelligence and analysis to make decisions, implementing projects through collaboration and teamwork, and exercising leadership to create change.

Learning Outcomes — Graduates of the program will be expected to: be capable of leading themselves and others, demonstrate critical and problem-solving skills, be skilled in the analysis and strategic use of financial data and tools, operate strategically within the framework of markets, technology and resources, demonstrate cultural competence in diverse organizational settings, effectively manage change, complexity and uncertainty, and demonstrate professional integrity.

Careers — Management and leadership positions in business, non-profit and government organizations. Jobs include: sales manager, marketing analyst or manager, business analyst, project manager, human resources manager, general manager.

General Prerequisites
Graduate level English language communication and writing skills. Coursework required in first term(s) if writing assessment indicates need (credits do not count towards degree).

MMG501E Business Communication
MMG505 Graduate Writing

Foundation Courses ......................... 9 credits
Take in first term(s) or demonstrate competency through tests/assessments or prior undergraduate or graduate courses with grades of B or better from a regionally accredited institution. If waived, credits required for degree are reduced.

MMG506 Quantitative Analysis for Managers
MMG514 Accounting for Managers
MMG515 Economics for Managers

Seminar & Capstone ......................... 9 credits
MMG500 Graduate Management Orientation Seminar (0 credit)
MMG691-693 Leadership Seminar I-III (3 terms @2 credits) Must be taken in sequence with same seminar leader.
MMG694 Graduate Management Capstone Seminar (preqs: MMG691-693, MMG511, 512, 520, 725; and no more than 12 credits remaining to finish program)

MBA Core Courses ......................... 27 credits
MMG511 Foundations of Management
MMG512 Organizational Environment
MMG520 Financial Accounting (preq. MMG514)
MMG522 Information Systems in the Organization

(All courses @ 3 credits except as noted.)
Master of Business Administration/Health Care

45-54 credits • 5 terms full-time

Program Description — The Master of Business Administration/Health Care prepares students with the practical skills and academic knowledge-base that are essential for managerial careers in health care. Working managers and emerging professionals will earn the degree that is the recognized workplace standard for leadership and management, and the competencies to survive and thrive in the changing world of healthcare. They will gain an in-depth knowledge of the issues and challenges facing healthcare today. Students will learn to deliver value by using business intelligence and analysis to make decisions, implementing projects through collaboration and teamwork, and exercising leadership to create change. Work experience in healthcare is required to enter this program.

Learning Outcomes — Graduates of the program will be expected to: be capable of leading themselves and others, demonstrate critical and problem-solving skills, be skilled in the analysis and strategic use of financial and other data and tools, operate strategically within the framework of markets, technology, regulation and resources, demonstrate cultural competence in diverse organizational settings, effectively manage change, complexity and uncertainty, and demonstrate professional integrity. They will understand health care systems and processes, ethical and public policy issues in health care and know how to manage quality, safety and cost-effectiveness in health care delivery.

Careers — Management and leadership positions in health care organizations such as hospitals, public and private health agencies, insurance companies and other health care businesses.

General Prerequisites
Graduate level English language communication and writing skills. Coursework required in first term(s) if writing assessment indicates need (credits do not count towards degree).

MMG501E Business Communication
MMG505 Graduate Writing

Foundation Courses .................................. 9 credits
Take in first term(s) or demonstrate competency through tests/assessments or prior undergraduate or graduate courses with grades of B or better from a regionally accredited institution. If waived, credits required for degree are reduced.

MMG506 Quantitative Analysis for Managers
MMG514 Accounting for Managers
MMG515 Economics for Managers

Seminar & Capstone .............................. 9 credits

MMG500 Graduate Management Orientation Seminar (0 credit)
MMG691-693 Leadership Seminar I-III (3 terms @2 credits)
Must be taken in sequence with same seminar leader.

MMG694 Graduate Management Capstone Seminar
(preqs: MMG691-693, MMG511, 512, 520; MHC720, MHC725; and no more than 12 credits remaining to finish program)

MBA Core Courses .............................. 18 credits

MMG511 Foundations of Management
MMG512 Organizational Environment
MMG520 Financial Accounting (preq. MMG514)

MMG522 Information Systems in the Organization
MMG525 Statistical Decision Techniques for Managers
(preq. MMG506)

MMG710 Project Management

Health Care Core Courses .......................... 9 credits

MHC720 The U.S. Health Care System
MHC725 Financial Management in Health Care (preq. MMG514)
MHC750 Health Care Policy & Ethics

Specialization ................................. 9 credits

Health Care Management — choose three courses

MHC710 Risk Management in Health Care
MHC730 Health Care Information Systems (preq. MMG522)
MHC740 Strategic Planning in Health Care
MHC741 Emergency & All-Hazards Preparedness in Health Care
MHC762 Nursing Home Administration

Health Care Informatics
Health/Medical information systems and software; IT project management; data and information management; use of data for analysis and decision-making. Jobs include IT and information systems management and analysis in health care organizations and facilities.

MHC730 Health Care Information Systems (preq. MMG522)

MHC732 Life Cycle of Information Systems
(preq. MMG522, MHC730)

MHC733 Data, Knowledge & Information Management
(preq. MMG522, MHC730)

Admission requirements:
• Bachelor’s degree and other School of Management requirements.
• Three-five years health care work experience required (Informatics: or information technology experience).

Cambridge, MA • 617.868.1000 • www.cambridgecollege.edu
Accelerated BS to MBA
Both degrees: 120+33 credits  •  5 years full-time

Program Description — The Accelerated Bachelor’s To Master Of Business Administration for Cambridge College undergraduate students allows qualified students to earn both a bachelor’s and a master’s degree within a reduced time frame and at a reduced cost. The program is open to students in the B.S. in Management Studies, Managerial Accounting and Health Care Management degree programs.

Students with 90 or more completed undergraduate credits and a GPA of 3.5+ may enroll in up to 12 credits of pre-specified graduate-level core courses in the MBA program. This coursework, if completed with a grade of B or better, is applicable toward both the undergraduate degree requirements and the master’s degree. These graduate courses will be billed at the undergraduate tuition rate when taken by undergraduate students who have been accepted into the accelerated program.

Students will be granted their bachelor’s degree when they complete all of the undergraduate requirements; they are undergraduate students until that point. They will be expected to enroll in the graduate program in the term following their undergraduate program. Students will be expected to maintain their strong academic record as they progress through the graduate program.

BS in Management
Undergraduate students who may wish to apply for the Accelerated MBA should work closely with their program chair, and file an Intent to Apply form when they have completed 60 credits.

Complete 90 Credits, including:
All general education courses ................................. 42 credits
Undergraduate management major courses .............................. 21 credits minimum
Accelerated program prerequisites ................................. 9 credits
BSM300 Economics for Managers
BSM330 Financial Accounting
BSM333 Statistics for Business

Apply to the School of Management for the accelerated MBA. Accepted students will be allowed to take the four specified MBA core courses below:

Final 30 Credits
Remaining undergraduate major courses and electives  . 18 credits

MBA Core Courses ......................................................... 12 credits
MMG512 Organizational Environment
MMG522 Information Systems in the Organization
MMG525 Statistical Decision Techniques for Managers
MMG740 Human Resources Management (for MBA)
or MHC720 The U.S. Health Care System (for MBA/Health Care)

Master of Business Administration
Upon matriculating into the graduate program, students will be assigned a graduate advisor who will monitor their progress and work with them to design a program of study that will permit them to complete the remaining credits for the MBA within three terms/one year. A typical program may follow this outline:

Term 1
MMG691 Leadership Seminar I ...................................... 2
Three MBA courses .................................................... 9

Term 2
MMG692 Leadership Seminar II ...................................... 2
(new) Directed Study: Pre-Capstone Seminar .................... 2
Three MBA courses .................................................... 9

Term 3
MMG694 Graduate Management Capstone Seminar ............. 3
Two MBA courses ....................................................... 6

See MBA program charts for full program requirements.

Admission requirements:
Apply to the School of Management as soon as 90 or more credits have been successfully completed in a Cambridge College bachelor’s degree in management, including:

● All general education courses.
● 21 credits of the undergraduate management major courses.
● Accelerated program prerequisites.
● Undergraduate GPA of 3.5+ based on a full record transcript.

● Written recommendations are required from the student’s undergraduate academic advisor and program chair.
● Students must also meet all admission requirements of the MBA program/specialization to which they are applying.

(All courses @ 3 credits except as noted.)

For Cambridge College students doing a bachelor’s degree in Management, Accounting, or Health Care Management
Program Description — The Master of Management program provides leadership and management skills and introduces the best current practices in private, public and non-profit organizations.

The curriculum combines core management foundation coursework with concentration options and electives that allow students to specialize. The application of theory to management practice is emphasized. A required management seminar series focuses on the development of "people management" skills and the integration of knowledge acquired throughout the program.

Learning Outcomes — Graduates will:
- Develop strong communication, analytical, research and decision-making skills.
- Learn to manage themselves and their own professional development, and to manage and lead others.
- Have the ability to use and understand the role of technology in organizations.
- Learn to manage human, financial and informational resources.
- Understand how to foster change and innovation and value and promote diversity in organizations.
- Understand the global, social and environmental context of management and the importance of ethical and socially responsible decision-making.

Careers — Graduates are prepared for advancement into supervisory and management positions in business, non-profit and government organizations. Management career opportunities include jobs in human resources, retailing, marketing, financial services, information technology, health care, non-profit management, organizational development, consulting, and training and development.

General Prerequisites
Graduate level English language communication and writing skills.
Coursework required in first term(s) if writing assessment indicates need (credits do not count towards degree).

MMG501E  Business Communication
MMG505  Graduate Writing

Seminar & Capstone ...............................9 credits
MMG500  Graduate Management Orientation Seminar (0 credit)
MMG691-693  Leadership Seminar I-III (3 terms @2 credits)
Must be taken in sequence with same seminar leader.
MMG694  Graduate Management Capstone Seminar
(preqs: MMG691-693, MMG511, 512, 514; and no more than 10 credits remaining to finish program)

MM Core Courses .................................12 credits
MMG511  Foundations of Management
MMG512  Organizational Environment
MMG514  Accounting for Managers
MMG517  Research Methods for Managers

Electives or Concentration .......................16 credits
Choose graduate management electives or a concentration to meet career and academic goals. (Health care management and informatics courses may not be taken as electives outside those concentrations.)

Concentrations
- Organizational Leadership
- Non-Profit & Public Management
- Information Technology Management

Health Care Concentrations—must be chosen and approved at time of admission
- Health Care Management
- Health Care Informatics

Practicum course may be taken with special permission.

Admission requirements:
- Bachelor's degree and other School of Management requirements.
- Three-five years of work experience recommended.
  Health Care concentrations: 3-5 years of health care experience required (Informatics: or information technology experience).

Online courses: No more than 49% of your Cambridge College courses may be fully-online. International students may take only one fully-online course in any term.

(All courses @ 3 credits except as noted.)
Master of Management Concentration or Certificate

Health Care Management
16 credits • accepted in MM and MBA

Program Description — The Health Care Management concentration helps health care professionals seeking career advancement gain the skills needed for leadership positions as managers or administrators. The core MM curriculum is combined with health care courses to provide students with comprehensive management and leadership skills as well as knowledge needed to solve problems in a variety of health care settings. The program is taught by health care practitioners who help students integrate theory and practice. Work experience in health care is required to enter this program.

Learning Outcomes — In addition to general MM outcomes, graduates will:
- Comprehend the global, social and environmental context of management and the importance of ethical and socially responsible decision-making.
- Understand health care systems and processes.
- Acquire a systems perspective to understand and analyze health care issues.
- Bring to bear a problem-solving orientation to issues of quality and cost-effectiveness in health care delivery.
- Understand ethical and public policy issues in health care.

Careers — Graduates are trained for advancement into supervisory and management positions in health care. Career opportunities include jobs in hospitals, clinics and outpatient departments, nursing homes and home health care agencies, physician practices, public health agencies, community health centers, and health insurance companies.

Required courses
MHC720 The U.S. Health Care System (required first course)
MHC750 Health Care Policy & Ethics

Choose three elective courses
MHC710 Risk Management in Health Care
MHC725 Financial Management in Health Care (preq. MMG514)
MHC730 Health Care Information Systems (preq. MMG522)
MHC740 Strategic Planning in Health Care
MHC741 Emergency & All-Hazards Preparedness in Health Care

Choose one directed study (1 credit)
DMG506 Essentials of Accounting
DMG605 Grant Writing
MHC721 Introduction to Health Care Disparities
DMG608 Emergency Management (not to be taken if you are taking MHC741)

(All courses @ 3 credits except as noted.)

Master of Management Concentration or Certificate

Health Care Informatics
16 credits • accepted in MM and MBA

Program Description — The Health Care Informatics concentration addresses key area of expertise in the emerging field of health care informatics including the fundamentals of health information systems and software, project management, and data, knowledge and information management. A required field work project enables students to demonstrate their skills in a work setting. Work experience in health care or information technology is required to enter this program as it builds on the student's prior knowledge. Faculty members are practitioners who work in the health care informatics field and introduce students to current trends and best practices in the field.

Learning Outcomes — In addition to general MM outcomes, graduates will:
- Gain an understanding of the fundamentals of computer information systems and systems analysis.
- Become familiar with health information systems and software.
- Obtain skills in project management.
- Acquire the ability to work with data, knowledge and information in health care settings.
- Gain the ability to support successful informatics initiatives within their organizations.

Careers — Graduates are trained for advancement into supervisory and management positions in business, non-profit and government organizations. They will be poised to work as practice workflow re-engineers, clinician/practitioner consultants, EMR implementation and support specialists, and health information technology project managers. Career opportunities include IT management, business management, systems analysis, health care organizations and facilities.

Required courses
MMG522 Information Systems in the Organization (required first course)
MHC730 Health Care Information Systems (preq. MMG522)
MHC732 Life Cycle of Information Systems (preq. MMG522, MHC730)
MHC733 Data, Knowledge and Information Management (preq. MMG522, MHC730)
MMG710 Project Management Concepts & Practices
MHC735 Health Care Informatics Field Work (1 credit) (preq. all concentration courses)

Admission requirements
- Bachelor’s degree and other School of Management requirements.
- 3-5 years of health care experience required (Informatics: or information technology experience).

MM Concentration: Personal interview with the SOM Admissions Committee and/or program chair, dean or regional site director. See also MM admission requirements.

Certificate: Approval of the program chair, dean or regional site director.

If writing assessment indicates need, additional coursework may be required.

Online courses: No more than 49% of your Cambridge College courses may be fully-online. International students may take only one fully-online course in any term.
Master of Management Concentration or Certificate

Information Technology Management
16 credits • accepted in MM and MBA

Program Description — The Information Technology Management concentration provides understanding of core information systems principles and the role of the systems professional and IT within an organization. Students get an overview of hardware, software, file/database concepts, systems analysis and design methodologies. They will acquire basic project management skills.

Learning Outcomes — In addition to general MM outcomes, graduates will:
- Understand how information technology may be used efficiently and effectively in the business environment.
- Be able to manage IT projects.
- Acquire the tools needed to manage IT departments.
- Be able to utilize technology to more efficiently manage functional areas within an organization.
- Understand how to align technology and business needs.

Careers — Graduates are trained for advancement into supervisory and management positions in business, non-profit and government organizations. Graduates will be able to move into jobs involving information technology, including jobs in IT management, business management, project management, systems analysis.

Required courses
MMG522 Information Systems in the Organization (required first course)
MMG710 Project Management Concepts & Practices
MMG715 Management Information Technology
MMG717 Systems Analysis & Design (preq. MMG522)

Choose one elective course
MMG700 IT Service Management (preq. MMG522)
MMG714 Data Management (preq. MMG522)
MMG795 Advanced Project Management

Directed study (1 credit)
DMG621 Statistical Analysis Using Spreadsheets

(All courses @ 3 credits except as noted.)
Program Description — The Nonprofit & Public Management concentration offers an understanding of management's role in a non-profit setting and of the nonprofit/public sector's role in society. Students learn to work more effectively with people from diverse cultures and build consensus. They learn to create and administer budgets, read and interpret financial reports, and the importance of financial planning. They learn how to work with boards, donors and government agencies and are introduced to the basics of grant and proposal writing.

Learning Outcomes — In addition to general MM outcomes, graduates will:
- Deepen their understanding of the non-profit/public sector's role in society.
- Be able to manage and work more effectively with diverse groups of people, inspire teamwork and morale, and build consensus.
- Be able to create and administer a budget, read and interpret financial statements.
- Be able to work more effectively with boards, donors and government agencies.
- Know how to write grant proposals.

Careers — Graduates are trained for advancement into supervisory and management positions in non-profit and government organizations. The non-profit sector is expected to grow and provide job opportunities at all levels for qualified candidates. Mid-level positions are often staffed from within the organization, and graduates will increase their chances for promotion. Typical job titles include program associate or manager, project manager, development associate or manager, client relations manager/supervisor, human resources manager, executive director.

Required courses
- MMG727 Budgeting & Finance for Nonprofit & Public Organizations (req. MMG514)
- MMG740 Human Resource Management
- MMG750 Business, Government & Ethics (req. MMG511)
- DMG605 Grant Writing (1 credit)

Choose two MBA electives or Organizational Leadership courses.

Program Description — The Organizational Leadership concentration helps students understand organization design and dynamics and learn strategies to manage the performance of employees and the organization as a whole. It will help them understand and enhance their own leadership potential and lead and manage change in organizations.

Learning Outcomes — In addition to general MM outcomes, graduates will:
- Enhance their ability to lead within an organization.
- Be able to apply strategies to develop employees.
- Gain an understanding of organizational design and dynamics.
- Understand and be able to apply a variety of practical tools used in organization development.
- Acquire strategies to help organizations better adapt to new technologies, markets and challenges.

Careers — Graduates are trained for advancement into supervisory and management positions in business, non-profit and government organizations. Career opportunities include jobs in organization development, consulting, training and development.

Required courses
- MMG560 Managing a Diverse Workforce
- MMG740 Human Resource Management
- MMG743 Models of Leadership
- MMG755 Organization Development & Change Management

Choose one elective course
- MMG535 Communication Strategies for Organizational Effectiveness
- MMG744 Management Training & Development
- MMG746 The Manager as Negotiator
- MMG757 Consulting Skills for Managers
- MMG770 Grant Writing

Choose one directed study (1 credit)
- DMG614 Performance Management
- DMG753 Introduction to Organizational Coaching
Program Description — The Business certificate provides an overview of business functions such as accounting, marketing and finance and prepares students to manage the business aspects of an organization. Students become familiar with the essential concepts, processes and best practices in each of these areas. They develop analytical and decision making skills and learn to think strategically in terms of markets, technology and resources.

Learning Outcomes — Students will:
- Gain the ability to manage human, financial and informational resources in their organization.
- Be prepared for positions within the functional areas of a business.

Careers — Students are trained for advancement into supervisory and management positions in business, non-profit and government organizations or to pursue career advancement within their industry. Jobs titles may include: sales associate or manager, marketing analyst or manager, business analyst, project manager, human resources manager.

Required courses
- MMG520 Financial Accounting (preq. MMG514 or equivalent)
- MMG525 Statistical Decision Techniques for Managers (preq. MMG506 or equivalent)
- MMG733 Marketing Management (preq. MMG511 recommended)
- MMG740 Human Resource Management
- Choose one elective course from the MBA program
- DMG603 Drafting Business Contracts
- DMG615 Developing a Business Plan
- DMG621 Statistical Analysis Using Spreadsheets
- DMG604 Social Media Marketing

Admission requirements:
- Bachelor’s degree and other School of Management requirements.
- 3-5 years of work experience recommended.

If writing assessment indicates need, additional coursework may be required.

Online courses: No more than 49% of your Cambridge College courses may be fully-online. International students may take only one fully-online course in any term.

Program Description — The Small Business Development certificate prepares students to deal with the challenges and issues entrepreneurs and small-business managers must face to ensure long-term success. It is intended for students who are exploring new business ideas or are already self-employed or part of a family-run operation.

Learning Outcomes — Students will learn how to:
- Prepare a business plan.
- Budget and manage finances.
- Market a product or service.
- Manage a business and employees.

Careers — Students gain the ability to start and operate a small business or manage an existing one. Careers include (but are not limited to) small business owner, franchise operator, manager in a family-run or small-to-medium size business.

Required courses
- MMG735 Entrepreneurship & Small Business Management (preq. MMG511, 520)
- MMG520 Financial Accounting (preq. MMG514)
- MMG733 Marketing Management (preq. MMG511 recommended)
- DMG615 Developing a Business Plan (1 credit)

Choose two elective courses
- MMG614 Business Law
- MMG710 Project Management Concepts & Practices
- MMG725 Financial Management (preq. MMG520)
- MMG734 Business Planning
- MMG740 Human Resource Management
- MMG746 The Manager as Negotiator

(All courses @ 3 credits except as noted.)
Master of Management  MM55

55 credits  •  6 terms

Program Description — The MM55 program is for qualified individuals with five to ten years of extensive leadership and management experience; who demonstrate readiness for graduate study; and who do not need a bachelor’s degree to advance their careers.

To start, foundational courses introduce and acclimate students to management theories and competencies. Then, MM55 students complete the standard Master of Management courses and concentrations.

Learning Outcomes — Through the introductory coursework students will acquire the competencies needed for further graduate study and to excel in their managerial careers. They will:

- Master the skills of academic and professional communication.
- Improve their critical thinking, research and technology skills.
- Improve their skills in quantitative and financial analysis.
- Deepen their understanding of the social, political and economic aspects of business.

Through the rest of their coursework students build on their experience and improve their ability to:

- Manage themselves and their own professional development.
- Manage and lead others.
- Manage human, financial and informational resources.
- Foster change and innovation, and value and promote diversity in their organizations.

Careers — Graduates move into positions that require increasing levels of responsibility and leadership. Graduates have moved on to senior level positions in a variety of fields or enhanced their ability to lead their own organizations.

Program Prerequisite . . . required if assessments indicate need

MMG501E Business Communication for the Global Workplace; additional 3 credits do not count towards degree.

Managerial Competencies & Theory .......... 18 credits

Must be taken before core and concentration courses and Capstone.

- MMG500 Management Orientation Seminar (0 credit)
- MMG504 Computer Applications for Business
- MMG505 Graduate Writing
- MMG506 Quantitative Analysis for Managers
- MMG507 Analysis & Communication for Managers
- MMG508 Information Research & Technology (preq. MMG504)
- MMG509 Political, Social & Economic Aspects of Business

MMG504, 505, and 506 may be waived based on assessment conducted at the beginning of the term, and replaced with management electives. MMG507, 508, and 509 cannot be waived.

Seminar & Capstone ......................... 9 credits

MMG691-693 Leadership Seminar I-III (3 terms @2 credits)

Must be taken in sequence with same seminar leader.

MMG694 Graduate Management Capstone Seminar (preqs: MMG691-693, MMG511, 512, 517, 514; and no more than 10 credits remaining to finish program)

Core Courses ................................. 12 credits

- MMG511 Foundations of Management
- MMG512 Organizational Environment
- MMG514 Accounting for Managers
- MMG517 Research Methods for Managers

Concentration or Management Electives . . . 16 credits

Choose a management concentration or 16 credits of graduate management courses to meet career and academic goals. (Health care management and informatics courses may not be taken as electives outside those concentrations.)

Concentrations

- Information Technology Management
- Organizational Leadership
- Nonprofit & Public Management

Health Care Concentrations—must be chosen and approved at time of admission

- Health Care Management

Practicum course may be taken with special permission.

(All courses @ 3 credits except as noted.)

Admission requirements:

- Associate’s degree, professional degree or license (e.g. RN); or at least 60 undergraduate credits that meet general criteria for transfer, and other School of Management requirements.
- 5-10 years of proven leadership and management experience required. Health care concentrations: includes 3-5 years of health care experience (Informatics: or information technology experience).

SKILLS ASSESSMENTS are conducted to ensure that entering MM students demonstrate graduate level English language communication and writing skills, computer and numeracy skills. If assessments indicate need, program prerequisite coursework will be required.

Online courses: No more than 49% of your Cambridge College courses may be fully-online. International students may take only one fully-online course in any term.

The MM55 is not a substitute for a bachelor’s degree. A bachelor’s degree may be required of students who decide to pursue further education or obtain professional licenses. Potential new employers may require a bachelor’s degree.
Management Course Descriptions

Directed Studies (DMG)

DMG 601 Forecasting and Planning - 1 credit
This course covers short and medium term forecasting techniques, and long term and strategic planning; quantitative and qualitative forecasting techniques are emphasized. Quantitative techniques using computer applications are presented and used for situations for which historical data is available. When no such data is available, e.g., to forecast demand or revenues for new products, qualitative techniques are used. For longer-term projections, strategic planning concepts will be utilized.

DMG 602 Introduction to Project Management - 1 credit
This course explores the major issues and techniques of project management. It has been designed to provide the students with the basic skills and knowledge necessary to plan and manage projects within their organizations.

DMG 603 Drafting Business Contracts - 1 credit
This course is designed for students who have completed at least one of the following courses: MMG746, MMG747, or MMG748, and/or those who are interested in developing a basic understanding of the mechanics of creating a formal contract. When one has completed a negotiation, whether using a hardball (distributive) or an interest-based (integrative) approach, the time comes when it is necessary to analyze (memorialize) the agreement by putting it into writing in the form of a legal and binding contract. Through this directed study students will develop the skills and resources to create such a document. The focus will be on the legal elements of a contract; the ramifications, legal and otherwise, of “loopholes” within contracts; and the basic law governing contracts in the United States.

DMG 604 Social Media Marketing - 1 credit
With the rise of social media and the abundance of devices that allow people to be connected 24/7, marketing is experiencing a dramatic shift from traditional print, radio, and broadcast to social media. Social media allows brands to communicate, listen, and respond faster than it was ever possible before. After this course, you will understand the elements of social media marketing; create and implement a strategy; and how to use tools to analyze the effectiveness of your social media strategy.

DMG 605 Grant Writing - 1 credit
This module for non-profit managers introduces the planning and proposal development phases of grant writing. It demystifies the process, from developing a fundable idea to identifying potential donors and structuring the technical components. Hands-on activities provide practice in the art and craft of grantsmanship.

DMG 607 Special Topics in Mgt: Current Economy-How Should a Manager Respond - 1 credit
This one credit course will examine the causes behind current economic problems and the impacts on managers and investors.

The responses of the public, private and non-profit sectors and likely results from their actions will be discussed. The course will look at future projections for the economy and ways of evaluating those projections to provide a practical guide for managers on how they should respond to the various options presented to them. (Students should have taken MMG511 before taking this course. A prior course in economics is recommended but not required.)

DMG 608 Emergency Management of Natural and Man-Made Disasters - 1 credit
This course is for managers responsible for ensuring that their organizations are prepared for response, mitigation, and recovery from mass casualty disasters both natural and man-made. Emergency management is prioritized by lives and property saved by improved responses and mitigation. Cases of past and future fatalities from mass disasters are presented, with examples of lives saved and lost by emergency management. Students prepare one-page personal disaster preparedness plans for home and work sites for diverse disaster threat-and-response characteristics.

DMG 614 Performance Management - 1 credit
This course helps managers learn a more holistic approach to performance management and communicate more effectively with their employees regarding performance. It helps them understand that performance management is not just a “once-a-year” phenomenon connected to compensation, but is an ongoing process that includes a clear understanding of work goals and expectations, development of skills, knowledge and abilities, and ongoing communication. The learning methodology includes a transfer of content and knowledge that includes a performance management system as well as the use of simulations, role-plays and case studies.

DMG 615 Developing a Business Plan - 1 credit
Developing a business plan is a hands-on course that provides students with the basics of how to develop a business plan. Students learn how to describe the business, how to use a structured coaching process to write the business plan, and how to use the business plan to anticipate key issues. The course covers (1) business plan basics including: who needs to write a business plan, when to write one, how long it should be, what a business plan can and cannot do, the process to write the business plan, and how to use the business plan in the (4) ways to enhance a business plan.

DMG 621 Statistical Analysis Using Spreadsheets - 1 credit
Previous experience with Windows and spreadsheets preferred. This course helps students use spreadsheets to develop complete analysis and presentations. Using Microsoft Excel, this course reviews the fundamentals of spreadsheet design, creation and formatting. Students learn how to perform “what if” analyses and use spreadsheets for simple descriptive statistics and regression analysis.
DMG 753 Introduction to Organizational Coaching - 1 credit
This course gives students the opportunity to develop and improve skills in organizational coaching. The course emphasizes performance assessment and performance management. Learners practice conducting coaching sessions and acquire critical coaching skills in active listening; giving and receiving feedback; and developing and managing performance improvement action plans. Special attention is given to cross cultural coaching, motivation, and the assessment of personal coaching styles.

Health Care Management (MHC)

MHC 600 Practicum in Health Care Management - 1-2 credits
This course is an elective intended for students with limited work experience in the health care management field and is open to students who have completed at least two terms of work in the MM or MBA program. Students will undertake a supervised practicum or internship in an organization, working not more than 20 hours per week during the fall and spring terms (full time may be permitted in the summer) in a position related to the concentration. Students are responsible for obtaining the position. Students work with the practicum advisor to design the learning objectives and outcomes of the practicum and will be required to submit learning papers and reports. International students will need approval for curricular practical training from the International Students’ Office.

MHC 710 Risk Management in Health Care - 3 credits
This course deals with the discipline of dealing with the possibility that some future event will cause harm. It examines a variety of contemporary issues surrounding managerial and analytical problems involved in health care risk management. It includes a historical review of the role of risk management in health care and the evolution from a reactive to a pro-active focus and discusses the planning of a proactive, patient outcome focused risk management program.

MHC 712 Healthcare Operations Management - 3 credits
Health care managers learn how to manage the outcomes of their organizations and departments more efficiently. Operations management involves planning the functioning of health care organizations for the most productive and efficient allocation of resources. Management functions such as planning, utilization of resources, control, and continuous quality management are addressed.

MHC 720 The U.S. Health Care System - 3 credits
The course will review the evolution of health care in the U.S., explore the structure of the current system, and consider the impact of emerging trends on the provision of health care in the future. Various components and stakeholders will be identified, with special attention on the diversity of care options and evolving roles of government as a funding source and regulator. Developments in national health care policy, the cost-quality-access conundrum, and the expansion of health care reimbursement options will be examined. The course also examines health care systems in other countries as a means to access alternative approaches to health care delivery issues.

MHC 721 Introduction to Health Care Disparities - Race, Ethnicity and Health - 1 credit
This course is designed to provide students with knowledge about racial and ethnic disparities in health and health care. The course will examine the ways in which dyadic relationships and multiple forms of discrimination contribute to racial and ethnic disparities in health. Students will examine the ways in which neighborhood and community factors and inequalities in socioeconomic status influence health behaviors, access to health care services and health status outcomes. Individual characteristics such as acculturation, patient preferences, provider congruence and cultural competence will be explored in this course.

MHC 723 Unequal Treatment: Disparities in Health Care - 3 credits
This course will examine racial and ethnic disparities in health and human services and theories as to why those disparities exist. Students will consider policies that impact quality and equity of care. Specifically we will look at Title VI of the Civil Rights Act, which states that persons will not be treated differently on the basis of race, creed or color and how this important policy has been implemented and enforced over time. The course will use as its primary text the Institute of Medicine’s (IOM) report issued in 2003: Unequal treatment: Confronting Racial and Ethnic Disparities in Health Care. While most of the research in this area has focused on health care, we will continually look at the relevance and application to social and human services. Students will critically review current efforts to address disparities in care and will focus on cultural competence.

MHC 725 Financial Management in Health Care - 3 credits
Prerequisite: MMG514 or equivalent. This course prepares health care managers to participate effectively in financial decision making within health care organizations. It focuses on how to use financial and program data to effectively analyze costs of programs and departments. Financial accounting, managerial accounting, and contemporary financial concepts are introduced. Special attention is given to Medicare, Medicaid, insurance, managed care, and government funding.

MHC 730 Health Care Information Systems - 3 credits
Prerequisite: MMG 522. This course includes an overview of the health care information technology system as well as clinical information systems devoted to the direct management of the patient. It provides guidance for implementing, managing, and accessing clinical information systems in various health care settings. Discusses medical records, resource management and security, the importance of disaster planning, standards and regulatory issues as related to informatics. Also examines the current state and future of health care informatics, including tele-medicine and emerging technologies, and explores the new technology creation and adoption processes and the impact of rapidly evolving technologies in the health care arena.

MHC 732 Life Cycle of Information Systems in Health Care Informatics - 3 credits
Prerequisite: MMG 522, MHC 730. This course helps health care professionals understand the life-cycle of an information system and view it as a continuous process while maintaining the underlying support for the system. The course provides the tools needed to select a health information system based upon identified criteria.
in an individual health care agency and includes strategic planning, analysis, design and implementation, as well as testing and evaluation of the system.

**MHC 733  Data, Knowledge and Information Management in Health Care Informatics - 3 credits**
Prerequisite: MMG 522, MHC 730. The purpose of the course is to help health care professionals transform data into useful information for decision-making. This information is then utilized to support administrative and clinical decision-making. Course content will include the process of decision-making, securing the right information, human factors that affect the use of information, information classifications, and the human-computer interaction in health care organizations.

**MHC 735  Health Care Informatics: Fieldwork - 1 credit**
Prerequisite: all concentration courses. The field work requirement provides the student with hands-on experience in a health care informatics setting. Students will be expected to complete an informatics project at a health care agency involving a total of 40 - 50 hours over a semester with an agency preceptor and under the guidance of a faculty advisor.

**MHC 740  Strategic Planning in Health Care - 3 credits**
This course focuses on developing an organizational vision, mission and goals, and integrating all components of the health care organization to achieve those goals. Strategic analysis, plan development and implementation strategies are included, as well as monitoring and evaluation.

**MHC 741  Emergency and All-Hazards Preparedness in a Health Care Setting - 3 credits**
This course is intended for the health care manager who is responsible for the preparedness of his or her organization in a disaster situation. It focuses on planning and preparedness for all types of hazards. It covers such topics such as the legal and ethical issues surrounding disaster planning and preparedness, obtaining assistance from government and other agencies, interagency cooperation, integrating civil and military response and meeting the needs of special populations.

**MHC 749  Special Issues in Health Care - 3 credits**
A special topic in health care is addressed from a health systems perspective. Financial implications, policy and ethical issues are considered. Racial, ethnic and economic dimensions of the issues are explored.

**MHC 750  Health Care Policy and Ethics - 3 credits**
This course gives an overview of policy development at the organizational, local and national levels. Students assess the influence of the influence of actors, arenas, and socio-historical trends on health care policy. They explore ethical principles and how they are infused into all aspects of health care and health care management.

**MHC 761  Health Care Services for the Elderly - 3 credits**
This course outlines the interface of gerontology - the study of human aging - and elder care services, the caring for this population. It will review care provided to seniors within a variety of institutional settings, as well as outpatient and home care services. The course provides a comprehensive overview of programs, policies, and services and examines the issues, challenges and dilemmas confronting the provision of health care services to the elderly.

**MHC 762  Nursing Home Administration - 3 credits**
This course is an introduction to long term care nursing home administration. It introduces the student to the industry, to facility management, to senior populations and the variety of issues confronting the industry today. These include nursing, resident-centered care and quality of life, facility management, fiscal management and human resources, leadership, and regulatory requirements and accreditation. The content will prepare the student to take the NHA-LTC test.

**Management (MMG)**

**MMG 500  Graduate Management Orientation Seminar - 0 credit**
Provides incoming students with an orientation to the graduate management programs, including an overview of their philosophy and curriculum, and the benefits and rationale of the academic model. Introduces students to the resources of the College such as the learning management system, the online library and academic support services. Students meet with their academic advisor and develop their academic plans.

**MMG 501E Business Communication - 3 credits**
This course is focused on the communication, analysis, and presentation skills necessary for success in the U.S. and global business environment. Using a variety of materials including articles from newspapers, videos and podcasts of business topics and cases, students will develop their reading listening, critical thinking and oral and written communication skills. Students will be exposed to issues facing managers in today’s environment and gain a better understanding of the cultural assumptions and communication styles of the U.S. business workplace. They will learn the appropriate style of communication for different types of business situations - participating in meetings, interviewing, writing memos or reports and making oral presentations. They will learn to develop clear and persuasive arguments both orally and in writing. Students may be required to take this course based on results of their initial writing assessment. It does not count as an elective in the Master of Management program.

**MMG 504 Computer Applications for Business - 3 credits**
This course familiarizes learners with the personal computer, Windows, word processing (Microsoft Word), spreadsheet (EXCEL), presentations (PowerPoint), E-mail and the Internet. Students get hands-on experience with these applications and an overview of personal and professional uses. Students progress from a beginning level through an intermediate level. This course is a requirement for students in the MM55 program. It may not be taken as an elective.

**MMG 505 Graduate Writing - 3 credits**
This course concentrates on strategies and techniques for building an academic essay. Challenging readings are used to promote the kind of critical thinking and analysis that best support graduate work. Students move from initial ideas, to first drafts, to strategies.
for revising their papers to achieve a polished product. Through a sequence of three to four progressively longer essays, students come to understand their own writing styles, strengths and difficulties, and become competent evaluators of their own work. By giving attention to the writing process itself and its different phases, students gain awareness of how to achieve their best work. This course is a requirement for students in the MM 55 Program. It may not be taken as an elective.

MMG 506  Quantitative Analysis for Managers - 3 credits
Students learn to think about and express business problems in quantitative terms. They examine basics of number theory, arithmetic operations including ratios and proportions, percentages, graphing, and algebraic operations. Students get an introduction to probability theory and statistical analysis. Topics include descriptive statistics, probability distributions, sampling, estimation, hypothesis testing, simple and multiple regression and correlation. Students learn to apply quantitative tools to solve a variety of business problems and create and use quantitative models for real-world problems. Charts and graphs are created using spreadsheet software. This course is a prerequisite to MMG525 Statistical Decision Techniques for Managers.

MMG 507  Analysis and Communication for Managers - 3 credits
This course addresses the analytical and communication skills necessary for success in business environments. Students develop their critical thinking skills and enhance their ability to evaluate claims, evidence and assumptions and develop persuasive arguments through analysis of management case studies. The course also covers different forms of business communications including memos, reports, and oral presentations. This course is a requirement for students in the MM 55 Program. It may not be taken as an elective.

MMG 508  Information Research and Technology - 3 credits
Prerequisite: MMG504 or equivalent. Students gain the knowledge, skills and abilities to apply principles of information research to their academic, work and professional lives. They gain ability to analyze problems, research and select relevant information from industry and professional publications, corporate and non-profit financial statements, print and electronic sources. They will become able to create an effective presentation and publish it in print or electronic form. This course is a requirement for students in the MM 55 Program. It may not be taken as an elective.

MMG 509  Political, Social and Economic Aspects of Business - 3 credits
This course provides a broad liberal arts foundation to management theory and concepts. It draws upon the disciplines of economics and political science, the study of society and culture, and the tools of ethical analysis. It helps students gain a basic understanding of economic concepts and institutions, the role of government in business and the impact of political institutions and processes. Issues of interrelatedness in the global economy and polity are considered. The societal implications of business decisions, issues of multiculturalism and diversity and the use of ethical analysis to guide business decisions are addressed. This course is a requirement for students in the MM 55 Program. It may not be taken as an elective.

MMG 510  Research Methods for Managers - 3 credits
This course helps students understand the role of research in the management decision making process and in the development of business plans and strategies. It helps students become familiar with the research process and with a variety of business research tools and techniques. Students learn how to define a problem and write good research questions, determine what tools and techniques are appropriate for different kinds of problems, find information sources and assess their reliability, and critically analyze information. They also learn how to present the results of research in appropriate output formats. This course helps students with their independent learning projects.
MMG 519  IT Security Management Planning Procedure and Policy - 3 credits
Security management includes identification of an organization's information assets and the development, documentation, and implementation of policies, standards, procedures, and guidelines. Students learn from a management perspective the tools required to rate system vulnerabilities. Students also define an information security strategy while prioritizing threats to information assets.

MMG 520  Financial Accounting - 3 credits
Prerequisite: MMG514 or equivalent. Financial Accounting covers the four basic financial statements and the way they are used by decision makers. Fundamentals and principles of accounting are discussed along with key concepts underlying accounting systems. Students learn the framework of debits and credits used in posting. The course has a focus on interpretation, analysis and communication of financial data. It covers balance sheets, income statements, cash flow statements, statements of retained earnings, and required SEC 10K filings. Students learn dual entry - accrual accounting with a focus on analysis of key ratios derived from financial statements for internal management. Special attention is given to accounting for assets, liabilities and owner's equity. Additional topics include generally accepted accounting principles (GAP), the Sarbanes-Oxley regulations, and ethics in accounting.

MMG 521  Managerial Accounting - 3 credits
Prerequisite: MMG520. This course examines the application of accounting principles and procedures to the planning and control functions of management. The emphasis is on costs, cost-profit relationships, measures of performance, and uses of accounting in long-range planning. Topics will include cost accounting techniques, overhead allocations, standard cost, profit planning and responsibility accounting.

MMG 522  Information Systems in the Organization - 3 credits
The course provides an overview of computer information systems. Students will be presented with the core information systems principles, offered an overview of the information systems discipline, and will learn about the changing role of the information systems professional. This course will enable students, regardless of their field, to understand and use fundamental information systems principles so that they can function more efficiently and effectively as workers, managers, decision makers and organizational leaders.

MMG 525  Statistical Decision Techniques for Managers - 3 credits
Prerequisite: MMG506 Quantitative Analysis for Managers or equivalent. This course provides students with the knowledge and appropriate use of descriptive and inferential statistical techniques used in management decision making and develops their ability to characterize management problems that can be solved by such techniques. Topics include descriptive statistics, probability distributions, sampling, estimation, hypothesis testing, simple and multiple regression and correlation, chi square testing, analysis of variance, and decision theory. Spreadsheet and statistical computer programs are used in the class.

MMG 535  Communication Strategies for Organizational Effectiveness - 3 credits
Organizational effectiveness is a process, not an event. This course will look at the assessment, analysis and evaluation of present organizational strategies and provide opportunities to design and implement more effective communication within the organization. By measuring the functions of (1) purpose, (2) strategy, (3) feedback, (4) processes and procedures, and (5) leadership/membership.

MMG 560  Managing a Diverse Workforce - 3 credits
Current business conditions are surveyed, and participants are introduced to the link between the business agenda and human capital. Since the workforce is critical to the success of the American business agenda, much of this course is dedicated to the development of competencies necessary to manage a diverse workforce. This course is for professionals dealing with issues of differences and diversity in contemporary organizations.

MMG 561  Business Law - 3 credits
The course provides an overview of the legal aspects and responsibilities/liabilities of managing an organization. Areas covered include the legal system, basic contract law and agency, and how these apply in an international context. It also examines legal issues relating to various organizational structures and the choice of a business organization (corporation, the agency relationship, partnership, sole proprietorship, not for profit and LLC).

MMG 600A Graduate Management Practicum - 1-2 credits
MMG 600B Practicum in Business - 1-2 credits
MMG 600C Practicum in Small Business Development - 1-2 credits
MMG 600D Practicum in Organizational Leadership - 1-2 credits
MMG 600E Practicum in Nonprofit and Public Management - 1-2 credits
MMG 600F Practicum in Information Technology Management - 1-2 credits
This course is an elective intended for students with limited working experience in their chosen field and is open to students who have completed at least two terms of work in the MM or MBA program. Students will undertake a supervised practicum or internship in an organization, working not more than 20 hours per week during the fall and spring terms (full time may be permitted in the summer) in a position related to the concentration. Students are responsible for obtaining the position. Students work with the practicum advisor to design the learning objectives and outcomes of the practicum and will be required to submit learning papers and reports. International students will need approval for curricular practical training from the International Students’ Office.

MMG 691  Leadership Seminar I: Self-Diagnosis and Goal Setting - 2 credits
The Leadership Seminar serves as a learning laboratory for students to develop, integrate and demonstrate competencies in personal, professional and academic development. It provides an opportunity for students to test and apply learning in a practical and experiential context and to integrate experience and theory. In the first semester
students self-diagnose their academic and managerial skills and develop academic and professional goals and plans. They also develop skills at being effective members of a learning community.

**MMG 692  **Leadership Seminar II: The Manager as Team Developer and Leader - 2 credits

This seminar focuses on the manager as a leader and developer of people and teams. Students develop important cognitive and affective skills: developing people, peer relationships, working with others, and resolving conflict. The seminar also helps the student learn how to leverage the diversity in teams and how utilize team resources effectively.

**MMG 693  **Leadership Seminar III: The Manager as Strategic Leader - 2 credits

Strategic leadership provides the scope and direction to help drive success for the organization. This seminar explores the skills and tools necessary for strategy formulation and execution and the ability to effectively manage change. Managing in an environment of change and uncertainty requires strategic leaders to craft and communicate organizational vision and consistently maintain a sense of direction, while simultaneously building ownership of goals and objectives for action within the units they are responsible for leading. Participants explore how strategic leaders make decisions based on values, invest in innovation, human capital, and create and maintain an effective culture to ensure long-term viability.

**MMG 694  **Graduate Management Capstone Seminar 3 credits

The Graduate Management Capstone Seminar is designed to support students in designing, implementing and presenting their capstone project. The capstone provides a culminating opportunity for students to apply and demonstrate the knowledge, skills and behaviors developed during their program through a designed action-learning experience, using the stated program outcomes and competencies as an assessment reference. Students will develop a business report / case analysis that demonstrates and documents their learning.

Prerequisites: Student must have competed at least 75% of their total program credits, seminars MMG691-693, as well as specific program core courses detailed in the program charts.

**MMG 699  **Graduate Management Capstone Continuation - 3 credits

Additional terms as needed to complete the Graduate Management Capstone project.

**MMG 700  **IT Service Management

Prerequisite: MMG522. In an age of cloud computing, on-demand services, virtualization, mobile devices, outsourcing and rapidly changing business delivery strategies, the role of IT is moving toward a focus on service integration. This course provides an introduction to the concepts, tools and techniques of IT service management. Students will learn how to define and build a comprehensive IT service management solution that incorporates process, technology, organization and governance and become familiar with standard frameworks that provide industry best practices for aligning IT with business needs.

**MMG 709  **Innovation and New Product Design - 3 credits

This course will focus on how companies’ top managers handle the complexity of managing growth through innovation and new product development. In today’s economy, competitive advantage goes to firms that are able to out-innovate the competition. The course will help students (1) to increase their understanding of what it takes to make and organization and its employees embrace innovation, (2) to understand the approaches companies are taking to foster new product development globally, and (3) to understand the capabilities organizations need in order to handle the complexities associated with the implementation of a global new product development strategy.

**MMG 710  **Project Management Concepts and Practices - 3 credits

In this course, students will learn how to use the concepts, tools and techniques of project management in order to successfully manage system development projects. System development project failures are generally failures of management, not failures of technology. Good management, along with an understanding of the appropriate use of technology, is therefore essential. Students will learn, in particular, how to apply the concepts, tools and techniques of project management in today’s dynamic, digital business environment, where projects must be brought to completion under increasingly compressed time frames and where decisions must be made under conditions of uncertainty.

**MMG 712  **Operations Management - 3 credits

Operations refers to the process by which an organization converts inputs (facilities, equipment, labor, etc.) into outputs (services and goods). This process involves management functions such as planning, the acquisition and utilization of resources, control, evaluation, and appropriate change. This course also develops an appreciation of the distinctions and relationships between the operations function and other functions of the organization including finance and marketing.

**MMG 713  **Total Quality and Operations Management - 3 credits

Operations Management is the process by which an organization converts inputs (facilities, equipment, labor, etc.) into outputs (services and goods). This conversion process involves management functions including planning, acquisition and utilization of resources, control and evaluation. Total Quality Management (TQM) is a way for businesses and organizations to improve the quality of business processes and performance. This course develops an appreciation of the TQM concept as well as the distinctions and relationships between the operations function and other functions of the organization.

**MMG 714  **Data Management - 3 credits

Prerequisites: MMG522, working knowledge of MS Excel. Today most enterprises rely heavily on data and technology to make strategic decisions to keep their organizations competitive, profitable and innovative. The technological revolution has ushered in the era of big data and as a result, the field of data management has grown exponentially. This course offers the student the fundamentals of data management and helps prepare the interested student for future certification and professional development in the field.
MMG 715 Management of Information Technology - 3 credits
Prerequisite: MMG 522. This course provides an understanding of how information technology may be efficiently and effectively used in the business environment. Students get an overview of hardware, software, file/database concepts, systems analysis and design methodologies. The complex integration of hardware, software, data, procedures and personnel that is required for managing information systems is addressed. The impact of constantly changing information technology upon the organization and the management of the firm is discussed.

MMG 717 Systems Analysis & Design - 3 credits
Prerequisite: MMG 522. Systems analysis and design is a critical competency for information technology. This course focuses on techniques for designing information systems more effectively and efficiently, by linking the information system, business mission and purpose and technology. Students learn the core skills required by systems analysts: from gathering requirements and modeling business needs, to creating blueprints for how the system should be built and implemented in a particular organization. The course provides a concise, yet informative theory of the systems development life cycle, and touches on project management, infrastructure management, system development and system implementation with examples from a variety of industries.

MMG 725 Financial Management - 3 credits
Prerequisite: MMG 520. The major goal of the financial manager is to maximize the value of the firm. Accordingly, this course focuses on analysis and interpretation of financial data from the income statement, balance sheet and the statement of cash flows, for decision making. Powerful planning and control tools such as pro forma budgeting and break-even analysis are introduced, as well as the concepts of operational and financial leverage. Students learn how to estimate the amount of cash an organization will need in its operations. One key focus of the course is on capital budgeting, based on the concepts of the time value of money. This includes calculations of future value (FV), present value (PV), net present value (NPV), internal rate of return (IRR) and payback period.

MMG 727 Budgeting and Finance for Nonprofit and Public Organizations - 3 credits
Prerequisite: MMG 514 or equivalent. This course provides an introduction to the basic financial accounting systems used in nonprofit and public organizations. It also focuses on how to use the financial and program data to effectively analyze the costs associated with programs and services provided by the organization. The final area to be covered will be budget preparation and monitoring. The politics of the budgeting process will be examined. By the conclusion of the course the student will be able to effectively participate in the financial decision-making within his or her organization.

MMG 732 Global Business - 3 credits
Prerequisite: MMG 511, MMG 515 or equivalent. The purpose of this course is to introduce students to the dominant themes and theories of global business. The course consists of a fundamental study of the nature of business and its environment. In the course of our study we will examine managerial functions and processes in a global context.

MMG 733 Marketing Management - 3 credits
Prerequisite: MMG 511 recommended. This course provides a basic overview of the marketing management process, oriented primarily to the non-marketing specialist. It examines the role of marketing in a variety of organizations - product/service, public/private. It introduces students to the analysis of an organization's market environment, and the development of marketing programs designed to achieve organizational goals. Topics covered include the analysis of markets, buyers and competition; the identification and selection of target markets; the design of product, pricing, distribution and communication programs appropriate to selected markets; and the planning, implementation and control of the marketing effort. The course emphasizes the practical utility of marketing tools and concepts through the use of case studies and application to the students’ own work environment. The course also attempts to create a heightened awareness of the global interrelationships affecting marketing, and the societal implications of marketing decisions.

MMG 734 Business Planning - 3 credits
This course allows students to learn about business development, new product/service planning, feasibility analysis and trends in innovation. During this course, students will learn how to test new products, forecast financial needs, and analyze market requirements. The basis of competition for new products/services, major traits of successful new ventures, market situation analysis, opportunities for professional challenge, common pitfalls and ways to avoid them will be addressed.

MMG 735 Entrepreneurship and Small Business Management - 3 credits
Prerequisite: MMG 511, MMG 520 or equivalent. This course examines the major characteristics of a self-employment venture and the issues facing the person starting or managing a small business. The focus is on the opportunities, risks, issues and problems facing the entrepreneur. Techniques learned in other management courses are integrated and applied to small businesses. Students prepare a business plan for a small business which defines the business concept and provides an integrated strategy for starting up or expanding a business.

MMG 736 Digital Marketing - 3 credits
Prerequisite: MMG 733. For a business to succeed in today's digital world, it is important to have a strong digital footprint. The course will assist the students to identify and understand the elements of digital marketing and how to create, implement and evaluate a digital marketing strategy. Students acquire the knowledge to build and actively manage digital marketing campaigns across social media, website and mobile platforms and track results of digital advertising through analytic tools.

MMG 739 Strategic Management - 3 credits
Prerequisites: MMG 511, MMG 512, MMG 514, MMG 725, MMG 733. Strategic management is concerned with managerial decisions and actions taken in order to ensure the success and sustainability of the entire organization in an environment of competition, change and uncertainty. The objectives of the course are to build an understanding of the key concepts in strategic management and the competitive business environment that organizations face, and to develop skills
in applying the concepts to analyze real world situations. The course integrates prior learning in courses such as organizational environment, accounting, finance and marketing.

**MMG 740  Human Resource Management - 3 credits**
Changes in the social and legal environment, and the workforce, make it increasingly difficult for organizations to manage relations with employees. The human resources manager needs to be able to formulate organization-wide human resource policies which result in competitive strategy, efficiency and effectiveness, and which are consistent with the organization’s culture and environment. The interests of many stakeholders have to be reflected in such policies — employees, unions, communities and government. The course helps students identify and understand Human Resources Management issues, develop skills in diagnosing situations, discuss effective approaches to problems and assess the comparative effects of immediate action and long-term policies.

**MMG 743  Models of Leadership - 3 credits**
An essential component of a successful career is an effective personal leadership style that fits appropriately within one’s professional setting. Students explore the elements of individual style with the goal of increasing effectiveness. The course also examines the content of the professional setting and looks at the different strategies for achieving the most congruent fit possible. This course will be experiential, and there will be guest speakers.

**MMG 744  Management Training and Development - 3 credits**
This course will explore many of the tools and techniques that are available to organizations for the use of upgrading staff. Some of those tools and techniques will include needs assessment, alternative methodologies for presenting material and evaluation techniques. Students will develop a total system for training and development within their organization or sub-unit. The course is aimed at corporate training staffs and human resource managers. The focus will be on actual situations and case analyses.

**MMG 746  The Manager as Negotiator - 3 credits**
Effective managers must be able to deal successfully with limited resources, divergent interests of people, and organizational conflict. This course improves skills in negotiation and joint decision-making that students can apply immediately. Emphasis is on integrative bargaining and problem-solving. Students learn the theory and tactics for understanding and diagnosing a conflict, planning for negotiations, and implementing an effective conflict resolution strategy.

**MMG 747  Negotiation Theories, Strategies and Tactics - 3 credits**
This course explores and compares the different theories of bargaining and competitive negotiation styles, and evaluates the impact of different styles on negotiation outcomes including ethical issues. The course also examines planning, perception, cognitive biases, and the use of power/influence in negotiations. Both one on one as well as multiple party negotiations will be studied. Emphasis is on the integration of negotiation theory, practice and behavior.

**MMG 749  Global Negotiation - 3 credits**
This course is designed for students who work in multi-cultural teams or negotiate in a multi-cultural setting. Students will learn how culture affects negotiating strategies, conflict management techniques and team effectiveness. Students will learn and apply a framework to help manage cultural differences whenever they impact business deals, disputes or team work.

**MMG 750  Business, Government and Ethics - 3 credits**
Prerequisite: MMG511, MMG512. This course explores the ethical environment of business and the ongoing relationship between business, government and society. Topics include the development of government regulations and the impact of regulations and likely future developments with an emphasis on ethical considerations.

**MMG 755  Organization Development and Change Management - 3 credits**
Prerequisite: MMG512. The theory and practice of organization development are introduced. Skills are developed in identifying how organizational systems operate together, including organization culture, leadership, structure, human resources, rewards, and technology. Students learn how to make effective change through dealing with an organization as a whole. Strategies are developed to help organizations adapt to new technologies, markets, and challenges, including the rate of change itself. Case studies and simulations are used throughout the class work.

**MMG 757  Consulting Skills for Managers - 3 credits**
This course explores the essentials of the consulting relationship and the skills critical to the consulting process. Managers develop ability to apply consulting skills and processes in a variety of situations from working with international personnel to getting the most from cross-functional teams to dealing with external clients and vendors. Tools for assessment, analysis and implementation will be reviewed. Topics include negotiating scope, influencing expectations, overcoming resistance and giving clients feedback.

**MMG 770  Grant Writing and Resource Development - 3 credits**
This course covers the preparation of proposals to state, federal, and local agencies, corporations and private foundations. Students will learn how to prepare successful, competitive grant proposals and realistic, effective project-based budgets. The course will take students step-by-step through each stage of the proposal presentation process from research techniques to polishing the finished product. Best practices in funding research, planning and presentation will be covered. By the end of the course, students will have a prototype suitable for submission to a funder.

**MMG 795  Advanced Project Management - 3 credits**
MMG795 focuses on solving common problems in project management. Topics covered include: How to use MS Project to plan and track projects; 2) How to recruit and motivate project teams; 3) How to accelerate a project plan - or make up time that was lost; 4) How to select and manage outsourced services; 5) How to plan for the unknown: risk, quality, and slope creep; 6) How to know whether your
project is doing well - and what to tell your sponsor, team, customers; 7) Your ethical and social responsibilities as a project manager. Students will build skills through group and individual assignments, case studies, and hands-on exercises. Prerequisite: Students need some experience with projects, either by previous experience on a project team or as a project manager. Students may substitute MMG710 or some other formal classroom course in project management for the prerequisite.

**MMG 800  Independent Learning Project: Management - 3 credits**

This comprehensive final project is focused on a topic in a student’s concentration. The Management Seminar and the Seminar Leader provide direction and support for the project. The project demonstrates ability to define a problem, use appropriate resources, collect and analyze data, draw conclusions, and organize the written report.
The School of Psychology and Counseling (SO-PC) provides graduate programs for new practitioners in the field of counseling and in human services. The School welcomes adult learners, serving a demographic of older than average graduate students who arrive with a wide range of non-traditional experience in counseling and related fields.

Diverse Populations and Perspectives

Our students and faculty are highly diverse in experience, cultural background and values. Our interactive classrooms and collaborative learning bring cross-cultural perspectives to the counseling process. Counseling students serve diverse client groups typically characterized by broad differences in access to appropriate services across lines of race and social class in agencies with varied philosophies.

Our faculty members are licensed professionals in their respective fields.

Academic Programs, Licensure, and Professional Credentials

Most academic programs prepare students for licensure or other professional credentials which are increasingly necessary for many counseling careers. Other concentrations support related careers that do not require licensure.

States and professional associations govern the requirements for professional credentials in counseling and related fields. The Cambridge College School of Psychology and Counseling strives to cover the academic requirements and to include in its programs appropriate supervised clinical practice hours through practicum/internship placements. There may be additional post-graduate requirements such as exams and further clinical experience.

External requirements and regulations may change at any time. Cambridge College reserves the right to alter programs accordingly. Program chairs are available to advise students.

Current, detailed information about the academic program, practicum/internship, and professional credentials is available from program chairs. At Cambridge College regional locations that offer SO-PC programs, information is available from the director.

All students are responsible for:

- Monitoring and understanding all applicable requirements and regulations for licensure.
- Knowing the detailed requirements of their academic program.

Students pursuing licensure in states other than Massachusetts are responsible for checking with the appropriate credentialing agency in their state to determine whether their SO-PC program of study:

- Meets all requirements for licensure/certification, and
- Is accepted for licensure.

Legal status as a U.S. citizen or lawfully admitted resident is required for a professional license from any state agency, under Title 8, U.S. Code Section 1621.

Academic Advising

Admission counselors give applicants an overview of the College’s academic programs and assist with the application process. Applicants may be referred to program chairs to discuss programs and for academic advising.

Orientation — All new students are required to attend Orientation.

The SO-PC academic advisor will provide program-specific academic advising for all students, including those in Springfield and Lawrence. Every new and continuing student meets with the academic advisor.

The program chair provides advising specific to licensure and field placement.

Writing Assessment and Support

A writing assessment is conducted during Orientation. Results are communicated to the academic advisor, who may refer students to writing courses and writing and academic support.
Practicum/Internship — See Also Your Program Handbook

Practicum/internship sites and supervisor qualifications are subject to state regulations.

The acceptability of a practicum, internship, or clinical site is determined by the program chair, instructor, or practicum/internship coordinator, depending on the program, in accordance with current criteria. Students are responsible to seek this person’s advice prior to enrollment in the practicum/internship, to determine what sites and supervision are appropriate for the credentials sought.

Preparedness for Field Experience

In addition to coursework, field experience (practicum/internship) is an integral part of a student’s clinical training. Prior to entering into the practicum course (CCP 520) students will be assessed for their preparedness for the experience. This assessment is conducted in CCP 550, Basic Counseling Skills, Rogerian Therapy. The instructor will evaluate each student at the end of the course. This preparedness assessment does not impact a student’s grade but is an assessment of a student’s preparedness for working in the field.

Field Experience

The practicum and internship include field experience under a qualified supervisor, conforming to Massachusetts regulations 262 CMR.

Addiction Counseling: Must include 300 hours in an approved substance abuse treatment program with appropriate supervision in the 12 core functions.

Trauma Studies: Must include documented counseling experience related to trauma.

Marriage & Family Therapy: Students must complete a minimum of 740 hours of on-site field placement time, of which 300 must be done in direct face-to-face client contact. Students must receive a minimum of 160 hours of supervision, which includes 55 hours of individual supervision by an approved supervisor, a minimum of 50 hours of group supervision with no more than 10 students, and 55 hours of either individual or group supervision. At least 25 hours of supervision must be done through video/audio supervision or direct observation. As this is a joint LMHC/LMFT program, students must also have 50 hours of documented LMHC supervision for licensure.

Students are guided and evaluated by a licensed/certified counselor on-site and by a licensed/certified Cambridge College supervisor.

The on-site component must be successfully completed to receive credit for an internship, practicum, or clinical course. The minimum on-site component must be completed while the course is in progress; not before or after. The instructor and the site supervisor verify successful completion; the decision to award or withhold credit is made by the instructor.

Students may not register for a subsequent field experience course with an Incomplete grade in the prior term(s) of a practicum or internship.

Practicum/Internship fee — A fee is charged to students in programs that include a practicum/internship component to cover administrative costs (see Tuition and Payment).

State requirements prior to practicum/internship — Students seeking placement in school, mental health, or public health facilities and programs are responsible for complying with all policies and procedures of the state and facility where they seek a field placement, including but not limited to:

- Fingerprinting
- Criminal Offender Record Information (CORI) check.
- Insurance.
- Immunizations.

Cambridge College strives to cover academic requirements for the following credentials, for which graduates may apply:

- Licensed Mental Health Counselor (LMHC) licensure by the Mass. Board of Registration of Allied Mental Health Professionals. Candidates must also pass an exam and complete two years of post-master’s supervised clinical practice.
- Certified Alcohol & Drug Abuse Counselor (CADAC) certification by MBSACC and Licensed Alcohol & Drug Counselor (LADC) licensing by the Mass. Dept. of Public Health.
- LMFT licensure by the Mass. Board of Registration. Candidates must also pass another exam. The post-master’s clinical practice must be structured to meet LMFT regulations. Students will be able to use their LMHC to apply to insurance companies as independent practitioners.
- Licensed Rehabilitation Counselor (LRC) licensure by the Mass. Board of Registration of Allied Mental Health Professionals and Certified Rehabilitation Counselor (CRC) certification by CRCC. Candidates must also pass an exam and complete two years of post-master’s supervised clinical practice.
- School Adjustment Counselor licensure by the Massachusetts Department of Elementary and Secondary Education
- School Guidance Counselor licensure by the Massachusetts Department of Elementary and Secondary Education

Regulations may change at any time. Cambridge College reserves the right to alter the program accordingly. The academic advisor and program chairs are available to advise students.

Students are responsible for monitoring and understanding state requirements and regulations, and for ensuring that their program of study complies with all requirements for licensure/certification.

Exit Portfolio

Most programs require students to assemble an educational portfolio over the course of their studies. It highlights the students’ professional knowledge, skills and abilities, and documents quality graduate level work. The specific requirements of each program's exit portfolio vary. See the program chart and program handbook, and ask the program chair and/or academic advisor for information.

Accreditation

The School Guidance Counseling Program at Cambridge College is awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.
School Adjustment and School Guidance: Counseling programs for Massachusetts ESE licensure

Programs leading to certification are aligned with national and state standards, accrediting agencies, and policies for licensure required by the Massachusetts Department of Elementary and Secondary Education (ESE); all programs are state-approved by state regulatory agencies. As such, program requirements are subject to change during a course of study and students are asked to consider this possibility and plan accordingly once enrolled in one of the licensure programs offered.

Seek advice from the program chair before registering for a licensure program.

All students seeking licensure in counselor education programs must:

- Complete the Massachusetts-specific admission and program requirements.
- Complete the Pre-Practicum, Practicum and Internship Field Experiences within the Commonwealth of Massachusetts.

Requirements for Program Entry

Entry into a Cambridge College program for ESE licensure requires:

- Massachusetts Educator Personnel ID (MEPID) number,
- Evidence of successful completion of the Communication and Literacy Massachusetts Test for Educator Licensure (MTEL), and
- A minimum Grade Point Average (GPA) of 3.0 in the most recent degree program.

Those entering the College having successfully met the Communication and Literacy MTEL and the GPA requirement may register for the licensure program of choice provided that evidence is submitted at admission verifying that the requirements are met. Evidence of the Communication and Literacy MTEL requirement includes a copy of the official document noting the “pass score” or verification page from the Educator Licensure and Recruitment (ELAR) system maintained by the Massachusetts Department of Education and Secondary Education. Evidence of the GPA upon College entry includes the official transcript of a prior undergraduate or graduate degree with a 3.0 GPA or better.

Those entering the College without having met the Communication and Literacy MTEL and/or the GPA requirement must register in the non-licensure program aligned with their desired area of study:

- School Guidance/Mental Health Counseling (60 credits): Register for Mental Health Counseling.
- School Adjustment/Mental Health Counseling (60 credits): Register for Mental Health Counseling.

Students who graduate from the non-licensure program can not be endorsed by Cambridge College for ESE licensure in School Guidance. They may apply to ESE after graduation and ask for a panel review to obtain such licensure.

Once the Communication and Literacy MTEL test is successfully passed and a 3.0 received (i.e., Grade “B” or better in at least two courses taken at Cambridge College), then a Change of Program Form can be completed with approval from the program chair in the field selected and dean, then submitted to the Registrar’s Office.

Students entering without having met the requirements for ESE licensure programs are advised to take the Communication and Literacy MTEL within the first semester of enrollment at Cambridge College. Workshops are offered to students at an additional fee to facilitate their success.

Once enrolled, candidates for licensure must maintain an overall GPA of 3.0 or better for the remainder of the program. Should the GPA drop below 3.0, an academic warning will be issued and the candidate placed on academic probation. If not resolved prior to the Practicum, the candidate must return to the non-licensure degree option.

No candidate can complete or graduate from the approved program for licensure selected without maintaining a GPA of 3.0 or better at Cambridge College.

Review of Progress and Practice

Due to the impact graduates will have on clients throughout their careers, the School of Psychology and Counseling considers the training and credentialing of master’s level counselors a matter of great sensitivity and importance. Consequently, faculty review and discuss students’ behavior within the graduate academic program and the field work site.

Students are expected to follow the American Counseling Association (ACA) Code of Ethics.

The Committee on Professional Conduct has developed guidelines for students’ professional behavior with which all graduate counseling students are expected to comply. The complete document and list of the guidelines is available from Counseling Psychology faculty. Students are encouraged to contact graduate faculty if they need further information.

The School reserves the right to require additional courses, field work, supervision, personal counseling and/or leave of absence. A student may be suspended or disenrolled for violation of ethical standards or lack of academic progress. The School may also recommend a change to a non-clinical major or require a student to leave the School of Psychology and Counseling.

Guidelines for Students’ Professional Behavior

The following guidelines apply to each student’s academic performance, classroom behavior, field-site performance, and general decorum while enrolled at Cambridge College and includes interactions with peers, colleagues, supervisors, clients, other professionals, faculty, advisors, staff, and administrators. The School of Psychology and Counseling recognizes that “professional behavior” is an evolving process and that students will be developing their awareness and skills in this area as they advance in their program. Students will be offered feedback and guidance from instructors and supervisors throughout their program, but students are also responsible for initiating such input. Attitudes and attributes include but are not limited to:

1. Demonstration of the capacity to work collaboratively and respectfully with others throughout all ranges of professional training experience.
2. Sustained awareness of one’s effectiveness and functioning in...
clinical and academic settings as well as an awareness of use-of-self and one’s personal and professional impact on others.

3. Demonstration of the capacity and willingness to actively respect professional boundaries in interactions with faculty, site supervisors, and staff.

4. Demonstration of the capacity to interpret accurately and reasonably the conduct of one’s self and of others.

5. Demonstration of and willingness to assume responsibility for learning by utilizing appropriate available resources to fulfill clinical and academic responsibilities (e.g., consultation, supervision, literature, etc.).

6. Demonstration of and willingness to meet academic and professional obligations in fieldwork and in the classroom in a timely and responsible manner.

7. Receptivity to constructive commentary and/or criticism from instructors to address such issues that may have been identified.

8. Demonstration of the capacity and willingness to evaluate one’s self and others honestly, fairly, and sensitively (e.g., in supervision, in classroom exchanges and exercises, during conferences, etc.).

9. Ability to empathize with clients and an ability to demonstrate this quality effectively in professional role responsibilities (i.e., in both clinical and applied work as well as in general behavior within school, field, or other work settings).

10. Demonstration of recognition, appreciation, and sensitivity to individual differences and diversity in the human experience and the relevance of such understanding for the practice of counseling and marriage and family therapy.

11. Overall knowledge, appreciation, and acceptance of the ethical standards and guidelines for the practice of counseling and marriage and family therapy.

12. Demonstration of the willingness and ability to take corrective actions once a problem area has been identified.

13. Not repeating any behavior perceived as “misconduct” after being informed of this perception.

14. Full cooperation and compliance with this Council and its process is expected.

**On-going training**

After completing a master’s degree, continuing graduate education is typically required to maintain licensure. Cambridge College courses and workshops can meet this on-going need for alumni.
Program Description — Counseling Psychology is a pre-licensure graduate program for students planning to enter the practice of mental health or improve their skills and professional qualifications. The program has a strong commitment to an evolving multicultural society.

Learning Outcomes — Students learn the principles and best practices of counseling including various psychotherapeutic techniques for work with individuals, families and groups; group counseling, and consultation to organizations and communities. They study human development, dysfunctional behavior and mental illness, strategies for prevention and treatment of substance abuse and domestic violence. They become familiar with community resources for referrals. They study research design and methodology. They become familiar with state regulations applicable to mental health practice.

Careers and Further Study — Graduates may qualify for employment or advancement in mental health agencies. They will be eligible to continue study towards mental health licensure at the CAGS level.

Academic Requirements
Counseling Psychology core courses, practicum, field experience 18
SOPC electives and concentrations 18
CCP592 Exit Portfolio non-credit
Total 36

Elective Concentrations
Students may choose one or two concentrations to earn additional credentials and knowledge. The program of study may not exceed 36 credits.

- Addiction Counseling — CADAC, LADC
- Geriatric Mental Health
- Holistic Counseling
- Pastoral Counseling
- Trauma Studies

Courses should be taken in sequence. Term 1 courses must be completed before term 2 courses. A maximum of 4 courses can be taken each term.

Term 1
CCP540 Personality & Counseling Theory
CCP550 Basic Counseling Skills: Rogersian Therapy (includes assessment of preparedness for field experience)
Two elective or concentration courses.

Term 2
CCP650 Group Dynamics/Group Counseling & Human Systems
CCP520 Counseling Practicum
Two elective or concentration courses.

Term 3
CCP641 Counseling Internship/SAC Field Experience II
Three elective or concentration courses.

Term 4
CCP630 Human Development Across the Lifespan
Select no more than 3 courses to complete your program of study.

Practicum & Internship
The practicum and internship include field experience under a qualified supervisor, conforming to Massachusetts regulations 262 CMR. May be individually designed to support licensure requirements. Further requirements are briefly outlined under each concentration. See also program handbook.

Admission requirements: Bachelor’s degree and other School of Psychology & Counseling requirements.
Program chair: Hugh Ferguson, PhD
Hugh.Ferguson@cambridgecollege.edu

(All courses @ 3 credits.)
Program Description — Mental Health Counseling provides graduate level professional training for mental health counseling licensure, with a strong commitment to an evolving multicultural society. Students are prepared to meet the licensing standards of the Massachusetts Board of Registration of Allied Mental Health Professionals.

Learning Outcomes — Students learn and apply the principles and best practices of counseling, including various psychotherapeutic techniques for work with individuals, couples, families and groups; group counseling, and consultation to organizations and communities. They study human development, dysfunctional behavior and mental illness. They learn to assess, diagnose and treat within the scope of the counselor’s practice, and become able to utilize community resources for referrals. They learn and apply strategies for prevention and treatment of substance abuse, domestic violence, the spectrum of mental illnesses; and learn to use psychoeducational techniques aimed to prevent such disorders. They study research design and methodology. They become familiar with state regulations applicable to mental health practice and licensure.

Holistic Counseling

9 credits

Program Description — Holistic Counseling is available as a concentration to students interested in exploring Eastern and Western as well as modern and ancient ways of understanding psychology and human behavior. The program integrates knowledge from the study of body, mind, and spirit. Students will review traditional Western and Eastern ways of understanding, and examine how different perspectives fit with new information emerging from neuroscience.

The starting point for our inquiry assumes that a foundation in the biological substrates of human behavior, emotion, and consciousness is essential not only to understanding psychological disequilibrium, but to discerning the impact of various somatic therapies. The program revolves around a series of questions:

- How does our understanding of evolution, physiology, and the body inform the study of psychology?
- Can new research in neuroscience offer a fresh perspective on both traditional and modern theories of motivation and intrapsychic/interpersonal conflict?
- What are the conceptual and practical differences between reductionist and holistic approaches to working with people in psychological distress?
- Do Eastern ways of understanding human experience complement Western theories — or are the differences difficult to reconcile?
- What are the intrinsic limitations of different epistemological tools?
- Can science inform perspectives on the potential for holistic healing, self-actualization and transcendence?

Program Outcomes — In addition to general outcomes of the degree, graduates will develop a conceptual framework that informs a holistic approach to counseling in today's world.

In creating a holistic learning experience, students will spend at least one term developing an experiential practice (e.g. meditation or yoga) of their own to complement the academic work. Students will keep a journal recording reflections on their experiences with the meditative practice they choose to develop.

Careers — Holistic approaches to counseling are used in both alternative and mainstream settings: medical (e.g. with pain management), community counseling, and academic settings (e.g. stress management).

Courses

CCP681 Mind, Body, & Emotion: a Holistic Perspective
CCP671 East & West: Self, Suffering, & Healing
CCP652 Holistic Approaches to Psychotherapy

Pastoral Counseling

9 credits

Program Description — Pastoral Counseling is available as a concentration for students interested in developing the knowledge, skills and training needed to provide effective and informed counseling services from a spiritual and/or faith-based perspective. Clinical, psychological and faith-based frameworks are integrated in order to address the multi-layered aspects of a client's experience including mental, emotional and spiritual elements. The foundational premise of this program is that when this integrative approach is used to understand, assess and provide treatment, clinical practice becomes more attuned and responsive to the needs of the whole person.

The program emphasizes inclusive, interfaith dialogue and cooperative and constructive interaction between individuals of different faiths and/or humanistic or spiritual beliefs. Throughout the curriculum, students will have many opportunities for reflective thought, applied learning, and personal and professional growth.

Program Outcomes — Graduates will possess a strong clinical background; a firm knowledge base of spiritual and faith-based perspectives; and a keen ability to integrate these understandings in their approach with diverse populations of varying faith traditions. Students will develop a deeper awareness and appreciation for different spiritual systems of meaning-making, values and beliefs; as well as an increased understanding and appreciation for the impact of religious and spiritual frameworks on the counseling process.

Careers — Graduates will be qualified for counseling positions in generalist practice; faith-based organizations; healthcare, palliative or hospice-care settings; crisis management; and counseling positions in religious communities or congregations. This program is also well-suited for religious or faith leaders who wish to understand the mental health needs of their congregations or faith communities.

Courses

CCP642 Fundamentals of Pastoral Counseling
CCP657 Terror, Trauma & the Sacred: Psychological & Spiritual Perspectives
CCP653 Religious Coping from a Sociocultural Perspective

CAGS students please consult with advisor and/or program chair and enroll in the corresponding CAGS-level courses.

(All courses @ 3 credits.)
Elective Concentrations
for: Mental Health Counseling

Elective Concentration for Mental Health Counseling (MEd only)

Marriage & Family Therapy
18 credits • MFT

Program Description — Marriage & Family Therapy provides professional training for counseling traditional and non-traditional families and couples in a multicultural society.

Choose six courses:
CCP561 Counseling Techniques with Multi-Problem Families in Changing Communities
CCP606 Family Treatment of Substance Abuse
CCP625 Foundations of Couples Counseling
CCP627 Family Assessment from a Multicultural Perspective
CCP710 Marriage & Family Therapy: Basic Counseling Skills
CCP721 Women in the Family: a Cross-Cultural Perspective
CCP722 The Life of the Family in Context
CCP723 Narrative and Collaborative Approaches to Therapy

Practicum/Internship Field Experience: Students must complete a minimum of 740 hours of on-site field placement time, of which 300 hours must be done in direct face-to-face client contact. Students must receive a minimum of 160 hours of supervision, which includes 55 hours of individual supervision by an approved supervisor, a minimum of 50 hours of group supervision with no more than 10 students, and 55 hours of either individual or group supervision. At least 25 hours of supervision must be done through video/audio supervision or direct observation. As this is a joint LMHC/LMFT program, students must also have 50 hours of documented LMHC supervision for licensure. See also program handbook.

Elective Concentration for Mental Health Counseling (MEd & CAGS)

Rehabilitation Counseling
18 credits • CRC, LRC

Program Description — Rehabilitation Counseling is an elective, clinical concentration for students who wish to pursue national certification as a rehabilitation counselors (CRC) and state licensure as rehabilitation counselors (LRC). Coupled with the MEd in Mental Health Counseling, students simultaneously complete the academic requirements for Mental Health Counseling licensure.

Program Outcomes — A focus on rehabilitation counseling helps practitioners to more comprehensively serve the needs of people returning to work or having workplace issues after injury, dealing with intellectual, emotional and/or physical challenges, veterans facing complex mental health and rehabilitation, and a host of other issues relating to the interface of disabilities and mental health.

Careers — Graduates will be qualified to pursue national certification and state licensure as rehabilitation counselors, and for the more general licensure in mental health counseling, allowing for significant career flexibility. Rehabilitation counselors typically work in settings such as mental health agencies, the Veterans Administration, state vocational rehabilitation agencies, insurance companies dealing with disability, non-profit agencies, employee assistance programs, disability management firms and consulting agencies, among others.

Courses
CCP651 Vocational Analysis & Job Placement (take instead of CCP670 Career Counseling)
CCP656 Vocational Assessment & Evaluation
CCP655 Vocational and Affective Counseling
CCP654 Rehabilitation Plan Development
CCP643 Medical & Psychological Aspects of Disabilities

Not applicable to SAC students:
CCP727 Clinical Interventions for Combat Stress & Trauma
or CCP729 Trauma Intervention in Schools

(CAGS students please consult with advisor and/or program chair and enroll in the corresponding CAGS-level courses.)

Cambridge, MA • 617.868.1000 • www.cambridgecollege.edu

Academic Catalog 2016-2017 • Sep 20, 2016

219
Program Description — School Adjustment and Mental Health Counseling trains mental health professionals to work within the school culture and in clinical settings, serving the mental health needs of PreK-12 students and their families. The use of evidence-based counseling strategies when working with children and adolescents in school settings is emphasized. Students are prepared to meet the licensing standards of the Massachusetts Board of Registration of Allied Mental Health Professionals and the Massachusetts Department of Elementary and Secondary Education.

MTEL Required — The Mass. Communication and Literacy Test (MTEL) must be passed before a student may enter the School Adjustment Counseling program. All new students must register for Mental Health Counseling until they pass.

Learning Outcomes — Students learn and apply the principles of therapeutic relationships; knowledge of normal and abnormal intellectual, social, and emotional development; learning disorders and emotional issues affecting student achievement. They develop working knowledge of treatments; state-of-the-art diagnostic instruments, procedures for testing, and interpreting results; medical conditions and medication related to physical disabilities and learning disorders. They learn to work with families, schools and community personnel. They learn and apply prevention and treatment strategies for substance abuse, physical and sexual abuse, and violence in preK-12 students. They develop a working knowledge of the criminal justice system with particular reference to juvenile justice. They learn and apply laws and regulations addressing the legal rights of students and families.

Elective Concentrations
Students electing a concentration take only one school adjustment electives. The program of study may not exceed 60 credits.

- Addictions Counseling — CADAC, LADC
- Geriatric Mental Health
- Holistic Counseling
- School Adjustment & Mental Health Counseling core program with no concentrations — LMHC, DESE
- Pastoral Counseling
- Rehabilitation Counseling
- Trauma Studies

Courses should be taken in sequence. Term 1 courses must be completed before term 2 courses. A maximum of 4 courses can be taken each term.

Term 1
CCP518 Research Design & Evaluation
CCP540 Personality & Counseling Theory
CCP550 Basic Counseling Skills: Rogerian Therapy (includes assessment of preparedness for field experience)
CCP630 Human Development Across the Lifespan

Term 2
CCP615 Psychopathology
CCP650 Group Dynamics/Group Counseling & Human Systems
CCP520 Counseling Practicum
CCP636 Psychological Testing

Term 3
CCP641 Counseling Internship/SAC Field Experience II*
CCP670 Career Counseling (for Rehabilitation Counseling concentration take CCP651 Vocational Analysis & Job Placement instead of CCP670)
CCP617 School Adjustment Counseling/School Social Work*
One elective or concentration course.

Term 4
CCP754 Perspectives in Cross-Cultural Counseling
CCP700 Internship Seminar/SAC Field Experience III*
CCP561 Counseling Techniques with Multi-Problem Families in Changing Communities*
or CCP715 Multicultural Counseling: Children, Adolescents in Context*
One elective or concentration course.

Term 5
CCP622 Ethics & Professional Issues for School Counselors & Mental Health Practitioners
CCP701 Advanced Internship Seminar/SAC Field Experience IV* (If field experience requirements are already completed, CCP701 may be replaced with an elective.)
Two elective or concentration courses.
CCP708 School Adjustment Counseling Exit Portfolio (non-credit)

Term 6 and subsequent terms
Select no more than 4 courses to complete your program of study.

* SAC core courses & internship.
School Adjustment & Mental Health Counseling

Practicum & Internship
The practicum and internship include field experience under a qualified supervisor, conforming to Massachusetts regulations 262 CMR. Requirements for the SAC/LMHC practicum/internship are briefly outlined below. Further requirements are briefly outlined under each concentration. See also program handbook.

School Adjustment Field Experience Prerequisites
- Pass all first-year requirements.
- SAC Pre-Practicum — 75 hours of directed field-based training in a school site (non-credit)
- Pass all teacher tests required by the state for this license. Massachusetts MTELs: Communication & Literacy test.
- Site approval form signed by SAC chair.

School Adjustment Field Experience / Mental Health Internship
Includes field experience under a qualified supervisor, conforming to Massachusetts regulations 262 CMR. Internship must be supervised by a dually licensed qualified supervisor (262 CMR and SAC by DESE) who is in an SAC role and meets all state standards. See program handbook.

- 900 hours total (minimum), to be completed in three or four terms in school and mental health settings.
- LMHC internship recommended in first year (CCP520),
- SAC field experience after practicum is completed (CCP641, CCP700; and 701 if needed).
  - School placement must be approved by the SAC chair.
  - 450 hours (minimum), completed in two sequential terms for SAC placement.
  - In one school setting approved by the SAC chair according to DESE standards.
  - Supervisor must work in SAC role with children, adolescents and families.

Admission requirements:
Bachelor's degree and other School of Psychology & Counseling requirements.

Required to enter program for ESE licensure:
- Massachusetts Educator Personnel ID (MEPID) number
- Pass Massachusetts Communication & Literacy Test (MTEL).
- 3.0 GPA at entry; maintained throughout program.

Non-licensure option: Mental Health Counseling, which is not an ESE licensure area.

Program and schedule subject to change.

Program chair: Vita Golub • Vita.Golub@cambridgecollege.edu
Master of Education

School Guidance Counseling
48 credits, 4 terms full-time ● Program approved by the Massachusetts Dept. of Elementary & Secondary Education for the preparation of school guidance counselors (PreK-8 or 5-12).

Program Description — School Guidance Counseling is treated as professional counseling which enhances child and adolescent students’ access to high quality educational and vocational experiences and facilitates their ability to make good use of opportunities. The program emphasizes the role of the school counselor as a facilitator of educational reform, reducing barriers in the multicultural 21st century: a group worker skilled in developmental guidance, a practitioner helping students find their academic niche and aiding their academic achievement, a broker of educational and community resources, an interpreter of assessment tools, and a consultant to students, parents, and staff.

Learning Outcomes — School Guidance students develop their professional philosophy, principles and practices for their work with students and parents, teachers and administrators. They gain and apply knowledge of research in school guidance; the psychology of learning; curriculum frameworks and student testing; normal and abnormal intellectual, social, and emotional development; diagnosis and treatment of learning and behavior disorders. They learn strategies for prevention and treatment of substance abuse, physical and sexual abuse, the spectrum of mental illnesses, and violence in PreK-12 students. They gain resources and skills to effectively help students plan for post-secondary education and careers. They become familiar with relevant federal, state, and municipal laws and regulations; group counseling, leadership and consulting techniques; and school and community resources for referral.

Careers and Further Study — Licensed school guidance counselors in public schools.

Courses should be taken in sequence. Term 1 courses must be completed before term 2 courses. A maximum of 4 courses can be taken each term.

Term 1
CCP518 Research Design & Evaluation
CCP540 Personality & Counseling Theory
CCP550 Basic Counseling Skills: Rogerian Therapy (includes assessment of preparedness for field experience)
CSG695 Counseling & Consulting Techniques Lab

Guidance Pre-Practicum—75 hours of directed field-based training in conjunction with Term 1 courses (internship preq.; 0 credit)

Term 2
CSG616 Counseling in the Schools
CCP630 Human Development Across the Lifespan
CCP650 Group Dynamics/Group Counseling & Human Systems
CSG682 Developmental Group Guidance Laboratory

Guidance Internship Prerequisites
● Guidance Internship approval form signed by program chair or designee.
● Pass all teacher tests required by the state for this license. Massachusetts: Communication & Literacy Test (MTEL)
● Complete and pass all term 1 & 2 courses.

Term 3
CCP636 Psychological Testing
CCP622 Ethics & Professional Issues for School Counselors & Mental Health Practitioners
CCP670 Career Counseling
CSG692 Guidance Internship Fieldwork & Seminar I
  for PreK-8: register for CSG792E
  for 5-12: register for CSG792S

Term 4
CSG613 Counseling College Bound Students (for 5-12) or elective (for PreK-8)
CCP754 Perspectives in Cross-Cultural Counseling
CCP615 Psychopathology
CSG793 Guidance Internship Fieldwork & Seminar II
  for PreK-8: register for CSG793E
  for 5-12: register for CSG793S

Suggested electives:
CCP561 Counseling Techniques with Multi-Problem Families in Changing Communities
CCP715 Multicultural Counseling: Children, Adolescents in Context
CCP729 Trauma Intervention in Schools
CCP640 Addiction Disorders
CCP606 Family Treatment of Substance Abuse
CCP637 Neurobiology: Basics & Beyond

The School Guidance Counseling Program at Cambridge College is awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.
Admission requirements: Bachelor's degree and other
School of Psychology & Counseling requirements.

Required to enter program for licensure:
- Massachusetts Educator Personnel ID (MEPID) number
- Pass Massachusetts Communication & Literacy Test (MTEL).
- 3.0 GPA at entry; maintained throughout program.

In the term PRIOR to enrolling in the Guidance field experience
students students are responsible for:
- Discussing options for internship with the program chair or regional
  site director. All school guidance field experience sites must be
  within the state of Massachusetts.
- Submitting Guidance Field Experience Approval form to program
  chair or designee, with copy of MTEL passing score.

Guidance Internship Fieldwork & Seminar: CSG792-793
Fieldwork is guided and evaluated in the classroom by a guidance
counselor licensed in Massachusetts, who meets all state standards;
and by a licensed Cambridge College site visiting supervisor. See
program handbook.
- 2 terms 300 hours, 600 hours total, in one school setting.
- Internship locations are subject to state regulations and must be
  approved by the program chair or designee.
- Completed Exit Portfolio required for credit.

Non-licensure option: All program components are required except
the Communication & Literacy Test (MTEL). Non-licensure students
must complete all pre-practicum hours embedded in the courses.

Students who graduate from the non-licensure program will not be
endorsed by Cambridge College for initial licensure as a school
guidance counselor to the Dept. of Elementary and Secondary
Education.

Program sequence may be modified to suit the needs of the cohort.

Program and schedule subject to change.

Program chair: Vita Golub  •  Vita.Golub@cambridgecollege.edu
The School Guidance Counseling Program at Cambridge College is awarded TEAC accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP) for a period of five years, from May 2014-May 2019. The accreditation does not include individual education courses that the EPP offers to P-12 educators for professional development, re-licensure, or other purposes.

Program Description — School Guidance Counseling and Mental Health Counseling trains professional counselors to work within the school culture and in clinical settings, serving the guidance and mental health needs of PreK-12 students and their families. The program emphasizes the role of the school counselor in reducing barriers in the multicultural 21st century: a group worker skilled in developmental guidance, a broker of educational and community resources, an interpreter of assessment tools, and a consultant to students, parents, and staff. Students are prepared to meet the licensing standards of the Massachusetts Board of Registration of Allied Mental Health Professionals, and of the Department of Elementary and Secondary Education.

MTEL Required — The Mass. Communication and Literacy Test (MTEL) must be passed before a student may enter the School Guidance Counseling program. All new students must register for Mental Health Counseling until they pass.

Learning Outcomes — Students learn about normal and abnormal intellectual, social, and emotional development, dysfunctional behavior and mental illnesses. They learn and apply the principles and best practices of counseling and collaboration within schools and community counseling practice, including:

- Resources and skills for enhancing children's and adolescents' educational and vocational experiences and facilitating their ability to make good use of opportunities.
- Assessment, diagnosis and treatment of learning and behavior disorders and mental illnesses.
- Psychoeducational techniques for prevention and strategies for treatment of substance abuse, physical and sexual abuse, mental illnesses, and violence in PreK-12 students and throughout the lifespan.
- Psychotherapeutic techniques for work with individuals, couples, families and groups.
- Group counseling, leadership and consulting techniques; and school and community resources for referral.

Students gain and apply knowledge of:

- Psychology of learning, curriculum frameworks, student testing.
- Research design and methodology.
- Relevant federal, state, and municipal laws and regulations.

Courses should be taken in sequence. Term 1 courses must be completed before term 2 courses. A maximum of 4 courses can be taken each term.

Term 1
CCP518 Research Design & Evaluation
CCP540 Personality & Counseling Theory
CCP550 Basic Counseling Skills: Rogerian Therapy (includes assessment of preparedness for field experience)
CSG695 Counseling & Consulting Techniques Lab

Guidance Pre-Practicum — 75 hours of directed field-based training in conjunction with Term 1 courses (Guidance Internship preq.; 0 credit)

n. use of data to advocate for programs and students ............................... CSG616, CCP518
Master of Education
Psychological Studies
36 credits  ●  3 terms full time  ●  non-licensure

Program Description — Psychological Studies is a non-licensure graduate program that introduces students to a broad range of psychological perspectives, with a strong commitment to an evolving multicultural society.

Learning Outcomes — Students are exposed to the principles of counseling. They learn about assessment, resources, cultural and racial dynamics, roles on interdisciplinary teams, ethics and relevant laws. They learn about small group dynamics and processes and how leadership styles influence group process. Students have flexibility to choose courses to support their particular interests in the field.

Careers and Further Study — Graduates may be eligible for advancement in human service careers that do not require licensure. They will NOT be eligible to return to study towards mental health licensure at the CAGS level.

Academic Requirements
Psychological studies core courses.............................................15
Psychological Studies elective courses...............................21
CCP592  Exit Portfolio ....................................................... non-credit
Total ..........................................................36

Psychological Studies Electives  — choose seven*
CCP600  Biopsychosocial Dimensions of Aging  ........ Fall
CSG613  Counseling College Bound Students
CCP631  The Counselor in the Forensic Environment  ... Summer
CCP634  Death & Dying ........................................ Spring
CCP622  Ethics & Professional Issues for School Counselors & Mental Health Practitioners
CCP606  Family Treatment of Substance Abuse
CCP681  Mind, Body, & Emotion: a Holistic Perspective
CCP615  Psychopathology
CCP518  Research Design & Evaluation
CCP657  Terror, Trauma & the Sacred: Psychological & Spiritual Perspectives  ........ Summer
CCP721  Women in the Family; a Cross-Cultural Perspective

Core courses below should be taken in sequence.
For example, all term 1 courses must be completed before term 2 courses. Select no more than 4 courses each term for a maximum course load of 12 credits.

Term 1
CCP540  Personality & Counseling Theory
CCP630  Human Development across the Lifespan
Two elective courses.

Term 2
CCP640  Addiction Disorders
Three elective courses.

Term 3
CCP670  Career Counseling
CCP754  Perspectives in Cross-Cultural Counseling
Two elective courses.

Term 4
Select no more than 4 courses to complete your program of study.

Admission requirements: Bachelor’s degree and other School of Psychology & Counseling requirements.

Program chair: Hugh Ferguson, PhD
Hugh.Ferguson@cambridgecollege.edu

*Students may select other elective courses with approval of the program chair.
Certificate of Advanced Graduate Studies with Elective Concentrations

CAGS in Mental Health Counseling

36 credits • 3-4 terms full time

**Program Description** — The CAGS in Mental Health Counseling is an advanced, post-master’s certificate program. Students will increase their expertise, add a new credential and area of competency, or upgrade their credentials in order to meet requirements for licensure.

**A Flexible, Individualized Program** — Each student meets with an advisor to plan an individualized academic program. Students meet periodically with their advisor to review educational and career goals. Course choices must be considered carefully in consultation with the program chair and/or academic advisor.

**Academic Requirements**

**Required course work** ............................................. 6
CCA825 Counseling Leadership Seminar
CCA830 Advanced Counseling Practice

**Internship** ............................................................... 6-12
CCA805 CAGS Practicum—required before CCA820 if mental health practicum was not taken in prior master’s program (counts as elective).

CCA820 Counseling Internship Seminar
CCA821 Advanced Internship Seminar

CCA823 Counseling Internship Seminar III—only if a third term is needed to complete field experience hours (counts as elective).

**Mental Health core courses, CAGS electives, concentrations** ........... 24
All mental health core courses not previously taken at master’s level must be taken to meet licensure requirements. See courses and sequence outlined in the MEd in Mental Health Counseling program, and consult with advisor or program chair to ensure enrollment in the corresponding CAGS-level courses (700-800 level).

All courses must be chosen with approval of academic advisor or program chair. Select no more than 4 courses each term for a maximum course load of 12 credits.

**Elective Concentrations**

After fulfilling licensure requirements, students may choose an elective concentration with advisor or program chair approval. The program of study may not exceed 36 credits.

- **Addictions Counseling** — CADAC, LADC
- **Geriatric Mental Health**
- **Holistic Counseling**
- **Mental Health Counseling** core program with no concentrations — LMHC
- **Pastoral Counseling**
- **Rehabilitation Counseling** — CRC, LRC (Due to the length of this concentration, no second concentration may be added.)
- **Trauma Studies**

**Practicum & Internship**

The practicum and internship include field experience under a qualified supervisor, conforming to Massachusetts regulations 262 CMR. May be individually designed to support licensure requirements. Further requirements are briefly outlined under each concentration. See also program handbook.

**Admission requirements:** Master’s degree in counseling or a closely related field, and other School of Psychology & Counseling requirements.

**Program chair:** Hugh Ferguson, PhD
Hugh.Ferguson@cambridgecollege.edu

(All courses @ 3 credits.)
Program Description — Alcohol & Drug Counseling is for students seeking professional training in substance abuse/addictions treatment, education and prevention, leading to certification or licensure.

Careers — Addictions counseling professionals help people through public health agencies, youth services, residential treatment programs, hospitals, outpatient substance abuse programs, and homeless shelters.

Learning Outcomes — Students become familiar with addictions counseling, its professional ethics, and its role in society. They learn the 12 core functions of an addictions counselor: screening, intake orientation, assessment, treatment planning, referrals, reports and record keeping, and consultation with other professionals. They know and apply current theory and research in their field, and gain sufficient knowledge for competent interdisciplinary counseling practice. They exhibit socially-conscious behaviors, critical thinking, and effective communication skills in their work with individuals, caregivers, families, staff, and other professionals.

Courses
ADC510 Ethics & Boundaries for Substance Abuse Professionals 1
ADC505 Alcohol & Drugs in Society ......................... 3
ADC611 Family Treatment of Substance Abuse............... 3
ADC601 Role of the Professional in Alcohol & Drug Treatment... 3
ADC625 Psychopharmacology in Addictions Treatment .......... 3
ADC642 Addiction Counseling ............................. 3

Practicum
Includes 300 hours of supervised practical experience in an approved substance abuse treatment program with appropriate supervision in the 12 core functions. The experience and supervisor qualifications must meet 262 CMR criteria to be accepted into an MEd.
ADC521 Practicum Seminar in Alcohol & Drug Counseling ...... 3

Admission requirements: High school diploma/GED, bachelor’s, or higher degree and other School of Psychology & Counseling requirements.(see Admissions) Including:
- Interview with and approval of the SOPC Admissions Committee and acceptance by the dean.
- Interview with program chair.
- Current résumé.
- Two professional recommendations.

These courses may be accepted into a Cambridge College bachelor’s or master’s degree. Courses must meet current program requirements at time of matriculation.

Program co-chairs:
Colleen Goode, MEd  ● Colleen.Goode@cambridgecollege.edu
John Ciervo, CAGS  ● John.Ciervo@cambridgecollege.edu
Certificates

Post-master’s Certificate

Mental Health Counseling for School Guidance Counselors
24 credits • 4 terms • Licensed Mental Health Counselor (LMHC)

Program Description — This certificate program provides school guidance counselors in Massachusetts, with the educational and field experience requirements for licensure as a mental health counselor in Massachusetts.

CCP550 Basic Counseling Skills: Rogerian Therapy (includes assessment of preparedness for field experience)
CCP615 Psychopathology
CCP636 Psychological Testing

CCP754 Perspectives in Cross-Cultural Counseling
If students have completed CCP754 as part of their School Guidance Counseling program, they must take CCP715 Multicultural Counseling Children & Adolescents in Context.

Students who previously completed any of the listed courses shall consult with the program chair for substitute course work to meet the requirement of 24 credits.

Practicum & Internship — 4 terms
Includes field experience under a qualified supervisor, conforming to Massachusetts regulations 262 CMR. See program handbook.

CCP520 Counseling Practicum
CCP641 Counseling Internship/SAC Field Experience II
CCP700 Internship Seminar/SAC Field Experience III
CCP701 Advanced Internship Seminar/SAC Field Experience IV (take only if needed to complete field experience requirements) or substitute an SOPC elective.

Admission requirements:
- Completion of current Cambridge College 48-credit MEd in school guidance counseling or equivalent program; official transcript required if from another college.
- Initial license as a school guidance counselor (photocopy).
- Other School of Psychology & Counseling requirements.

Program chair: Hugh Ferguson, PhD
Hugh.Ferguson@cambridgecollege.edu

Rehabilitation Counseling Certificate
18 credits • CRC, LRC

Program Description — The Rehabilitation Counseling Certificate is for the individual seeking to add to their credential by pursuing a national certification as a rehabilitation counselor (CRC) and/or Mass. state licensure as a rehabilitation counselor (LRC).

Program Outcomes — A focus on rehabilitation counseling helps practitioners to more comprehensively serve the needs of people returning to work or having workplace issues after injury, dealing with intellectual, emotional and/or physical challenges, veterans facing complex mental health and rehabilitation, and a host of other issues relating to the interface of disabilities and mental health.

Careers — Rehabilitation counselors typically work in settings such as mental health agencies, the Veterans Administration, state vocational rehabilitation agencies, insurance companies dealing with disability, non-profit agencies, employee assistance programs, disability management firms and consulting agencies, among others.

Courses
CCP651 Vocational Analysis & Job Placement
CCP656 Vocational Assessment & Evaluation
CCP655 Vocational and Affective Counseling
CCP654 Rehabilitation Plan Development
CCP643 Medical & Psychological Aspects of Disabilities

And one of the following:
CCP727 Clinical Interventions for Combat Stress & Trauma or CCP729 Trauma Intervention in Schools

Admission requirements:
- 60-credit master’s or higher degree in mental health counseling, marriage & family therapy, social work, or psychology.
- Other School of Psychology & Counseling requirements.

Practicum/Internship Field Experience: Not required during academic training. However, 36 months of acceptable employment experience including 12 months supervised by a CRC will be required after completion of academic requirements to fulfill requirements for the CRC. See program chair for any questions.

Program chair: Linda Kuramoto, MS, CAGS, CRC, LMHC

School Adjustment & Mental Health Counseling for School Guidance Counselors

30 credits  •  4 terms  •  School Social Worker/School Adjustment Counselor (ESE)  •  Licensed Mental Health Counselor (LMHC)

Academic Requirements

Mental health core courses and practicum .................................. 15
School adjustment core courses and internship ........................... 15
CCP708  School Adjustment Counseling Exit Portfolio (non-credit)
Total ........................................................................................................ 30

Courses should be taken in sequence. For example, all term 1 courses must be completed before term 2 courses. Select no more than 4 courses each term for a maximum course load of 12 credits (all courses @ 3 credits).

Term 1

CCP550  Basic Counseling Skills: Rogerian Therapy (includes assessment of preparedness for field experience)
CCP615  Psychopathology
CCP520  Counseling Practicum

Term 2

CCP636  Psychological Testing
CCP641  Counseling Internship/SAC Field Experience II*
CCP617  School Adjustment Counseling/School Social Work*

Term 3

CCP700  Internship Seminar/SAC Field Experience III*
CCP754  Perspectives in Cross-Cultural Counseling
CCP561  Counseling Techniques with Multi-Problem Families in Changing Communities*
or CCP715  Multicultural Counseling: Children, Adolescents in Context*

Students who previously completed any of the listed courses (or equivalents) shall consult with program chair for substitute course work to meet 30-credit requirement.

Term 4

CCP701  Advanced Internship Seminar/SAC Field Experience IV*
(If field experience requirements are already completed, CCP701 may be replaced with an elective—see below.)

Special Treatment Issues (if possible) — choose one
CCP606  Family Treatment of Substance Abuse
CCP640  Addiction Disorders
CCP720  Psychopharmacology in Addictions & Mental Health Counseling
CCP724  Post Traumatic Stress Reactions
CCP729  Trauma Intervention in Schools

Mental Health Practicum/Internship—term 1
School Adjustment Field Experience—terms 2-3 or 3-4

Prerequisites

• SAC Pre-Practicum — 75 hours of directed field-based training in a school site (0 credit)
• Pass all teacher tests required by the state for this license. Massachusetts MTELs: Communication & Literacy test.
• Site approval form signed by SAC chair.

School Adjustment Field Experience / Mental Health Internship
Includes field experience under a qualified supervisor, conforming to Massachusetts regulations 262 CMR. Internship must be supervised by a dually licensed qualified supervisor (262 CMR and SAC by DESE) who is in an SAC role and meets all state standards. See program handbook.

Completed Verification form required by SOPC office before registering.

• 900 hours total (minimum); 300 hours in each of three terms in school and mental health settings.
• LMHC internship recommended in first year (CCP520), SAC field experience recommended in second year (CCP641, 700).
  • School placement must be approved by the SAC chair, and must be within Massachusetts.
  • 450 hours (minimum), completed in two sequential terms.
  • Supervisor must work in SAC role with children, adolescents and families.

Admission requirements:

• Completion of current Cambridge College 48-credit M.Ed. in school guidance counseling or equivalent program. (Students who took an earlier version of this program, or who earned their MEd at another college, may need to take additional course work to meet LMHC and SAC academic requirements.)
• Initial license as a school guidance counselor.
• Other School of Psychology & Counseling requirements.

Required to enter program for ESE licensure:

• Massachusetts Educator Personnel ID (MEPID) number
• Pass Massachusetts Communication & Literacy Test (MTEL).
• 3.0 GPA at entry; maintained throughout program.

Program chairs: Vita Golub  •  Vita.Golub@cambridgecollege.edu
and Hugh Ferguson, PhD Hugh.Ferguson@cambridgecollege.edu

School Adjustment Counseling for Mental Health Counselors

24 credits • 3-4 terms • School Social Worker/School Adjustment Counselor (ESE)

Academic Requirements

School adjustment core courses and internship. ............... 18
Two prevention or special treatment electives .................. 6
CCP708 School Adjustment Counseling Exit Portfolio (non-credit)
Total .......................................................... 24

Courses should be taken in sequence. For example, all term 1 courses must be completed before term 2 courses. Select no more than 4 courses each term for a maximum course load of 12 credits.

Term 1
CCP615 Psychopathology*
CCP617 School Adjustment Counseling/School Social Work*
CCP636 Psychological Testing*
Internship prerequisites

Term 2
CCP561 Counseling Techniques with Multi-Problem Families in Changing Communities*
or CCP715 Multicultural Counseling: Children, Adolescents in Context*
CCP700 Internship Seminar/SAC Field Experience III*
One prevention or special treatment course

Term 3
CCP701 Advanced Internship Seminar/SAC Field Experience IV*
One prevention or special treatment course

Admission requirements:

Completion of current Cambridge College 60-credit MEd in mental health counseling or equivalent program. (Students who took an earlier version of this program, or who earned their MEd at another college, may need to take additional course work to meet SAC academic requirements.)

Required to enter program for ESE licensure:

Massachusetts Educator Personnel ID (MEPID) number
Pass Massachusetts Communication & Literacy Test (MTEL).
3.0 GPA at entry; maintained throughout program.

Program chair: Vita Golub  Vita.Golub@cambridgecollege.edu

School Adjustment Field Experience Prerequisites

Pass all first-year requirements.
SAC Pre-Practicum — 75 hours of directed field-based training in a school site (0 credit)
Pass all teacher tests required by the state for this license.
Massachusetts MTELs: Communication & Literacy test.
Site approval form signed by SAC chair.

School Adjustment Field Experience

Includes field experience under a qualified supervisor, conforming to Massachusetts regulations 262 CMR. Internship must be supervised by a dually licensed qualified supervisor (262 CMR and SAC by ESE) who is in an SAC role and meets all state standards. See program handbook.

Completed Verification form required by SOPC office before registering.

School placement must be approved by the SAC chair, and must be within Massachusetts.
450 hours (minimum), 300 hours/term, completed in two sequential terms.
Supervisor must work in SAC role with children, adolescents and families.

Special Treatment Issues — choose two
CCP606 Family Treatment of Substance Abuse
CCP640 Addiction Disorders
CCP720 Psychopharmacology in Addictions & Mental Health Counseling
CCP724 Post Traumatic Stress Reactions
CCP729 Trauma Intervention in Schools

(All courses @ 3 credits.)
Graduate Certificate

Trauma Studies

15 credits • 2-3 terms

Program Description — Trauma Studies provides professional training in crisis intervention and trauma treatment, education and prevention, leading to certification. The program has a strong commitment to educating compassionate, ethical and effective trauma specialists. The program emphasizes the role of trauma specialists in implementing trauma-informed care across disciplines and utilizing community resources.

Learning Outcomes — Students will gain knowledge of crisis, trauma, post-traumatic stress reactions, trauma-specific interventions and disaster mental health in multi-cultural settings. They can apply the learned skills in trauma assessment, counseling and treatment to effectively respond to immediate and long-term needs of survivors, including war veterans, survivors of child abuse, first responders, immigrants and refugees, as well as victims of crime, disasters, domestic violence, sex trafficking and torture.

Careers — Upon completion, students will qualify to work in crisis response teams, provide trauma-informed care in community mental health, addiction treatment and rehabilitation programs in school settings and provide support for veterans, survivors of gender-based violence and refugees.

Select no more than 4 courses each term for a maximum course load of 12 credits (all courses @ 3 credits).

CCP615 Psychopathology
CCP622 Ethics & Professional Issues for School Counselors & Mental Health Practitioners

Trauma
CCP724 Post Traumatic Stress Reactions (preq for CCP728)
CCP728 Trauma-specific Interventions
CCP727 Clinical Interventions for Combat Stress & Trauma (Fall)
or CCP729 Trauma Intervention in Schools (Spring)

Students who previously completed any of the listed courses shall consult with the program chair for substitute course work to meet the requirement of 15 credits.

Course schedule: All courses are offered in Cambridge every term, subject to sufficient enrollment, except as noted above.

(All courses @ 3 credits.)

Admission requirements: Bachelor's degree and other School of Psychology & Counseling requirements.

Transfer credit — These courses may be taken alone as a certificate of completion or evaluated for transfer into a Cambridge College master’s degree program; courses must meet current program requirements and credit limits at time of matriculation.

Program chair: and Hugh Ferguson, PhD
Hugh.Ferguson@cambridgecollege.edu
Alcohol & Drug Counseling (ADC)

ADC505  Alcohol and Drugs in Society - 3 credits
This course provides an overview of alcohol and other drugs of abuse in our society today. The common drugs of abuse will be named and their actions based on substance, setting and individual psychological set will be described and examined. We will explore the consequences of abuse and dependence to the individual, the family, and society at large. Historical approaches to this issue including understanding etiological factors, as well as scientific methods of treatment, rehabilitation and prevention will be covered. Bio-psychosocial assessment and related interventions will be identified, including medications, counseling, 12 Step support and other psychological methods.

ADC510  Ethics and Boundaries for Substance Abuse Professionals - 1 credit
This course allows students to review ethical standards and raise awareness and standards. The course also addresses and educates participants in some of the common mistakes made by counselors in the substance abuse treatment field. Students studying to be substance abuse counselors are advised of certification requirements related to ethics.

ADC521  Practicum Seminar in Alcohol and Drug Counseling - 3 credits
Enrollment limited to 10. This course is for students beginning their alcohol and drug counseling program fieldwork. Counselor trainees become familiar with the following: basic professional counseling skills and behaviors; working with agencies/systems; the use of supervision; beginning diagnostic skills; and DSM-5 TR. The 300 hour practical supervised experience takes place in a facility or agency licensed to provide counseling services. An opportunity to provide 10 hours in each of the “12 core functions” will be part of this experiential placement. Participants complete case presentations, case scripts, process notes and take an active part in the didactic and demonstration parts of the class. Readings and active discussion are required. The Commonwealth of Massachusetts specifies that this practicum be supervised by an “approved supervisor” as described in (OMR) 262, in order for students to meet requirements for licensure as an LMHC. Requirements for those not seeking a mental health license will be provided by the program director or your advisor.

ADC601  Role of the Professional in Alcohol and Drug Treatment - 3 credits
This course introduces students to the role of the professional in alcohol and drug treatment. The historical development of treatment services and the various professionals associated with the field. The development of treatment modalities, the influence of the federal government and private facilities in developing standards and credentials for counselors and other professionals as well as certification, licensing standards, the institution of organizations and agencies designed to promote appropriate and evidence based treatment for alcohol and drug abuse/dependency will all be explored. The language and descriptors of treatment. The patient placement criteria of the American Society of Addiction Medicine and other instruments will be demonstrated. The “12 core functions” for substance abuse counselors, five domains and 46 global criteria of the international Certification Consortium will be presented and demonstrated. Levels of care and various settings of treatment programs will be explored.

ADC611  Family Treatment of Substance Abuse - 3 credits
This course bridges the gap between substance abuse counseling and family therapy. It examines the specific interactional patterns that help to maintain addictive behavior within the family. Case examples illustrate how to intervene in addictive families. The following topics are covered: a systemic perspective on addictive behavior; assessing substance abuse and setting treatment goals; the over responsibility/under responsibility dynamic in families; the family intervention model; treatment needs of young children and adult children of addictive families; and facilitating family adjustment to sobriety. Course requirements include class attendance, reading, participation in experiential exercises and role play.

ADC625  Psychopharmacology in Addictions Treatment - 3 credits
The use of medications in the treatment of alcohol and drug dependence has often been controversial. Recent times have seen the advent of more and different types of medications to address addiction directly. Agonist and antagonist drugs are designed to have a direct impact on the neurochemistry of addiction. The use of other psychotropic drugs can be contra-indicated in persons with addictive disorders. Because psycho-pharmacology treatment depends on diagnosis, this course will review the medical model's analytical mode, differential diagnosis. A brief review of relevant neuroanatomy and neurophysiology will then set the stage for an examination of the major psychotropic medications: anti-psychotics, anti-depressants, mood stabilizers and anti-anxiety agents. The course will be grounded throughout in clinical material, and case histories will be discussed during each class. Requirements will include one topical presentation. We will also share responsibility for presenting cases.

ADC642  Addiction Counseling - 3 credits
Designed for counselors with some knowledge in treating and educating substance abusers and their families, this course offers an in-depth examination of special populations and specific issues related to substance abuse treatment. Topics include: working with dual diagnosis clients; adolescent substance abuse; women treatment issues; working with diverse client populations including HIV positive clients; cultural competency; infectious diseases; tobacco cessation; relapse prevention; the use of strategic and paradoxical interventions; and certification of substance abuse counselors. Evidence based treatment from psychodynamic to motivational enhancement as well as modern approaches to relapse prevention will be explored.
Psychology & Counseling (CCP)

CCP 512  The Cognitive Therapies - 3 credits
Therapeutic applications of the cognitive theorists will be explored. Among the theorists are Insoo Kim Bergh (brief solution focused therapy), Aaron Beck (cognitive therapy), Richard Glasser (choice therapy), Albert Ellis (rational-emotive behavioral therapy), Arnold Lazarus (multi-modal therapy) and select others. Using didactic, video and experiential exercises, the course will address mental health issues in children and adolescents, addiction and substance abuse, bereavement, and family structure. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 518  Research Design & Evaluation - 3 credits
This course provides students with a foundation in research and evaluation methodologies and strategies, program evaluation and needs assessment. Students will gain an understanding of different types of research and research design, procedures for data collection and analysis, analysis of both hard and soft data, and ethical and legal considerations associated with research. Students will leave the course prepared to conduct and be discriminating consumers of research. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 520  Counseling Practicum and SAC Field Experience I - 3 credits
Prerequisite: CCP 550. The Commonwealth of Massachusetts specifies that this practicum be supervised by an “approved Supervisor” as described in (CMR) 262 in order for students to meet requirements for licensure.

(Enrollment limited to 10) This course is intended for students beginning their master’s program fieldwork. Counselor trainees become familiar with following: review the principles of therapeutic relationships and basic professional counseling skills and behaviors; developing techniques for communicating and working with families, agencies/systems, and school and community personnel; the use of supervision; beginning diagnostic skills; and DSM-5 TR. Participants complete case presentations, process notes, and treatment planning. Students take an active part in the didactic and demonstration parts of the class. This course will stress philosophy, principles, and practice of mental health/school adjustment counseling: therapeutic relationships; and federal, state, municipal and school laws. One contact hour of weekly supervision is required. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

For SAC students in school sites: Onsite training supervised by a state-approved licensed/certified school adjustment counselor who also has clinical licensure as an LMHC, LICSW, LMFT, clinical psychologist or psychiatrist is required. SAC students in school sites must pass MTEL Communication and Literacy Tests before entry.

This course addresses the following Massachusetts State Standards for School Adjustment Counseling: 3: A practicum of 900 hours, 450 of which must be working with children, adolescents, and families in an educational setting. (Cambridge requires Practicum fieldwork of 100 contact hours and Internship fieldwork of 600 contact hours). (Cambridge College recommends that students in the SAC track have 225 site hours for each of the four field experiences). 4: A passing score on the Communication and Literacy Skills test. Standard a: Principles of therapeutic relationships. Standard f: Techniques for communicating and working with families and school and community personnel. Standard i: Federal and state regulations addressing the legal rights of students and families.

CCP 540  Personality and Counseling Theory - 3 credits
Pre Practicum: 15 hours of directed field-based training required for ESE licensure.

This course explores personality and counseling theories, identifying strengths and weaknesses in each theory. Cultural elements are stressed. Theories are approached from an eclectic standpoint, including normal and abnormal, social, intellectual, and emotional development. Students are encouraged to identify an approach or approaches which are compatible with their history, current philosophy, clients and counseling settings. We also explore modern notions of cultural and family identity, increasing our ability to adapt counseling theory to the strengths and needs of individuals in our contemporary, diverse client population. The on-line library is employed in this course to gather evidence and support project development and presentations. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: b: Theories of normal and abnormal intellectual, social, and emotional development.

CCP 550  Rogerian Person-Centered Therapy: Basic Counseling Skills - 3 credits
The basis of therapeutic relationships is seen in Carl Rogers’ theory of personality with its stress of self-actualization, development of the self, phenomenological field, validation, and conditions of worth is the basis for the techniques that are taught, practiced and modeled in this course. These techniques are empathic understanding, unconditional positive regard, and congruence. These techniques are central to any effective relationship from any theoretical perspective. The student will become practiced at these and related aspects of person-centered theory. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Adjustment Counselor/School Social Worker: Standard a: Principles of therapeutic relationships.
CCP 561 Counseling Techniques with Multi-Problem Families in Changing Communities - 3 credits

It is strongly recommended that students participate in a practicum/internship while enrolled in this course. This course is for those beginning work with "multi-problem" families, and for those with some experience who wish to adopt a systemic, strengths-focused model of counseling. Techniques for communicating and working with families in school and community settings are emphasized. Instructor and student generated case studies are supported by role-playing and outside readings. Students go step-by-step through assessment, contracting, and counseling processes. They learn how to evaluate resources and needs, how to identify and collaborate with outside helpers and agencies, and how to deal with conflicts between the needs of family members. Issues relating to family violence, substance abuse and the use of home visiting are also discussed. In addition to class participation and readings, two papers analyzing families and the counseling process are required. This course emphasizes approaches which honor the socioeconomic, linguistic and cultural differences which may affect families and relationship between the family and therapist. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: f: Techniques for communicating and working with families and school and community personnel.

CCP 592 SOPC Exit Portfolio - 0 credit

An educational portfolio assembled by the student over the course of their studies. It highlights the student's professional knowledge, skills and abilities, and documents quality graduate level work.

CCP 600 Biopsychosocial Dimensions of Aging - 3 credits

Students explore the biology, psychology and sociology of aging, with an emphasis on how these issues manifest in clinical settings. Students will explore the biology of aging, including "normal aging," common physical changes, medical conditions, and related functional impairment. Psychosocial issues will also be addressed, including multigenerational family dynamics, aspects of adult development (e.g. generativity, successful aging), and common late-life stressors (e.g. financial strain, bereavement, housing changes). This course will also explore sociocultural trends in aging such as cohort differences between generations, multicultural concerns, ageism and discrimination. Students will also obtain an overview of public health policy, advocacy and case management, as they relate to counseling work with older adults. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 606 Family Treatment of Substance Abuse - 3 credits

This course bridges the gap between substance abuse counseling and family therapy. It examines the specific interational patterns that help to maintain addictive behavior within the family. Case examples illustrate how to intervene in addictive families. The following topics are covered: a systemic perspective on addictive behavior; assessing substance abuse and setting treatment goals; the over-responsibility dynamic in families; the Family Intervention Model; treatment needs of young children and adult children of addictive families; and facilitating family adjustment to sobriety. Course requirements include class attendance, reading, participation in experiential exercises and role play. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students.

CCP 609 Counseling for Grief and Loss - 3 credits

This course examines a broad range of topics within the scope of grief and loss, including Kubler-Ross’ stages of grief and William Worden’s task model. Students explore personal beliefs concerning grief and loss as the class examines the beliefs, death rituals and practices of a variety of cultures. This class addresses counseling challenges presented by clients who are experiencing loss. Students learn a current bereavement counseling model, then practice related techniques in classroom exercises. The class explores issues related to death and dying in contemporary society, including suicide, assisted suicide and capital punishment. Guest speakers may address special topics. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 615 Psychopathology - 3 credits

This course deals with the nature of neurotic behavior, abnormal behavior and the psychoses, as well as the nature of normal and abnormal intellectual, social, and emotional development and learning in childhood and adolescence. Particular attention is given to ego-defensive, adaptive and sociocultural aspects of behavior, health and wellness, and ways in which adaptive behavior becomes symptomatic. This course organizes disorders according to the organization of the DSM-5. Historical contexts in which psychopathology has been diagnosed and viewed from early medical concepts through the currently used Diagnostic Criteria in the DSM-5 are presented. Learning disorders, including emotional issues affecting student achievement and their treatments are investigated. Attention is focused on differential diagnosis, treatment planning and best practices in applied settings. Discussions focus on psychopharmacology, knowledge of medical conditions and medication related to physical disabilities and learning disorders, prevalent psychotherapies, and theories of abnormal behavior and development. Case studies provide experience in classifying, diagnosing and categorizing various mental disorders from childhood throughout the lifespan.

Discussions of treatment of mental illness include psychopharmacology, prevalent psychotherapies used in individual, family, couple and group psychotherapy and current research findings related to treatment. Discussions also focus on health and wellness, multicultural issues, plus variables related to resiliency and student learning.

Additionally, the effects of abuse, violence, theories of normal and abnormal behavior and development are examined. Current research
that can assist the school counselor in developing a plan of action for referral and treatment that relates to personal, social and academic functioning of students will be procured through the online library.

This course utilizes films, tapes, case studies, class presentations, lectures, and group discussions. It includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction. This course also includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: h: Knowledge of medical conditions and medication related to physical disabilities and learning disorders.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: e. Theories of normal and abnormal intellectual, social, and emotional development. c. Psychology of learning.

CCP 617 School Adjustment Counseling/School Social Work - 3 credits
Offered in Fall and Summer only. This course explores the roles and functions of school adjustment counselors with students identified as having emotional, behavioral, and social problems. This course operates on the assumption that such students are best served using personal, systems, family and group counseling approaches, with strong emphasis on identifying, assessing and utilizing community and family resources. Techniques for working with families, school and community personnel are emphasized. Clinical school counseling and systems issues are explored as well as: consultation, harm prevention and reduction, and the evaluation and utilization of community resources. Assessments such as genograms, biopsychosocial assessments, functional behavior assessments and behavior intervention plans, will be taught as well as treatment planning and goal writing.

The understanding of the diagnosis and treatment of learning, emotional and behavioral disorders, when to recommend an IEP, when a 504 is most appropriate, and when students do not qualify for services is emphasized. Knowledge of IEP/special education time lines is conveyed. The referral process for students and their families to obtain services and supports in the community is a focus of discussion, as well as advocating and facilitating relationships with community and government agencies. The course addresses a working knowledge of the juvenile justice system with regard to criminal justice, child protection, CHINS laws and regulations, as well as federal and state regulations addressing the legal rights of students and their families. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Adjustment Counselor/School Social Worker: c: Learning disorders, including emotional issues affecting student achievement, and their treatment. f: Techniques for communicating and working with families and school and community personnel. g: Knowledge of the criminal justice system with particular reference to the juvenile justice system and organizations. i: Federal and state regulations addressing the legal rights of students and families.

CCP 622 Ethics and Professional Issues for School Counselors and Mental Health Practitioners - 3 credits
This course explores several models of school counseling and mental health counseling and the relationship to relevant ethics, federal, state, municipal, state laws, and standards and regulations. The course emphasizes best practices and strategies for dealing with ethical and legal dilemmas, including the ability to apply and practice ethical and legal standards in school counseling. School counseling and systems models are examined along with consultation, harm prevention and reduction, and the evaluation and utilization of community resources. Focal areas include professional roles and functions, ethical standards including accountability, responsibility, client/student welfare, emotional health, laws and regulations, institutional policies including crisis/disaster preparedness and response, cross cultural, cross social class practices and their impact on mental health and school counseling. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: i: Federal and state laws and regulations addressing the legal rights of students and families.

This course addresses the following Massachusetts State Standard for School Guidance Counseling: h. Federal, state, municipal, and school laws and regulations.

CCP 625 Foundations of Couples Counseling - 3 credits
Designed for beginning counselors working with couples, this course will cover the basic approaches to couples counseling. Presentations and discussions of key topics will be accompanied by videotapes and experiential exercises. Therapy techniques such as family sculpture, doubling, and psychodrama will be presented. Special topics in couples counseling such as divorce, violence, and alcoholism will be discussed. The goals of the course are to help students learn how to: (1) assess the couples’ presenting problem; (2) develop appropriate counseling plans; and (3) evaluate counseling as it proceeds. Course requirements include class attendance, readings, active participation, and two five-page papers. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 627 Family Assessment from a Multicultural Perspective - 3 credits
This course will address methods of family assessment in relation to a range of ethnic groups. We will study cultural attitudes regarding problems and seeking help. We will look at the advantages and disadvantages of each method of assessment from the perspectives of different ethnic groups. Students will practice the skills of bridging cultural differences. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.
CCP 629  Geriatric Counseling - 3 credits
There are many unique issues that arise in providing counseling services to older adults. After discussing the "paradox of aging" — that older adults generally have increased cognitive and physical problems yet also report higher well-being — this course will explore the differential prevalence and symptomology of various mental disorders in older adulthood. Students will also learn about the major types of dementia and related treatment issues (e.g. behavioral interventions, working with family caregivers). Students will be taught about evidence-based clinical interventions for older adults, such as cognitive-behavioral therapy, problem-solving therapy, and reminiscence/ life review. Students will also learn about the unique professional issues that arise in providing mental health counseling to older adults in the variety of settings in which treatment often occurs (e.g. long-term care, outpatient mental health, hospitals, social service agencies, and home-based treatment.) Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 630  Human Development Across the Lifespan - 3 credits
This course will address the psychological and biological aspects of human development from conception through childhood, adolescence, early adulthood, mid-life and aging. Familial, environmental and cultural factors will be explored as they impact the development of people across the continuum of life. Theory will combine with application related to physical, emotional, intellectual, learning, social, normal and abnormal development; plus cognitive, moral, and vocational adjustment. The processes of physical and psychological development including ethnic and gender differences will be studied. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: b: Theories of normal and abnormal intellectual, social, and emotional development.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: c. psychology of learning, and e. theories of normal and abnormal, intellectual, social, and emotional development.

CCP 631  The Counselor in the Forensic Environment - 3 credits
This course explores forensic settings, the counselor's roles within these settings, and appropriate counseling and systems skills. It introduces concepts of addiction, relapse prevention, and stages of personal change, as they relate to forensic counseling. Students are introduced to the continuum of forensic settings including court clinics, juvenile detention and rehabilitation facilities, houses of correction, jails, prisons, pre-release and post-release centers. Students explore the stages of the judicial process, legal and procedural issues during incarceration, the offender's transition to release and community life, and the dynamic tension between the goals of rehabilitation and punishment. Students then survey counseling and systems skills appropriate to such settings and engage in realistic role-plays in order to develop or improve their skills. The course then surveys approaches to addiction, relapse prevention, and stages of personal change, with an overview of appropriate counseling techniques. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 634  Death and Dying - 3 credits
In this course, students will explore an overview of common end-of-life issues that arise when counseling dying clients and their family, e.g. discussion of goals of care (e.g. DNR/DNI), psychological treatments for pain, multicultural factors, familial conflict, anticipatory grief, bereavement, and death anxiety. Students will also learn about palliative care, hospice care, and the complex bioethical issues that can arise in this work. Lastly, students will explore what it means personally to work with this population, with discussion of compassion fatigue and burnout prevention. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 636  Psychological Testing - 3 credits
This course provides an overview of psychological testing including a review of projective testing and techniques for individual and group administration for understanding personality development and pathology, basic administration, scoring and diagnostic skill development. This course reviews instruments including TAT, MMPI and Roschach as well as language and alternative non-language based intelligence tests, achievement tests including the WISC-IV, the Woodcock-Johnson III, tests of nonverbal intelligence, and other state-of-the-art diagnostic tools. Emphasis is on clinical integration of the testing materials, useful intervention strategies and recommendations for the counselor, treatment team and/or referral agent. Test reliability, validity, standard deviations, scaled scores, percentiles and interpretation of significant differences are taught. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 637  Neurobiology: Basics and Beyond - 3 credits
In this three credit course, we will explore neurobiology as it relates to emotional, behavioral and cognitive development and expression. The last decade, with the benefits of technology and research, has witnessed a renewed convergence of psychiatry and neurology. Emotional factors are often expressed via neurological symptoms and neurological deficits often resulting in psychological symptoms. This course will identify key areas in the brain, nervous system, and the interrelationship with internal and external factors that shape who we are and what we do. Through presentations, discussion and experiential practice, students taking this course will leave with a greater understanding of the brain/body connection as it relates to stress, trauma and the myriad of neurological and emotional pathologies. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 640  Addiction Disorders - 3 credits
Designed for beginning and intermediate clinicians, this course provides a thorough foundation in substance abuse treatment. The prevention and treatment of substance abuse in people of all ages
will be explored, as well as the relationship between substance use, violence, and physical and sexual abuse. Topics include: theories of etiology of addiction; pharmacology of psycho-active drugs; cultural factors that influence substance use; assessment and intervention with substance abusers and their families. Emphasis is put on diagnosis, treatment planning and referral to appropriate resources including self-help groups. Students will have the opportunity to participate in simulated interviews and experiential exercises. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: Standard d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students.

CCP 641 Counseling Internship/SAC Field Experience II - 3 credits
Prerequisites: CCP 520, CCP 550, CCP 650. (Enrollment limited to 10). This course provides a real life experience of providing mental health counseling services to clients/students. A minimum of 200 hours of field placement (225 for SAC students in school placements) gives the student intern an opportunity to learn, apply and sharpen diagnostic, treatment planning, counseling and consultation skills under the supervision of a qualified on-site field supervisor and observed by a Cambridge College internship facilitator. (Students in SAC placements are also visited three times over the course of 2 sequential semesters by the Cambridge College visiting site supervisor).

Coursework integrates the practice of mental health counseling from screening through aftercare planning and discharge from treatment, with content areas necessary for appropriate client/student treatment including but not limited to: review the principles of therapeutic relationships, developing techniques for communicating with and working with families, agencies/systems, and school and community personnel; the use of supervision; diagnosis and application of DSM5-TR treatment planning, application of appropriate counseling theories and related clinical interventions, methods and techniques, documentation of progress, referral and collaboration and treatment of treatment professionals and families. Case presentations, biopsychosocial histories, progress notes and other relevant documentation of the field placement will be presented in class. The diagnosis and treatment of learning and behavioral disorders, when to recommend an educational evaluation, an IEP or a 504 will also be discussed. SAC Interns will learn to develop plans for the prevention, treatment and referral of students engaged in legal or illegal substances, school violence, school crises and other situations. Students will share experiences with their internship seminar cohort. This internship must conform with Massachusetts regulations 282 CMR. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

For SAC students in school sites: Onsite training supervised by a state-approved licensed/certified school adjustment counselor who also has clinical licensure as an LMHC, LICSW, LMFT, clinical psychologist or psychiatrist is required. SAC students in school sites must pass MTEL Communication and Literacy Tests before entry.

The fieldwork experiences in this course address the following Massachusetts State Standards for School Adjustment Counselors: 3: A practicum of 900 hours, 450 of which must be working with children, adolescents, and families in an educational setting. (Cambridge requires practicum fieldwork of 100 contact hours and internship fieldwork of 600 contact hours). (Cambridge College recommends that students in the SAC track have 225 site hours for each of the four field experiences). 4: A passing score on the Communication and Literacy Skills test. Standard a: Principles of therapeutic relationships. c: Learning disorders, including emotional issues affecting student achievement, and their treatment. d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students. f: Techniques for communicating and working with families and school and community personnel.

CCP 642 Fundamentals of Pastoral Counseling - 3 credits
This introductory course will provide an integrative study of psychological, spiritual, and faith-based frameworks. The course will explore the role of spirituality in clinical practice, and train students on how to effectively integrate a client's spirituality into various phases of counseling, including clinical assessments and intervention. We will study several theories and models for spiritually-informed psychotherapy from diverse perspectives. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 643 Medical and Psychological Aspects of Disabilities - 3 credits
The course offers students with little or no exposure to advanced medical sciences the opportunity to examine the physiological and anatomical basis for many chronic diseases and medical conditions they will encounter in a rehabilitation counseling setting. Students examine the etiology, progress, and potential resolution of a wide range of disorders, as well as the potential social implications consequent on these disabilities. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 650 Group Dynamics/Group Counseling and Human Systems - 3 credits
Pre Practicum: 15 hours of directed field-based training required for ESE licensure. This course involves the study of the dynamics common to all small groups, through examining their structural and interactional properties and learning the bases for understanding groups as therapeutic, organizational, social, psychological, and collective phenomena. The class will be divided into two groups. All students will participate in an experiential, interactional group for one half of the term and observe another interactional group for one half of the term. Each experiential phase of a group will be followed by a didactic analysis of the process. The instructor will demonstrate various techniques as leader of all experiential sessions. Leadership styles will be examined as they influence group process. Students are required to write journal analyses of group sessions, complete assigned readings, and attend every session. Students are taught to develop self awareness, sensitivity to others, and skills needed to relate to individuals and groups from diverse backgrounds. (No one will be admitted to the course in the event of failure to attend the first
session.) Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Guidance Counseling: 1. group counseling and group leadership.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: a. Principles of therapeutic relationships.

CCP 651 Vocational Analysis and Job Placement - 3 credits
The career development and work adjustment components of the course focus on such theories as Roe, Holland, Ginzberg, Super, Tiedman and Minnesota Theory of Work Adjustment. This course addresses vocational implications associated with disabilities and the use of transferable skills analysis, occupational and labor market information to guide career planning, especially for special populations. Job analysis, ergonomics, and assistive technology will also be discussed to address job accommodations in the workplace. Job placement strategies as well as employer considerations will be addressed. This course is limited to students in the Rehabilitation Counseling concentration or certificates. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 652 Holistic Approaches to Psychotherapy - 3 credits
Through exploring a range of integrative approaches to counseling and psychotherapy this course aims to elucidate holistic assumptions behind counseling people in psychological distress. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 653 Religious Coping from a Sociocultural Perspective - 3 credits
This course will examine the stress experience of marginalized groups and explore the ways in which religion, spirituality and/or faith is used to help individuals cope. We will study traditional stress and coping theory, and religious coping theory to examine the applicability of these models for oppressed and marginalized populations. The course will explore the ways in which certain theories and models for mental health practice have historically pathologized the faith experiences of some groups. The course will contrast this study with a look at liberation theologies for its role in helping to empower individuals and communities dealing with systemic stressors and oppression. Students will develop skill in integrating these frameworks and understandings into effective clinical practice. Diverse populations and faith traditions will be explored. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 654 Rehabilitation Plan Development - 3 credits
This course acquaints students with case and caseload management, delivery systems for public, private and nonprofit settings for individuals with disabilities. This course will also address laws and ethical standards that impact rehabilitation counseling and the range of community resources available to the counselor whose goal is the effective and comprehensive rehabilitation of individuals with disabilities. Topics also include educational and vocational programs for individuals with disabilities in a diverse setting. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 655 Vocational and Affective Counseling - 3 credits
This course acquaints students with the process, history and philosophy of rehabilitation counseling. Discussions also focus on the organizational structure of the rehabilitation system, the professional identity of the rehabilitation counselor, and legal and ethical issues in the practice of rehabilitation counseling. This course will also address career alternatives for the rehabilitation counselor. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 656 Vocational Assessment and Evaluation - 3 credits
This course provides an orientation to individual appraisal, standardized testing, and test and measurement principles. It focuses on standard test areas such as achievement, aptitude, interest, personality, situational testing; behavioral observation and commercial work samples. This course will also address career alternatives for the rehabilitation counselor. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 657 Terror, Trauma and the Sacred: Psychological and Spiritual Perspectives - 3 credits
This course will examine the ways in which spirituality and faith impacts a person’s response to crisis. We will examine case examples of individuals and communities dealing with issues of grief and loss; death and dying; natural disasters; and trauma and victimization. The course will explore a wide-variety of spiritual and faith-based frameworks for the perspectives they provide on suffering, hope and healing. Students will develop skills and techniques for crisis management and counseling from a faith-based perspective. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 658 Career Counseling - 3 credits
This course provides an experiential approach to analyzing the stages responsible for successful career development. The course enables students to identify, assess, enhance, and act upon data pertinent to career fulfillment and success in individual and group counseling settings. Topics examined include job values and interests, experiences and skills, specification of career targets, research with the online library, analysis of career targets, and developing a comprehensive plan of action. Students can apply such information to develop and assess career goals and to make use of appropriate career resource materials. Course experiences include worksheets, sub-grouping, completion and study of interest inventories (including an examination of basic psychometric issues and discussion of strengths and weaknesses of standardized instruments), and discussion of computer resources which enhance the career guidance process. Students
are taught to advocate for learning necessary to promote career development of students. This includes accessing and consulting with viable resources of community, parents, and schools. Students will also explore multicultural issues connected to career development. All students should have access to the book What Color is Your Parachute? or How to Create a Picture of Your Ideal Job or Next Career. The course stresses a practical approach to career development; underlying career development theories are discussed. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Guidance Counseling: i. Career counseling.

**CCP 671 East & West: Self, Suffering, & Healing - 3 credits**

This course considers theories of mind and behavior in Eastern philosophy and Western psychology. The aim of the course is to elucidate different perspectives on the nature of self and human suffering, and to understand suggested pathways to the alleviation of suffering. We will examine Western theories ranging from psychoanalysis to transpersonal psychology, as well as Eastern traditions ranging from Taoism and Buddhism to the perspectives of figures like Jiddu Krishnamurti. A central question of the course is: To what extent do Eastern ways of understanding human experience complement Western theories - or are their differences difficult to reconcile? This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

**CCP 680 Human Sexuality - 3 credits**

Sensitization to sexual issues and exploration of how a therapist’s perceptions of such issues affects her/his work with clients is explored in this course. Introduction to the theory and practice of sex therapy, including information about sexual function and dysfunction and appropriate intervention methods is presented. Emphasis is on the relationship system and the dynamics of sexual functioning within that system. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

**CCP 681 Mind, Body, & Emotion: a Holistic Perspective - 3 credits**

This course reviews literature in animal and human behavior to provide a basic biological and behavioral framework for considering the relationship between the mind, body, and emotions. The historical view of emotion as an instinctual force that should be controlled is contrasted with an emerging understanding of emotion as an adaptive intelligence that deeply informs our relationship to the world. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

**CCP 700 Internship Seminar and SAC Field Experience III - 3 credits**

Prerequisites: CCP 520 and CCP 641, (Enrollment limited to 10). This course focuses on students’ counseling practice which is conducted in the field from week-to-week during the course. A minimum of 200 hours of internship experience (225 hour minimum for SAC track students in school sites) are required under the supervision of a qualified supervisor (Massachusetts Regulations 262 CMR). (Supervisors of School Adjustment Counseling students in school sites must also have ESE licensure as a School Adjustment Counselor.) Goals for each student will be established with their College internship facilitator at the beginning of the experience. A self-assessment of these appropriate learning goals will be conducted by the student and their college internship facilitator throughout the term. Casework, note taking, diagnostic and treatment planning will be analyzed and explored in the classroom with a focus on enhancing students’ clinical skills in these areas, as well as a review of the principles of therapeutic relationships, developing techniques for communicating with and working with families, agencies/systems, and school and community personnel, and the use of supervision. The diagnosis and treatment of learning and behavioral disorders, when to recommend an educational evaluation, an IEP or a 504 will also be discussed. SAC Interns will learn to develop plans for the prevention, treatment and referral of students engaged in legal or illegal substances, school violence, school crises and other situations. This course may be combined with CCP 701. The internship must conform to Massachusetts Regulations 262 CMR. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

For SAC students in school sites: Onsite training supervised by a state-approved licensed/certified school adjustment counselor who also has clinical licensure as an LMHC, LICSW, LMFT, clinical psychologist or psychiatrist is required. SAC students in school sites Students pass MTEL Communication and Literacy before entry. The fieldwork experiences in this course address the following Massachusetts State Standards for School Adjustment Counselors: 3: A practicum of 900 hours, 450 of which must be working with children, adolescents, and families in an educational setting. (Cambridge requires practicum fieldwork of 100 contact hours and internship fieldwork of 600 contact hours). (Cambridge College recommends that students in the SAC track have 225 site hours for each of the four field experiences.) 4: A passing score on the Communication and Literacy Skills test. Standard a: Principles of therapeutic relationships. c: Learning disorders, including emotional issues affecting student achievement, and their treatment. d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students. f: Techniques for communicating and working with families and school and community personnel.

**CCP 701 Advanced Internship Seminar/SAC Field Experience IV - 3 credits**

Prerequisites: CCP 520, CCP 641 and CCP 700; (Enrollment limited to 10). The course focuses on students’ counseling practice which is conducted in the field from week-to-week during the course. A minimum of 200 hours of internship experience (225 hour minimum for SAC program students in school sites) are required under the supervision of a qualified supervisor (Massachusetts Regulations 262 CMR). Supervisors of School Adjustment Counseling students in school sites must also have ESE licensure as a School Adjustment Counselor.
Goals for each student will be established with their College internship facilitator at the beginning of the experience. A self-assessment of these appropriate learning goals will be conducted by the student and their college internship facilitator throughout the term. Casework, note taking diagnostic and treatment planning will be analyzed and explored in the classroom with a focus on enhancing students' clinical skills in these areas; as well as a review the principles of therapeutic relationships, developing techniques for communicating with and working with families, agencies/systems, and school and community personnel; and the use of supervision. The diagnosis and treatment of learning and behavioral disorders, when to recommend an educational evaluation, an IEP or a 504 will also be discussed. SAC Interns will learn to develop plans for the prevention, treatment and referral of students engaged in legal or illegal substances, school violence, school crises and other situations. The completion of a portfolio demonstrating student's advancement through their program of study is required in this course. This course may be cross listed with CCP 700. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

For SAC students in school sites: Onsite training supervised by a state-approved licensed/certified school adjustment counselor who also has clinical licensure as an LMHC, LICSW, LMFT, clinical psychologist or psychiatrist is required. SAC students in school sites Students pass MTEL Communication and Literacy before entry.

The fieldwork experiences in this course address the following Massachusetts State Standards for School Adjustment Counselors: 3: A practicum of 900 hours, 450 of which must be working with children, adolescents, and families in an educational setting. (Cambridge requires practicum fieldwork of 100 contact hours and internship fieldwork of 600 contact hours). (Cambridge College recommends that students in the SAC track have 225 site hours for each of the four field experiences.) 4: A passing score on the Communication and Literacy Skills test. Standard a: Principles of therapeutic relationships. c: Learning disorders, including emotional issues affecting student achievement, and their treatment. d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students. f: Techniques for communicating and working with families and school and community personnel.

CCP 710 Marriage and Family Therapy: Basic Counseling Skills - 3 credits
This course will cover the theories behind marital and family therapy and provide a practical integration of interests and skills. The course is designed to meet the needs of both beginning and experienced therapists. Beginning students will have the opportunity to build a sound theoretical foundation for marital and family therapy while more advanced students can refine technique and explore emerging treatment approaches. Written assignments will be similarly tailored. One basic counseling skills course is required in each counseling program. The course stresses development of counseling skills which are essential to a particular area of training and practice. One or more active teaching methods, such as role-play, live or videotaped demonstration, or other experiential exercises form a significant part of the course experience. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 715 Multicultural Counseling: Children and Adolescents in Context: Basic Counseling Skills - 3 credits
Pre Practicum: 15 hours of directed field-based training required for ESE licensure.
This course explores the counseling process with children and adolescents from two perspectives: first from the experiential world of the child or adolescent, and secondly, from an ecological/systems perspective, with strong emphasis on cultural strengths and concerns. Topics include: the world of the child in a multicultural society; exceptionality, techniques for communicating and working with diverse families, school and community personnel; play/activity techniques, multicultural group work. Also: assessment; diagnosis; gathering and communicating information; sensitivity to others; self awareness; culturally congruent educational programs; stereotyping; economic, social and political issues surrounding diversity; relevant state, municipal and school laws and regulations relating to ethnic, linguistic, racial, gender and religious diversity; interviewing; dealing with research; resources and referrals within schools and community; hazards and problems of normal and abnormal development; enhancing a positive school climate in a multicultural school setting. The course also addresses issues impacting learning, achievement, and diversity with a final presentation utilizing the online library and other online researched based sites. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Adjustment Counselor/School Social Worker: f: Techniques for communicating and working with families and school and community personnel. i: Federal and state laws and regulations addressing the legal rights of students and families.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: h: Federal, state, municipal, and school laws and regulations. j: Resources within the school system or the community for referral. m: Development of skills for consultation with parents, teachers, and administrators.

CCP 716 Cognitive Behavior Therapy: Theory and Practice - 3 credits
This course reviews operant conditioning, classical conditioning and social learning theory, especially as they relate to the development and current practice of cognitive behavior therapy. Special attention is paid to dialectical behavior therapy as the most recent research based application of behavioral treatment, in combination with Eastern theories and practice. The primary focus of the course is on the actual practice in class of the most relevant behavioral techniques including: deep muscle relaxation, mindfulness meditation, systemic desensitization, covert sensitization, thought stopping, covert reinforcement, behavioral rehearsal, behavioral analysis, and behavior shaping. Ethical issues are specially considered as we progress through these and other techniques. Includes the fundamental
occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 720  Psychopharmacology in Addictions and Mental Health Counseling - 3 credits
The use of medications in the treatment of alcohol and drug dependence and their co-occurring disorders has historically been controversial. Newer medications with less potential for addiction are increasingly being used, including agonist and antagonist drugs designed to have a direct impact on the neurochemistry of addiction. Finding the balance between treating dependence and co-occurring depression, anxiety, trauma and other disorders poses a special challenge, and it appears that addressing these issues concurrently shows the most success. This course will review current clinical models of intervention and differential diagnosis. A brief review of relevant neuroanatomy and neurophysiology will set the stage for an examination of major psychotropic medications, including antipsychotics, antidepressants, mood stabilizers and anti-anxiety medications, as well as newer medications for addictions treatment. This course will be grounded in clinical material and frequent presentation of case material. Requirements will minimally include one topical presentation. Responsibility will be shared for presenting material throughout the class. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 721  Women in the Family: a Cross-Cultural Perspective - 3 credits
This course addresses new findings in women’s psychology and internal experience, the conflicts and expectations women experience in various environments, with specific focus on the family. A family systems perspective is the framework within which women’s roles and status are analyzed. The course considers the ways in which the gender experience has been understood and researched and how this can be helpful to counselors. Topics include gender differences, cultural roles, the myths about motherhood and sexuality, and new psychologies of women. Students are expected to complete assigned readings, participate actively in class discussions and role plays, do a class presentation and submit a paper. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 722  The Life of the Family in Context - 3 credits
This course examines the evolution of the family in the context of the social environment in which it exists. Traditional family values and structures are examined as well as more modern and nontraditional situations that may include: the divorced family, the gay/lesbian family, families of war, immigrant families, religious families, foster/alternative family environments, families of abuse, grandparent/grandchild families, culturally blended families, addicted families, and families experiencing mental illness. An exploration of personal and professional experiences and the lenses through which we view families as well as challenges to traditional family concepts will be considered. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 723  Narrative and Collaborative Approaches to Therapy - 3 credits
Postmodern therapy is a radical shift in both the stance of the therapist and in how therapy is conducted. For example: the therapist is the participant/manager of the conversation, not the ‘expert.’ Language, rather than interactional pattern, is the system; meaning and understanding are achievable through continued efforts; difficulties are constructed in the language system and can be ‘dissolved’ through language; and change occurs through development of new language. In this course, students will have their assumptions challenged and play an active role in co-creating a postmodern experience of meaning-making in the classroom. Ideas will be practiced both in and out of class, so students are strongly encouraged take this course concurrently with their internship. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 724  Post Traumatic Stress Reactions - 3 credits
This course focuses on theory, research and practice of trauma by addressing systemic and cultural aspects of diagnosis, assessment, dynamics, and trauma treatment. This includes acute stress disorder, post traumatic stress disorder and complex PTSD, as well as dual diagnoses. Immediate and long-term effects of trauma on various populations will be explored: trauma in adults, children, and families, sexual and physical abuse survivors; victims of crimes, large scale disaster, war; workplace violence and complicated grief. Other topics include trauma resilience, natural courses of coping; transgenerational aspects of traumatization and life span perspectives on trauma.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 727  Clinical Interventions for Combat Stress and Trauma - 3 credits
This course is taught in the fall only. The content and design of this course is to familiarize students with the history, diagnosis and treatment of combat stress and trauma (CST) in the lives of primarily military people, but also the effects of CST on civilian populations exposed to war operations. The course will further provide information concerning the effects of CST on veterans’ families. Through lecture, class discussion, directed readings and case studies, students will become acquainted with causes and effective treatments of CST. Emphasis will be placed on diagnosis, treatment, referral resources and the support systems. Students will gain knowledge of: 1) the prevalence and complexity of combat stress and trauma; 2) counseling and treatment methods for returning veterans and their families; and 3) referral resources for veterans. Students will demonstrate proficiency in understanding the nature and complexity of combat stress and trauma. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.
CCP 728  Trauma Specific Interventions - 3 credits
Students will learn about assumptions, principles and concepts of trauma-specific treatment approaches and trauma-informed care. Students will gain knowledge of theory and practice of psychological first aid, its application in disaster mental health, crisis intervention and crisis counseling. They will become familiar with major approaches in trauma treatment: individual and group trauma counseling, cognitive, behavioral, psychodynamic, and exposure therapies, psychopharmacological treatments, and newly emerging approaches. The acquired knowledge and skills can be applied in providing individual and group crisis intervention, brief trauma counseling and treatment of survivors of sexual abuse, war trauma, torture, disasters and workplace violence and other. The ethics of trauma work will be thoroughly covered. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 729  Trauma Intervention in Schools - 3 credits
This course is taught in the spring term only. Trauma, chronic fear and stress impact children's neurobiological development which affects critical brain functions (memory, language, problem-solving, higher order thinking, and executive function skills). The support a child/adolescent receives from those around them and the communities they inhabit heavily influences the trauma response and forward growth. Schools are children's communities. This course will explore the impact of trauma on the child/adolescent’s neurobiological development, relationships, behavior, learning and academic performance. Trauma sensitive approaches in schools are described, including prevention and treatment of physical, sexual and substance abuse, as well as clinical interventions related to stabilization and the development of coping and social skills. School and system-wide crisis prevention, intervention and postvention planning and implementation will also be reviewed. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standard for School Adjustment Counselor/School Social Worker: d: Prevention and treatment of substance abuse, physical and sexual abuse, and violence in PreK-12 students.

CCP 730  The Practice of Mental Health Counseling - 3 credits
(Offered in spring and fall terms only.) This course looks at issues in the practice of mental health counseling, including: history and trends; specialized roles related to young people and schools (school social worker/school adjustment counselor, guardian ad litem, juvenile court clinician); roles, settings and special populations in mental health counseling practice; specialized treatment planning, assessment, and documentation for managed care. (The course does not focus on basic clinical skills.) Particular emphasis is given to professional identity and ethics, mental health consultation, the roles of members of an interdisciplinary team, developing a process for professional self assessment and continuing education planning, using appropriate language for managed care assessment and treatment, and developing a disclosure statement to introduce clients to the counseling relationship. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCP 754  Perspectives in Cross-Cultural Counseling - 3 credits
This course focuses on the role of culture in the development of psychological health and in psychopathology. Variations among diverse cultures in defining mental health and deviant behavior are discussed. The importance of understanding the cultural context is emphasized, both in the prevention and in the resolution of psychological problems. Students become aware of their own cultural beliefs regarding mental health issues, and the impact of their perspective in working with culturally different people. Techniques for working with families and schools are also discussed. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Adjustment Counselor/School Social Worker: Standard f: Techniques for communicating and working with families and school and community personnel.

CCP 796  School Adjustment Counseling Field Experience Seminar A - 3 credits
Prerequisites: CCP520, 641, 700, and 701. (Enrollment limited to 10). This course is for students who have passed the MTEL and changed to the SAC Program after completing four internship/field experiences. The course focuses on students’ counseling practice which is conducted in the field from week to week during the course. A minimum of 225 hours of internship experience are required under the supervision of a qualified supervisor (Massachusetts Regulations 252 CMR) and must also have ESE licensure as a School Adjustment Counselor. Goals for each student will be established with their College internship facilitator at the beginning of the experience. A self-assessment of these appropriate learning goals will be conducted by the student and their College internship facilitator throughout the term. Casework, note taking, diagnostic and treatment planning will be analyzed and explored in the classroom with a focus on enhancing students’ clinical skills in these areas; as well as a review of the principles of therapeutic relationships, developing techniques for communicating with and working with families, agencies/systems, and school and community personnel; and the use of supervision. The diagnosis and treatment of learning and behavioral disorders, when to recommend an educational evaluation, an IEP or a 504 will also be discussed. SAC interns will learn to develop plans for the prevention, treatment and referral of students engaged in legal or illegal substances, school violence, school crises and other situations. The completion of a portfolio demonstrating the student’s advancement through their program of study is required in this course.

This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction. Onsite training supervised by a state-approved licensed/certified school adjustment counselor who also has clinical licensure as an LMHC, LICSW, LMFT, licensed psychologist, or...
The fieldwork experiences in this course address the following Massachusetts State Standards for School Adjustment Counselors: 3: A practicum of 900 hours, 450 of which must be working with children, adolescents, and families in an educational setting. (Cambridge requires practicum fieldwork of 100 contact hours and internship fieldwork of 600 contact hours.) (Cambridge Recommends that students in the SAC track have 225 site hours for each of the four field experiences. 4: A passing score on the Communication and Literacy Skills test.

CCP 797 School Adjustment Counseling Field Experience Seminar B - 3 credits
Prerequisites: CCP520, 641, 700, 701, and 796. (Enrollment limited to 10). This course is for students who have passed the MTEL and changed to the SAC Program after completing four internship/field experiences and CCP796. The course focuses on students’ counseling practice which is conducted in the field from week to week during the course. A minimum of 225 hours of internship experience are required under the supervision of a qualified supervisor (Massachusetts Regulations 252 CMR) and must also have ESE licensure as a School Adjustment Counselor. Goals for each student will be established with their College internship facilitator at the beginning of the experience. A self-assessment of these appropriate learning goals will be conducted by the student and their College internship facilitator throughout the term. Casework, note taking, diagnostic and treatment planning will be analyzed and explored in the classroom with a focus on enhancing students’ clinical skills in these areas; as well as a review of the principles of therapeutic relationships, developing techniques for communicating with and working with families, agencies/systems, and school and community personnel; and the use of supervision. The diagnosis and treatment of learning and behavioral disorders, when to recommend an educational evaluation, an IEP or a 504 will also be discussed. SAC interns will learn to develop plans for the prevention, treatment and referral of students engaged in legal or illegal substances, school violence, school crises and other situations. The completion of a portfolio demonstrating the student’s advancement through their program of study is required in this course.

This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction. Onsite training supervised by a state-approved licensed/certified school adjustment counselor who also has clinical licensure as an LMHC, LICSW, LMFT, licensed psychologist, or psychiatrist is required. Students pass MTEL Communication and Literacy before entry.

The fieldwork experiences in this course address the following Massachusetts State Standards for School Adjustment Counselors: 3: A practicum of 900 hours, 450 of which must be working with children, adolescents, and families in an educational setting. (Cambridge requires practicum fieldwork of 100 contact hours and internship fieldwork of 600 contact hours.) (Cambridge Recommends that students in the SAC track have 225 site hours for each of the four field experiences. 4: A passing score on the Communication and Literacy Skills test.

CCP 800 Independent Research Project - 3 credits
Over a year's time, this course provides students with an overview of approaches to research in their chosen program area. With consistent faculty instruction, advice and review, students develop a research proposal, engage in supervised research activities, produce faculty-critiqued drafts and finally complete a formal project document called the Independent Research Project. This thesis document describes their inquiry, critical thinking and conclusions.

School Guidance (CSG)

CSG 613 Counseling College Bound Students - 3 credits
This course explores college admissions, with emphasis on application and Admission criteria for various colleges. Students will gain an understanding of consultation, of resources available to counselors including print material, software, and web site exploration to assist college bound students. Students develop strategies to effectively work with high school students, parents, and college admissions personnel. Topics include college search, student academic development as related to post high school education, understanding testing and financial aid, development of a classroom guidance curriculum to support delivery of the college admissions process, support to parents, and outreach to students of all backgrounds, special populations, and cultures. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: m. Development of skills for consultation with parents, teachers and administrators. n. College counseling and use of college and other post-secondary resource materials (grades 5-12).

CSG 616 Counseling in the Schools - 3 credits
Pre Practicum: 15 hours of directed field-based training required for ESE licensure. This course explores history, philosophy and trends in school counseling. Topics include professional roles and practices,
student counseling, multicultural issues, stereotyping, impact of socioeconomic status, gender and sexual identity, group work, assessment issues, behavioral observation, and a variety of traditional and developmental/preventive classroom guidance approaches. The course is presented in a manner which includes individual and group counseling, and consultative perspectives. There is a strong emphasis on developing skills which allow interns to learn differentiated strategies to confront the achievement gap. Students learn to develop a professional identity as a person in the role as change agent, and to help students deal with crisis, emergencies, and disasters through intervening with important figures and organizations in their lives. A significant part of the course will deal with crisis intervention, learning to recognize symptoms of substance abuse in students and home-life where substance abuse occurs; consultation to teachers, parents and administrators with respect to promoting student well-being. Students will be taught to identify opportunities, especially from the community at large, than can enhance or impede growth and advancement academically and socially. Another focus will explore liaison opportunities with important individuals from the non-school community, and the roles of the peer group in the lives of children and adolescents. Students will also be taught to advocate for students and the policies in school and the community that are equitable for multicultural student populations. Throughout this course students will employ web searches to gather supporting data for presentations. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Guidance Counseling:

f. Knowledge of strategies used for the prevention and treatment of substance, physical and sexual abuse, the spectrum of mental illnesses, and violence in PreK-12 students.

g. Philosophy, principles and practices in school guidance counseling.

j. Resources within the school system or the community for referral.

CSG 624 Assesment/Appraisal Process: Intelligence and Achievement Testing - 3 credits

Students learn about the administration, scoring and interpretation of intelligence and achievement tests with assistance from the online library. Test reliability, validity, standard deviations, scaled scores, percentiles and the interpretation of significant differences are taught, and assessment information is analyzed in a manner that produces valid inferences when evaluating the needs of individual clients and evaluating the effectiveness of educational programs. Use of alternative, non-language based tests to intelligence and state of the art diagnostic instruments are also discussed. Achievement testing and the use of the standardized achievement tests as a part of a test battery are utilized. Achievement-ability discrepancy analysis is included in the understanding of how a student qualifies for an IEP or 504. This class also explores the MCAS (Massachusetts Comprehensive Assessment System) or other state competency tests with regard to interpretation to students, teachers and parents, and factors related to school achievement and state-approved curriculum frameworks. Students develop an understanding of the importance of intelligence testing in a school/clinic setting and how it fits into a complete assessment including achievement and modality testing. Students learn about the influence of antecedent context (i.e. the influence of multiple factors such as abuse, violence, eating disorders, attention deficit hyperactivity disorder, and childhood depression) that may affect the personal, social, and academic functioning of students. The importance of assessing and interpreting clients' strengths and needs, and recognizing uniqueness in cultures, languages, values, backgrounds, and abilities as well as assessing barriers that impede clients' academic, career, and personal/social development are highlighted. Test instrument bias in relation to assessment of diverse cultures is also discussed.

The referral process as it relates to professionals in guidance/school adjustment counseling, school psychologists and licensed psychologists is a focus of discussion. Students discuss the writing of referral questions in relation to the selection of appropriate assessment strategies that can be used to evaluate a client's academic, career, and personal/social development. This includes understanding of the diagnosis and treatment of learning and behavioral disorders, when to recommend an IEP when a 504 is most appropriate, and when students do not qualify for services. Knowledge of IEP/special education time lines is conveyed. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

This course addresses the following Massachusetts State Standards for School Adjustment Counselor/Social Worker:

c. Learning disorders, including emotional issues affecting student achievement, and their treatment.

e. Knowledge of state of the art diagnostic instruments; procedures for testing and interpreting results.

This course addresses the following Massachusetts State Standards for School Guidance Counseling:

b. Understanding and interpretation of Massachusetts Comprehensive Assessment System (MCAS) and other academic test results to students, teachers, and parents.

d. Understanding of the diagnosis and treatment of learning and behavioral disorders.

j. Resources within the school system or the community for referral.

CSG 682 Developmental Group Guidance Laboratory - 3 credits

Students will utilize the Massachusetts Model of School Counseling to develop proactive group guidance activities created in a learning laboratory. In the laboratory, students will be taught to develop, teach and evaluate proactive guidance lessons that address personal/social issues, academic achievement issues, and career guidance concerns. Students will deliver several major projects and one final project. Each project will consist of delivery tools: lesson plans, power-points, group activities, brief videos, discussion plans, and evaluation plans. All projects will be accumulated and distributed into a digital piece of work called The Counselor's Toolbox.

CSG 691 Professional Seminar: School Guidance and Graduate Research I - 2 credits

Students must continuously enroll in the three-term Professional Seminar sequence to continue to remain eligible for federal financial aid.
This three term Professional Seminar will teach future school counselors how to gather and apply relevant research findings to inform the practice of school counseling. Throughout the three terms of preparing to write a school counseling based Independent Research Project, students engage in the critical evaluation of research, investigate multicultural variables embedded in the research, and are taught how research data applies to generating information to help improve existing practices in school counseling. The Independent Research Paper is formatted after the Publication Manual of the American Psychological Association (7th edition.) For the three semester Professional Seminar, students are taught to utilize an analysis/synthesis methodology in preparing their project. They are taught how to utilize the databases in the online library for research, writing, and other assistance.

This first seminar focuses on the development of research skills, and on students’ current abilities and interests in school counseling. Students are introduced to the Independent Research Structure (IRP), quantitative and qualitative analysis, research design, statistical analysis (descriptive statistics), and the construction of a research proposal. The cohort also functions as a resource and support group, with open agenda time for discussion of members’ current struggles in project development, academic courses, management of work and family issues, and the like. The implications of technology on school guidance counseling program development are also discussed. Students will learn to critically evaluate outcome research connected to the school counseling field and to apply those measurable outcomes in constructing a research project of their own. In term one, a final proposal is required that outlines and provides a rationale for the complete IRP project. The advisory piece of this course addresses Pre Practicum, Practicum, and Internship requirements, the teacher test for licensure, the Massachusetts State Testing System and the Massachusetts Curriculum Frameworks, and professional organizations (ASCA and the National Model) for school counselors.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: a. Familiarity with the curriculum frameworks and their use in the advising responsibilities of the guidance counselor, b. Understanding and interpretation of Massachusetts Comprehensive Assessment System (MCAS) and other academic test results to students, teachers, and parents, k. Knowledge of statistics, research design, and research in guidance counseling, (m) ii. A practicum of 450 hours in an educational setting (Cambridge College requires 600 hours), (m) iii. Passing score on the communication and literacy test (Massachusetts), f. Knowledge of strategies used for the prevention and treatment of substance, physical and sexual abuse, the spectrum of mental illnesses, and violence in schools.

CSG 692  Professional Seminar: School Guidance and Graduate Research II - 2 credits

Students must continuously enroll in the three-term Professional Seminar sequence to continue to remain eligible for federal financial aid.

The second term of Professional Seminar provides a further understanding of research design and statistical procedures to be used as tools for developing an independent research project (IRP) on some topic of school counseling. Students define their research into narrow topics that fit a quantitative or qualitative design. They study differential statistics and application to analyzing and reporting data. With assistance from the instructor, students utilize the Cambridge College On line Library to gather relevant literature. They are expected to complete their Review of Literature and Methodology sections in this term. Students also continue to share their struggles and successes concerning the completion of the project as they exchange encouragement, advice and critical comment. They continue to learn to critically evaluate outcome research connected to the school counseling field. The advisory piece of this term discusses Pre Practicum, Practicum and Internship requirements, the teacher test for licensure, and presentations and discussion of school violence, and credentialing and professional organizations (ASCA and the National Model) relevant to school counseling.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: k. Knowledge of statistics, research design, and research in guidance counseling, (m) ii. A practicum of 450 hours in an educational setting (Cambridge College requirements are 600 hours), (m) iii. Passing score on the communication and literacy test (Massachusetts), f. Knowledge of strategies used for the prevention and treatment of substance, physical and sexual abuse, the spectrum of mental illnesses, and violence in schools.

CSG 693  Professional Seminar: School Guidance and Graduate Research III - 2 credits

Students must continuously enroll in the three-term Professional Seminar sequence to continue to remain eligible for federal financial aid.

The final term of Professional Seminar continues the emphasis on completion of the IRP. Students finalize the collection of their data or information and analyze with the appropriate statistical format. They construct their Results, Conclusions and Recommendations sections, as well as the demographic pages of the IRP. In Professional Seminar III, students continue to share their struggles and successes concerning the completion of the project as they exchange encouragement, advice and critical comment. In the end students submit a piece of research (IRP) that reflects APA standards, and is designed to be applied towards creating school counseling programs, interventions or activities to help improve existing practices in school counseling.

The advisory piece includes discussion of Practicum and Internship requirements, and passing the state test for entrance into Internship, and a presentation and discussion on strategies for treatment for physical, substance, sexual abuse.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: k. Knowledge of strategies used for the prevention and treatment of substance, physical and sexual abuse, the spectrum of mental illnesses, and violence in schools, k. Knowledge of statistics, research design, and research in guidance counseling, (m) ii. A practicum of 450 hours in an educational setting (Cambridge College requirements are 600 hours), (m) iii. Passing score on the communication and literacy test (Massachusetts).
CSG 695 Counseling and Consulting Techniques Laboratory - 3 credits
Counseling skills such as interviewing, reflection, use of empathy, summarization, concreteness, genuineness, magic questioning, and building relationships will be covered in this course. The course will also teach techniques for identifying and focusing on problem behaviors (substance abuse, physical abuse, suicide risk), body language, and underlying influences of problematic behavior. In addition, Solution Focused School Counseling, and other models of counseling will be explored. Students are taught to understand and develop multicultural awareness and competencies, and how to be an effective leader. The course will also address wellness programs for students, and methods of consulting to promote student academic, career and personal/social development in ways to help parents solve problems. Students will be introduced to principles of peer mediation, peer mentoring, and peer tutoring and engage in supervising peer interventions to solve problems. The course employs technology for student presentations, role taking, lecture, video, audio, presentations, readings and demonstrations, and fieldwork.
This course addresses the following Massachusetts State Standards for School Guidance Counseling: m. development of skills for consultation with parents, teachers, and administrators.

CSG 789 School Guidance Practicum and Seminar – 2 credits
Prerequisites: Pre Practicum, CSG 695 and near completion of IRP. Includes 100 clock hours of school-based fieldwork and attendance at a seminar. Fieldwork includes 40 hours of direct service providing individual, group, classroom developmental guidance, co-leading a workshop or training seminar. The remaining 60 hours are considered indirect service and include observation and other on-site activities assigned by a counseling supervisor.

Seminar will stress roles, functions and professional identity; online research examining the design and implementation of transition curricula, plus school to work programs, post secondary planning, and college admissions. Students employ teamwork, leadership strategies, and become involved in school counseling program management and evaluation. They study philosophy, principles, and practice of school guidance; federal, state, municipal and school laws, demonstration of basic counseling techniques reflecting an understanding of multicultural awareness; understanding and interpretation of the Massachusetts Comprehensive Assessment System (MCAS) and other test results to students, teachers, and parents; and engage in critical presentations of case studies. One contact hour of weekly supervision is required. Practicum evaluation and a minimum passing score of 55/80, and completion of all prerequisites is required to move into the Internship phase of the school counseling program.

This course addresses the following Massachusetts State Standards for School Guidance Counseling: b. Understanding and interpretation of Massachusetts Comprehensive Assessment System (MCAS) and other academic test results to students, teachers, and parents, g. Philosophy, principles and practices in school guidance counseling: i. Federal, state, municipal, and school laws and regulations.

CSG 792E School Guidance Fieldwork and Internship Seminar I (PreK-8) 600 clock hours - 3 credits
Class preparation and assignments reflect levels preK-8 or 5-12 depending on fieldwork level and license level sought.

Onsite training supervised by a state-approved licensed/certified school guidance counselor at the level sought is required; currently, 600 contact hours minimum, 240 of which must be in direct service with students, and 360 hours of indirect service (per CACREP National Standards). Entry requires approval from school guidance counseling chair. Students must pass required parts of MTEL (Massachusetts) or other state tests before entry.

This is the first of a two semester capstone experience where interns engage in the role of school counselor and attend a seminar that runs concurrent with fieldwork. Interns work with children and adolescents under supervision of a licensed school guidance counselor. They participate in individual and group counseling; utilize technology in the counseling process; apply counseling principles to career, social, personal, and academic development of students, and students with normal and abnormal behavior. Students are taught to use measurable outcomes for school counseling programs and activities. They utilize behavioral observation and program evaluation in planning successful interventions for students. They work with special education teams in understanding diagnosis of learning and behavior disorders. Interns are introduced to resources within the school district and community for referral. They develop plans for the prevention, treatment and referral of students engaged in legal or illegal substance abuse, personal, physical, and sexual abuse, school violence, school crises and other trauma causing situations. Students engage in ethical and legal practices of school counseling; campaign for an identity as a school counselor; work in support service teams to identify opportunities that enhance or impede academic, personal/social and career development. They work with task and peer counseling groups; deploy multicultural strategies in relation to diversity, equity, and opportunity in student learning; involve parents to promote academic, personal/social, and career development. Students are taught to use data to make decisions regarding accountability; learn and practice concepts, principles, and strategies to help close the achievement gap and school drop-out; employ suicide risk procedures; and are involved with designing curriculum and instructional strategies to teach a developmental guidance curriculum. Students also apply consultation strategies with parents, staff, administration and community resources; plan and implement developmental classroom guidance programs; learn the special education referral processes; and are taught to recognize and discuss personal limitations in supervision. Students are expected to utilize leadership strategies in the planning and implementation of parent education programs, and advisor/ advisse programs. And lastly, students become familiar with the state achievement tests and the state curriculum frameworks. One contact hour of weekly supervision with a licensed supervisor and attendance at a seminar that runs concurrent with fieldwork is required.
The fieldwork experiences in this course address all of the Massachusetts State Standards for School Guidance Counseling (except standard k).

**CSG 793E  School Guidance Fieldwork and Internship Seminar II (PreK-8) 600 clock hours - 3 credits**

**CSG 793S  School Guidance Fieldwork and Internship Seminar II (5-12) 600 clock hours - 3 credits**

Class preparation and assignments reflect levels PreK-8 or 5-12 depending on fieldwork level and license level sought.

Onsite training supervised by a state-approved licensed/certified school guidance counselor at the level sought is required; currently, 600 contact hours minimum, 240 of which must be in direct service with students, and 360 hours of indirect service (per CACREP National Standards). Entry requires approval from school guidance counseling chair. Students must pass required parts of MTEL (Massachusetts) or other state tests before entry.

This is the second of a two semester capstone experience where interns engage in the role of school counselor and attend a seminar that runs concurrent with fieldwork. Interns work with children and adolescents under supervision of a licensed school guidance counselor. They participate in individual and group counseling; utilize technology in the counseling process; apply counseling principles to career, social, personal, and academic development of students, and students with normal and abnormal behavior. Students are taught to use measurable outcomes for school counseling programs and activities. They utilize behavioral observation and program evaluation in planning successful interventions for students. They work with special education teams in understanding diagnosis of learning and behavior disorders. Interns are introduced to resources within the school district and community for referral. They develop plans for the prevention, treatment and referral of students engaged in legal or illegal substance abuse, personal, physical, and sexual abuse, school violence, school crises and other trauma causing situations. Students engage in ethical and legal practices of school counseling; campaign for an identity as a school counselor; work in support service teams to identify opportunities that enhance or impede academic, personal/social and career development. They work with task and peer counseling groups; deploy multicultural strategies in relation to diversity, equity, and opportunity in student learning; involve parents to promote academic, personal/social, and career development. Students are taught to use data to make decisions regarding accountability; learn and practice concepts, principles, and strategies to help close the achievement gap and school drop-out; employ suicide risk procedures; and are involved with designing curriculum and instructional strategies to teach a developmental guidance curriculum. Students also apply consultation strategies with parents, staff, administration and community resources; plan and implement developmental classroom guidance programs; learn the special education referral processes; and are taught to recognize and discuss personal limitations in supervision. Students are expected to utilize leadership strategies in the planning and implementation of parent education programs, and advisor/advisee programs. And lastly, students become familiar with the state achievement tests and the state curriculum frameworks. One contact hour of weekly supervision with a licensed supervisor and attendance at a seminar that runs concurrent with fieldwork is required.

The fieldwork experiences in this course address all of the Massachusetts State Standards for School Guidance Counseling (except standard k).

**CSG 800  Independent Research Project in School Guidance - 3 credits**

Over a year’s time, this course provides students with an overview of approaches to research in school guidance counseling. With consistent faculty instruction, advice and review, students develop a research proposal, engage in supervised research activities, produce faculty-critiqued drafts and apply their knowledge of statistics and research design in creating a complete formal project called the Independent Research Project. This thesis document describes their inquiry, critical thinking, statistical analysis, and conclusions.

This addresses the following Massachusetts State Standard for School Guidance Counseling: k. Knowledge of statistics, research design, and research in guidance counseling.
Course Descriptions — CAGS

CCA 700  Biopsychosocial Dimensions of Aging - 3 credits
Students explore the biology, psychology and sociology of aging, with an emphasis on how these issues manifest in clinical settings. Students will explore the biology of aging, including “normal aging,” common physical changes, medical conditions, and related functional impairment. Psychosocial issues will also be addressed, including multigenerational family dynamics, aspects of adult development (e.g. generativity, successful aging), and common late-life stressors (e.g. financial strain, bereavement, housing changes). This course will also explore sociocultural trends in aging such as cohort differences between generations, multicultural concerns, ageism and discrimination. Students will also obtain an overview of public health policy, advocacy and case management, as they relate to counseling work with older adults. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 704  Psychopharmacology - 3 credits
This course will assume a significant level of proficiency in differential diagnosis as well as a basic understanding of neuroanatomy, neurophysiology and the major psycho-tropic medications. The main thrust of this course will be the development of a fuller appreciation of anti-psychotics, antidepressants, mood stabilizers and anti-anxiety agents as they relate to the client’s clinical picture. There will also be a strong consideration of side effects: e.g. tardive dyskinesia, ethical issues and current research of treatment outcome. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 705  Human Sexuality - 3 credits
Basic understanding of sexual function, sexual dysfunction and appropriate intervention methods are reviewed, and this course goes beyond that point. Students are expected to develop expertise in relevant DSM-5 categories and best practices in this very important aspect of counseling. Throughout the course students are directed to focus on relevant transference and counter-transference issues. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 708  Counseling Techniques with Multi-Problem Families in Changing Communities - 3 credits
This course takes special notice of the diversity of those seeking counseling services and emphasizes approaches which honor the socio-economic, linguistic, and cultural differences which may affect families in working with a therapist. Techniques for communicating and working with families in school and community settings are highlighted. The emphasis is on a systemic, strength-based model that the instructor and student can practice applying and further developing through classroom feedback. To this end, it is strongly recommended that students participate in practicum/internship while taking this course. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 709  Basic Counseling Skills: Rogerian - 3 credits
This course is presented as a foundation for any counseling work that the student would be involved in. Carl Rogers theory of personality with its stress of self-actualization, development of the self, phenomenological field, validation, and conditions of worth is the basis for the techniques that are taught, practiced and modeled in this course. These techniques are empathic understanding, unconditional positive regard, and consequence. These techniques are central to any effective relationship from any theoretical perspective. The student will become practiced at these and related aspects of person-centered theory. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 710  Child and Adolescent Psychological Development - 3 credits
In providing counseling services to those seeking such services – especially the child and adolescent – it is critical that the counselor have a thorough understanding of normal as well as abnormal development. This course meets that need for those developmental issues from birth through young adulthood. The student taking this course is looking at theory and the application of issues such as physical, intellectual, learning, social, moral, normal and abnormal development, plus cognitive, moral and vocational adjustment. The processes of physical and psychological development including ethnic and gender differences will be studied. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 714  Geriatric Counseling - 3 credits
There are many unique issues that arise in providing counseling services to older adults. After discussing the “paradox of aging” — that older adults generally have increased cognitive and physical problems yet also report higher well-being — this course will explore the differential prevalence and symptomology of various mental disorders in older adulthood. Students will also learn about the major types of dementia and related treatment issues (e.g. behavioral interventions, working with family caregivers). Students will be taught about evidence-based clinical interventions for older adults, such as cognitive-behavioral therapy, problem-solving therapy, and reminiscence/life review. Students will also learn about the unique professional issues that arise in providing mental health counseling to older adults in the variety of settings in which treatment often occurs (e.g. long-term care, outpatient mental health, hospitals, social service agencies, and home-based treatment.) Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.
CCA 715  Counseling Children and Adolescents in Context  
- 3 credits
The emphasis in this course is on diversity as it affects children and adolescents. Diversity is looked at along ethnic, religious, spiritual, linguistic, racial, and gender dimensions. The student learns to look at the world from the client’s perspective; both empathically and systematically. Topics include: the world of the child, exceptionality, techniques for communicating and working with families in school and community settings, play/activity techniques, group work; Also: assessment; diagnosis; gathering and communicating information; relevant state, municipal and school laws and regulations; ethics; ethnic, linguistic, racial, gender and religious diversity; interviewing; dealing with research; resources and referrals within schools and community; hazards and problems of normal development; communicating with children and adolescents of different ages. The students are expected to apply this learning to their own personal and professional spheres and share their responses to this in class for feedback. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 716  Child and Adolescent Psychopathology - 3 credits
This course assumes a basic understanding of the DSM-5 TR axes and the classification systems as they apply to children and adolescents. Learning disorders, including emotional issues affecting student achievement and their treatment are explored. This course will explore a wide range of problems across a range of developmental milestones and levels of severity. Further attention is focused on differential diagnosis, treatment planning and best practices in applied settings. Discussions focus on psychopharmacology, knowledge of medical conditions and medication related to physical disabilities and learning disorders, and prevalent treatments. This course utilizes actual sites and cases of the students to practice the usage of principles covered. Confidentiality and other relevant ethical issues are considered throughout the course. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 720  Psychopharmacology in Addictions and Mental Health Counseling - 3 credits
The use of medications in the treatment of alcohol and drug dependence and their co-occurring disorders has historically been controversial. Newer medications with less potential for addiction are increasingly being used, including agonist and antagonist drugs designed to have a direct impact on the neurochemistry of addiction. Understanding of major psychotropic medications, including antipsychotics, antidepressants, mood stabilizers and anti-anxiety medications, as well as newer medications for addictions treatment. This course will be grounded in clinical material and frequent presentation of case material. Requirements will minimally include one topical presentation. Students will be expected to have a working knowledge of addiction disorders and dual diagnosis, and will develop a proposal for advanced individualized research with their instructor. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 721  Women in the Family: a Cross-cultural Perspective  
- 3 credits
In exploring this topic, culture is looked at from a variety of perspectives. Those perspectives include gender, ethnicity, race, family norms and roles, myths about motherhood and sexuality, and the new psychologies of women. Students are expected to take an active role in illustrating these issues from their own experience as well as research and to share their reactions to applying their learning in their professional practice. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 723  Narrative and Collaborative Approaches to Therapy  
- 3 credits
Post-modern therapy is a radical shift in both the stance of the therapist and in how therapy is conducted. For example: the therapist is the participant-manager of the conversation, not the ‘expert’: language, rather than interactional pattern, is the system; meaning and understanding are achievable through continued efforts; difficulties are constructed in the language system and can be ‘dissolved’ through language; and change occurs through development of new language. In this course, students will have their assumptions challenged and play an active role in co-creating a post-modern experience of meaning-making in the classroom. Ideas will be practiced both in and out of class, so students are strongly encouraged to take this course concurrently with their internship. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 724  Post Traumatic Stress Reactions - 3 credits
This course focuses on advanced findings and current controversies in the theory, research and practice of trauma. It addresses systemic and cultural aspects of trauma in addition to diagnostic and assessment issues. This includes acute stress disorder, post traumatic stress disorder and complex PTSD, as well as dual diagnoses. Immediate and long-term effects of trauma on various populations will be explored: trauma in adults, children, and families, sexual and physical abuse survivors; victims of crimes, large scale disaster, war; workplace violence and complicated grief. Other topics include trauma resilience, natural courses of coping; transgenerational aspects of traumatization and life span perspectives on trauma.
CCA 727 Clinical Interventions for Combat Stress and Trauma - 3 credits
This course is taught in the fall only. The content and design of this course is to familiarize students with the history, diagnosis and treatment of combat stress and trauma (CST) in the lives of primarily military people, but also the effects of CST on civilian populations exposed to war operations. The course will further provide advanced information concerning the effects of CST on veterans' families. Through lecture, class discussion, directed readings and case studies, students will become acquainted with causes and effective treatments of CST. Emphasis will be placed on diagnosis, treatment, referral resources and the support systems. CAGS students will gain advanced knowledge of: 1) the prevalence and complexity of combat stress and trauma; 2) counseling and treatment methods for returning veterans and their families; and 3) referral resources for veterans. Students will demonstrate proficiency in understanding the nature and complexity of combat stress and trauma. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 728 Trauma-Specific Interventions - 3 credits
Students will gain advanced knowledge of assumptions, principles and concepts of trauma-specific treatment approaches and trauma-informed care. Students will learn the theory and practice of psychological first aid, its application in disaster mental health, crisis intervention and crisis counseling. They will become familiar with major approaches in trauma treatment: individual and group trauma counseling, cognitive behavioral, psychodynamic, and exposure therapies, psychopharmacological treatments, and newly emerging approaches. The acquired knowledge and skills can be applied in providing individual and group crisis intervention, brief trauma counseling and treatment of survivors of sexual abuse, war trauma, torture, disasters and workplace violence and other. The ethics of trauma work will be thoroughly covered.

CCA 729 Trauma Interventions in Schools - 3 credits
This course is taught in the spring only. This course explores the impact of trauma and the child/adolescent's neurobiological development, relationships, behavior, learning, and academic performance. Traumatic experiences from violence, disasters, war, physical and sexual abuse, and traumatic grief all impact a child's ability to function in school. Trauma sensitive approaches in schools will be introduced, as well as clinical interventions related to stabilization and the development of coping and social skills. School and system-wide crisis prevention, intervention and postvention planning and implementation will also be reviewed. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 730 The Practice of Mental Health Counseling - 3 credits
This course focuses on the role of mental health counselors and their professional identity. That identity is explored regarding clients, agencies, and social systems. Other issues explored include practice standards, ethical issues, career and employment options, and managed health care organizations. The students are expected to contribute to the classroom discussion by looking at their roles as consultants or supervisors and to develop a relevant personal model for assessment and intervention in one or both of these roles. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 731 The Counselor in the Forensic Environment - 3 credits
This course explores forensic settings, the counselor's roles within these settings, and appropriate counseling and systems skills. It also introduces concepts of addiction, relapse prevention, and stages of personal change, as they relate to forensic counseling. Students are introduced to the continuum of forensic settings including court clinics, juvenile detention and rehabilitation facilities, houses of correction, jails, prisons, pre-release and post-release centers. Students explore the stages of the judicial process, legal and procedural issues during incarceration, the offender's transition to release and community life, and the dynamic tension between the goals of rehabilitation and punishment. Students then survey counseling and systems skills appropriate to such settings and engage in realistic role-plays in order to develop or improve their skills. The course then surveys approaches to addiction, relapse prevention, and stages of personal change, with an overview of appropriate counseling techniques. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 732 Death and Dying - 3 credits
In this course, students will explore an overview of common end-of-life issues that arise when counseling dying clients and their family, e.g. discussion of goals of care (e.g. DNR/DNI), psychological treatments for pain, multicultural factors, familial conflict, anticipatory grief, bereavement, and death anxiety. Students will also learn about palliative care, hospice care, and the complex bioethical issues that can arise in this work. Lastly, students will explore what it means personally to work with this population, with discussion of compassion fatigue and burnout prevention. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 733 Psychological Testing - 3 credits
This course provides an overview of psychological testing including a review of projective testing and techniques for individual and group administration for understanding personality development and pathology, basic administration, scoring and diagnostic skill development. This course reviews instruments including TAT, MMPI and Rosochach as well as language and alternative non-language based intelligence tests, achievement tests including the WISC-IV, the Woodcock-Johnson III, tests of nonverbal intelligence, and other state-of-the-art diagnostic tools. Emphasis is on clinical integration of the testing materials, useful intervention strategies and recommendations for the counselor, treatment team and/or referral agent. Test reliability, validity, standard deviations, scaled scores, percentiles and interpretation of significant differences are taught.
CCA 737 Neurobiology: Basics and Beyond - 3 credits
In this three credit course, we will explore neurobiology as it relates to emotional, behavioral and cognitive development and expression. The last decade, with the benefits of technology and research, has witnessed a renewed convergence of psychiatry and neurology. Emotional factors are often expressed via neurological systems and neurological deficits often resulting in psychological symptoms. This course will identify key areas in the brain, nervous system, and the interrelationship with internal and external factors that shape who we are and what we do. Through presentations, discussion and experiential practice, students taking this course will leave with a greater understanding of the brain/body connection as it relates to stress, trauma and the myriad of neurological and emotional pathologies.

CCA 746 Marriage & Family Therapy: Basic Counseling Skills - 3 credits
This course will cover the theories behind marital and family therapy and provide a practical integration of interests and skills. The course is designed to meet the needs of both beginning and experienced therapists. Beginning students will have the opportunity to build a sound theoretical foundation for marital and family therapy while more advanced students can refine technique and explore emerging treatment approaches. Written assignments will be similarly tailored. One basic counseling skills course is required in each counseling concentration. The course stresses development of counseling skills which are essential to a particular area of training and practice. One or more active teaching methods, such as role-play, live or videotaped demonstration, or other experiential exercises form a significant part of the course experience. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 747 Vocational Analysis and Job Placement - 3 credits
The career development and work adjustment components of the course focus on such theories as Roe, Holland, Ginzberg, Super, Tiedman and Minnesota Theory of Work Adjustment. This course addresses vocational implications associated with disabilities and the use of transferable skills analysis, occupational and labor market information to guide career planning, especially for special populations. Job analysis, ergonomics, and assistive technology will also be discussed to address job accommodations in the workplace. Job placement strategies as well as employer considerations will be addressed. This course is limited to students in the Rehabilitation Counseling concentration or certificates.

CCA 748 Rehabilitation Plan Development - 3 credits
This course acquaints students with case and caseload management, delivery systems for public, private and nonprofit settings for individuals with disabilities. This course will also address laws and ethical standards that impact rehabilitation counseling and the range of community resources available to the counselor whose goal is the effective and comprehensive rehabilitation of individuals with disabilities. Topics also include educational and vocational programs for individuals with disabilities in a diverse setting.

CCA 749 Holistic Approaches to Psychotherapy - 3 credits
Through exploring a range of integrative approaches to counseling and psychotherapy this course aims to elucidate holistic assumptions behind counseling people in psychological distress.

CCA 754 Perspectives in Cross-Cultural Counseling - 3 credits
This course focuses on the role of culture in the development of psychological health and in psychopathology. Variations among diverse cultures in defining mental health and deviant behavior are discussed. Additionally, the importance of understanding the cultural context when communicating and working with families within school and community settings is emphasized, both in the prevention and resolution of psychological problems. Students become aware of their own cultural beliefs regarding mental health issues, and the impact of their perspective in working with culturally different people. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 756 Substance Abuse in the Family - 3 credits
This course looks at substance abuse counseling in the context of the family. The systems perspective tells us to assess the function of addictions, codependency, scapegoating and sobriety, and other related issues in the family. The prevention and treatment of substance abuse, and the relationship between substance use and violence, physical and sexual abuse within the context of the family is discussed. This course helps the advanced student to develop his or her own model of assessment and intervention in this area. Students are expected to apply these skills in their professional life and share with the class their reframing of past experiences from their new perspective. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 758 Religious Coping from a Sociocultural Perspective - 3 credits
This course will examine the stress experience of marginalized groups and explore the ways in which religion, spirituality and/or faith is used to help individuals cope. We will study traditional stress and coping theory, and religious coping theory to examine the applicability of these models for oppressed and marginalized populations. The course will explore the ways in which certain theories and models for mental health practice have historically pathologized the faith experience of some groups. The course will contrast this study with a look at liberation theologies for its role in helping to empower individuals and communities dealing with systemic stressors and oppression. Students will develop skill in integrating these frameworks and understandings into effective clinical practice. Diverse populations and faith traditions will be explored.

CCA 759 Vocational and Affective Counseling - 3 credits
This course acquaints students with the process, history and philosophy of rehabilitation counseling. Discussions also focus on the organizational structure of the rehabilitation system, the professional identity of the rehabilitation counselor, and legal and ethical issues in the practice of rehabilitation counseling. This course will also address career alternatives for the rehabilitation counselor.
CCA 760  Vocational Assessment and Evaluation - 3 credits
This course provides an orientation to individual appraisal, standardized testing, and test and measurement principles. It focuses on standard test areas such as achievement, aptitude, interest, personality, situational testing; behavioral observation and commercial work samples.

CCA 761  Terror, Trauma and the Sacred: Psychological and Spiritual Perspectives - 3 credits
This course will examine the ways in which spirituality and faith impact a person’s response to crisis. We will examine case examples of individuals and communities dealing with issues of grief and loss; death and dying; natural disasters; and trauma and victimization. The course will explore a wide variety of spiritual and faith-based frameworks for the perspectives they provide on suffering, hope and healing. Students will develop skills and techniques for crisis management and counseling from a faith-based perspective.

CCA 766  Cultural and Religious Issues in Counseling and Family Therapy - 3 credits
This course expects students to look at cultural and religious issues at both personal and professional levels. Students look at their transference/counter transference potential around aspects of culture, religion, spirituality, race and related topics. Further, students look at these same issues in the workplace and develop a better understanding of the institutionalization of myths related to these areas and develop personal action plans to help themselves to avoid the attendant pitfalls. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 768  Addiction Disorders - 3 credits
Designed for beginning and intermediate clinicians, this course provides a thorough foundation in substance abuse treatment. The prevention and treatment of substance abuse in people of all ages will be explored, as well as the relationship between substance use, violence, and physical and sexual abuse. Topics include: theories of etiology of addiction; pharmacology of psychoactive drugs; cultural factors that influence substance use; assessment and intervention with substance abusers and their families. Emphasis is put on diagnosis, treatment planning and referral to appropriate resources including self-help groups. Students will have the opportunity to participate in simulated interviews and experiential exercises. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 771  Professional Issues and Ethics in Counseling and Family Therapy - 3 credits
Students develop their own written manuals and action plans for responding to professional issues and ethics as counselors. The concerns addressed include: professional roles and functions, goals and objectives, ethical and legal standards, cross-cultural and cross-social class practice, professional liability, professional organizations and associations, professional history and trends, standards for supervision and independent practice, and preparation standards and credentialing. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 772  Psychopathology - 3 credits
This course assumes a basic understanding of the DSM-5 TR Axes and classification of the various disorders that encompass a wide range of problems across a spectrum of developmental milestones and levels of severity. Special attention is paid to the relationship between Axis I clinical syndromes and Axis II personality disorders and features. Further attention is focused on differential diagnosis, treatment planning and best practices in applied settings. Discussions of treatment of mental illness include psychopharmacology, prevalent psychotherapies used in individual, family, couple and group psychotherapy and current research findings related to treatment. This course utilizes actual sites and cases of the students to practice the usage of principles covered. Confidentiality and other related ethical issues are considerations throughout the course. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 773  Group Dynamics/Group Counseling and Human Systems - 3 credits
This course involves the study of the dynamics common to all small groups, through examining their structural and interactional properties and learning the bases for understanding groups as therapeutic, organizational, social, psychological, and collective phenomena. The class will be divided into two groups. All students will participate in an experiential, interactional group for one half of the term and observe another interactional group for one half of the term. Each experiential phase of a group will be followed by a didactic analysis of the process. The instructor will demonstrate various techniques as leader of all experiential sessions. Leadership styles will be examined as they influence group process. Students are required to write journal analyses of group sessions, complete assigned readings, and attend every session. (No one will be admitted to the course in the event of failure to attend the first session.) Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 774  Biological Bases of Behavior - 3 credits
This course explores neurological, biological, chemical, developmental and disease-related phenomena which influence human behavior. The course includes the interactive effects of mental illness, coping skills and physical health as well as the effects of medication and other agents on human behavior. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 775  Substance Abuse: Advanced Clinical Methods - 3 credits
This course requires students to develop a written manual of assessment and intervention theory and technique for working with substance abusers. Topics covered include working with dual diagnosis clients, adolescent substance abusers, women’s treatment issues, working with diverse client populations including HIV-positive clients,
relapse preventions, the use of strategic and paradoxical interventions, and certification of substance abuse counselors. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 776  Basic Techniques in Brief Therapy - 3 credits
This course requires students to develop their own “action manual” for brief therapy practice. It will include the theory behind this approach, criteria for when to use it, sample treatment plans, catalog of techniques for treatment and termination, and a listing of relevant ethical concerns. Course format includes lecture, discussion, demonstration, and participatory exercises. Students share their own cases for discussion and analysis. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 777  Cognitive Behavior Therapy - 3 credits
This course will review operant conditioning, classical conditioning, and social learning theory especially as they relate to the development and current practice of cognitive behavior therapy. Special attention will be paid to dialectical behavior therapy (DBT) as the most recent research-based application of behavioral treatment in combination with Eastern theories and practice. The primary focus of the course, however, will be on the actual practice in class of the most relevant behavioral techniques. Those techniques will include deep muscle relaxation, mindfulness, meditation, systematic desensitization, covert sensitization, thought stopping, covert reinforcement, behavioral rehearsal, behavioral analysis, and behavior shaping. Ethical issues will be a special consideration as we progress through these and other techniques. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 778  Assessment/Appraisal Process: Intelligence and Achievement Testing - 3 credits
This course focuses on the application and interpretation of standardized tests used in cognitive and academic assessments. Test reliability, validity, standard deviations, scaled scores, percentiles and the interpretation of significant differences are taught. In addition to the Wechsler Scales and other cognitive tests, use of alternative, non-language-based tests to assess intelligence is also discussed. Achievement testing and use of the WIAT (Wechsler Individual Achievement Test) as part of a test battery is utilized. Achievement-ability discrepancy analysis is included in the understanding of how a student qualifies for an IEP or a 504. This class also explores the MCAS (Massachusetts Comprehensive Assessment System) or other state competency tests with regard to interpretation to students, teachers and parents, and discusses factors related to school development and the state-approved curriculum frameworks. Students develop an understanding of the importance of intelligence testing in a school/clinic setting and how it fits into a complete assessment including achievement and modality testing. Students explore the use and misuse of standardized tests with minority groups, the diagnosis of learning and behavioral disorders, and how to prepare reports that are easy to understand for non-specialists, parents, members of a diagnostic team or school personnel.

The referral process as it relates to professionals in guidance/school adjustment counseling, school psychologists and licensed psychologists is a focus of discussion. This includes understanding of the diagnosis and treatment of learning and behavioral disorders, when to recommend an IEP, when a 504 is most appropriate, and when students do not qualify for services. Knowledge of IEP/Special Education time lines is conveyed. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 780  Foundations of Couples Counseling - 3 credits
This course provides experienced counselors with a format for working with couples in treatment. Students survey a variety of theoretical approaches and then focus upon one for the remainder of the class. Therapy techniques are learned such as family structure, doubling, role playing, use of homework, and paradoxical interventions. Special topics in couples work are covered such as domestic violence, divorce and substance abuse. Assessment, treatment planning, and termination are also addressed. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 781  Foundations in HIV/AIDS Education and Counseling - 3 credits
This course gives an overview of medical and psychosocial issues confronting HIV-positive clients and their significant others. It reviews the purpose and procedures of conventional interventions, alternative treatments, and social service modalities. Social, cultural and political forces that impact client acceptance, adjustment, and adaptation processes are examined. Training, supervision and respite concerns of educators and counselors are also considered. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 782  School Adjustment Counseling/School Social Work - 3 credits
Offered in Fall and Summer only. This course explores the roles and functions of school adjustment counselors with students identified as having emotional, behavioral, and social problems. This course operates on the assumption that such students are best served using personal, systems, family and group counseling approaches, with strong emphasis on identifying, assessing and utilizing community and family resources. Techniques for working with families, school and community personnel are emphasized. Clinical school counseling and systems issues are explored as well as consultation; harm prevention and reduction; and the evaluation and utilization of community resources. Assessments such as genograms, biopsychosocial assessments, functional behavior assessments and behavior intervention plans will be taught, as well as treatment planning and goal writing. Understanding of the diagnosis and treatment of learning, emotional and behavioral disorders, when to recommend an IEP, when a 504 is most appropriate, and when students do not qualify for services, is emphasized. Knowledge of IEP/special education time lines is conveyed. The referral process for students and their families to obtain services and supports in the community is a focus of discussion, as well as advocating and facilitating relationships.
CCA 783  Career Counseling - 3 credits
This course is intended to help the experienced professional to understand the theory behind career counseling by looking at how they arrived at this point in their own development. It will also focus on when to refer someone to career counseling, what to expect, and what can be learned from interest inventories. This course stresses a practical approach to career development. Students should have access to the book What Color is Your Parachute? or How to Create a Picture of Your Ideal Job or Next Career. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 785  Human Psychological Development - 3 credits
While the practicing clinician, educator, or related human services professional is facing the daunting task of working with the process of human development gone awry, not all aspects of the physical, emotional, cognitive, moral, and vocational aspects present are problematic. This issue can be further complicated by ethnic, gender, and other cultural differences. This course seeks to explicate the issues of "normal" versus "abnormal" development and, in fact, will also focus on the adaptive aspect of these supposedly abnormal responses to very stressful and often traumatic life situations. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 786  East and West: Self, Suffering and Healing - 3 credits
This course considers theories of mind and behavior in Eastern philosophy and Western psychology. The aim of the course is to elucidate different perspectives on the nature of self and human suffering, and to understand suggested pathways to the alleviation of suffering. We will examine Western theories ranging from psychoanalysis to transpersonal psychology, as well as Eastern traditions ranging from Taoism and to what extent Eastern ways of understanding human experience complement Western theories—or are their differences difficult to reconcile?

CCA 791  Ethics & Professional Issues for School Counselors / Mental Health Practitioners - 3 credits
This course explores several models of school counseling and mental health counseling and the relationship to relevant ethics, federal, state, municipal, state laws, and standards and regulations. The course emphasizes daily best practices and strategies for dealing with ethical and legal dilemmas. Guidance, clinical school counseling and systems models are examined along with consultation, harm prevention and reduction, and the evaluation and utilization of community resources. Focal areas include professional roles and functions, ethical standards including accountability, responsibility, client/student welfare, emotional health, laws and regulations, institutional policies, cross cultural, cross social class practices and their impact on mental health and school counseling. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 792  Counseling in the Schools - 3 credits
A major part of this course will focus on how to consult with teachers, parents, and administrators in a variety of school settings. There will also be a focus on how to liaison with important individuals from the non-school community. Students will also develop a thorough understanding of the role of school counselor and the functions of counseling in the school system. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 796  Personality and Counseling Theory - 3 credits
This course focuses on students having a thorough understanding of psychoanalytical, behavioral, and personality-centered approaches to personality theory. Theories of normal, abnormal and emotional development are explored in relationship with personality theory. Various theories are placed in relationship to these anchor points. Students practice applying these to cases in classes and then write a paper focusing on a particular individual. There is also strong emphasis on understanding the importance of personality theory in both differential diagnosis and in developing best practices. These three approaches are then looked at as they relate to recent advances in neurobiological research. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 797  Family Assessment from a Multicultural Perspective - 3 credits
This course will address methods of family assessment in relation to a range of ethnic groups. We will study cultural attitudes regarding problems and seeking help. We will look at the advantages and disadvantages of each method of assessment from the perspectives of different ethnic groups. Students will practice the skills of bridging cultural differences. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 801  Foundations of Social Science Research - 3 credits
This course covers the basic concepts and methodology of qualitative and quantitative research in the social sciences, with particular emphasis on program evaluation, needs assessment and the efficacy of intervention. Students learn the rationale for program evaluation and commonly used research designs. In addition, the ethics of social intervention research are discussed. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 805  CAGS Mental Health Practicum - 3 credits
The Commonwealth of Massachusetts specifies that this practicum be supervised by an “approved supervisor” as defined in 262 CMR 2.00 in order for students to meet requirements for licensure. Enrollment limited to 10. This course is intended for CAGS students who
have not completed a practicum in their master's degree program of study. Students become familiar with the principles of therapeutic relationships and basic counseling skills and behaviors. They will develop techniques for working with individuals, groups and families as well as using supervision. They will complete case presentations, process notes and formulate treatment plans. Students take an active part in the didactic and demonstration parts of the class. The course will stress philosophy, principles and the practice of mental health counseling. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 806 Fundamentals of Pastoral Counseling - 3 credits
This introductory course will provide an integrative study of psychological, spiritual, and faith-based frameworks. The course will explore the role of spirituality in clinical practice, and train students on how to effectively integrate a client’s spirituality into various phases of counseling, including clinical assessments and intervention. We will study several theories and models for spiritually-informed psychotherapy from diverse perspectives. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 808 Medical and Psychological Aspects of Disabilities - 3 credits
The course offers students with little or no exposure to advanced medical sciences the opportunity to examine the physiological and anatomical basis for many chronic diseases and medical conditions they will encounter in a rehabilitation counseling setting. Students examine the etiology, progress, and potential resolution of a wide range of disorders, as well as the potential social implications consequent on these disabilities.

CCA 820 Counseling Internship Seminar - 3 credits
Students’ current practice is in mental health counseling. Field experience is supervised on-site by a supervisor who meets the relevant Board of Registration requirements. Students complete at least 13.5 hours of supervised practice each week and at least 189 hours each term. At least 80 of these hours must be providing direct, face-to-face services on-site. A total of 700 hours, including 280 hours of direct service are required for licensure. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 821 Advanced Internship Seminar - 3 credits
Students’ current practice is in mental health counseling. Field experience is supervised on-site by a supervisor who meets the relevant Board of Registration requirements. Students complete at least 13.5 hours of supervised practice each week and at least 189 hours each term. At least 80 of these hours must be providing direct, face-to-face services on-site. A total of 700 hours, including 280 hours of direct service, are required for licensure. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 823 Counseling Internship Seminar III - 3 credits
This is a third term of Advanced Internship available to students in the CAGS program, needing to complete the hours required for licensure or for students seeking to gain additional licensure hours that may be required for other states. Field experience is supervised on-site by a supervisor who meets the relevant Board of Registration requirements. Students complete at least 13.5 hours of supervised practice each week and at least 189 hours each term. At least 80 of these hours must be providing direct, face-to-face services on-site. A total of 700 hours, including 280 hours of direct service are required for licensure in Massachusetts, divided into 100 hours of practicum experience and 600 hours of internship experience. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 825 Counseling Leadership Seminar
This class focuses on developing advanced counseling skills and culminates in completing a thorough literature review and presentation on an area of clinical interest. Students develop advanced knowledge in a chosen topic and strong research skills as a scholar-practitioner. Students will also give case presentations about their counseling work and learn advanced case conceptualization, diagnosis, treatment planning, and counseling technique.

CCA 830 Advanced Counseling Practice
This class prepares students for leadership roles within their organizations/institutions, discusses launching a private practice, as well as opportunities for leadership in the counseling field. Students will learn skills in supervision/consultation, advocacy, community and systems levels interventions, administrative and program development skills. Students will also develop project management and business planning skills.

CCA 831 The Cognitive Therapies - 3 credits
Therapeutic applications of the cognitive theorists will be explored. Among the theorists are Insoo Kim Berg (brief solution focused therapy), Aaron Beck (cognitive therapy), Richard Glasser (choice therapy), Albert Ellis (rational-emotive behavioral therapy), Arnold Lazarus (multi-modal therapy) and select others. Using didactic, video and experiential exercises, the course will address mental health issues in children and adolescents, addiction and substance abuse, bereavement, and family structure. This course includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.

CCA 832 Life of the Family in Context - 3 credits
This course examines the evolution of the family in the context of the social environment in which it exists. Traditional family values and structures are examined as well as more modern and nontraditional situations that may include: the divorced family, the gay/lesbian family, families of war, immigrant families, religious families, foster/alternative family environments, families of abuse, grandparent/grandchild families, culturally blended families, addicted families, and families experiencing mental illness. An exploration of personal and professional experiences and the lenses through which we view families as well as challenges to traditional family concepts will be considered. Includes the fundamental occupational tasks of assessment, case presentation, case collaboration, team membership and client interaction.
1000 Massachusetts Avenue
The main campus consists of two buildings located in the heart of Cambridge. The central administration building at 1000 Massachusetts Avenue is the location of the School of Undergraduate Studies, School of Psychology & Counseling, the Executive Administrative Offices, Admissions, Enrollment Services, Registrar, Financial Aid, Bursar, Admissions Records Office and Student Services.

School of Education
and School of Management
Located at 17 O’Brien Highway, across from the Museum of Science parking garage.

School of Undergraduate Studies
and School of Psychology & Counseling
Located at 1000 Massachusetts Avenue, between Harvard Square and Central Square, in the central administration building.

Location and Facilities
Located in the historic urban setting of Cambridge, accessible by subway and close to many city resources, each school houses the academic offices of its deans, program chairs and faculty. Each building contains technologically equipped classrooms, study environments, and computer labs. Additionally, there are lounges and vending machines for student convenience, but no cafeterias. There are good public eating places nearby. Our students are typically commuters, not in need of housing except when enrolled in our summer residential programs (Summer Institutes).

Library Services
www.cambridgecollege.edu/resources/library-services

The Cambridge College Online Library provides an extensive collection, reference librarian support, and instruction and resources for doing research in all programs. Registered students log in to the MyCC portal and click on the Library tab. For recommended academic and other research libraries in the Cambridge area open for public use, click Traditional Libraries on the Cambridge College Online Library home page.

Academic Support and Learning Assessment
Cambridge College offers assessment and tutoring opportunities to assist students to achieve their academic goals. Assessment activities are available primarily to undergraduate students. All students can readily find information about assessment and course advising or make appointments with writing and math tutors through the Office of Student Affairs.

Computer Labs and IT Support
The College supports wireless technology throughout the three buildings of the Cambridge main campus. The Information Technology Department maintains staff and computer labs at all buildings (with extended operating hours) and help desk support through phone and e-mail contact.

Disability Support
The College provides disability support and education accommodations for students through the Office of Student Affairs. The facilities are handicapped-accessible and meet the requirements of the Americans with Disabilities Act.
Directions and Parking
For directions and more about parking, see cambridge.cambridgecollege.edu/contact-us/ma/driving-directions.

Student Parking in 1000 Mass Ave Garage — Parking is available after 5:30 pm for students while attending evening classes at 1000 Massachusetts Avenue, Cambridge. Space is limited. More information and application form available at www.cambridgecollege.edu/business-operations/parking-and-transportation

Emergency/Weather Closing
Closings or delays for Cambridge are posted on:
- RAVE text message notifications.
- The MyCC web portal homepage under ANNOUNCEMENTS.
- Your Cambridge College email.
- Social media: check our Facebook and Twitter pages.
- TV channels 4, 5, 7, 25, 56
If you do not have internet access, please call the school at 1.800.877.4723. The answering service is notified of any campus closings or delays.

Regional centers have procedures specific to their locations. Contact the center for details.
Cambridge College maintains regional locations in Massachusetts and across the United States offering undergraduate, graduate and postgraduate degrees and certificate programs.

- Cambridge College Lawrence — Lawrence, MA
- Cambridge College Springfield — Springfield, MA
- Cambridge College Puerto Rico — San Juan, PR
- Cambridge College Southern California — Rancho Cucamonga, CA

Cambridge College is accredited by the New England Association of Schools and Colleges, Inc. (NEASC) through its Commission on Institutions of Higher Education. Additionally, Cambridge College has sought and received state approval to operate in the states in which the regional locations are located.

All College programs are evaluated for consistency and quality control throughout the main campus and regional locations by the Office of Academic Affairs and Deans of the Schools. Educator licensure degree programs are approved by the Department of Elementary and Secondary Education, Malden, Massachusetts.

Oversight and Communications

The Provost/Vice President of Academic Affairs Office maintains oversight of the Cambridge College regional locations (sites). Regional site directors represent the College policies and procedures to students and local agencies and act as the local authority in the chain of communications. Administrative, academic and operations offices at the main campus engage with the regional Cambridge College offices for purposes of strategic planning, information sharing, and problem solving. Directors conference weekly and are part of the monthly Senate, Dean’s Council and Management Council meetings at the main campus. Regional site directors and faculty are the first choices when students have information needs or concerns. The main campus offices collaborate with the regional offices in supporting the needs of our students throughout the nation.
Cambridge College is recognized in Lawrence as a member and supporter of the community, serving to secure the economic prosperity of tomorrow’s workforce by expanding access to quality, flexible and affordable higher education to the Lawrence community. The College equips students with the tools and resources that are critical to their success inside and outside of the classroom.

The College has been a local leader in adult education and symbol of access to quality education for over 13 years, serving Lawrence and communities throughout the Merrimack Valley. With academic programs chosen to enhance the career advancement of community members, the College is a model for higher education services supporting diverse student needs.

**Location and Facilities**
In September 2016 the Lawrence location moved to a larger space at 280 Merrimack Street, on the fifth floor of this newly renovated building. Located in the heart of the Riverwalk, the new campus offers students large modern classrooms, improved technology, student-focused amenities such as a spacious computer lab and a One Stop Resource center, ample complimentary parking, and easy access from major highways.

**Articulation Agreements**
Articulation agreements are partnerships between Cambridge College and community colleges that facilitate the easy transfer of credits from other institutions to Cambridge College. When students complete an associate’s degree at an articulated college, they can transfer in all eligible credits earned when they enroll in a related degree program at Cambridge College.

**Library Services**
www.cambridgecollege.edu/resources/library-services

The Cambridge College Online Library provides an extensive collection, reference librarian support, and instruction and resources for doing research in all programs. Registered students log in to the MyCC portal and click on the Library tab. For recommended academic and other research libraries in the Lawrence area open for public use, click Traditional Libraries on the Cambridge College Online Library home page.

**Academic Support**
Academic support is available by appointment and strongly encouraged. Specialists can assist with the reading and understanding of texts and assignments. They can also help with planning, organizing, with study skills and with writing. Seeking out support earlier rather than later helps ensure academic success.

**Computer Lab and IT Support**
The College supports wireless technology, with a computer lab is available during the day and classroom hours with a computer technician to assist students. The College also makes available to all enrolled students an online IT Help Desk which supports students through e-mail and phone contact.

**Disability Support**
Disability support and education accommodations are provided for students through the Office of Student Affairs. The local facilities are handicapped-accessible and meet the requirements of the Americans with Disabilities Act.

**Directions and Parking**
**From the South:** 495 North toward Lawrence. Take exit 44-45 for Merrimack Street. Turn right at Merrimack Street. The Riverwalk will be about 0.2 miles on the right.

**From the North:** 495 South toward Lawrence/North Andover. Take exit 44-43 toward Merrimack Street/Mass Ave. Take exit 44 for Merrimack Street toward Sutton Street. Turn right at Merrimack Street. The Riverwalk will be about 0.2 miles on the right.

Parking is available on-site.

**Emergency Contact**
617.873.0484.

**Emergency/Weather Closing**
Closings or delays are posted on:
- The MyCC web portal homepage under ANNOUNCEMENTS.
- Your Cambridge College email.
- Social media: check our Facebook and Twitter pages.
- Local media outlets.

If you do not have internet access, please call the school at 1.800.877.4723. The answering service is notified of any campus closings or delays.
Cambridge College Springfield moved in January 2013 to the heart of downtown Springfield, convenient for students in western Massachusetts and Connecticut. Cambridge College Springfield has a long history of supplying higher education degree and certificate programs to meet the needs of Connecticut students. Known for our diverse education environment, experienced faculty, affordable programs and flexible scheduling, Cambridge College Springfield focuses on adult learners, and helps them to advance in a changing world.

Location and Facilities
The classrooms and offices have state-of-the-art technology. There are study areas, a student lounge and vending machines for student convenience. Restaurants, public transportation and parking are available nearby.

Articulation Agreements and Partnerships
Articulation agreements and partnerships facilitate the easy transfer of credits from other institutions to Cambridge College. When students complete an associate's degree at an articulated college, they can transfer all eligible credits earned when they enroll in a related degree program at Cambridge College.

Connecticut
- Asnuntuck Community College
- Capital Community College

Massachusetts

Library Services
www.cambridgecollege.edu/resources/library-services

The Cambridge College Online Library provides an extensive collection, reference librarian support, and instruction and resources for doing research in all programs. Registered students log in to the MyCC portal and click on the Library tab. For recommended academic and other research libraries in western Massachusetts and adjacent Connecticut open for public use, click Traditional Libraries on the Cambridge College Online Library home page.

Academic Support
Writing Center — Tutorial services are offered on Tuesdays, Thursdays and Saturdays. Our writing tutor provides assistance to undergraduate and graduate students, with all aspects of the writing and research process. Students can get help with everything from starting a paper, to library research using the Cambridge College Online Library, to the final editing. Call x6610 for an appointment.

Computer Lab and IT Support
The College supports wireless technology within the facility. A computer lab is available during the day and classroom hours with a computer technician to assist students. The College also makes available to all enrolled students an online IT Help Desk which supports students through e-mail and phone contact.

Disability Support
Disability support and education accommodations are provided for students through the Office of Student Affairs. The local facilities are handicapped-accessible and meet the requirements of the Americans with Disabilities Act.

Directions and Parking
From Mass Pike I-90 (East or West): Take Mass Pike to Exit 4 (South Springfield/Hartford) onto Rte. 91 South and follow directions below.

From the North: Take Rte. 91 South to Exit 7 (Columbus Ave Downtown Springfield.) Take first left onto Boland Way. Continue under 91, turn onto East Columbus Avenue, and immediately bear to the right up ramp into Tower Square parking garage.

From the South: Take Rte. 91 North to Exit 6 (Springfield Center) to East Columbus Avenue and continue into center lane. At the intersection of East Columbus and Boland Way stay in middle lane, then immediately after crossing intersection bear to the right up ramp into Tower Square parking garage.

From Interstate 291: Take Exit 2-B (Dwight Street), take a left onto Dwight Street, drive 0.4 miles then turn right on Bridge Street. After crossing Main Street, turn left into Tower Square parking garage.
Tower Square Parking Garage: Take ticket and go up to level C. Park near north elevators “To the Shops”. Take ticket with you for validation (visitors) and take elevator to street level. Cambridge College will be on your left.

For assistance please call Cambridge College at 413.747.0204 x6610.

Public Transportation: Cambridge College Springfield, now located downtown at Tower Square, is conveniently on many city bus routes. Also, the Peter Pan Bus terminal and Amtrak station are just a few short blocks from Tower Square. Route information and assistance:
- Pioneer Valley Transportation Authority — www.pvta.com • 413.781.7882.
- Peter Pan Bus Lines — www.peterpanbus.com • 800.434.9999
- Amtrak — www.amtrak.com

Cambridge College Puerto Rico
The Hato Rey Center Bldg., Suite 1400, 268 Ponce de León Avenue, San Juan PR 00918
787.296.1101 • puertorico.cambridgecollege.edu

Cambridge College Puerto Rico serves professional adults who come from every corner of the island seeking the flexibility and instructional quality that our master’s programs have to offer. Located at the heart of educational and business activity in the metro area of San Juan, Cambridge College provides the best opportunities for contextual and practical learning, in a motivating and inclusive environment.

Location and Facilities
Cambridge College Puerto Rico is centrally located in the Hato Rey area of San Juan, known as the Golden Mile for its banking, education, and business activity.

Accreditation and Authorization
Cambridge College is accredited by the New England Association of Schools and Colleges, Inc. through its Commission on Institutions of Higher Education.

The Puerto Rico Council of Education (www.ce.pr.gov) has authorized Cambridge College to offer selected programs.

Library Services
www.cambridgecollege.edu/resources/library-services

The Cambridge College Online Library provides an extensive collection, reference librarian support, and instruction and resources for doing research in all programs. Registered students log in to the MyCC portal and click on the Library tab. For recommended academic and other research libraries available to Puerto Rico residents open for public use, click Traditional Libraries on the Cambridge College Online Library home page.

Academic Support
Spanish writing skills of all new students are supported each semester by workshops conducted to improve organization, grammar, critical thinking and APA style skills.

Computer Lab and IT Support
The College supports wireless technology within the facility. The College IT Help Desk supports students through e-mail and phone contact.

Disability Support
Disability support and education accommodations are provided for students through the Office of Student Affairs.

Directions and Parking
We are located across from Plaza 273 on Ponce de León Avenue, two blocks from the Roosevelt Avenue train station.

Parking — Parking is available to students at a special rate. Park at Banco Popular on Saturday-Sunday 7:00 a.m. to 5:00 p.m. Plaza 273 parking is available on Saturdays only, 8:00 a.m. to 5:00 p.m. Limited street parking in front of the building.

Emergency Contact

Cambridge College Southern California in Rancho Cucamonga has been serving the diverse population of professional working adults in Southern California since 2005. The College collaborates and partners with local community colleges, organizations and agencies to offer academic programs that meet the educational and professional growth needs of students and employees. Students have chosen to come to Cambridge College from as far away as Northern California and Nevada for its flexible schedule, affordable tuition and its exceptional learning experience.

Location and Facilities
The Cambridge College location is in Ontario Airport Hotel & Conference Center, which provides technology-supported classrooms and learning environments, study areas, student lounge and vending machines for student convenience, although no cafeteria. Public eating places, bookstores and parking are available nearby.

Housing — Cambridge College is a commuter college and therefore does not offer student housing. There are apartment complexes within a few miles of the campus. As of September 1, 2017, one-bedroom apartments in the area serviced by Cambridge College rent for an average of $1568/month.

Accreditation and Authorization
Regional Accreditation — Cambridge College is accredited by the New England Association of Schools and Colleges, Inc. through its Commission on Institutions of Higher Education.

California — Cambridge College is a private institution, approved to operate by the California Bureau for Private Post-Secondary Education P.O. Box 980818, West Sacramento, CA 95798-0818 wwwbpppe.ca.gov 916-431-6959 1-888-370-7589 fax 916-263-1897.

Emergency/Weather Closing

Student Tuition Recovery Fund
The Student Tuition Recovery Fund (STRF) was established by the legislature to protect any California resident who attends a private postsecondary institution from losing money, from having prepaid tuition and suffered a financial loss as a result of the school closing, failing to live up to its enrollment agreement, or refusing to pay a court judgement. See Tuition & Payment.
Compliance and Community Policies

General Policy and Compliance
College policies are located on the College website at www.cambridgecollege.edu/college-policies. Additional policy statements and compliance related matters may be located throughout this catalog under section headings that are more specific to the policy statement or compliance related matter. This section broadly captures a wide variety of policy statements and compliance related issues that do not explicitly belong in other sections of this catalog. For general policy or compliance related inquiries, please contact the Office of the General Counsel.

Children at the College
In order to protect the safety and security of your children, as well as the educational environment, children under the age of 18 are not allowed to accompany parents or guardians to class. Children may accompany their parents or guardians when visiting the College for non-academic reasons, for example: registering for classes, paying bills, etc. Children must never be left unattended by the parent or guardian on the College’s property.

Please arrange childcare off-site during class time, tutoring, etc. Parents/guardians are responsible for childcare and supervision at all times. Cambridge College is not responsible for children unattended by the parent or guardian.

College Name
Cambridge College’s name and marks are copyrighted. Any use of the name or marks without the College’s written consent is prohibited. All external marketing materials must have the name and marks attached unless otherwise noted.

Drug and Alcohol Policy
In accordance with the Drug Free Schools and Communities Act Amendments of 1989, Cambridge College prohibits the unlawful use, manufacture, distribution, dispensation, sale and possession of drugs and alcohol by students, administrators, faculty, staff and all others on its property or in any of its activities.

The College will take disciplinary action against violators, consistent with federal, state, and local laws. Such action may include requiring satisfactory participation in a substance abuse treatment, counseling or education program as a condition of reinstatement. Students may face expulsion, disenrollment, or probation with contingencies for reinstatement. Students may also face criminal prosecution.

Effective July 1, 2000, the 1998 Amendments to the Higher Education Act mandate the suspension of eligibility for financial aid for students convicted of drug related offenses.

As a member of the Cambridge College community, it is your responsibility to know and abide by all campus rules and regulations, to understand the risks associated with the use and abuse of alcohol and illegal drugs, and to assist in creating an environment that promotes health-enhancing attitudes and activities.

At the main campus, a list of counseling resources is available from the dean of student affairs:
- Drug and alcohol counseling rehabilitation programs.
- Local agencies and/or private practitioners who provide assistance in the areas of alcohol and substance abuse.

At regional locations, this information is available from the director. See policy at www.cambridgecollege.edu/college-policies.
**Firearms and Weapons**
All firearms, knives, and other weapons are forbidden at all Cambridge College locations at all times. Discovery of any such item in any person’s possession is grounds for immediate disciplinary suspension and potential expulsion or termination.

**Non-Discrimination and Harassment**
Cambridge College is committed to an educational and work environment in which all individuals are treated with respect and dignity. Each individual has the right to study and work in a professional atmosphere that promotes equal opportunities and prohibits unlawful discriminatory practices, including harassment. Therefore, the College expects that all relationships among persons in the educational setting and the workplace will be business-like and free of bias, prejudice and harassment.

**Equal opportunity** — It is the policy of Cambridge College to ensure equal opportunity without discrimination or harassment on the basis of race, color, religion, sex, sexual orientation, gender identity, age, disability, marital status, citizenship, national origin, genetics, or any other characteristic protected by law. The College prohibits any such discrimination or harassment.

**Retaliation is also prohibited** — Cambridge College encourages reporting of all perceived incidents of discrimination or harassment. It is the policy of the College to promptly and thoroughly investigate such reports. The College prohibits retaliation against any individual who reports discrimination or harassment or participates in an investigation of such reports.

For more complete information, see Non-Discrimination and Harassment policy at www.cambridgecollege.edu/college-policies.

**Hazing Policy**
Hazing is prohibited at Cambridge College. Any conduct by a Cambridge College student, including hazing activities, which is likely to cause serious bodily or mental injury to another is prohibited. In accordance with Massachusetts General Laws, Chapter 269, Sections 17, 18, 19, any form of hazing is considered to be a criminal offense punishable by a fine and/or imprisonment.

College disciplinary action will be addressed pursuant to the Student Code of Conduct.

See policy at www.cambridgecollege.edu/college-policies.

**Health Policies and Insurance**
See Student Affairs.

**Liability**
Cambridge College cannot be responsible for personal property in its buildings and rented facilities. Participants in Cambridge College programs, courses and activities do so at their own risk, and agree to waive and release any and all claims of personal injury or property damage against Cambridge College, its agents, faculty, or employees, that may arise from their participation in the College.

**Office Equipment**
Office equipment such as copying machines and fax machines, computers, and telephones are not accessible to students.

**Personal Services**
Cambridge College students are not permitted to offer personal services at any Cambridge College location at any time. (Services such as manicures, pedicures, massage and haircuts require a state license for public health reasons).

**Photos**
Occasionally, photos and videos are taken at College classes and events for public relations, marketing, and other purposes. Students who do not want their images taken or used in College publications are provided with the opportunity to opt out.

**Service Animals and Pets**
No pets of any kind are allowed on Cambridge College property. Service animals that provide assistance to individuals with disabilities are permitted.

**Smoking Policy**
**Massachusetts locations** — In compliance with Massachusetts and city ordinances, Cambridge College is a smoke-free institution. All indoor smoking on campus and at all other classroom locations is prohibited, including in bathrooms and stairwells. Outdoor smoking is not permitted on College property. Smokers should move to public sidewalks.

**Locations in other states** — Smoking is permitted only as allowed by the state and local laws governing smoking in public places and on College campuses, and, for the summer institutes, by the policies of our host site.

**Student Housing**
Cambridge College is a commuter college; it has no dormitory facilities under its control. The College does not provide information about the availability or cost of housing near its campuses, and Cambridge College takes no responsibility to find or assist a student in finding housing.

**Summer Institutes (Cambridge location only)** — To assist students in attending the brief on-site residency, Cambridge College may make arrangements with a nearby college to provide housing that may be billed to a student’s account. Charges for housing (and meals if offered/selected) must be paid prior to the start of the term or arrangements made for financial aid with the charges being paid prior to the distribution of student refunds. Students must make their own assessment of whether the accommodations meet their personal standards for quality, access and safety.

Only currently enrolled students taking classes are eligible to request and obtain housing when offered.

Specific procedures and housing request forms are distributed before the start of each term for locations/programs where housing is offered. See full policy at www.cambridgecollege.edu/college-policies.
Security

Annual Campus Safety & Security Report (Clery)
The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act was signed into law in November 1990. At the time it was known as the “Student Right to Know and Campus Security Act.” It requires institutions participating in student financial aid programs under Title IV of the Higher Education Act of 1965 to disclose information about campus safety policies and procedures and to provide statistics concerning certain crimes that occurred on or near campus. In compliance with the Act, Cambridge College publishes and distributes this information in October of each year in an Annual Security Report and Crime Statistics Brochure. It is made available to current students and prospective students and employees, electronically and in print, and to College employees through the Office of Human Resources.

Security Statement
Cambridge College strives to protect the rights, safety, health and welfare of everyone in the Cambridge College community. Compliance with all state, city, and federal laws is expected of all members of this learning community. Anyone who is victimized by, observes, or has knowledge of a criminal action should report it immediately: the College will investigate and take prompt, appropriate action. If the complaint is of a criminal nature, the local police department will be notified right away. In a medical emergency, the College will call an ambulance to take the person(s) concerned to the nearest emergency room (at his/her own expense if not covered by health insurance).

Any act or threat of violence, indecent assault, or conduct that may endanger any person on College property is prohibited. Where there is reasonable cause to believe that a member of the College community has violated College regulations, the College will review the incident and take appropriate actions as necessary.

Crime Prevention
Cambridge College is concerned about the welfare, security and safety of every individual at the College. However, maintaining a secure and safe campus environment can only be achieved through a cooperative effort of the entire College community. Community members are encouraged to use caution on our urban campuses. It is rare that criminal activity occurs on College property, nevertheless, safety measures are essential in any urban setting. Keep your personal property safe. Lock your car. Do not leave your purse, keys, laptop, or other valuables unattended.

Please see also related safety and security policies in this catalog and on the Cambridge College website:

- Drugs & Alcohol
- Firearms/Weapons
- Hazing
- Sexual Harassment
- Domestic Violence
- Sexual Assault
- Non-Discrimination & Harassment

Cambridge College students are adult learners. The College serves the commuting students and does not maintain campus residence halls. The College takes the necessary steps to ensure the safety of our community through our published policies, reporting activities, relationships with local police, publications, and timely communications.

Threat Assessment & Prevention
Cambridge College is dedicated to providing a safe environment for work and study. The Threat Assessment and Prevention initiative is committed to improving community safety through a proactive, collaborative, coordinated, objective and thoughtful approach to prevention, identification, assessment, intervention, and management of situations that pose, or may reasonably pose, a threat to the safety and well-being of the campus community.

Timeliness in reporting potential threats is of utmost importance. DIAL 911 if there is an emergency. If a threat is observed or suspected, please contact the following parties IMMEDIATELY so that appropriate action may be taken:

1. Regina Robinson, Dean of Student Affairs, regina.robinson@cambridgecollege.edu, 617.873.0470
2. Security in your Cambridge College building (see list below).

Questions about threat assessment and prevention? Contact:
Regina Robinson, Dean of Student Affairs, regina.robinson@cambridgecollege.edu, 617.873.0470

How to Report a Crime
The College strongly urges every member of the community—faculty, staff, and students—to report any crime promptly to the College security authorities and/or your local police department (911). Criminal actions may also be reported to any professional staff member who will then contact appropriate campus officers or local authorities. Victims of crimes are encouraged to report these matters to local police; Cambridge College may assist any student in reporting crimes, if desired.

Campus Sex Crimes Prevention
The federal Campus Sex Crimes Prevention Act requires colleges and universities to issue a statement advising the campus community where state law enforcement agency information concerning registered sex offenders may be obtained. The Act also mandates that sex offenders who are already required to register in a state to provide notice of each institution of higher education in that state at which the offender is employed or is a student. To learn the identity of registered sex offenders on or near a Cambridge College location, or anywhere in the United States, visit the Sex Offender databases at www.sexoffender.com and http://nsopr.gov. You can search by city, county, or zip code. This information is collected by other agencies and Cambridge College cannot guarantee this information is correct or complete. The information provided here is intended to be in compliance with the Campus Security Act and for campus safety purposes only. It should not be used to intimidate, threaten or harass. Misuse of this information may result in prosecution.
Title IX Sexual Misconduct Policy
See Student Affairs.

Violence Against Women Act
See Student Affairs.

Department Personnel & Relationship with Local Authorities
The Cambridge College main campus has security staff at each of the two buildings in the City of Cambridge. Building security maintains security staff at Cambridge College Lawrence and Springfield. Other regional locations may have building-provided security and members of the college community should check with onsite College administration. Security staff do not carry firearms nor do they have police powers of arrest. However, the security companies and staff have effective working relationships with local police agencies who can provide these services to the campus in timely fashion, as needed.

Timely Warning
In the event that a situation arises, either on or off campus that, in the judgment of the Vice President for Finance and Administration, constitutes an ongoing or continuing threat, a campus-wide “timely warning” will be issued. The warning will be issued through the College e-mail systems to students, faculty, and staff. Additionally, notifications will be posted on the MyCC homepage (no log-in required) and at other strategic public locations within each of the appropriate buildings, as well as to media outlets if appropriate. See full policy at www.cambridgecollege.edu/college-policies.

Emergency Response, Evacuation & Egress
The College has developed procedures for response and notification in the event of an ongoing or continuing threat to the college community that may or may not include evacuation or closing a facility. Egress information is posted in all classrooms and office suites with general emergency procedures to follow. For more information consult with campus security authorities listed below.
